From the Toledo Blade.

The Indignation at the Corners.

CONFEDRIT X ROADS,
Wich iz in the State uv Kentucky,
March 24, 1885.

It wuz egg-spectid that the Corners wud be awl tore up by the unaccountable perversenis uv the President in not immejitly removin the nigger Lubbock from the Postoffis, Pollock and Bigler from the two Collectorships, and appintin me, Issaker Gavitt and Deekin Pogram in ther places. The good Deekin, Issaker, Bascom and myself hed got ourselves worked up into sich a fury over the slownis uv the President in doin this act uv justis to a long sufferin quartet thet we hed got it worked into our systems thet the entire Corners wuz ez indignant ez we wuz. Bascom wud look at the chalk marks at the back uv hiz door, wich iz hiz day book, and then open hiz ledger, to wich he posts the door, and dror a sigh that wuz hart-renden. Under the supposishen that the feelin in consequence uv this onaccountable delay wuz somethin intense in the Corners, we called a meetin uv the Dimocrisy to consider the situashen, and we antissapated a demonstrashen wich wud make hiz Axidency quake in the White House.

Ther wuz a good many present, for the Corners, hevin nothin pertik'ler to do, iz alluz reddy to meet and consider things, ther care for things uv Nashnel importens, taking in evrything from the best settlin uv the Nashnel debt.

But it wuz a disgustin meetin after all, and did not pan out ez well ez I hoped and expectid.

I hed a series uv resolutions prepared, wich I offered, recitin that the Dimocrisy uv the Corners hed been groanin under the inflickshen uv federal offis holders for 24 long and dreery years, and that now that the Dimocrisy had finally triumfed, the people they demandid with one voice and likewise in thunder tones that the Radikel offishels be turned out and the patronage uv the Government be given to them wich wud uphold the banner of Dimocrisy, and so on.

"Now, my friends," sed I, "we want these resolushens to go thru with a whoop that will be heerd at Washinton, and show the Mugwumps that the Corners iz in earnest. Vote 'aye,' and vote with a will."

To my astonishment, the only voices heerd wuz Deekin Pogram, Issaker Gayitt, Bascom and my own.

"Wat duz this meen?" I exclaimed in a white heat. "Iz the Corners ded? Do yoo know that the nigger Lubbock iz still in the postoffis, and that arch feend, Joe Bigler, is collector uv customs, and Pollock uv revenoo?"

Then ariz Samyooel Smiley, a old Dimecrat, wich iz testified by hiz hevin served in the Confedrasy four yeers.

"I hev a remark to make," sed he. "I did not vote fur the adopshen uv these resolushens, fur a reeson. It iz true the nigger Joe Lubbock iz postmaster, and hez bin fur meny yeers. It iz true that Joe Bigler and Pollock iz Collectors, hev bin fur meny yeers. I know that you, Parson, want to be postmaster, and Issaker and Deekin want to be Collectors, awl of wich Bascom wants likewise. You four hev an interest in awl this. Three uv you want the salaries, and Bascom wants you to hev em, fur he iz very shure that evry penny uv the salaries will filter thru hiz till.

"But wat interest iz awl this to me? I ain't in the ring. I hev no interest in the Postoffis, for I don't send any letters, and ef I did Lubbock will continner to do my biznis jest ez well ez you wud do it. The Collectors we hev collect jest ez well ez anybody kin, and ef the Government is satisfied I am. Ef I wuz goin to hev one of these offises I shud git up and howl about it and howl about it and stay up to howl. I shud sit up awl nite so ez to be on hand early in the mornin to howl. I shud never stop howlin till the commishen wuz in my hands, and I hed histid Lubbock. But ez I ain't goin to git any uv the places, I ain't rendin my linen about it to any alarmin extent. Paul may plant and Apollos may water, but wat do I care, so that I don't git the increase?

"I may ez well remark that there ain't goin to be any trubble among the Dimocrisy uv the Corners ef you don't git the offises at awl. I don't know uv only four members uv the party wich is interested in the matter a bit. I can't see that it will fatten my hogs and to hev you drawin the salary, nor will it give me credit at Bascom's bar to hev the Deekin and Issaker take the places uv Pollock and Joe Bigler. It is possible that the foundashens uv the great deep may be broken up ef yoo don't git them places, but I think not. Shud President Cleveland conclude to continyoo the present officials for two yeers or sich a matter, I think the sun wud continyoo to rise and gild the east with its golden beams every mornin, and illumine the western horyzin ez it sinks to rest evry nite. I hev no doubt the planits wud continoo to gyrate about each other ez usual, end that the comits wud be no bigger nor hev longer tales, than ez before. It woodent bring hog colera nor rust in the oats.

"I move yoo, Mr. Cheerman, that we substitoot this resolushen:

Resolved, that it is the judgment uv the Dimocrisy uv the Corners that ef the President does ez he dam pleases about the offises, three men may starve to death, but that otherwise it won't act either as a fizic or emetic on the body pollytik.

And he put the moshen and it wus carryed by evry voter present ceptin us four, and the meetin adjourned.

And so we ain't goin to git them places! And this iz the reward uv devotion to one's kentry! It iz time thet my tume-stun was bein ordered at once.

PETROLEUM V. NASBY,
(Despairin.)

Taken at His Word.

Cleveland Ledger.

When Gen. Sherman's army was at Goldsboro, N. C., Gen. Sherman made a visit to the headquarters of Gen. Howard. While there Gen. Sherman felt the need of a small draught of whiskey to drive off the malarial effects of the climate on his system. Now, all the officers of the army knew of Gen. Howard's rigid temperance proclivities, and were strict in their respect for them. Gen. Sherman knew there was no whiskey in Gen. Howard's quarters, and therefore did not mention his wants to Gen. Howard. Presently Dr. John Moore, the medical director, came in, and after a little conversation Gen. Sherman gave him the wink and said: "Doctor, have you a seidlitz powder in your quarters?" The Doctor answered that he had. Gen. Howard spoke up and said: "Gen. Sherman, it is not necessary to go to the Doctor's quarters; I have plenty of seidlitz powders here and good ones too, I will get you one." If there was anything in Gen. Howard's quarters that Gen. Sherman did not want it was a seidlitz powder, and therefore he said to Gen. Howard: "Never mind, General; give yourself no trouble." Gen. Howard was then getting the powder and glasses of water ready. "I will be going by Moore's quarters after awhile." Dr. Moore was a great wag, and quickly took in the situation and became a party to the joke on Gen. Sherman. He said to Gen. Sherman: "By the way, General, I don't think I have a seidlitz powder in my quarters, and you had better take the one Gen. Howard has." By this time Gen. Howard had the powder all ready for use, and handed the glasses to Gen. Sherman. Rather than offend Gen. Howard by saying he meant whiskey, he drank the foaming stuff down, much to his own disgust, to the satisfaction of Gen. Howard and to the amusement of the staff.

A Hint to Cleveland.

New York Evening Post (Mugwump.)

The request made by the Commissioner of Pensions to Miss Ada C. Sweet, Pension Agent at Chicago, for her resignation, coupled as it is with an expression of entire satisfaction with her management of the office, savors strongly of the spoils system, and appears to be in contravention to President Cleveland's letter to the Civil Service Reform League. In this letter Mr. Cleveland distinctly indicated his purpose not to remove faithful, non-partisan officers during their respective terms, merely to make places for other persons. Miss Sweet's term does not expire untill April, 1886. She has certainly not used her place for political ends. She is not even a voter. A good deal of interest was already called to her during President Hayes' term, by an effort, seconded by a powerful array of "influence," to displace her in order to make room for Mrs. Mulligan, the widow of the late General Mulligan. Secretary Schurz opposed the change on the grounds of civil service reform and retained Miss Sweet against all the pressure that could be brought to bear upon him by the Illinois Senators. Mis Sweet has declined to accommodate the Commissioner with her resignation, and the question now comes up, "Shall she be removed?" This can only be decided by the President. When he comes to examine the case and compare it with the text of his letter we presume that he will at least allow Miss Sweet to retain her place until her commission expires.

An Editor's Tribute.

Theron P. Keator, Editor of Ft. Wayne, Ind., *Gazette*, writes: "For the past five years have always used Dr. King's New Discovery, for coughs of most severe character, as well as for those of a milder type. It never fails to effect a speedy cure. My friends to whom I have recommended it speak of it in same high terms. Having been cured by it of every cough I have had for five years, I consider it the only reliable and sure cure for Coughs, Colds, etc." Call at A. G. Sturgiss' Drug Store and get a *Free* Trial Bottle, Large Size $1.00.

NEW ADVERTISEMENTS.

Diabetes Cured.

New Orleans Picayune, Jan. 20, 1884.

Mr. Mathias Doll, business place No. 23 North Peters street, residence Royal street, between Jeanne and Bartholomew, New Orleans, has been a most intense sufferer from kidney trouble (diabetes) for the last six long and weary years. He said to us: "Even earlier than that I frequently suffered from pain in the back, and frequent making of water, but gave it no thought until about the time stated, when the almost constant desire to make water became unendurable. The pain in the back, and sometimes in the legs, made me so lame at times that I could scarcely walk. I consulted one of the best doctors in this city, and was under his constant treatment for one entire year without deriving the least benefit. I then consulted from time to time, during the last five or six years, six other physicians, each one standing in the front rank of the medical profession in New Orleans, and though I sometimes was a little relieved of some excruciating suffering, yet upon the whole I was not only no better, but in many respects much worse. My limbs became so swollen and sore that I could not cross my legs when sitting on a chair—all of which, they said, was caused by diabetes. I then tried some highly lauded patent medicine. But they all turned out to be humbugs. I had given up all hopes of ever getting relief, much less being cured, when I noticed in the papers some wonderful cures that PERUNA had made in this city, as prescribed by Dr. Hartman, giving the name and address of each person treated. I called to see him; he at once prescribed his PERUNA, which is not over three weeks ago. I am so much better that if I would not improve any more, I would not for any amount that I had not placed myself under his treatment. All my pain and lameness is gone. The swelling and stiffness in my legs has disappeared, and instead of making water every fifteen minutes, I now make it once in three hours during the day, and only twice in a whole night. I am, indeed, quite well again. Don't hesitate, don't say humbug, but get the PERUNA at once and take it as its printed label directs, or, if you think this is only an advertisement, and not strictly true, call and see me and see for yourself."

Mrs. Huldah Riple, Smethport, McKean county, Pa., writes: "DR. S. B. HARTMAN, & Co., Columbus, O. I have used your PERUNA and it has done me a great deal of good. Have recommended it to many of my friends, who have since expressed themselves as wonderfully pleased with its virtues."

A. A. BLIZZARD

The United States Government Census Volume, just published, speaks of the "REMARKABLE SUCCESS" attending our "UNIQUE AND UNTIRING EFFORTS," in pushing the *American Agriculturist*. It began the current year with a larger subscription list than at any corresponding period in twelve years. The able corps of Editors, who have made the *American Agriculturist* a welcome visitor to thousands of American homes for a quarter of a century, are now bending all their energies to make the Journal, if possible, more interesting and valuable than ever to our readers. And you may forthwith conclude that it

Is Sweeping

over Maryland, where it already has so many subscribers and friends, to quadruple its circulation. For who will fail to embrace THIS UNPARALLELED OFFER?

A FAMILY CYCLOPÆDIA FREE.—Any person subscribing to the *American Agriculturist* (English or German) for 1885, who sends subscription is promptly forwarded to us, together with the subscription price, $1.50 per year, and 15 cents extra for packing and postage on the Cyclopædia—making $1.65 in all—will receive the *American Agriculturist* for 1885, and be presented with the AMERICAN AGRICULTURIST FAMILY CYCLOPÆDIA just out, 709 pages, 1,000 engravings.

TWO MONTHS FREE.—Every *new* subscriber (and only new ones), who promptly forwards his subscription in accordance with these conditions, can have his year's subscription date from March, 1885, receiving free the numbers of the *American Agriculturist* for January and February.

TWO MAGNIFICENT ENGRAVINGS FREE.—Every such subscriber will also be presented, postpaid, with the magnificent plate Engravings "In the Meadow," and "Foes or Friends," of which over eighty thousand have been sent for by our subscribers.

CYCLOPEDIA, ENGRAVINGS, AND A DICTIONARY FREE.—To any one promptly forwarding the name of a new subscriber to the *American Agriculturist* with $2.00, we will send Webster's Practical Dictionary, just out, 600,000 words, 1,000 illustrations, while to the new subscriber we will send the *American Agriculturist* for 1885, and also the Family Cyclopædia, post-free. Furthermore, on receipt of fifteen cents extra, (making $2.15 in all) in this case for packing and postage, we will forward the two engravings, "In the Meadow," and "Foes or Friends," to the sender of the subscription, or to the subscriber himself, as we may be directed.

Send six cents (stamps), for mailing you specimen copy AMERICAN AGRICULTURIST, an elegant forty-page Premium List, with 200 Illustrations, and specimen pages and descriptions of our Cyclopædia, Dictionary, and magnificent Engravings presented to every subscriber.

THE TRIED and TRUE REMEDY FOR CROUP, BURNS, CUTS, Bruises, Sores, Boils.

FOR SALE BY ALL DRUGGISTS

A HOME DRUGGIST TESTIFIES.

Popularity at home is not always the best test of merit, but we point proudly to the fact that no other medicine has won for itself such universal approbation in its own city, state, and country, and among all people, as

Ayer's Sarsaparilla.

The following letter from one of our best-known Massachusetts Druggists should be of interest to every sufferer:—

RHEUMATISM. "Eight years ago I had an attack of Rheumatism, so severe that I could not move from the bed, or dress, without help. I tried several remedies without much if any relief, until I took AYER'S SARSAPARILLA, by the use of two bottles of which I was completely cured. Have sold large quantities of your SARSAPARILLA, and it still retains its wonderful popularity. The many notable cures it has effected in this vicinity convince me that it is the best blood medicine ever offered to the public. E. F. HARRIS."

River St., Buckland, Mass., May 13, 1882.

SALT RHEUM. GEORGE ANDREWS, overseer in the Lowell Carpet Corporation, was for over twenty years before his removal to Lowell afflicted with Salt Rheum in its worst form. Its ulcerations actually covered more than half the surface of his body and limbs. He was entirely cured by AYER'S SARSAPARILLA. See certificate in Ayer's Almanac for 1883.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists; $1, six bottles for $5.

MAGNETIC CURES.

DR. HILL is to discover the philosophical principle that all nervous pains, aches, and debility should be treated directly from the "brain battery," from whence emanate all nervous force and will power. All other forms of treatment for nervous disorders are failures. Every person who suffers from nervousness knows this, and that medicines only palliate, but never cure. These appliances are magnetic, and differ from all others on the market which are electric. Magnetism is the life of man. Their curative qualities are wonderful in all nervous complaints. The Roman physicians practiced magnetic treatment 1,000 years ago in nervous diseases, but did not treat from the "brain battery." Dr. HILL has made this great discovery, the only sure cure for nervous Headaches, Rheumatism, Neuralgia, Liver and Kidney Complaints, Paralysis, Gout, Spinal weakness, Dyspepsia, Constipation, Cold Limbs and Feet, and General Debility. Miraculous cures noted every day. The Magnetic Brush lifts nails, and the only article of the kind invented. It is the greatest curative agent known and used in a "brush bath;" imparts tone, replenishes the debilitated system, and creates warmth. In chronic cases our Magnetic Bands, Belts and Pads should be used. The brushes are warranted to do the work, or the money refunded. Send for circular and testimonials. By giving a description of nervous trouble we will give advice and directions how to use our appliances. HILL MEDICAL MAGNETIC APPLIANCE COMPANY, Lock Box 55, Washington, D. C.

PENSIONS

SPEER'S PORT GRAPE WINE!

FOUR YEARS OLD.

THIS CELEBRATED WINE is the pure juice of the dead ripe Oporto Grape, raised in Speer's vineyards. Its valuable,

TONIC AND STRENGTHENING PROPERTIES

are unsurpassed by any other Wine. Being produced under Mr. Speer's own personal supervision, its purity and genuiness, are guaranteed by the principal Hospitals and Boards of Health who have examined it. The youngest child may partake of it, and the weakest invalid use it to advantage. It is particularly beneficial to the aged and debilitated, and suited to the various ailments that affect the weaker sex. It is in every respect A WINE TO BE RELIED ON.

Speer's Unfermented Grape Juice.

Is the juice of the Oporto Grapes, preserved in its natural, fresh, sweet state as it runs from the press by fumigation, thereby destroying the exciter of fermentation. It is perfectly pure, free from spirits and will keep in any climate.

Speer's Burgundy,

It is a dark rich medium Dry Wine used by the wealthy classes as a Table or Dinner Wine, and by physicians in cases where a dry wine instead of a sweet port is desired.

Speer's (Socialite) Claret.

Is held in high estimation for its richness as a Dry Table Wine especially suited for dinner use.

Speer's P. J. Sherry.

Is a wine of Superior Character and partakes of the rich qualities of the grape from which it is made.

Speer's P. J. Brandy.

IS A PURE distillation from the grape, and stands unrivalled in this Country for medicinal purposes.

It has a peculiar flavor, similar to that of the grapes from which it is distilled.

See that the signature of ALFRED SPEER, Passaic, N. J. is over the cork of each bottle.

Sold by A. G. STURGISS, and by druggists everywhere. Feb. 16'84 1y.

GOLD for the working class. Send 10 cents for postage, and we will mail you free, a royal, valuable box of sample goods that will put you in the way of making more money in a few days than you thought possible at any business. Capital not required. We will start you. You can work all the time or in spare time only. The work is universally adapted to both sexes, young and old. NEW ADVERTISEMENTR.

IT LEADS ALL.

No other blood-purifying medicine is made, or has ever been prepared, which so completely meets the wants of physicians and the general public as

Ayer's Sarsaparilla.

It leads the list as a truly scientific preparation for all blood diseases. If there is a lurking taint of Scrofula about you, SCROFULA AYER'S SARSAPARILLA will dislodge it and expel it from your system.

For constitutional or scrofulous Catarrh, CATARRH AYER'S SARSAPARILLA is the true remedy. It has cured numberless cases. It will stop the nauseous catarrhal discharges, and remove the sickening odor of the breath, which are indications of scrofulous origin.

ULCEROUS SORES "Hutto, Tex., Sept. 28, 1882. "At the age of two years one of my children was terribly afflicted with ulcerous running sores on its face and neck. At the same time its eyes were swollen, much inflamed, and very sore.

SORE EYES Physicians told us that a powerful alterative medicine must be employed. They united in recommending AYER'S SARSAPARILLA. A few doses produced a perceptible improvement, which, by an adherence to your directions, was continued to a complete and permanent cure. No evidence has since appeared of the existence of any scrofulous tendencies; and no treatment of any disorder was ever attended by more prompt or effectual results.

Yours truly, B. F. JOHNSON."

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists; $1, six bottles for $5.

DR. JOHN BULL'S

Smith's Tonic Syrup

FOR THE CURE OF

FEVER and AGUE

Or CHILLS and FEVER,

AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration to the general health. It is, however, prudent, and in every case more certain to cure, if the medicine is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.

BULL'S SARSAPARILLA is the old and reliable remedy for impurities of the blood and Scrofulous affections.

THE YOUNG WIFE'S PLOT.

"They are determined not to like me," said Octavia Durell, with the tears of mortified pride sparkling in her eyes as she laid down the frigid letter she had been reading. "And it is cruelly hard for me to be forced to meet them without Sigismund's presence to sustain and uphold me. I know just how it will be. My mother-in-law will look coldly and critically upon everything I do; my step-daughter will fancy me a tyrant, and steel herself against me as if I were an inquisitor. Home will be a dungeon and life a burden! Oh. I wish—I almost wish," she added correcting herself, with the shy smile of happy wifehood—"that I had never married. But, after all, what nonsense that is, when Sigismund is so good, so noble, so worthy of a wife's devotion!"

Mrs. Durell was on her way home from India, and, seated in the cool, marble-paved apartment of Gibraltar, from whence the Peninsular and Oriental steamship was to sail the next day, she watched the palm leaves swaying in the breeze, the flutter of the gay green and white awnings, and the turbaned Eastern servants passing to and fro with trays of black coffee, delicately flavored ices, moulded to imitate apples, oranges and pomegranates, with absent, unseeing eyes.

Never before had she been parted from her husband, who was American consul at one of the oriental ports, but a sudden call had arisen for his presence many hundred miles back into the mountain country—a wilderness to which it was impossible that he could take his delicate young wife.

"There is no telling how long I may be detained among those semi savages, Octy," he had said to his wife "and I can neither take you nor leave you. Go home to my mother, and make friends with little Eudora. It is possible that I may follow you in a few months, if all goes well. But, at all events, I shall feel safer if you are secure on American soil. Benson, your maid, is an accustomed traveler, and Leonard, who commands the Pacifica, is my old friend, so that you will lack no care."

"But, Sigismund," cried Mrs. Durell, with a countenance of ludicrous dismay, "a—mother-in-law! and a step-daughter! To be compelled to confront them, all by myself!"

"My dear little goose!" said the consul laughing. "Now you are frightened at mere shadows. My mother is the dearest old lady in the world, and Dora is a darling."

"Couldn't I stay with you? pleaded the young wife, clinging to his arm. "I'd rather be murdered by the natives, or die of cholera down on the plains, than go back to America all by myself!"

"Nonsense! nonsense! nonsense!" cheerily cried out Mr. Durell.

And so the matter had been settled. And Octavia was thus far on her tedious voyage home, when, crossing the chequered pavement without, a slight, graceful figure glided by, with floating lace scarf and deeply-fringed, rose colored parasol.

"It's Janie Weldon!" cried Octavia, springing up and rushing out to intercept the movements of the beautiful stranger.

"Why," cried Miss Weldon, in infinite surprise, it is Octavia Olcott! And here on the heights at Gibraltar! Of all places, who would have dreamed of meeting you here?"

"I am going to America," said Octavia

"So am I," said Miss Weldon.

"But my name isn't Olcott any longer," added the young wife, laughing and blushing. "I am Mrs. Sigismund Durell."

"Then," said Miss Weldon, with her eyes growing larger and more brilliant than ever, "you are the daughter-in-law of Mrs. Alkmond Durell, the lady I am going to Durell Court to visit. Do tell me about her! Is she nice! Is she lovely? Is she——"

Octavia burst ont laughing.

"I never saw her in my life," said she.

"Neither have I," said Miss Weldon. "But she has invited me to visit her because my Aunt Barbara was an old friend of hers. And you really have married the charming young consul-widower? My darling, I congratulate you!"

"I was a governess at Calcutta," said Octavia, blushing and looking exceeningly pretty. "And——"

"I see how it was, nodded Miss Weldon, who had been Octavia's schoolmate long ago. "Love at first sight—and I don't blame him when I see how pretty you have grown. And I suppose dear old Mrs. Durell is delighted to have you?"

"She isn't delighted at all," said Octavia, solemnly. She has written me a letter as cold as ice, regretting that her son should have married again so precipitately (just as if his wife hadn't been dead five years) hoping that we should be congenial, but fearing very much that I should find the quiet and solitude of Durell Court too dull for my tastes."

"But that's horrid," said Miss Weldon. "Not in the least like the letter she wrote me. Wait a minute—I have it here in my pocket."

And, with a heart filled by involuntary envy, Mrs. Durell read the affectionate, almost motherly epistle, which invited Miss Weldon, for her aunt's sake, to make Durell Court her home for as long a period as she pleased, assuring her of the warmest welcome and love.

Octavia's eyes filled with tears.

"Why couldn't she have written such a letter to me!" she exclaimed.

"Because, my dear, you are her daughter-in-law," Miss Weldon philosophically answered. "No woman can welcome the girl who has stolen away her son's heart. It isn't in human nature."

Octavia was silent for a moment; then she suddenly exclaimed:

"Janie, I've an inspiration—a positive inspiration! Let me go! And you keep away for a little while!"

"Go where? Keep away from whom?" said Miss Weldon, in amazement; and then, with brightening eyes, she added: "Oh, I see! Octavia, you are a genius. Come here and sit by me, and we'll arrange it all."

* * * * * *

The golden autumn time had come, and the woods around Durell Court were wearing their brightest dyes.

Little Eudora had tripped around all day, gathering the sweetest roses, arranging violets in saucers of Dresden china, adding new beauties to the suit of apartments which had been prepared for Miss Welden, the only child of "grandmamma's dearest friend."

"For we must enjoy her society all we can before any odious stepmother comes," said Eudora, all unconscious that she was in the least degree uncharitable.

Poor child! she only echoed the chime of popular opinion, after all.

And when grandmamma's pony phaeton came back from the train with the tall, lovely lady in black, Eudora flew into her arms, with all a child's innocent enthusiasm.

"Stand off a little, and let me look at you," said the child, joyously, pushing back her jetty curls—and so like Sigismund's that Octavsa's heart thrilled within her. "Oh, you are exactly like what I pictured you in my mind! And we are going to be so happy together—you and I, and grandmamma—until—until my stepmother comes!"

Octavia looked wistfully at her.

"Dear Eudora!" she said, impulsively, "I love you already. Promise me that you will love me?"

The warm-hearted little girl covered her cheeks, brow and lips with kisses.

"Dear Miss Weldon," said she, "I promise you a thousand times over."

And Miss Durell led the guest smilingly to her room.

"My darling," said she, "I want you to be very happy here. For you are filling a place in our heart that has long been vacant—my daughter's place!"

"But Mrs. Sigismund Durell?" suggested the stranger, coloring deeply.

The old lady made a gesture of dissent.

"I can never love her!" she uttered, sadly.

"But me—you will be kind to me?"

"My dear Janie, you are like my own child already!" lovingly spoke the old lady.

And Mrs. Durrell never suspected the rain of bitter tears which poor Octavia shed when she at last was left alone.

"But I mill make thew love me!" she thought, "and when once their affection is thoroughly mine, I will not let them withdraw it from me, merely because I am Octavia instead of Janie Weldon."

And this beautiful young impostor had not been a week in the house before she had won all hearts. She was grandma's darling, Eudora's confidant, the pet and sunshine of the house. And oh, how her heart beat when Mrs. Durell looked at her tenderly one evening, and said, with a kiss:

"Dear little Janie, I was thinking how many thousand dollars I would give if Sigismund's wife were like you."

Octavia turned first red, then white.

"Mrs. Durell," she said rather hurriedly, "if I were Sigismund's wife——"

And just then a bevy of guests were shown in, and the words of confession checked on Octavia's lips.

But the secret betrayed itself at last as secrets will always do.

It was a rosy December sunset, the fields all decked with carmine, the huge fire of mossy logs cracking in the tiled fire-place of Durell Court. The old lady was serenely dozing in the blaze, and Eudora was helping her guests to arrange roses, fresh gathered from the green house, in antique majolica vases when the door opened and a tall, well-moulded figure strode in.

"Well, mother! Well, Eudora——"

The old lady started up with a cry. Eudora looked with dilated, wondering eyes; but first and sweetest of them all Octavia was in her husband's arms.

"Sigismund!" she cried hysterically; "oh, Sigismund!"

Old Mrs. Durell recovered herself with an effort, and looked on in amazement.

"Sigismund," said she, "I did not know that this lady——"

"This lady, mother," he answered, brightly, "is the sweetest and dearest lady in all the world to me—my wife!"

And Octavia hid her face on her mother-in-law's shoulder.

"Dear Mrs. Durell," she whispered, forgive me for stealing you by strategy, for, indeed, I despaired of ever winning it in any other way. Janie Weldon told me that I might borrow her personalty. She, too, is coming after New Year's, and——"

"I'm sure," said Mrs. Durell, nervously wiping her spectacle glasses, "I don't know what to say!"

"Say 'I forgive you,'" said Octavia; "and also say, 'I love you little daughter!'"

"I love you, dear little daughter," said the old lady falteringly. "And as for forgiving—why I am not certain but I need forgiveness the most of all."

While little Eudora clung closely to the young wife's side.

"I don't care whether you are my step-mother or not," she said. "I love you, and I shall always call you mamma, now!"

And then the happy, excited little group gathered around the fire, and explanations followed all around.

Octavia had to recount her little plot so often betrayed by the fullness of her own heart. Sigismund had to relate the combination of circumstances by which he had obtained a year's leave of absence from his Eastern consulate, and managed to take them by surprise; and a more joyful household was nowhere to be found. "I was beginning to wonder why Mrs. Durell, junior, did not come," said the lady, with a smile.

"And I was dreading it terribly, said Eudora, with a pretty little grimace, and all the time the mischievous darling was in our very midst."

And that very evening Octavia sat down and wrote to Janie Weldon what a success her plot had proved. —Helen Forest Graves.

A Walking Skeleton.

Mr. E. Springer, of Mechanicsburg, Pa., writes: "I was afflicted with lung fever and an abscess on lungs, and reduced to *a walking skeleton*. Got a free trial bottle of Dr. King's New Discovery for Consumption, which did me so much good that I bought a dollar bottle. After using three bottles, found myself once more a man, completely restored to health, with a hearty appetite, and a gain in flesh of 48 lbs."

Call at Sturgiss Drug Store and get a free trial bottle of this certain cure for all Lung Diseases. Large bottles $1.00

Several years ago General Grant uttered these earnest words about the Bible: "Hold fast to the Bible as the sheet-anchor of your liberties; write its precepts on your hearts and practice them in your lives. To the influence of this book we are indebted for the progress made in true civilization, and to this we look as our guide in the future."

Remove boils, pimples, and skin eruptions, by taking Ayer's Sarsaparilla to purify the blood.

ETHIOPIOMANIA.

Vers de Societe (new style). Dedicated to a Fashionable Young Lady who Plays the Banjo.

I.

Piano put away
In de garret for to stay;
De banjo am de music dat de gals am crazed about.
De songs dat now dey choose
Am 'spired by de colored muse,
An' de ole kind o' poeckry am all played out.

CHORUS. O, Maud Elaine,
Sweet as sugar-cane!
Hush dat music, let my poor heart go.
For hit's sweeter dan de band
To heah yo' little hand
A-plunk-plunk-plunkin' on de ole banjo.
Clog dance.

II.

I ain't from de Souf;
But yo' pretty, pretty mouf
Done took to singin' darkey songs in such angelic tones
Dat jest fo' yo' sake
I'se a-gwine fo' to take
Some lessons on de tambourine, an' learn to
Play de bones.
CHORUS, *and double shuffle.*

III.

O, when Maudie sings,
And picks 'pon de strings,
'Twould charm a deaf-and dummy, or a possum from a tree.
She holds dat banjo so,
In her arms as white as snow,
I'd gib a half-a-dollah if dat instrument was me!
CHORUS, *and walk-around.*

IV.

So play, play an' sing,
For de banjo am de king,
Its music brings de belles an' beaux a-knockin' at de doah.
We'll dance heel an' toe
Till de lamp burns low,
An' de Turkey carpet's worn away from off de parlor floah.
CHORUS, *and grand break-down.*

—*Henry Tyrrell, in Century.*

AN ARCADIAN ROMANCE.

Which Ended as All Such Romances Should.

[Captain Prentice, C. S. A., to John Forbes, Esq., Brook Ranche, East Park, Colo.]

NEW YORK, June 11, 1884.—*Dear Forbes:* When I promised to write you during my leave I hardly expected to shower such favors upon you within a fortnight after leaving you in Denver. But the fact is, I have, as usual, a request to make. Don't feel in your pocket for your check-book, for this time I am not going to ask a loan. I met an old friend of mine at a reception last evening, Mrs. Harwood, whose husband was Major in the Seventh Cavalry. She played the dickens with my heart ten summers ago, and I have not seen her since. But in the interval she has married, become a widow, and, if reports are to be trusted, has broken a dozen hearts. Well! I did not start out to write you the history of my first love affair, or the fate of the heroine, but to tell you that Mrs. Harwood is going to Colorado for the summer, and that I have suggested the Park to her if she wants the best of times in the simplest of ways. Why I did it I can not imagine, for I have heard of her as a belle of the gayest New York set, and she does not look suited to Arcadian simplicity. But she seized upon my proposal; said she was leaving the "beaten road" in order to get just the attractions I held out, and to the Park she seems bound to go. Possibly when she reaches Denver she will decide on some other place, but my knees are knocking together lest she may carry out her present plan, and hate me as its author. Now for the favor. Will you, when you visit the hotel, look over the register for Mrs. Alice Harwood's name, and, if you ever find it, will you look her up?

I have promised her this in your name, and I know if you once meet her you will be friends and her stay will be made delightful.

Mrs. Harwood's party will consist of her two sons—have I told you she was the mother of twins?—and an aunt who plays duenna.

If you were not the best fellow in the world, and I not sure of the resulting pleasure, I would not ask you to give yourself a thought for one of my friends. But here's your chance, old man, of studying the best type of the American product. I am desperately glad you are going to be on the ranch this summer, for I should tremble to ask Wyndham anything in this line. I leave this afternoon for Washington. Beyond that my plans are not made, so write me care army headquarters and your letter will be forwarded.

As you have written me one letter and a postal during over six years' friendship, I anticipate great entertainment from your pen while on my travels. With regards to Wyndham, I am, very truly yours,

J. W. PRENTICE.

[Brantly Wyndham, Brook Ranche, Colo., to John Forbes, Esq., Sommerset Club, London, England.]

JULY 8, 1884.—*Dear Jack:* Your letter was brought over Saturday night by Beale and Richards, who came for some shooting. They agreed it was only fair for me to share so rare a treat, so Beale read it aloud. We roared over your description of the Edinborough trip and used some pretty hard language over the fate that kept us here when our hearts were "awa."

A pretty good idea that, for you and Black to wait for me in London, and if all goes as well as I now expect I shall be able to join you by October. It will be time enough to quarrel over the trip when we can plan together, but I am for Greece and Italy, unless you both take a stand against me, in which case I shall yield to the majority. The cattle are looking splendid, and I am more and more convinced that Duncan understands how to look after details better than you or I ever did. The round-up will not commence before August, and I shall stay in Colorado till not only that but the shipping is over. I am going to consign to the Chicago yards this year. Beale has talked me over. Richards and he are talking of getting another range near Cheyenne and forming a stock company. If they do I shall put in $5,000 with them.

With the exception of one trip to Denver I have been vegetating right here ever since you left. I gave a dinner yesterday to two Philadelphia fellows—friends of Richards. As the new china hasn't come, we were two plates short, and the fish gave out; but I saw no inclination on the part of Wilson—by the way, he is proving himself an excellent cook—to follow the example of Vatel. Perhaps because our nearest approach to a sword is the carving knife, and that has been pointless for weeks.

We made the welkin ring and had as good a time as only five jolly bachelors can.

I have left to the last my remarks on the colossal impudence you displaced in inclosing Captain Prentice's letter to me. "So as you are not here to dangle after the mother of the twins I will be obliged to do the proper thing by her!" By Jove! I'll cut and run first! Confound Prentice! If I had dreamed of the contents of that letter it would not have been forwarded to you. How did it happen you missed seeing him in New York? It's all well and good for you to say I shall only have to call once. You know well enough that this "American prodigy," will never hesitate to ask me to let her see the ranch; that she may know how we live so far from civilization. They are all alike, and I remember too well that girl from St. Louis—wasn't she?—who wanted an invitation to dinner of you for her party after you had been presented to her half an hour. If a girl can get along that fast what wouldn't a widow accomplish? I tell you Prentice showed a great mind when he said what he did about me. I will do all I can for any man you send out to my cara, but away with twins, duennas, and widows. I am not for them.

Well, my lad, remember you are under oath to run up to Inverness and tell my blinded family all of good you conscientiously can about their idolized son. If any matter of business comes up I will write again. At any rate, you will hear from me before I join you. I know too well your epistolary habits to say: "Let me have a letter soon," but you know, when you wish to write, who appreciates your efforts most highly. With good wishes from Beale, Richards and myself for a jolly holiday, I am, hastily, BRANTLY WYNDHAM.

[Mrs. Alice Harwood, East Park, Colo., to Mrs. James Creighton, New York.]

FEB. 24, 1884—*My Dearest Edith:* This is the sixth letter I have written this morning, so you can imagine the desperate state my correspondence was in. I know you are furious with me for not writing you before; but, my dear, you would forgive me could you realize how entirely I am shut out from the world in this beautiful Park, hemmed in as it is by mountains and having no connection with the busy life outside save the stage that comes in every other day. Don't think I am about to plunge into rhapsodies over the scenery. I shall spare you all that, knowing that Aunt Mary has written you, and that her poetic soul has not been content until you and Jim shared her ecstacy as much as possible. But I do wish you were here to enjoy the lovely walks and drives, and, best of all, rides I am delighting in. Speaking of rides suggests a funny adventure I had a week ago, which may amuse you.

Did Aunty write that we met Captain Prentice just before we left New York?

You remember him, of course. I had a desperate flirtation with him at West Point the summer before I was married. I had not seen him since, but we renewed our old acquaintance, and it was he who told us about this delightful place. Just before leaving us he told me that he should write to one of his best friends, a Mr. Forbes, who lived on his ranch, ten miles from the hotel, to call upon me when I arrived at the Park. Naturally I felt a flutter of delight at the thought of knowing one of those mythical ranchmen of whom we hear in New York, and especially as Captain Prentice told me he was an Englishman and a thoroughly good fellow. I confidently expected each day after we were domiciled here to receive a card from Mr. John Forbes, but none came. Finally, becoming impatient, I asked one of my fellow-sojourners, an awfully pretty Philadelphia girl, if she had ever heard of him. Now, my dear, I do not intend you and Jim to be allowed to prophesy my speedy retreat unless an attractive man is forthcoming—for I am perfectly absorbed in Aunt Mary and my boys: and, besides, I came here to escape the sex. But I digress.

She had heard of him; her brother had dined at his ranch when he was here, but Mr. Forbes was not his host. He was in Europe, and his partner, a Mr. Wyndham, was in command. Of course this led to a discussion of the ranch, which my pretty girl tells me her brother raved over, and then to a mention of Mr. Wyndham. His name is Brantly—did you ever hear anything more swell—and the brother aforementioned described him as the best of good fellows—but dashed his sister's hopes by the cheering information that he was never known of his own free will to speak to a woman. Naturally after that I gave up all expectation of seeing a ranch, and devoted myself to the boys and learning to leap a four-barred fence.

This, my own dear sister, is a descriptive prologue. As the curtain rises on the comedy itself, picture a country road—mountains as a back—and seated on a stump a woman dressed in a riding-habit and gazing anxiously in every direction. A stanhope suddenly comes into view by a turn on the road, and the solitary woman leaps to her feet, prepared to attract the attention of the driver. The signal is made. The horses are stopped, and a decidedly good-looking young man, arrayed in a white-flannel suit and East India hat, leaps to the ground.

Young Man (removing hat)—"I fancy I can be of some service to you by your look of distress as I was passing."

Forlorn Female (very hot and red)—"You are very good to interpret my signal correctly. I foolishly started from the hotel for a ride alone this morning"—marked disapproval expressed in young man's eye—"and getting off my horse to gather some flowers, he broke away from me and left me as you see, at least six miles from home."

Y. M.—"Certainly a shabby trick to serve you, but if you will allow me the pleasure, I am going to the hotel and will be most happy to have you occupy the other seat in my cart."

F. F.—"You are extremely kind, and I gladly accept."

Thereupon the young man assists the F. F. into the cart, his face bearing a decidedly bored expression and a determination to be frigidly polite—nothing more. Desultory conversation on each side—the weather touched upon—the beauties of the Park mentioned—then a long silence. Young man gazing into space. Young woman casting about in her mind how to find out her protector's name. A sudden inspiration! It must be—it is—Brantly Wyndham. The woman's name is Harwood, and she has been called good-looking, but no glance of admiration comes from her host. No time is to be lost! They are reaching the hotel! It is now or never! She turns and says: "I wish to thank you for so kindly bringing me out of my dilemma. I think I was getting quite hopeless—so far away and alone." Quiver in voice. Young man turns, evidently fearing hysterics. Grand coup d'etat. "I am Mrs. Harwood, of New York, and I should like to know the name of my rescuer."

There, it's sheer nonsense for me to try and keep up this farce! I beg leave to drop all dramatic form. It was Mr. Wyndham, and he is the best looking man I ever saw. He pulled himself together after my little finesse had wrung from him his name and told me "that his friend Forbes, who was abroad, had written him about me." It seems Mr. Forbes had sent Captain Prentice's letter, which followed him to Europe, back to his partner asking him to take his place in what it asked. Mr. Wyndham said that, being no lady's man, he had hesitated to call upon me in his friend's stead, but "was grateful for this meeting," etc., etc. All bosh, because I knew he was raging inwardly. We reached the hotel, and I asked him to pay me the visit now. This he declined to do, but would, with Mrs. Harwood's permission, "drive over soon to further an acquaintance so charmingly begun." So he bowed himself away, and I never expected to see him more, for he looked anything but happy over the situation. But the fates have determined to bring us together. I was sitting on the veranda this afternoon waiting for the mail when he appeared before me. Of course he stopped and tried to prevaricate without looking conscious. "He was just about to send me his card; would I not accept a call here?" I think I made quite a good impression, for, gauging my man, I used no little feminine arts to attract him—was calm, dignified and collected. We discussed the West—Chinese Gordon—and finally his beloved mother country. He told me that he was a Scotchman, and that his family lived at Inverness. While we were chatting Aunt Mary joined us, and Mr. Wyndham staid on until the stage came in, bringing a friend, whom it seems he was expecting—when he left us and in a moment bowled off toward his ranch in as swell a stanhope as graces Bellevue avenue.

Here, sister mine, ends the first chapter of as pretty a tale as I can write you from Arcadia, and most probably you in the whirl of your Newport season will have no time to interest yourself in it. I have succeeded in covering a number of sheets with my nonsense, and my watch points to the mystic hour of midnight. With love to Jim, whose chief perfection in my eyes is his good taste—so beautifully displayed in the "sister" he chose for me—and with a hope of soon being cheered with one of your letters, I am your own ALICE.

[The Same to the Same.]

MY DEAR EDITH: It was so sweet in you to pretend to find such an interest in my rambling letter! I show my grateful appreciation by answering yours at once. I do not like to think how soon this lovely summer will have ended, and my journey back to civilization commence! But I do long to see you and tell you all I can not write. And so I really excited in your breast a wild desire to see Mr. Wyndham? You would detest him, I know; and he would disapprove you from your Langtry bang to your Louis Quinze heels, so you can imagine how little I should love to be the means of bringing you together. I have grown to know him quite well and like him better every time we meet. He is so genuine, so honest and frank, that he is like a new element in my life. My set of men at home are so detestable, worldly and blase. Yes, I like him, and yet I never get over my surprise that I know him, he is so little of a woman's man. After that day on the veranda—of which I wrote you, did I not?—we met several times casually, when one day, to my surprise he asked me to drive over the scene of our first meeting with him—in his cart—and that jaunt completely broke the ice. So I have driven with him, and ridden Mr. Forbes' horse, and spent one delightful day on his ranch. O, that day! I give a sigh of happiness every time I think of it.

Mr. Wyndham had a couple of men from Cheyenne stopping with him, and one evening, when they had all been dining at the hotel, he suggested to aunty that she bring Leslie Stephens—with whom, by the way, I am very intimate, she is a Philadelphia girl, and very pretty—and your humble servant over to his quarters next day for luncheon. Although poor, dear Aunt Mary questioned the propriety of visiting Bachelors' Hall, we persuaded her to our way of thinking, and went.

The road to the ranch lies through the park and is perfectly beautiful. After ten miles, which aunty and the boys took in a carriage, and Leslie and I in the saddle, we reached the dearest little log-house, with a veranda across the front furnished with lounging-chairs and a hammock to make it inviting. A tiny lake within two hundred feet of the house added to the picturesqueness, and the glorious old mountains and brilliant blue sky completed the scene. Our host and his friends, a Mr. Beale and a Mr. Richards, met us on the veranda—helped us dismount and took us inside, where we were served with sherry and crackers.

After a lovely hour spent out of doors we sat down to as dainty a lunch as heart could desire, in the sunniest of dining-rooms, which is worthy of being described. It looks out upon the lake, and is not more than twelve feet square. On one side is a great bay-window, and on the other an old-fashioned fire-place, with a high, narrow mantel over it. The china was all in view in cupboards built in the walls. All over the house the rafters are left in the ceilings, and the plaster is rough-dried, which is really wonderfully effective.

Besides this pretty dining-room there is the hall, a trifle larger, which serves as a living-room. It also has a fire-place, and a great log was burning on the andirons the day we were there. The hall is furnished with great easy-chairs, two luxurious couches, quantities of skins, and a few really fine etchings. All over the house Navajo blankets hang as portieres, but "all over the house" does not mean much, as there are only three sleeping-rooms and a kitchen besides those I have described. There! Now that I have done justice to Mr. Wyndham's abode, I will go back to my tale. After luncheon we roamed over the place, took a row, swung in the hammocks, and had, in fact, a long, idle, lovely day. Mr. Beale brought out his banjo, and we sung a lot of old songs, and finally at five o'clock we went home, escorted by all three men. Don't think, my dear, that the fascinating Brantly has succumbed to my charms. He likes me, I fancy, as I like him, but there is not a vestige of a flirtation between us. This party even was proposed by Mr. Richards, who is dead in love with Leslie, but I profited by her attractions. Yet I am confident that if in Mr. Wyndham I have not even "half a lover" I have "all a friend," which in this unstable world would be far more desirable.

I am making my plans to be at home in two weeks. We are all vulgarly well. Aunty longs to dwell in tents forever, and my dear boys contemplate the return eastward with moans of dismay. With love to Jim and your sweet self,

YOUR DEVOTED SISTER.

[Brantly Wyndham, Chicago, to John Forbes, Sommerset Club, London, England.]

SEPTEMBER 27.—*Dear Jack:* I suppose Duncan wrote you that I had started East—so you will not be surprised at the postmark on this letter. Everything was so satisfactorily finished up at the ranch that I decided to come on to Chicago, settle with the commission men, and get to New York ten days before I sail. Perhaps this will not reach you before I am on the ocean, for I am booked for the Gallia the 22d.

I have had a tremendous summer. Richards was with me for six weeks, and he did not get away until he had been taken captive, bound and made a slave by a girl, from the East somewhere, named Stephens. The poor old man is completely gone, and the only remedy I see for him is matrimony. Speaking of the fair sex, I met Mrs. Harwood after all, and knew her quite well. The fact is we were thrown together by chance. Her horse ran off and left her alone on the ranch road. I came along, gave her the vacant seat in the cart, and took her home. Of course, after that we met more or less, and she is such a sensible little woman, with as much horror of a flirtation and all that as I have, that we became good friends before the summer was over.

That's right! Shout all you please! For, of course, you *are* making an ass of yourself.

Richards wanted his love over for the day, so I asked Mrs. Harwood with her aunt and children to join her and lunch with us. The new china had come, so we could make a decent enough appearance. They seemed to enjoy themselves so thoroughly that we repeated the invitation, and had them all over to dinner, driving home later by moonlight. Mrs. Harwood has gone back to New York, so I shall see her before I sail. Don't think I am going to be a second Benedict. Remember, Beatrice did not have twins.

This is all stuff and nonsense, old man. Your widow turned out to be a jolly little woman, and improved my summer, but I have no intention of trying to replace the late major. So make your plans to meet me in London, and early in November we will start on our jaunt.

Business has been magnificent this year. We cleared fifty per cent.

Auf wiedersehen,
BRANTLY WYNDHAM.

[Mrs. Alice Harwood, New York, to Mrs. Mary Van Littart, Boston.]

OCT 9, 1884.—*My Dearest, Most Beloved Aunty:* I have something to tell you the most surprising, the most unexpected, and the most delightful it has ever been my good fortune to confide to you! Are you prepared? Will you swear you will not faint? Very well, then, here is my news:

I am engaged to Brantly Wyndham! O, my dear aunt! you who have been a mother to me, I wish I could lay my head on your breast and tell you how happy I am. It all came about so strangely. I had not heard a word from Brantly since we left the Park, but knowing he had his passage engaged on the Gallia I expected to see him here about the 9th, and that was one of my reasons for refusing to go with you to Boston. Well, Sunday evening I was sitting alone over the fire, feeling forlorn enough—you know how I hate my own society—when his card was brought me. I don't know how it happened, for I was all unconscious of my state of heart, and Brantly vows he came to call without a thought of offering himself to me. But some way it came about. He had told me that he loved me, had asked me to be his wife, and I had accepted him, all in a minute, and without any preface as I look back to it. And we are the two happiest creatures the sun shines upon. I am in too excited a condition to write intelligently. This is only a word to beg of you to come home and give me your blessing. Jim and Edith came up from Newport this morning. They dine here to-night and meet the man of my choice. I want to look my prettiest, so will say good-by to my dearest of aunts and hie me to my bed to snatch a beauty sleep. Come home and help me make my friends approve my choice. Of course I need not say that Brantly has given up sailing. He has postponed it until January, when we will go together. Lovingly,

ALICE.

[To John Forbes, Sommerset Club, London, Eng.]

NEW YORK, Oct. 10, 1884.—Can not join you. Make plans without me. Have given up passage. Will write reasons.

BRANTLY WYNDHAM.

[Extract from New York Paper Jan. 28, 1885.]

WYNDHAM—HARWOOD.—Wednesday, Jan. 27, at the residence of the bride's brother Mr. James Creighton, Percival Brantly Wyndham, second son of Sir Lhyniph Wyndham of Invernsss, Scotland, to Alice Creighton Harwood of this city, the Rev. Dr. Banner officiating.—*Chicago Tribune.*

BIRDS.

The Erotic Character of Their Melodious Outpourings.

The majority of ornithologists agree in ascribing an erotic character to the songs of birds; not only the melting melodies, but also those of their tones that are discordant to the human ear, are regarded as love notes. Darwin finally, saving some reserves, came to accept this view. To be able to speak critically of the love song one should pay especial regard to the love life of birds. It would be to throw water into the sea to add to what ornithological writers have advanced concerning the vital worth and cosmical significance of of love. Nevertheless, I venture the opinion that the origin of the song habit is to be found in other sources as well as in this important factor, among which is the joy of life, manifested in an irresistible determination to announce itself in melody; and that the song is more perfectly brought out in proportion as this feeling is more highly developed in the organization. Birds in freedom begin to sing long before pairing, and continue it, subject to interruptions, long afterward, though all passion has been extinguished; and domesticated birds sing through the whole year without regard to breeding time, though no female or companion ever be in sight. Such birds, born in captivity, never feel the loss of freedom, and, if they are well taken care of, are always hearty and in good spirits. The bird sings, to a large extent, for his own pleasure, for he frequently lets himself out lustily when he knows he is all alone. In the springtime of love, when all life is invigorated, and the effort to win a mate by ardent wooing is crowned with the joy of triumph, the song reaches its highest perfection. But the male bird also sings to entertain his mate during the arduous nest-building and hatching, to cheer the young, and, if he be a domesticated bird, to give pleasure to his lord and the providence that takes care of him, and in doing so to please himself. Lastly, the bird sings—by habit, as we call it—because the tendency is innate in the organs of song to exercise themselves."—*Boston Globe.*

LITTLE LEAKS.

It Is the Little Wastes That Bring Trouble to the Householder.

It is an old adage that "a looker-on sees more of the game than the players," and this has been forcibly brought to mind by observations made in some households for a few months past. The housewives of course were not aware of the little wastes or leaks that were constantly in progress in their family; they were mere trifles taken one by one, but it is the small leaks that sink the ship sometimes. For instance the bread pan had dough and flour enough left on the bottom and sides to make a good-sized biscuit; this went into the swill pail or drain. The gravy or butter left on the meat platter, or perhaps a large piece of nice steak, went the same way, or to the chickens or cat. It was too much work to make soap; it was cheaper to buy; so scraps of meat and grease were thrown away. Potatoes were cooked by the quantity, and what were left after a meal were thrown into the swill pail. Buttered toast, cake and doughnuts all went the same way. "We farmers raise our own wheat, grow our potatoes, make our own butter, etc." True; but we farmers make our money by these little things, and frugality and stinginess are too very different things.

All these are little items, but in the course of a year they amount to quite a sum, that might just as well be saved, and I could not help thinking that it was no wonder that some farmers had such hard times to get along and make both ends meet. The men do not see the waste. They provide bountifully, as in duty bound, and if they wonder why things do not spend better and last longer, it does not answer to find fault or grumble, and, perhaps, they do think sometimes "that a woman can throw out faster with a spoon than a man can throw in with a shovel."—*Cor. Country Gentleman.*

—Charlotte Cushman "had a foot of her own" in size, and generally wore fours, but could crowd into a three-and-a-half on a "tight squeeze." One night, soon after recovering from a severe attack of inflammatory rheumatism, she was wearing a pair of slippers much too small for her. Darting behind the wings between the scenes, she snatched them off and threw them as far as she could, exclaiming: "Ye gods! Somebody lend me a pair of slippers, or I'll go on in my stockings!" "What number do you wear?" asked a young actor, ready to help her in her emergency. "O, never mind the number; anything from five to twenty!" she replied.—*Chicago Tribune.*

—One of the greatest curiosities in Japan is the wonderful and almost indescribable variety of coins that are used daily, it requiring in some instances 1,000 pieces to make a dollar.

IRON MAKES WAY FOR STEEL.

Steel Taking the Place of Wrought Iron for All Purposes—Its Superior Strength and Cheapness—Puddlers Out in the Cold.

A correspondent has written to the *Sun* asking whether the rails now in use on the railroads of this country are made of iron or steel. Although no iron rails are made now, there are still a few old iron rails in use. As fast as worn out they are replaced by steel rails.

Few people now actually engaged in the metal trade are aware of the wonderful strides made by steel in recent years. In fact, steel is wholly taking the place of wrought iron. Steel is simply a mixture of iron and carbon, the quantity of carbon ranging from twenty-five to two per cent. of the mass. It is not only stronger and for almost every purpose better than wrought iron, but it is cheaper.

Its first victory over wrought iron was obtained in England, where steel rails for railroads were found to be much better than iron in several ways. They did not wear away so rapidly under the wheels, and they were able to stand a greater strain. The first Bessemer steel plant in this country was started in 1867. Its product was used for making rails, and the total amount for the year was 3,000 tons. For a number of years the Bessemer steel was almost wholly devoted to that purpose, the high price at which it was sold making it unprofitable for other uses to which wrought iron was put. Steel rails brought $160 a ton in 1867. But after the panic of 1873 prices came down, and in 1875 the rails brought $75. The hard times of 1879 lowered the price, in spite of combinations among owners, and in 1883 steel rails sold for $40 a ton. Since that time the price has fallen steadily, and a recent price list puts the price of rails at $29, and of steel slabs, ready to be rolled or forged into any shape, at $28 per ton.

The result of these low prices is that bridges are no longer made of iron. Steel beams have taken the place of iron in the fireproof buildings. Steel ships are built instead of iron ships. Steel boilers replace iron boilers. Steel rifles replace the old cast iron cannon. Wherever tensile strength is required steel is used.

The use of steel in beams and girders for houses and bridges was a natural sequence of their use in railroad tracks. But the use of this steel has not been confined to railroads and steamships. The big tin plate factories in Wales began to experiment with steel instead of iron about two years ago. Tin plate contains about ninety-three per cent of iron and seven of pure tin. The steel plate was found to be cheaper, and the articles made of steel tin plate were superior. For making tin dishes without seams or soldered joints, the Siemens process steel plate is not only superior, but it is about the only kind that can stand the spinning process. This country now imports 240,000 tons of tin plate annually, and it is all made of steel plate with a tin coating.

One field in which steel has not yet wholly displacee iron is in the manufacture of nails. The plates from which nails are cut can be rolled from steel ingots as easily as from puddled iron, but the steel plate is harder to cut and the cutters charge a little more for the work. The plants engaged in making steel nails are limited in number, and the price of steel nails is higher than that of iron. The steel nail is smoother, stronger and handsomer, and has made its way in spite of the higher price, but the difference in price is rapidly dwindling, and will, no doubt, soon disappear altogether. In November, 1884, the Wheeling manufacturers charged thirty cents and the Troy men twenty-five cents a keg more for the steel nails. Quotations during the last of February this year were $2.10 per keg for steel nails and $2 for iron. The profit to the manufacturer of the steel nails is much greater on account of the smaller cost of the plates, and the only thing that prevents the iron nail makers from using steel plates entirely is that it takes money to change the plant, and after the great depression of the past two years money is not over abundant among iron manufacturers in any branch of the trade.

A curious outgrowth of this improvement in the manufacture of nails is the action taken by the trades unions in the West at the instigation of the puddlers. By the old puddling process of making iron plates for nails, the pig iron was melted in a great furnace and a small army of men stirred up the melted mass with long rods until the impurities were burned out and the iron became pasty instead of liquid. By the new process the melted pig iron in a big pear-shaped kettle is subjected to a powerful blast of air which is forced up through it from the bottom until the impurities are burned out. Then another small amount of melted pig iron is poured in and the mixture is ready to be cast into ingots. By the old process twenty skilled men could turn out fifteen tons of nail plate in a day, while by the new process four common laborers and one skilled mechanic can turn out from 150 to 250 tons in a day. Naturally the puddlers must lose their occupation.

There is one thing that has not yet been successfully made of steel, and that is a propeller shaft for a steamship. Experiments were made in England and after considerable money had been lost the attempt was abandoned.—*N. Y. Sun.*

An Up-Hill Journey.

A tavern keeper on the San Bruno road was aroused late the other night by the call of an antiquated granger, who sat over the front wheels of a lumber wagon, and who was very much preplexed about something.

"I say, Mister," said the old man, scratching his head; "this is the road to 'Frisco, ain't it?"

"Cer't—but, old man, what have you done with your hind wheels?"

"Jerusalem Scott!" said the old farmer, getting out his specs; "If I haven't lost them hind wheels. That explains the whole thing, Mister. Seemed like I had been going up such an all-fired long hill I was beginning to think I'd lost my way."—*San Francisco Post.*

SCHOOL AND CHURCH.

—The University of Madras has graduated 899 persons, none of whom are Christians.

—The Jesuits have recently purchased the villa in the Island of Elba which was occupied by Napoleon after his abdication, in 1814. It is to be converted into a college.

—During the year 1884 there were 244 new Lutheran churches erected in the United States, divided in language as follows: German, 138; English, 59; Swedish, 22; Norwegian, 14; Norwegian-Danish, 7; Danish, 2; Finnish, 1; Slowakian, 1.

—"The City of Churches," as Brooklyn has been styled for many years, appears not to be correspondingly a city of church-goers, as one of her ministers finds upon investigation that there are 250,000 people there who never go to church.—*Boston Transcript.*

—Wedding fees constitute an important item in the revenues of the popular ministers of New York and Philadelphia, their annual receipts sometimes reaching $5,000. The fees vary from $10 to $200. The average of one minister last year was $80.

—An eccentric Perthshire Scotchman, all his life a member of the Free Kirk, has left his entire fortune—about $150,000 in our money—for the building and endowment of a Wesleyan chapel in a village where, so far as is known, there are no Wesleyan inhabitants.

—A Lowell man whipped out his memorandum-book in church the other Sunday and took down this remarkable thanksgiving from the lips of his scientific pastor: "We Thank Thee, O Lord, that we are permitted to unwind the mighty coil of material circumstances, and gaze into the everlasting abysses where flaming comets roll."—*Lowell Citizen.*

—Pastor Dickinson, of Norwich, Conn., was accused of having said in prayer meeting that the spirit of the late U. S. Gardner had appeared to him. What he did say was that a brother of Gardner, who had spoken in the meeting, brought the dead man so vividly to his memory that he could almost see him standing by his side. His description was so striking that the hearers construed it literally.—*N. Y. Sun.*

—The new head-master of Eton proposes to return to the old system of admitting boys of eight or nine years of age, it being the latter usage to admit only those of twelve or thirteen. It is urged that the boys are at the school too short a time to get the full benefit of its discipline, and, as they cannot be kept till they are older, they should be gathered in when they are younger.

—Donald G. Mitchell, better known as Ik Marvel, is said to be much pleased with the Professorship of belles-lettres, which he has held for a year past at Yale College. The students regard him as an amiable and delightful instructor, and many of them have read his "Dream-Life" and "Reveries of a Bachelor" with an interest approaching enthusiasm. He studied law forty years ago, but never practiced, and afterwards attempted daily journalism, but did not find it to his liking.

—Rev. Dr. Shedd, in a letter to the New York *Observer*, insists that faith in eternal torment makes men tranquil and cautious, but never throws "a sound orthodox man into a consternation or makes him lose his head." On the contrary, he says: "Hell is like any other danger. To be forewarned is to be forearmed. In order to escape danger one must believe in it. Disbelief of it is sure destruction. Speaking generally, all who acknowledge hell and fear it, will escape it; and all who deny a hell and ridicule it, will fall into it."

PUNGENT PARAGRAPHS.

—In respectable society it is said that usually one generation in a family makes the wealth, a second spends it, and the third goes back to the foot to begin again.

—Bill Nye says: "Some of the things that we know should be saved for our own use. The man who sheds all his knowledge and don't leave enough to keep house with fools himself."

—Some people think it would be nice if everybody in the world would mind their own business. But it would not. Over one-half of the people in the world would be out of employment and not know what to do with themselves.—*Pittsburgh (Pa.) Chronicle-Telegraph.*

—A forlorn-looking man said: "I've tried everything that I could turn my hand to, but couldn't make anything answer; and now I have decided to go up among the hills, where they say there's a wonderful echo, to see if I can make that answer."—*Chicago Tribune.*

—Mrs. De Blank—I am so glad Mrs. De Bright is going to remain in the city another month. She is perfectly charming; the most lovely woman I ever saw. All the ladies adore her. Mr. De Blank—Is she pretty? Mrs. De Blank—Of course not.—*Philadelphia Call.*

—A twelve-year-old boy entered a news-stand, threw down fifteen cents, and said: "Gimme 'The One-Eyed Demon of the Ditches,' 'Crimson-Handed Bill, or the King of the Highwaymen,' and 'Sal Slumpkins, the Queen of the Shoplifters,' of the Half-Dime Series." And yet an English review once sneeringly asked: "Who reads an American book?"—*Norristown Herald.*

—Patient—"And so you advise the hot-water cure for my dyspepsia?" Doctor—"I am sure it will relieve you if you take it in the right way." Patient—"When is the best time?" Doctor—"Just before meals. Take about a quart after you sit down to the table." Patient—"A quart! Why, then I would have no room for anything else." Doctor—"Certainly, and consequently no indigestion."—*N. Y. World.*

—"Now, then," said the cashier to his wife, "are you dressed for the journey, my dear?" "All ready, my love." "Got the boodle safe?" "All safe." "What kind of a dress is that you have on?" "It is a pull-back." "A pull back! Good heavens! The idea of your thinking we can escape to Canada while you wear a dress like that! Don't you see I've got on a cutaway coat? Go and put on a dress with a sloping train, and your hat with a flyaway feather. We must take every precaution setting out on such a journey."—*Buffalo Courier.*

FOR OUR YOUNG FOLKS.

THE NEW BABY'S SOLILOQUY.

I is a brand-new baby, just two weeks come to town;
My eyes is any color, an' my hair is soft and brown;
The best of it I'se ain't a girl; that makes me crow with joy!
An' I'll show 'em who is master here when I'se a bigger boy.

I is the first grand-baby my grandpa ever had?
I'se got a lot of grandmas, but only one granddad;
I'se got a lot of uncles an' a good big lot of aunts,
Who I guess are very anxious to see me dressed in pants.

But papa says I'm yet too young, an' mamma laughs a b.t,
Till Rover dog an' baby me finks she must have a fit;
I guess now I will shut my eyes, an' when they see me smile
They'll say "he's gone to slumberland to stay a little while."

—*Irene Dana, in Philadelphia Call.*

TOT'S EXPLOIT.

She Goes a-Begging and Meets with Wonderful Success—Her Triumphant Return Home.

Crash! bang! ting-a-ling-a-ting! went the piano. Mrs. Bevere lifted her aching head from the lounge with a groan.

"Oh, Tot! *won't* you please be quiet for five minutes?"

"Yes, mamma," replied Tot, shrilly, scrambling noisily from the piano-stool, and coming up to where mamma was lying. I was trying to play a jewet with kitty, but she's just horwid to-day, Mamma Bevere. *She* made all that noise."

"Put the kitten out of the room, Tot," said Mrs. Bevere.

"Shall I fan you, mamma?" asked Tot, when the reluctant kitty had been dragged out of the room by the tail.

And two or three gusty breaths from a palm-leaf fan swept coldly around Mrs. Bever's throbbing head.

"Thank you, no, Tot," said mamma. "Won't you go into the dining-room and shut the door behind you? If I could only go to sleep, perhaps I'd wake up with my headache gone. You may tell Mary Ann to give you some bread and milk."

"Shall I sing you to sleep, mamma? I can sing 'Little drops of water' lovely. Shall I?"

"No, Tot," said mamma, in desperation. "I know you must be hungry, so I won't keep you here. Mary Ann may give you an orange, too."

So Tot went, blaming herself remorsefully for neglecting "Mamma Bevere," but an orange was something not to be resisted.

And now the bread and milk and orange were gone, and Tot was making lively, if rather discordant, music on her silver mug with the spoon. It had been raining, but now the shower had ceased, and a beautiful rainbow appeared in the east. Tot had watched it, delighted, till it had slowly vanished; but Tot was quite sure that one end had been sticking in the ground in their garden.

"I am going to dig some gold," she announced to kitty, who was purring contentedly in the warm sunshine which had suddenly burst into the room. "Don't you want to go 'long? Why, you naughty, lazy thing! Don't you know we'll get rich if we go?"

"Now we *ain't* rich, kitty, for I once heard Mrs. French say it was queer that mamma had only one servant, when papa was making so much money. She didn't know I helped do the washing, I guess. When I told Papa Bevere he just laughed and said:

"'Mrs. French is liable to be mistaken.'

"I'll bring you a chain for your neck, kitty, made of twenty gold cents."

But digging gold was certainly discouraging work, and Tot's arms soon began to ache. She knew exactly where the end of the rainbow had been, but she could find nothing there except a rusty nail. Mamma's silver spoon had broken right in the middle. Tot became disheartened. Then a happy thought struck her; she would go a-begging.

She had seen a little girl once who sang and danced, and who got, oh, ever so many pennies!

"I can sing 'Little drops of water,'" thought Tot, "and Papa Bevere says I can dance lovely."

Mr. Smith, the next-door gardener, was tying up some vines that had been beaten down by the rain. His dilapidated straw hat was hanging on the fence. Tot put it on. It was ever so much too large, and flapped dismally over her face when she walked. But beggars must not be choosers, you know.

In a twinkling Tot was out on the sidewalk, with the silver mug which was to hold the pennies clasped tightly in her hand. Oh, naughty little Tot!

There was an old gentleman reading a newspaper out on the veranda of the first house Tot decided to enter. He looked just like her grandpapa, so she wasn't a bit afraid of him.

How he stared when Tot began to sing "Little drops of water," and how he laughed and applauded when she danced!

Really, begging was great fun, Tot decided, when, breathless with her exertions, she held out her mug, and the old gentleman put a shining silver piece into it.

How people laughed on the departure of the funny little figure, which rang their door-bells so furiously and sang and tripped a polka so irresistibly! Most of them knew who she was; but, somehow, no one thought of sending her home.

Tot felt very rich, indeed, as she looked at the shining heap of pennies and silver pieces in her mug.

Two ladies and two gentlemen were playing croquet out on Mrs. French's smooth-shaven lawn. They looked as fresh and happy after the rain as the birds and flowers did.

Mrs. French her-self was reclining in a hammock, reading a book. She was a slender, elegant lady, who talked in a soft voice, which fascinated Tot, in spite of the vague idea she had conceived that she ought to dislike her very much.

"I've come a-begging," announced Tot, halting directly before the hammock. "We ain't rich. My papa says you're liable to be mistaken. We don't *need* more n one servant, 'cause I help do the washing. Shall I sing for you?"

As Mrs. French nodded, her face was a study. She was a lady, with lady-like instincts, and I am sure she felt thoroughly ashamed of herself because of what she had said about the Beveres.

The croquet-players made believe they had not heard, for their faces were very, very grave. Tot wondered why, because they had been laughing a moment before.

After Tot had sung and danced for them, Mrs. French invited her to play a game of croquet. Then tea was brought out under one of the trees, and Tot felt like a dignified young lady, for Mamma Bevere never allowed her to drink tea at home. Mrs. French herself drove Tot home in her pretty pony phaeton.

There had been a coldness between Mrs. Bevere and Mrs. French before Tot's exploit; but after that they became the best of friends again. So Tot's escapade was productive of great good, after all.—*Anthony E. Anderson, in Golden Days.*

THE BOYS' CLUB.

How It Is Carried on, and the Good Time It Affords Its Members.

The Boys' Club is not a school nor a lecture-room, nor any kind of a meeting. It is only a club for the East-side boys, where every fellow can read, or play games, or talk, or tell stories, or do anything that is regular out-and-out fun, and not mischief.

The Superintendent has one or two boys to help him—one to look after the hats and caps, another to keep an eye on the wash-room, and another to take charge of the drawing materials used by the boys who are busied with the study of drawing. These officers, if you have a mind to call them so, take turns, so that every young member of the Boys' Club has a chance to make him-elf useful, and may be promoted to the highest position if he shows himself fit for that honor.

Every night at half-past seven, excepting on Sundays, the doors are opened and the boys file in, down the stairs to the big basement where the club holds its jolly meetings. Show your ticket at the door, give up your hat to the gentlemanly usher, aged nine, and take a check for it. Will you read the picture-papers, sir, or play checkers? Will you read a story-book or indulge in "Go-Bang?" A game, eh? all right; show your ticket to the librarian. He takes it, punches a hole in it, and keeps it while you have your game. Here are a table and five chairs.

On the walls of the room are posted the catalogues of the books in the library. Half a dozen little fellows are reading the enticing lists, and off they go to the librarian, and present their cards for their books. Here's a good, quiet place in a corner, where a fellow can read in peace. There is a great clatter of voices, with every one talking as fast as he can; but your city boy can read anywhere.

Every boy can talk and laugh as freely as in his own home. Make all the noise you like, within reasonable bounds. It is good for the lungs. Who ever heard of a boy who could fold his arms and be truly good all the time. In the Boys' Club every fellow can be as lively as he pleases, provided he does not interfere with any other boy's fun. Only house fun is in order; and, if any boy feels that he must race about the room, the fatherly policeman suddenly wakes up and Mr. Race-horse is invited into the street, where he can run to his heart's content. He can not come again to the club till he learns how young gentlemen behave in the house.

Of course there are rules of some kind. To enter the club, the boy must apply for a ticket, and this ticket is only good for a month. If, during the month, a boy behaves badly in the club-room, he will lose his ticket, and, perhaps, not get another for a long time. All the boys who show that they wish to do the right thing, and treat the club and each other properly, have their tickets renewed every month. You see from this that, really, the club is practically free to any little East-side fellow who wishes to escape from the dismal streets, and is willing to behave himself for sake of the good time the club affords him.—*Charles Barnard, in St. Nicholas.*

BRIDGE BUILDING.

The Extraordinary Structure Being Constructed Across the Firth of Forth.

The great railroad bridge across the Firth of Forth in Scotland will be when completed one of the most remarkable feats of engineering in the world. The bridge will be more than a mile and a half long, so high that the largest warship can pass safely beneath it in any part of the channel, and so strong that the heaviest railway train can be run upon it at the highest rate of speed.

The principle of the bridge is known as the cantilever. A powerful structure of steel, in shape not unlike that of the walking-beam of a paddle-steamboat, rest upon a pier. The weight on one side balances that on the other. But the arms of the two cantilevers do not meet.

Imagine an engine's walking-beam thirteen hundred feet long—almost a quarter of a mile long—resting upon its center, so that it projects in either direction six hundred and seventy-five feet.

Next fancy *two* such cantilevers so placed in the same line that their ends leave an abyss of three hundred and fifty feet between them. This space is filled with an ordinary girder bridge, the ends of the two cantilevers serving for piers.

The process of constructing this bridge is extremely interesting. The structure is largely made of steel cylinders from eight to twelve feet in diameter, and some of them two or three hundred feet long. There will be a length of six miles of such cylinders in the bridge. Some parts of the bridge will cost more than twenty dollars an inch to build.

Four great railway companies unite to construct it, and its total cost will be more than ten million dollars. It will not be finished before the year 1890, even if all goes well.—*Youth's Companion.*

—"Toothpick's were used in Shakespeare's time. "I will fetch you a toothpick now from the farthest point of Asia," is a sentence in "Much Ado About Nothing."

MISCELLANEOUS.

—The engineer of the Washington monument says it will stand 100,000 years, and children need be in no hurry to climb it.—*Detroit Free Press.*

—In British India the large river Sutlej, which has a descent of 12,000 feet in 180 miles, or nearly sixty-seven feet per mile, is said to be the fastest flowing river in the world.

—The love of draw-poker passeth all understanding. If a player is a constant winner he is a gambler, and should quit. If he is a steady loser he is a fool, and should play no more. If it is a see-saw arrangement, the players eat up and drink up the profits, and should be in better business.—*N. O. Picayune.*

—The new paper bottles are said to withstand the action of water, wine and alcohol. It is thought that druggists will be able to furnish them free of charge, just as they provide wrapping paper for dry drugs. The cementing material of the bottles is a mixture of blood, albumen, alum and lime.—*N. Y. Sun.*

—There are about a dozen, more or less, breweries in and around Boston, and the number of barrels of beer manufactured may be counted by the hundreds of thousands. In 1883 there were drunk in Boston 756,140 barrels, and in 1884, 788,882 barrels, an increase of 32,742 barrels. Besides this, there are large importations of ale and porter from Europe.—*Boston Globe.*

—What children want, within the bounds of right, they should, if possible, have. Their wishes should be respected. The small desires of a child are, to him, as important as the great desires of a man, and should as carefully be considered. The wet blanket, "You can't have that," often causes keener pain to a boy than the loss of thousands of dollars in after life.—*School Journal.*

—Dan Rice, the circus clown, is running a ten cent circus in the French quarter of New Orleans. He talks sadly of the good old days when his Floating Palace was the sensation on the Father of Waters, and thousands upon thousands of people swarmed from far and near to see him. He gave an entertainment a few nights ago when not 300 persons were present, and about one-third of those were professional and other deadheads."

—Those people who argue that Grant is a great smoker, Grant is afflicted with cancer, therefore all smokers are afflicted with cancer, are very much like the English tourist who rode upon the box of an American omnibus. He noticed that the driver carried his whip in his left hand. Asking the reason, the driver replied: "I am left-handed." Straightway into the notebook went this astounding bit of information: "Stage drivers in America are left-handed.

—A safety paper manufactured by a Massachusetts mill will make it difficult for anyone to tamper with bank notes or checks printed upon it. The coloring matter of the paper is so prepared that the application of any chemical to remove the ink will permanently change the color of the paper, and an ingenious device is added which betrays at once any attempt to make an erasure. Between the two the enterprising forger will be sure to come to grief.—*Boston Journal.*

—Pete Osterhout is one of the most rascally negroes in Galveston. He was caught stealing poultry and brought before the Justice. "The evidence," said the Judge, "shows that you stole the chickens from Colonel Jones' hen-coop, and the fine should be five dollars; but I'll let you off this time." "Who wants to be let off?" exclaimed the prisoner; "I steals my chickens and I pays my fine, and don't ask nuffin oh nobody. Dis heah mixing up sentiment and bizness am what's ruinin' de kentry."—*Texas Siftings.*

—Dr. Heber Newton says: "Taking the average human life, he would be a bold man who, rightly weighing the manifold daily blessings which come like the sunshine and the dew, would venture to pronounce the lot of man rather of pain than of pleasure. Much of the pain of man is, moreover, to be subtracted from the charges against Providence and to be credited to our human responsibility. The thriftlessness of the poor, the greed of the rich, and the common ignorance of social laws cause most of our poverty."

—Successful experiments have been recently made at Cincinnati with the new electric railway brake. The trial was made with a heavy coal train of ten cars, each car weighing empty about eleven tons and having a tonnage capacity of 40,000 pounds. The loaded train, with full steam on, was put to a speed of forty-eight miles per hour on a down grade of sixty-eight feet to the mile, and brought to a dead stop in 37½ seconds after putting on the brake, the distance run in that time being 445 yards, exact measurement.—*Cincinnati Times.*

—Dr. Dallinger, the eminent microscopist, holds that the development of living organisms in a piece of fish-muscle, previously subjected to a temperature of boiling water, does not indicate spontaneous generation, despite the belief that such a temperature is absolutely destructive of life. He hopes the microscope may yet reveal more about the details of the life of minute creatures, but, in the meantime, he says, philosophy must take it for granted that the principle of life is something wholly distinct from the matter with which it is clothed.—*Current.*

—How many persons have even a rough idea of the average sum upon which by far the larger part of the citizens of the United States are fed, clothed and housed? A recent statistician estimates that eighty per cent. of the population of this country is supported by from forty to fifty cents per capita a day. At the latter figure this makes $164.25 as the average annual cost of living; but, as by average we mean the balance between extremes, there must be many persons who have not even this sum to live upon. That fifty cents a day is a generous estimate will be admitted when it is remembered that many mill operatives earn only from five to seven dollars a week, and that the wages of farm hands run from twenty to thirty dollars a month, and that on these sums several persons are often supported.—*Chicago Times.*

ARMED WOMEN.

The Extremity to Which the Mahdi May be Reduced.

The announcement that Osman Digma has been arming the Arab women, in view of a supreme effort to oppose the advance of a relief party by way of Suakim, is not by any means absurd. From the earliest period of the history the women of the desert tribes were as celebrated for their skill with lance and bow as for that bronze beauty which the composers of the "quasidah" or the "moallakat" were never weary of describing. Before Islam it was the boast of many Arabian tribes, as it was afterwards of certain Tartar hordes, that their women could fight as well as the men: the Himaryites were among the most famous of these. All through those ancient Arabian poems to which Mahomet is said to have referred as final authority for the meaning of certain words or phrases in the Koran, one finds legends of Arab girls celebrated for their equestrianism, their dexterity with the cimeter, and even for the number of men they have overcome in single combat. Islam, by subordinating the woman to man and destroying the idea of female equality, did much to extinguish the warrior-spirit of the fairer sex throughout the greater part of the Orient; but in the deserts of Arabia and Northern Africa something of those ancient ideas still prevail.

And the modern Arab woman who acquires skill with any weapon might well appeal to Moslem tradition in justification of her use of such powers. When Mahomet was struck down at the battle of Ohod, it was a young Arabian woman who stood over him and fought valiantly with bow and sabre in his behalf—keeping back the enemy until she herself was disabled by a severe wound in the shoulder. Still it must be observed that among the very famous warrior-women of Islam who appeared after the death of the Prophet, all did not fight in a strictly orthodox cause. We need not refer to the prophetesses like Sedjah, or female leaders of schismatic movements—some of whom displayed great personal bravery and were treated with shocking cruelty—but will confine ourselves to a brief mention of some other renowned female warriors who went into battle to engage in hard hand-to-hand fighting.

In the first century of the Hegira two remarkable women fell, sword in hand, in a great battle—Djahizah and Razalah, respectively the mother and the young wife of Chebib, who aspired to win the Caliphate by force of arms in the days of Abdel Melik. Chebib was perhaps the finest soldier of his time; he won many victories, and his mother and wife fought always by his side. Razalah on one occasion actually made a vow to recite the second and third chapters of the Koran in the Mosque of Kufa while that city was in the possession of the imperial troops. The second chapter (Sura of the Cow) contains 286 verses; the third 200. Razalah and seventy companions unexpectedly forced a passage through the gates of Kufa, galloped to the mosque and, after the vow had been accomplished, cut their way out again. Several times in battle the young woman attacked the Governor of Irak, the ferocious Haddjadj, and put him to flight. The army of the Caliph finally overcame Chebib in a bloody engagement by mere weight of numbers, and Razalah and Djahizah died fighting to the last. In the second century of the Hegira lived the famous Delhemeh, or Zat-el-Hemmeh, whose name signifies "Lion-heart"—the most renowned warrior-woman in the history of Islam, and the heroine of an enormous Arabian epic. There was scarcely a siege or battle during the three reigns or El Mahdy, El Hady, and of Haroun-al-Raschid in which she did not take part. Joan of Arc could scarcely be compared with her; the huge work in which her deeds are recorded pictures her rather as a rival of that wonderful type in the Nibelungen, Brunehild. It does not appear that she men to whom such women were opposed always lacked the true spirit of chivalry. When, during the reign of El-Raschid, the Chief of the Kharejites, El-Wady, was killed in battle, his young sister, Alfarea—famous for her grace, her beauty, and her poetical talents—buckled on her dead brother's armor, and charged, all alone the conquering army. Yezid, the Chief, shouted to his cavalry, "Let no man lay a finger on her!" but, riding up to her, he struck her horse with the staff of his lance to stay its course, and exclaimed, "Shame! Will you disgrace your tribe?" It was not death she had to fear, but ill-treatment if captured alive. The rough but kindly observation effected its purpose, and she rode away in safety.

It is not very likely that the women of the Arabs about Suakim—a mixed and swarthy race—possess such physical charms as might disarm the English soldiers, much less the Indian contingent expected. But they might certainly in battle win the respect of those against whom Osman Digma promises to lead them by the same warrior-qualities which once distinguished the women of these ancient tribes to which the Arabs of the Soudan are related by blood.—*London Standard.*

A Gambling Incident.

A clerk in a large German counting-house was spending his honeymoon in Italy, and while there a firm paid him 40,000f., owed to his employers. Having the 40,000f., the clerk thought he would go to Monte Carlo. He knew it was the worst possible place for him, because he would be tempted to gamble, but nevertheless being the foolish and weak-minded clerk he was, he set off for the spot. Lest he should be impelled to go to the rooms and speculate with his employers' money, he handed the sums over to his wife to keep. Devoted to each other as bride and bridegroom were they rambled about this very small place independently of each other. The wife, with 40,000f. in her pocket, went to the tables, lost all, and jumped into the sea.—*N. Y. Post.*

—Professor Loomis, of Yale, says that with two exceptions last February was the coldest February known in that section for one hundred years.

MILLINERY.

The Novelties in Spring Millinery Goods, According to an Expert.

The present season, while not specially prolific of striking novelties, has a full complement of attractions.

Spring bonnets are shown in fine split straw and English braids. A new fancy braid, somewhat heavy, is called "tramway" braid. There are all possible modifications and novelties in the combining and sewing of braids to produce odd effects. The shell braid and "row and row" pattern are exceptionally novel, the latter being braids of contrasting colors sewed alternately. Among the favorite colors are blue and white, garnet and white, blue and brown, blue and cardinal, and there are others equally striking. There are also many braids with threads of gold, silver or steel running through them; and there are braids sewed so that there is a center like a crown on each side of the head. Many of these shapes have the brim down over the forehead, others have jaunty gable effects under the brim suggesting a humming-bird's nest in the dainty lace and flowers.

Round hats have high crowns, and some of the newest and highest shapes are very conspicuous. They might do for school-girls, but would scarcely suit the styles of ladies of quiet tastes. A few shapes have crowns that must be ten inches high or more and incline almost to a sharp point. The more conservative shapes are really very attractive, and roll back on one or both sides, in many cases the brim being cut from edge to crown so as to be caught up and allow of large masses of trimmings being filled in just at one side. There are charming "Tam O'Shanter" caps of the new straws in a variety of colors. They will be desirable for early spring wear, but of little use when the bright sunny days come.

Trimmings are in great variety, but those most popular will be the moyen age scarfs of ecru canvas with quaint printed designs in dull colors and gold. The ground material is not unlike rather heavy, round thread scrim. Some of these scarfs are nearly two and one-half yards long and at least eighteen inches wide. They seem very heavy for millinery purposes, but when it is taken into consideration that no other trimming is required, the use of them is less a problem. Square handkerchiefs of the same stuffs are also in great demand, more so even than the scarfs. They trim most effectively, especially on the tall hats where a good deal of spread is required. Tiny pins in great profusion attach these materials and make bows and puffs and rosettes of them; the variety of arrangements being limited only by the ingenuity and patience of the designer or trimmer.

Feathers will be in fair request for trimming tall hats, and will appear in close bunches just over the brims of the bent-in bonnets. Ostrich plumes, ten to fourteen inches in length, will be used for some of the very high crowned hats, but must be very artistically handled and suitably worn else they will destroy a really superb effect. One of the most perfect of this class is a dark brown English straw with fourteen-inch plumes, one curling upward and around the front, the other rolling over the first and drooping slightly below the brim in the back. The stems of the plumes are set into a mass of plaited gold lace, with fine straw flowers and trembling bead pendants.

Flowers are as nearly perfect as it is possible for skill to make them. The creamy velvet jonquils and daffy-down-dillys" tempt one's sense of smell by their natural appearance. More velvet is utilized in flowers than ever before, and hosts of delicate crape flowers will be used later. For immediate demand velvet and straw flowers, gold wheat, oats and gold-tinted gold-dusted flowers and feathers are in the ascendant. Early spring roses, the ones we used to watch for while yet the snow-drifts lay in sheltered places in the fields, come in heavy sprays of buds, blossoms and leaves. Ferns will be very popular, the early grown, just uncurling fronds, and shaded brown mushrooms, chestnuts in velvet-burrs, hazle-nuts with dew-sparkles on them, grasses and pretty weeds; for indeed flowers are only weeds when they are out of fashion or before fashion has patronized them.

Ribbons come in great variety and novel styles. Widths known heretofore as sash ribbons will be used for trimming, massed in rosettes, bows and knots upon the tall-crowned hats. Gauze and grenadine ribbons promise to be very popular. They are dotted, striped and cross-barred with velvet and chenille, and are charming. Surah ribbons and those in watered silk, or combinations of velvet and satin or watered stripes, will be received with favor. Indeed we are promised a revival of watered effects, not only in millinery but in dress materials. There are very soft Ottoman ribbons in market, but they receive very little attention by the side of the novelties. Scotch plaid and Madras effects in surah ribbons, scarfs and handkerchiefs will be much sought after for trimming straws.

Lace will be among the almost indispensible articles in millinery, and will yet be very conservatively used. Tinsel laces rank first in the list. Wide gold lace will be used for upright plaitings in which to set the ends of flowers, plumes and trimmings of velvet or silk. Widths from one inch to four or five inches will be used. Gold combined with brown will be fashionable. Some silver will be used, but it will not be specially in request. Real old-time Lima laces are coming into popularity again, and the standard Spanish laces in Escurial, hand-run and Van Dyke patterns will be included in the schedule of millinery materials.

The new piece goods for millinery uses are very desirable as well as varied in style. Canvas cloths in ecru with printed middle-age designs like the scarf and handkerchiefs are shown. Embroidered velvets, embroidered surahs, soft watered effects, embroidered veiling and pongees expressly for millinery and matching dresses, are among the latest importations.

High hats will be very profusely trimmed, indeed one might fear, in the light of conservative taste, that they would be overdone. Bonnets will show many puffed crowns and shirred brims of the various popular fabrics, and full garniture of some sort of lace.—*Demorest's Monthly.*

MR. GILL'S DAUGHTER.

Poor Katie! A great sufferer she was, and most patiently did she endure in the hope that at last her sufferings would come to an end. She was just budding into womanhood; a fine-looking girl of nearly nineteen, who had, previous to her attack of illness, enjoyed robust health.

Let her mother tell the story, as she told it to two of our editorial friends who recently spent an evening at the house.

"Katie's illness came on slowly, with great pain in her thigh and hip. For a while she kept on going to school, but the pains became so severe that she had to stay at home, and most of the time He down on a little lounge here in the sitting-room. We tried the best physicians we could get. The disease baffled them all. One said it was ulceration of the thigh bone, and wanted to have the poor child undergo a terrible operation. It turned out to be sciatic rheumatism. Poor child! how she did suffer! About four o'clock in the afternoon she would begin screaming with pain. She couldn't help it. She would scream and moan till about four in the morning. Then she would fall asleep from weariness, and sleep for some hours. This went on for about eight months. During the nights neither she nor I could sleep.

"Katie was a great reader. One day, in a paper, she saw an advertisement of Athlophoros. She asked me to get it and see if it wouldn't cure her. We had tried a good many different things, but I thought we would try this. And I went and got a bottle. I gave her a dose of it towards evening. It was simply wonderful how it quieted the poor child's pain and put her into a gentle sleep. She slept nicely until ten. Then she was in a great perspiration. She waked, and I gave her another dose, for the first one had done her so much good. Then she fell asleep again and slept till morning. Her pain was gone. She had hardly any returns of it. The Athlophoros did the work for her most completely.

"But the terrible sciatica had drawn Katie's leg up, and made it shorter than it had been, by several inches. She was lame for life, although the rheumatism was all driven out of her. She had to walk on crutches. One day she fell down stairs and was so badly hurt that she had to be taken to the hospital. There she suffered a great deal, and after some weeks she died.

"Father Tacheider, of the Paulist Fathers, saw much of Katie during her illness, and knows all about us. Go and ask him, and he will tell you all about it.

Some time ago we gave a letter about Katie's case, and it was published. We have had numerous inquiries in reference to it, all of which we promptly answer.

"I must tell you," continued Mrs. Gill, "of our neighbor, Mrs. Summers, and her eleven-year old boy. The boy had one of the most terrible attacks of rheumatism I ever knew a boy to have. I had a little Athlophoros left in the bottle from which Katie had taken. I gave it to Mrs. Summers, and she gave it to the child who was screaming with pain. When Mr. Summers came home, he was surprised to find the boy sitting up, free from pain, and cheerfully singing. I wish you would go and see them. They live not far from here, on West 12th street, No. 905."

Mr. Gill added in his own behalf:

"I have had a good deal of rheumatism myself, chiefly in my shoulders and arms. But I took Athlophoros and I got rid of the trouble. I did not have to take much either. I found the medicine acted very quickly."

The Rev. Father Peter Tscheider, assistant pastor of the Church of the Holy Family, was found at his pastoral residence, No. 417 West 12th street, Chicago. Father Tscheider took pleasure in saying that he knew Mr. and Mrs. Gill, and that he esteemed them highly; also that he had seen Katie frequently during her illness, and knew all about her wonderful recovery from sciatica, and her subsequent injury and her illness at the hospital.

If you cannot get ATHLOPHOROS of your druggist, we will send it express paid, on receipt of regular price—one dollar per bottle. We prefer that you buy it from your druggist, but if he hasn't it, do not be persuaded to try something else, but order at once from us, as directed. ATHLOPHOROS CO., 112 Wall Street, New York.

Painful Impressions.

A remarkable characteristic of the average newspaper reader of the day is the eagerness and avidity one seeks for painful impressions caused by perusing accounts of human suffering. Is there a railroad accident, a steamboat disaster, a hanging, a lynching, a murder or anything of this nature vividly written up and glowingly pictured in reportorial descriptive style, it at once becomes the most interesting item of the paper. Managers of our large and most successful metropolitan dailies pander to this corrupt and morbid taste of their patrons. A reporter will be dispatched a hundred miles to gather the latest and most minute details of some licentious rape or revolting murder, while the deeds of the good and the virtuous are never known outside a narrow limit.

"Full many a rose is born to blush unseen
And waste its fragrance on the desert air."

All this is evidence of mental disease, a truth that can not be contradicted. They that are clothed and in their right mind loth evil and a recital of evil ways; with them it is "peace on earth and good will toward men." "Heaven on earth" is printed on their banner, while "all their ways are ways of pleasantness and all their paths are peace." Not all are conscious of their mental impairment; so long have they suffered from urinary, digestive and nervous disorders, that they consider their feelings and impressions natural and common to even healthful individuals. But if all such should regain perfect health and strength of mind and body by using DR. GUYSOTT'S YELLOW DOCK AND SARSAPARILLA, they would experience a change of feeling that would be most gratifying and pleasurable.

SMOKE "THEO" SOLD EVERYWHERE
5 CENTS. Positively the Best. Made only by the N. Y. & Havana Cigar Co., 57 Broadway, N. Y. ASK FOR IT.

CONSUMPTION.
I have a positive remedy for the above disease; by its use thousands of cases of the worst kind and of long standing have been cured. Indeed, so strong is my faith in its efficacy, that I will send TWO BOTTLES FREE, together with a VALUABLE TREATISE on this disease to any sufferer. Give express and P. O. address.

SATURDAY, APRIL 25, 1885.

In our paper of last week we called attention of our readers to the object and purposes of the Baltimore and Ohio Immigration Company. We trust all persons who have land to sell in our county have considered the matter carefully, and if, after such consideration, they believe the Company will aid them in finding purchasers for their surplus land, it will be a great benefit to our county. If those who have read our article of last week have not duly considered the questions involved, we urge them to do so, as it may be a matter of great importance to them.

As we have heretofore suggested from time to time, we confidently believe that it would be infinitely better for many of our land owners if they would sell a large portion of their land. In many cases men own large tracts of land upon which they have been paying taxes for years and from which they receive no income or return from the money thus expended, If a portion of these tracts could be sold to settlers and improved by them, that would certainly add value to the remaining portion of land.

So far as the settling or selling of land through the company or otherwise is concerned, much depends upon the prices demanded for land, and if a demand for land should spring up through the opportunities offered by the company, we hope owners will not fix their prices too high, because such a course would drive away settlers and would render the efforts of the company of no use. If any benefits are to accrue to our people by reason of the opportunity offered in the way we have pointed out, they can only be received by mutual fair dealing between the company and land owners.

The standing of the officers and directors of the company is a sufficient guaranty on the part of the company, and we advise our readers to write to Dr. W. T. Barnard, the Secretary, for a prospectus and general information.

Cleveland's Policy.

The Washington correspondent of the Baltimore *American* says in that paper of Tuesday:

The President has had occasion to announce his policy once more about office giving. Talking the other day with one of the territorial delegates, who had called to say good-bye and give a parting word of advice, he said that he proposed to move very slowly, and that he could not turn men out of office simply because they were Republicans. "Well, Mr. President," said the delegate "I wanted to know something of your policy in that direction, so I can tell the people on my return just what to expect."

"You can say to them that I have been so pressed with other business that I have not had time to think about the territories yet. But when I do reach them, I cannot make sweeping changes. I cannot turn out a good officer simply because there is a cry for a change," was the President's answer.

Mr. Cleveland won't have to say this more than a hundred times more before the place-hunters begin to understand it. Some of them already catch his idea, and the crowds in the hotel lobbies here are beginning to show the effects of it. Another thing is noticed: In cases where there is a hot contest over any particular position, the President often urges a compromise. "Why can't you agree on somebody, and save me the trouble and responsibility of settling this thing?" he often says to the men who are pressing rival candidates for some position. "Why not lay aside these candidate over whom you are quarreling, the appointment of either of whom would cause much dissatisfaction with a good many people? Why can't you drop these men and agree on somebody else?" This advice, however, seldom results in a solution of the problem, for when your average politician sets his heart on any particular scheme, he is never willing to give it up unless he sees something better within easy reach. It is, therefore, pretty easy to tell what the President's general policy is to be in regard to offices. He will appoint men to places when the terms of the present incumbents expire, and will slowly make changes in the offices which have no fixed terms, refusing to remove men except for very good reasons, and leaving a very large number of Republicans in the smaller offices. That this will make some heart-burnings and party dissatisfaction goes without saying, but that it will make him popular with the people generally is quite certain. This much for what the President himself will do. It is not so sure that the heads of the departments will observe the same rule. It is hardly to be hoped that they will. But as far as presidential appointments are concerned, there is a fixed conviction here in Washington that the above policy will be adhered to.

The Washington correspondent of the Baltimore *Sun* says in that paper of Monday:

Mr. R. D. Johnson, of Cumberland, was in town again yesterday with ex-Representative Walsh, who is also urging him for the position of internal revenue collector for Maryland. Gov. Hamilton and that wing of the party affiliated with him will make a strong contest for Mr. Johnson, while Senator Gorman and Representative Compton will put in their best licks for Dr. George Wells, of Annapolis. The District of Columbia is included within the jurisdiction of this collection district, and it is rumored that one or two patriots residing in this city are thinking of putting in an application. It is not linkly, however, that the appointment will go out side of Maryland. As it is understood that the present collector, Mr. Sellman, reports that the services of emgloyes whose compensation aggregates $4,000 per annum can be dispensed with, his recommendation, if approved by the Treasury Department, will result in lessening the patronage of the new appointee, whoever he may be, to that extent. The Western Maryland Democrats will doubtless not concur in his suggestion that the stamp office at Hagerstown can be abolished. It may be anticipated that the friends of all the applicants for the collectorship will agree in opposing any action by the department in advance of the new appointment, but it is just possible that the department will not be influenced by such considerations.

War Rumors.

LONDON, April 20. — Dispatches which have passed between this city and St. Petersburg in the last forty-eight hours have resulted in further widening the differences between both governments, arising out of the Russo-Afghan frontier embroglio. An attache of the foreign office stated to a *Central News* representative to-day that the situation had grown very serious over Sunday, and that a war seems now almost inevitable. "The Russian officials," said he, "emboldened by their success with regard to Penjdeh, have made further demands which I fear will force a war or result in the utter humiliation of England in the eyes of the world."

It is stated on the semi-official authority that the Russian Government has greatly increased its demands with regard to the Afghan boundary line, and that Russia will not yield one inch, nor in any way seek to avert war. These fresh demands are said to have been accompanied by a note to the effect that England must either concede them or fight.

Alarmists are predicting that war with any Power possessed of a decent navy would result in the presence of a hostile fleet at the gates of the Tower. Their prediction is made in view of the weakness of the defenses of the River Thames, and it is argued that the incomplete and untried system of torpedo defense, so much relied upon by enthusiastic military engineers, might prove inadequate to the proper protection of the metropolis. A society has been formed which has for its object the organization of an extra naval reserve force, composed of boatmen, watchmen and others at present engaged in trade on the Lower Thames. This contingent would be expected to act as a volunteer brigade for the defence of the river. The society proposes to shortly send a deputation to wait upon the Government for the purpose of procuring official sanction to their Thames defense scheme.

LONDON, April 21—Earl Granville, British foreign minister, in the House of Lords this afternoon stated that the government had come to the conclusion that the condition of affairs justified putting the army and navy and the whole of the auxiliary forces in condition of immediate readiness for service if required.

The governmet has asked for a credit of £11,000,000 for the army and navy account. Of the 11,000,000 pounds the sum of 4,500,000 pounds is for war purposes in the Soudan, and 6,500,000 pounds for other naval and military prepartions.

Capt. John M. Mentzer, editor of the Hagerstown *Herald and Torch*, died on Thursday, of last week, after a long illness, aged 57 years. He was a brave Union soldier and as an editor he was intelligent and fearless. He leaves a wife but no children.

Tales of the Disappointed.

WASHINGTON, April 12.—One of the worst cases of disappointment is that of a distinguished Democrat from a Southern State. As the member of the National Democratic Committee from his State he came to Washington early and took rooms at one of the principal hotels. He was in no Ring, and in no sense a Boss. All that he wanted was a fair deal and celerity of movement. After the inauguration, Democrats from his state came on for what he had provided for them, subject to the President's approval, about which no doubts were entertained. Contests over the offices were avoided, and there was a fine feeling over the prospective good things. The expectants waited. One by one the offices they were to have went to others. The committeeman faithfully visited the White House, but he got no satisfaction. The President did not seem interested in him or in his friends. Finally, when nearly the last of the coveted places were filled by strangers, he gathered his disappointed friends around him and said:

"Generally I can do tolerable justice to any subject I understand, but this is beyond my powers. I would go on and do my best, but it's no use. You all know how it is yourselves! Boys, let us take a drink together, and then we'll all go home and let the blank things go to the tropics!"

Senators and Congressmen have their occasional jokes in the White House if they are out of humor with the President. A Senator entered the President's room one morning and inquired for a map of the United States, which he scrutinized for some time. "What are you looking for?" asked the President.

"I was seeing if my State was still in the Union, I see it is," replied the Senator.

"How is that?" inquired the President.

"Oh, as you have given it no attention I did not know how it was."

Both smiled grimly.

What Doctors Don't Know.

It is rather unfortunate for the medical profession that whenever there is an eminent patient under treatment, and the public interest in the case is so great as to justify daily or hourly bulletins from the sick-room, strong differences of opinion should exist among the attending and the consulting surgeons. During Garfield's illness it was insisted for a while that the patient would recover, though it afterward came out that some of the surgeons from the first regarded recovery impossible.

In Gen. Grant's case, however, it appears that all the doctors regarded his disease as certainly fatal; and now it is said they are divided in opinion whether his life has ever been at any time in danger. One physician, it is said, still adheres to his opinion that the malady is cancer; others say it is not cancer at all, and that the patient will recover. One thing is certain—the doctors all expected from hour to hour that Grant would die, and the patient refuted their diagnosis by recovering from his prostrated condition and regaining a considerable store of strength. He now walks about the house, goes down stairs to his meals, looks out the window and salutes his friends, and in other ways sets at naught medical predictions.

A few weeks ago, however, the doctors had a consultation as to whether it was advisable to cut out the cancer. The operation, said one of the surgeons, would require the division of the jawbone and its removal, the cutting out of the tongue and other organs; and this was deemed so grave an operation as to be impracticable on account of the weakness of the patient. There was no doubt expressed that it was a fatal cancer—the only doubt was whether the patient was strong enough to bear this fearful operation. Grant's weakness, therefore, saved him from this dreadful mutilation, and the death that would in a large proportion of cases result from it. And now it is said there is no cancer, and that the strength has returned.

Yet these physicians have carefully guarded themselves against adverse criticism by giving out as few facts as possible. They have suffered to escape very little in the way of details upon which the medical profession outside could base an opinion. Altogether, the impression made upon the public mind is very painful, and a distrust of medical science is freely expressed.—*Balto. American.*

According to an interview, Senator Harrison, of Indiana, thinks something more serious than appointments will yet trouble President Cleveland. The main body of the Democratic party is at war with the silver policy of the executive, and there are hot times ahead in a fractional fight between the Randall and Carlisle wings over the tariff,

Cancer of the Tongue.

Dr. Jesett, surgeon of the London Cancer Hospital, states that out of 2,227 cases of cancer known to him, the tongue was the seat of the disease in 190, or 8.5 per cent.; the breast in 697 cases, or 31.3 per cent.; and the uterus in 12.3 per cent. In 2,412 cases given by other surgeons, 8 per cent. were upon the tongue. Irritation is a cause of cancer, and one cannot, therefore, be surprised that the tongue should be frequently affected. Curious and broked teeth, with rough, sharp edges, against which the tongue plays; the large quantities of tartar which collect upon the teeth, false teeth, especially when the plates fit badly, or are of inferior materials; smoking, particularly the short clay pipe, with its jagged end; ardent spirits; hot condiments, chilies, pickles, etc., may all be placed among causes of tongue cancer. Phthisis and syphilis increases the danger, though the liability, in a weakened system, of one kind of ulcer to change into another, and heredity appears to be traceable in some instances. Dr. Jesett's advice should be noted of all men. He says: "I would in all cases of suspicious ulcer of the tongue, if after ten days' or a fortnight's treatment it did not commence to heal or assume a healthy appearance, strongly advise the excision of the ulcer. Should it prove after its removal to be innocent, I should know my patient was not a bit the worse for its loss, while we would have been prevented from running the risk of further mischief. It is unfortunately, very rarely that we are able to see patients at this early stage, and when we do it is very difficult to imbue them with the gravity of the import of these small nodules or ulcers until the former have ulcerated, and they have infiltrated deeply into the substance of the tongue; but still, up to this point, if the glands of the neck and submaxillary region remain free much can be done by the removal of the diseased tissues." When it is remembered that no specific for cancer is as yet known, and that cancer once developed is hopeless, the importance of this advice cannot be overestimated. Care of the general health after the removal of a very early stage of cancer might prevent its reappearance.

Coupons Good for Taxes.

WASHINGTON, April 20.—The United States Supreme rendered an important decision to-day in the group of cases known as the Virginia coupon tax cases, involving the validity of the recent legislation of that state with reference to the payment of state taxes in the coupons of the state's bond. The decision was against the state and in favor of the bondholders on all material points. The court holds that all the legislation of the state which attempts to evade the obligation under which it rests to receive the coupons of its bonds in payment of state taxes is unconstitutional and void, because it impairs the obligation of a contract; that the taxpayer, having once made a due tender of coupon in payment of his taxes, is under no obligation to pay such taxes in money, and that a tax collector who attempts thereafter to forcibly collect such taxes by levying upon the taxpayer's property is not shielded by the legislation of the state, but makes the attempt at his personal peril. The court holds furthermore that a suit brought against a tax collector for seizure of a tax payers property, after due tender of coupons, is not a suit against the state, but is a suit against an individual trespasser acting without the legal authority of the state. The opinion was delivered by Mr. Justice Matthews. The chief justice and Justices Bradley, Miller and Gray dissented, Justice Bradley delivering the dissenting opinion.

The whole country has been informed, through the medium of the newspapers, that the McCormick heirs of Chicago, had given the very large sum of $100,000 towards the endowment of a theological seminary. At the same time it is announced also through the press that the 1,600 workmen in the large manufactories of the McCormicks have struck against a 10 per cent. reduction in their wages. These two facts contrast very disagreeably. Perhaps the reduction proposed would in the course of a year amount to as much as the donation to the theological seminary. Was the first the natural outcome of the latter? Then, again, while this great gift was given to the noblest of purposes, it may nevertheless be questioned whether the money would not at this particular time do more good if distributed among the needy families of these 1,600 laborers. At all events, if the business of the McCormicks will allow of such liberal gifts it will also allow of the payment of living wages to those who have been directly the means through which such a public benefaction has been made possible.

Takes a Walk on the Street.

NEW YORK, April 21.—At 7 this morning the curtains were opened in General Grant's residence. At 8:20 A. M. Dr. Douglas left the house. He stated that the General slept through the night without disturbing him even once; that he was much improved after a drive yesterday, and that he would go out to-day. As far as can be gleaned from the increased amount of exercise taken by the General, the Doctor thinks he is gaining in bodily strength. The swelling at the base of the tongue, however, still contingues, with a little sloughing.

The *Sun* editorially declares that Gen. Grant's hemorrhage was caused by a sore which has now disappeared; that he has not had cancer; that the doctors now admit it, and that Shrady and Douglas have got a good deal of free advertising and are sharp fellows.

At 4 o'clock this afternoon the General in an overcoat, high hat and neck scarf left his house and walked down the steps. Behind him came Col. Grant, who walked beside him but not touching him. The General walked to the corner of Sixty-sixth street and Madison avenue, there turned and paced back. He used a cane and walked slightly limping, but there was nothing of tottering feebleness, and as he was congratulated during the little walk, he responded with "thank you," in a voice that was clear and firm. The Colonel slightly assisted him in mounting the steps on his return.

A Japanese House.

In describing the Japanese village at Knightsbridge, the London *Telegraph* says: The houses are built of wood and bamboo, and stands on posts raising them about eighteen inches above the grounnd. The floor is composed of thick rush mats called tattams, each five feet ten inches long by two feet ten inches wide. The size of the house is invariably determined by the number of these mats used, and a Japanese, in giving an order for the construction of a house, would at once indicate the kind of structure he required by saying that it must be so many mats in area. Thus, an ordinary house will have the floor covered with three or four mats, whereas that of a wealthy person might have twenty. Commonly the buildings have only one floor, but sometimes another is added, and one of these is erected here. Access to the second floor is obtained by a ladder inside, and there is a small balcony running round, intended however for ornament and not for use. The fronts of the houses consist of sliding frames filled with paper, and all the windows are also of paper, and very thin texture. Each house has its shrine inclosing a god, and some of these shrines are very elaborate and beautiful pieces of workmanship. The internal decorations usually consist of paper, printed or painted with flowers and various designs, but in some cases there are also most ingenious and beautiful effects produced by means of embossed paper and silk.

The Cost of the White House.

Most people believe that the $50,000 a year which the President gets as his salary is the sum total. This is a mistake. The estimate of the amount which Congress is to appropriate this year lies before me, open at the page relating to the President. I see that $36,064 is asked for him in addition to his salary of $50,000, to pay the salaries of his subordinates and clerks. His private secretary is paid $3,250; his assistant private secretary, $2,250; his strenographer, $1,800; five messengers, each $1,200; a steward, $1,800; two doorkeepers, who each get $1,250; four other clerks at good salaries, one telegraph operator, two ushers getting $1,200 and $2,400, a night usher getting $1,200, a watchman who gets $900, and a man to take care of fires who receives $864 a year. In addition to this there is set down $8,000 for incidental expenses, such as stationery, carpets and the care of the Presidential stables. And further on, under another heading, there is a demand for nearly $40,000 more. Of this $12,500 is for repairs and refurnishing the White House; $2,500 for fuel, $4,000 for the green-house and $15,000 is for gas, matches and the stables. The White House, all told, costs the country in connection with the President considerably over $125,000 a year.

Babyhood, the only periodical in the world devoted wholly to the care of young children, has succeeded in securing the services of eminent specialists in every subject with which it deals. The April number contains aaticles on "The Care of Children's Hair," by Prof. Geo. H. Fox, M. D.; "Isolation in Contagious Diseases," by Dr. L. Emmett Holt; "True Croup," by J. H. Ripley, M. D. &c. Under the title of "Domestic Disinfections," George M. Sterberg, major and surgeon, U. S. A., publishes some of the results of the recent Government investigation into the properties of the best disinfectants. Among the miscellaneous articles is an especially entertaining and practical one, by an anonymous lady writer, entitled "Nurse's Day Out." Marion Harland's writing is an attractive as usual, and the "Baby's Wardrobe," "Nursery Problems," and other departments contain the accustomed variety of useful hints. [15 cents a number; $1,50 a year. 18 Spruce Street, New York.]

The New Era of Reform.

Pittsburg Chronicle.

President C-l-v-l-n-d: "Are you getting your department into shape?"

Att'y Gen'l G-r-l-n-d: "Yes, your Excellency, I've sold off two wagons, three sets of harness, a billy goat and six curry combs."

President C-l-v-l-n-d: "That's right. Economy and retrenchment are the order of the day. The public will applaud you. Can't you keep it up?"

Att'y Gen't G-r-l-n-d: "Why, there is a coal scuttle and two tin spittoons——"

President C-l-v-l-n-d: "Sell them! Sell them! They are the relics of an extravagant and corrupt party. We must show the people we are earnest in reform."

Att'y Gen'l G-r-l-n-d: "But—ah, I chew tobacco."

President C-l-v-l-n-d: "Get a soap box then and fill it with sawdust. Don't let two tin spittoons stand between the Administration and its duty."

New Causes of Pneumonia.

PHILADELPHIA, April 17.—Major Sternberg, of the United States army, who is detailed at the Johns Hopkins University, Baltimore, investigating causes of disease, stated before the Pathological Society of Philadelphia to-night that pneumonia was simply the failure of the system to resist the ravages of a micrococci or sort of vegetable fungus growth that exists in every healthy human saliva, but differs in virulence, being greatest among the colored race. He gave results of the fatal effects on various small animals of injected saliva from medical men in different parts of the country. He injected his own saliva into a number of rabbits, and declared that they would die within twenty-four hours with symptons similar to pneumonia.

Secretary Lamar, in conversation with several Democrats, one of whom remarked that there was dissatisfaction in the party at what was considered the dilatoriousness of the administration in removing Republicans and putting in Democrats, said, somewhat significantly, that it should be remembered that not only a new party, but new men had come into control of the government; that the men in charge of the departments could not familiarize themselves with the vast interests and duties entrusted to them in a day, and it was better for the country for the administration to proceed slowly and cautiously in making selections for office. Secretary Lamar intimated quite plainly that a great deal of harm might result from undue haste, while nothing but good could come from deliberation.—*Washington Star.*

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, April 20, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5¾@5¾ c., that generally rated first quality 5¼@5½ cts; medium or good fair quality 4@5 cts; ordinary thin steers, oxen and cows 3½@3¾ cts; extreme range of prices 3½@5¾ cts; most of the sales were from 4¾@5¾.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 1,202 head, against 1,229 last week and 1,740 head the corresponding week of last year, and the sales were 681 head, against 831 last week, and 984 head the corresponding week of last year.

The wholesale market was more active and higher than it was last week, and the retail trade opened fairly active at a fractional improvement on the better grades—of which there was a fuller representation than last week. But the advance was early lost and trade became very sluggish, the market closing dull, and, in some instances, lower figures ruling than last week. There were few as common Cattle as last week, and a larger line of the middle grades. Prices 3½@5¾c., with most sales from 4¾@5¾.

THE SWINE MARKET.

The supply this week is largely in excess of last week's offerings, but it is generally reported as about equal to a fair to good demand, at prices near about the same as those of last week. The quality is fully as good as it was last week. We quote prices at 6@6½c., and extra at 6¼c. net; same time last year 7@8½c. net.

THE SHEEP MARKET.

A fair trade is generally reported in nearly all the yards, in presence of some little outside demand and the usual purchases of our home butchers. The quality will scarcely average as good as it was last week. The supply falls some nine hundred head less than last week. Prices for wool sheep ranged from 3½ to 5½c.; clipped 3@4¼; spring Lambs 9@12½; fall lambs 5@6. Same time last year clipped sheep sold at 3@5¾c.; wool sheep 4@6¾; lambs 8@10¼.

LOCAL NEWS.

LODGE MEETINGS.

OAKLAND LODGE, I. O. G. T., meets in Sturgiss' Hall every Tuesday night.

LOCAL BRANCH, No. 85, of the Iron Hall, meets in same Hall 1st and 3d Saturday nights of each month.

SHEALTIEL LODGE, No. 122, I. O. O. F., meets in Legge's Hall every Monday night.

ALTA LODGE, No. 574, K. of H., meets in same Hall 2d and 4th Thursday nights of each month.

PATMOS COUNCIL, No. 386, A. L. of H., meets in same Hall 2d and 4th Friday ntghts of each month.

—Florida oranges at Lakin's.

—Ladies' underwear at M. L. Scott's Baltimore Store.

—Lemons and cocoanuts at Lakin's.

—M. L. Scott has now open spring and summer millinery goods. Now is the time to select your hats.

—Join Nydegger's watch club and get a watch worth $26.00 for $20.00, and have 20 weeks in which to pay for it.

—All persons indebted to the late firm of Harne & Sons are requested to come forward and settle immediately.

HARNE & LAWTON.

—If you want a good cigar call at Lakin's.

—John Strawser, committed to jail last week by Justice Gonder, charged with maliciously injuring the dwelling house of E. Jamison, made his escape Wednesday about noon and is still at large.

—We note some little activity in the way of building and improvements in Oakland this spring. Mrs. Sincell has commenced the erection of a building on Railroad street, to be used as store rooms. The building will be 30 by 35 feet. Mr. G. H. Pritchard will also erect a business house on Third street between Oak and Alder streets. Mr. A. Nelson will make extensive improvements to his place of business on the corner of Third and Oak streets. Other improvements in a smaller way are contemplated by our citizens.

—On Friday of last week, about noon, considerable excitement was occasioned in Oakland by the report that Clarence, the two-year-old son of Mr. Samuel Boyer, had been drowned in the cellar under Mr. Boyer's residence. On inquiry it was ascertained that the child had fallen into the cellar, which contained about three feet of water, was rescued by its father apparently lifeless, but was resuscitated by the active exertions of Dr. J. Lee McComas and others. The water was almost ice cold and the little fellow was threatened with pneumonia for several days, but is now apparently as well as usual.

Join Nydegger's Watch Club.

Are you a member of Nydegger's watch club? If not, don't fail to join at once.

Notice!

All persons indebted to the undersigned, will confer a favor by paying all they can by May next.

CHARLES SCHLOSSNAGLE.
Accident, Md.

Chance for Investment.

For sale or rent, two cottages, furnished, with use of horses and carriages.

MRS. E. A. KILBOURN,
4 11 Oakland, Md.

New Furniture, Carpets, &c.

Mr. John Shartzer has just returned from Philadelphia and Baltimore with the finest lot of Furniture, Carpets, Matting, Oil-Cloth, Wall Paper, &c., ever brought to Oakland. Call and get his prices before buying elsewhere,

Bread, Cakes, Pies, &c.

Mr. William Roth has purchased the bakery and confectionery heretofore owned and operated by Mr. C. P. Smith, on Second street, Oakland, Md., where he will keep constantly on hand fresh bread, cakes, pies, &c., &c., as well as canned goods, candies, nuts, fruits, &c. Ice cream in season. Give him a call.

For Sale.

House and lot in Oakland. House contains 4 rooms, two 14 by 17 feet, one 12 by 17, and one 6½ by 11. Hall 6½ by 7; pantry 7 by 8, shelved; ceilings all 10 feet high; back porch 7 by 12; front portico 6 by 12, from which there is a good view of Oakland and of the depot and of the B. & O. hotel. House newly spouted with tin. Lot corners on Pennington and Bartlett streets, and runs back to an alley; is 160 feet deep and 50 feet front. Title good. I will also sell at private sale, a Walnut Bedstead, Walnut Bureau, two Rocking Chairs, Poplar Wardrobe, Walnut Marble Top Center Table, Husk Mattress, one-half dozen Maple Chairs, Orb Heating Stove, with pipe, Flowered Carpet, and several pieces of Rag Carpet. F. P. ARNOLD.
4 11 3t Oakland, Md.

[For The Republican.]

Autobiography.

Autoo. Of the begining of my life I can truly say nothing, only on hear-say.

This is how I heard it:

On the eleventh day of June, in the year of grace, 1838, some seven miles east of what is now the city of Wooster, Ohio, and was then the city of nothing, save a few very small and very plain houses, a boy-baby was added to a growing family—a very small, and not particularly prepossessing baby, with a countenance squally, and a white head: the father's name was John, and the mother's Mary, and the family name ——. The house stood in the woods, and the woods was full of white-oaks, hickorys, deer, turkeys, boggy bottom and indian turnips.

The father and mother of this new boy-baby had come from Pennsylvania direct, some six months previously: before that, the first had come from Switzerland, and the second from Baden—eigh-year-olds, sailing in the same ship, and thus begining "the voyage of life" together at a somewhat tender age. What they most remember now was, that they had come to the "back-woods," in a one-horse wagon, drawn by the black horse "Coly," were living in a cabin, and had three boys and one girl to provide for—to clothe, feed and—flog.

One of the largest facts about me, was room to grow. But this, on the hear-say authority, was not notably appreciated: at the end of my first six months of pioneer experience my weight was only bare six pounds. However, in this case, the child was *not* the father of the man—for the wielder of this pen can to-day balance about 220 lbs. at the other end of the beam. But some forty-six years have gone into the working of this change, so that I have been adding but a fraction over five pounds per year to my individuality, on the average. As to my taxable value at the outset, I heard—so far as memory serves me—no close calculation. This I know, of my own consciousness, in the neighborhood of my twelfth birthday, I would have exchanged my American independence for the right to a day's fishing, or the ownership of a new "barlow" knife. But years have brought their changes in this relation too; so that to-day, I would likely be disposed to estimate myself at a full market price—possibly rather higher than some of my acquaintances. UNCLE JOHN.

Miners Ask for More Pay.

CUMBERLAND, MD., April 17.—At a meeting of the miners from the different mines in the Cumberland region, held some time last week, it was decided to ask the companies to increase the rate of mining coal from 40 to 50 cents a ton, the same as paid before the reduction last December. The presidents of the different coal companies were to-day notified by letter of the increase asked for by the miners. In addition to the increase, the letter asks for a compliance with the laws of Maryland in reference to hours of labor. The increase is to date from May 1.

The miners claim that the reason for asking for an increase is that they are unable to maintain their families on the present wages. It is also urged that the men who are required to work by the day have to work 11 hours without any increase of pay. On March 15 the companies posted a notice that after that date the men would be required to work from 6 A. M. to 6 P. M., with one hour for dinner. The men claim that they have to work according to the notice or be discharged, and that it is a vioation of the law to ask them to work the extra hour without extra pay. The companies maintain that the condition of the coal market will not justify the slightest increase. It is said by some of the coal men to-day that the request of the miners will not be considered. The companies are still bound together by their agreement of 1882, and they have no idea of acting in any other way except as a unit. The merchants, who have heard of the miners' request, claim it will amount to nothing, as the miners are not able to strike, not having fully recovered from their strike of 1882. Some of the miners seem confident that their request will be granted and that they will have plenty of work during the season.

Ex-Gov. Hamilton and Gen. Bradley T. Johnson were in Washington last week to urge the appointment of Mr. R. D. Johnson, of Cumberland, for Internal Revenue Collector for Maryland.

State of Trade.

NEW YORK, April 18.—Special telegrams to *Bradstreet's* from the principal distributing points report that demands from country merchants have thus far been disappointing. Spring trade is declared to be a fortnight late, even where the demand is most active. The dry goods trade is moderately active from jobbers' hands, but manufacturers' agents report it dull. Boston advices report prices in some lines of cotton goods as low as ever before, and the outlook for improvement is uncertain. Seasonable fabrics are in best demand. The four weeks' stoppage of production of Fall River print cloth mills prior to July 1 covers thirty-four factories and affects 12,225 employes, earning $67,900 weekly. The weekly production of those mills is 136,500 pieces. Stocks will be reduced about 550,000 pieces. Some Rhode Island mills will also stop. The volume of sales of wool at Eastern markets has been a fair average, but prices are no better. Manufacturers refuse to stock up in advance of early requirements.

The industrial situation is practically unchanged except for the strike of 1,500 flax spinners at Paterson, N. J.

The iron and steel trades are unimproved. There is no material increase in the demand for pig-iron, and the competition between the mills renders nominal quotations subject to reduction. Orders for steel rails are light and prices are as low as ever.

The excessively cold weather during Febrnary and March benefited the anthracite coal trade, and stocks have been reduced 60 percent. But trade at present is only moderate.

Grocery staples have been quiet. Tea is lower and coffee easier. Others are nominal. Dairy products have moved in large volume both for home and for export.

There were 196 failures in the United States during the last week, as compared with 174 in the preceeding week and with 155, 169 and 86 respectively in the corresponding weeks of 1884, 1883 and 1882. About 84 per cent. were those of small traders whose capital was less than $5,000. Canada had nineteen—a decrease of seven.

*

BOSTON, April 18.—The *Advertiser* in its weekly review of the wool market says: The market has been quite active; prices are for most descriptions fairly steady, but there is a disposition among dealers to reduce their stock. The tone on the whole is healthy, as the good demand and the increased inquiry come from a more active improvement in woolen goods and more orders to manufacturers. Manufacturers have shown more interest on the market than for some time. They have been in the market in much larger number than usual, and a great many sample bags have been taken, which should bring larger sales later. The war excitement has served as a topic of interest and discussion, but it is not thought clothing wools could be effected. Early in the week in London desirable wools declined ½d, but this has since been recovered, and is not likely to reoccur, as the suppiy there is very light. The only direct effect of any war would be in carpet wools, of which large supplies come from Russia.

PITTSBURG, April 18.—The *American Manufacturer* says: As the cause of present depression in the iron trade is primarily the refusal or inability of railroads, who are the great consumers of iron, to purchase, it is evident that there can be no revival in the iron trade until this condition of things shall change. For nearly four years no great undertaking, involving the large consumption of iron, has been entered upon. Enterprises inaugurated before have been carried on, many of them to completion, though a few are still in progress, but as one after another of these enterprises have been completed they, of course, have gone out of the market as consumers of iron, confining purchases to the few enterprises remaining uncompleted, and to the demand for renewals and repairs. Of course there are always some minor enterprises in progress and undertaken from time to time that in the aggregate consume considerable iron, and to these and repairs and renewals must we look for the running of the mills at the present time. The return of prosperity, however, can only come with the undertaking of important enterprises with an increase in the number of minor ones and with a much greater increase in the renewals and repairs.

CONNELLSVILLE, April 18.—The *Keystone Courier* says of the coke trade: The bright star of hope that has been steadily dawning upon the coke trade is slightly obscured at this time. Orders have fallen off considerably, and coke is accumulating on the yards and in the cars at a rate that must demand a curtailment of production unless the market moves out more briskly.

The Revised Old Testament.

[From the New York Times]

The revision of the Old Testament has been completed, and on May 21 the new revision will be issued simultaneously in London, New York and Philadelphia. This version is the joint property of the Universities of Oxford and Cambridge, and each university will issue its own edition, although both will be printed from plates made from one set of types. For the American trade Thomas Nelson & Sons, of No. 42 Bleecker street, New York, will control the Oxford Bible, and Lippincott, of Philadelphia, will act as agents for Cambridge. The Harpers, of this city, will also have an edition of the Cambridge Old Testament, which will correspond with their own reprint of the revised New Testament published three years ago. They will have only one style, in pica type, and in four octavo volumes, making five volumes of the Old and New Testaments. The binding will be in brown cloth, with red edges, and the four volumes will be sold for $10. The Nelsons will offer a variety of styles on the day of issue, and a copy of the complete Bible, printed in pearl type and bound in cloth, may be had for $1, or the purchaser of luxurious taste may secure a royal octavo edition in five volumes, printed in pica type and bound in Turkey morocco boards, with gilt edges, for $52.50. There are to be in all six editions and twenty-three styles of binding. The "parallel Bible"—the authorized version arranged in parallel columns with the revised version—will doubtless suit the scholar who desires to make a close comparison. It is to be a crown quarto edition, printed in minion type, and, as to price, $8 will secure the book in cloth boards, $14 a Persian morocco binding, and $18 a cover of Turkey morocco.

The interest of the public and even of the book-sellers in the publication of the revised Old Testament appears thus far to be of rather a quiet sort, and such excitement as attended the issue of the New Testament three years ago is not anticipated. The Harpers, however, state that there is a fair demand for the new Bible, and the Nelsons report that they have received a greater number of orders than they had obtained for the New Testament, at about the same period prior to publication, although the aggregate quantity ordered is somewhat less. It is said, too, that the universities have printed a much larger number of Bibles than that at first supposed to be sufficient to meet the demand.

As to a comparison of the old and new version of the Old Testament, nothing can be said at present, as the translators keep their own counsel Every precaution has been taken to prevent a premature issue of the work, and to prevent stray copies from getting out before the day of delivery. It is asserted that the two universities and the three American houses who are to act as agents are working in perfect harmony in the matter, in proof of which the fact that the Oxford and Cambridge Bibles are printed from the same set of types is mentioned. All the editions to be offered in America are imported from England in the completed state, no sheets even having been sent forward for binding. Whatever arrangements may have been made for reprinting must await the issue of the English work in the prescribed form.

Lee on Grant.

"I wish," said General Lee, "to do simple justice to General Grant when I say that his action toward my army is without a parallel in the annals of nations. When my poor soldiers, with famished faces, having neither food nor raiment, hungry and footsore, came before him in the hour of surrender, it was then that Gen. Grant immediately issued the humane order that 40,000 rations should be given to them. And that was not all. I was giving orders to one of my subordinate officers, who was making out a list of the things to be surrendered. I told him to include the horses. At that very moment Gen. Grant, who seemed to be paying no attention to what was going on, quickly rose from the camp-stool and said: 'No, no, General Lee, no surrender of the horses. Not one, not one. Keep them all. Your poor people will need them for the spring crops.' It was a scene never to be forgotten."

As Lee spoke he paced the room, and with tears streaming down his cheeks repeated two or three times this incident of the surrender.

I then asked him whom he thought to be the greatest of Federal soldiers. "Indeed, sir, judged by Napoleon's test of 'Who did all that?' General Grant is the greatest of living American or European soldiers."—*Lee's interview with Chaplain Pepper, in* 1865, *in New York Sun.*

An "Anti-Treating" Law.

The lawmakers of the far western States are a practical set of fellows who seem to be entirely capable of giving their eastern brethren points in the science of legislation. Here, for instance, is the Legislature of Nevada—and who expects any good to come out of Nevada—dealing a powerful blow at intemperance, and that, too, without either directly antagonizing the whiskey men or taking sides with the prohibitionists.

These wild western Solons, noting the evil effects of the social custom of "treating," so prevalent in this country and so potent in encouraging excess, have determined to strike at the root of the matter, and if possible break up the custom. The result is a stringent "anti-treating" law, which, if it can be enforced, ought to be placed on the statute-books of every one of the thirty-eight States. The outcome will be watched with interest by thousands of parents whose sons are subjected on every hand to the alluraing temptations of a habit that has become universal. We give herewith the text of the first four sections of the bill:

Section 1. It shall be unlawful for any person or persons to treat or entertain gratuitously any other person or persons to or with any spirituous or malt liquor or liquors, wine or cider, or any beverage whatever, or to or with any other article whatever, whereby any spirituous or malt liquors, wine or cider, or any other beverage, shall be obtained in any public bar-room, saloon, beer hall or grocery in this State, or in any other public place of resort or amusement in this State.

Sec. 2. It shall be unlawful for any one to attempt to evade the provisions of this act by any chicanery or subterfuge whatever, such as pretending to sell one article and delivering another, or by falsely pretending to buy or sell any such beverage.

Sec. 3. Any person or persons violating the first section of this act shall be guilty of a misdemeanor and on conviction thereof, shall be punished by a fine of not more than $20 nor less than $4, or by imprisonment in the county jail not more than ten days nor less than two days, or both such fine and imprisonment.

Sec. 4. Any person or persons violating the second section of this act shall be guilty of a misdemeanor and upon conviction thereof, shall be punished by a fine of not more than $50 nor less than $10, or by imprisonment in the county jail not more than 25 days nor less than five days, or both such fine and imprisonment.

The remaining sections provide that in the event of the failure of any person convicted under the act to pay the fine imposed, it shall be served out in the county jail at the rate of $2 per day. The fines so collected are to be paid into the school fund.

Isthmus Troubles.

WASHINGTON, April 21.—Secretary Whitney has received an account of the recent troubles of the Isthmus of Panama up to the time of the first engagement between Preston and the Government troops just preceding the burning of Colon, written by Capt. Dow, agent of the Pacific Mail Steamship Company. It differs in no material point from the accounts by mail from there; and Commander Kane's report, which has been already published, except that it goes more in detail as to his (Dow's) and Mr. Connor's arrest and treatment by the insurgents.

It appears that they were arrested and locked up in the calaboose together with Consul Wright and one or two others on the afternoon of March 30, but were released upon a promise from the Consul that the arms and ammunition in the steamer Colon should be delivered to Preston. Wright went on board the Colon and subsequently to the Galena, but as soon as the latter vessel made preparations to take possession of Colon, Dow and Connor were rearrested, Preston ordering his men to shoot them if a shot was fired from the Galena. They were guarded in the calaboose until 2 o'clock on the morning of March 31, when they were marched under guard several miles into the country. They managed to escape in different directions in the confusion following the attact on Preston by the government troops. They did not reach the Galena until 7 or 8 o'clock in the morning.

Capt. Dow concludes thus: "I have been thus particular in my accovnt of this unjustifiable and entirely irresponsible outrage committed on Mr. Connor and myself in order that we may put ourselves on record as demanding, through the United States Government, satisfaction from the United States of Columbia for the treatment we received."

In his speech to the Middlesex Club in Boston, Saturday evening, Sen. Evarts expressed the opinion that Republicans were not likely again to show their faith in the stability of the Government by voting the Democracy into power, and that in 1888 there will be no talk about repugnance to any candidate, and very few people will shout for the Prohibition nominee, but the votes will be cast for one of the two great parties. Mr. Evarts may draw his sentences out to undue length, but in this matter his head is decidedly level.

NEW ADVERTISEMENTS.

NOTICE.

A LOVE SONG TO A WIFE.

'Tis the beautiful, love-breathing gloaming hour,
And the breeze is rocking each slumbering flower,
And 'neath the clustering hawthorn boughs
Lovers are breathing their tender vows.

Shy lids are drooping o'er radiant eyes,
And the air is full of delightful sighs;
Cheeks glow and dimple, and red lips part—
And, O, how fondly heart answers heart!

For very gladness young pulses sing—
Ah, love is a wildering, witching thing;
An exquisite, tremulous, heaven-born strain,
That fills the soul with delicious pain.

We have been lovers for forty years;
O dear cheeks faded and worn with tears,
What an eloquent story of love ye tell!
Your roses are dead, yet I love ye well.

O pale brow shrined in soft silvery hair!
Crowned with life's sorrow, and lined with care;
Let me read by the light of the stars above
Those dear, dear records of faithful love.

Ah, fond, fond eyes, of my own true wife!
Ye have shone so clear through my chequered life,
Ye have shed such joy on its thorny way,
That I can not think ye are dim to-day.

Worn little hands, that have toiled so long,
Patient and loving, and brave and strong!
Ye will never tire ye will never rest,
Until you are crossed on my darling's breast.

O, warm heart throbbing so close to mine!
Time only strengthens such love as thine,
And proves that the holiest love doth last
When summer, and beauty, and youth are past.

—*Fannie Forrester, in the Quiver.*

FROM DEATH TO LIFE.

Why a Warrior's Hair Changed from Black to White.

You wonder that my hair is so white while I am not an old man as years go? Perhaps your hair would be as white as mine if you had passed through the ordeal of death in life that it was my fate to endure.

Tell you about it? Ugh! I shudder to think of it. Everything comes up before me so vividly when I tell my strange story that I seem to be living the terrible hours of terror and suspense over again: I do not tell it often, but if you care to hear it, listen, and when I am done tell me if you wonder my hair is white.

I was a soldier in the late war, and it was my fortune to be wounded in an engagement in Virginia. A ball struck me in the shoulder, and I fell to the ground and knew nothing of what happened for hours after that.

When I came to myself I was in an ambulance and was being taken to the hospital. The jolting of the wagon caused almost unbearable pain in my wounded shoulder. At times it seemed as if my suffering would drive me wild. By the time we reached our destination I was so weak I could hardly speak above a whisper. I was taken from the ambulance and carried into the hospital ward, and a surgeon was sent for at once.

He came presently—a kindly featured, mild-voiced man, who won my confidence at once. He asked me some questions about my wound before he proceeded to examine it. Seeing how weak I was he gave me something that soon quieted me.

When the drug had taken effect he examined my shoulder. I saw from his face that he considered amputation necessary.

"I wont consent to have my arm taken off," I cried. "I'd rather suffer any amount of pain than the loss of that."

"But—you might lose your life," he suggested.

"I might as well, and be done with it, as to go through life with one arm," I answered. "I'll never consent to any operation that will deprive me of it."

He reasoned with me in vain. At length he left me.

Shortly after the nurse having charge of that ward came in. The surgeon had made out a prescription for me, and I swallowed the medicine he sent, wondering if life or death was to be my lot.

I fell into a broken, troubled sleep, from which I woke to the consciousness of a keen, knife-like pain in my shoulder, a sudden darting pain that ran through all my nerves and tingled to the extremities of my body.

In this condition the surgeon found me when he made his next visit.

"I knew how it would be," he said, shaking his head. "I tell you what it is, my boy, you had better submit to the loss of a limb than a loss of life. It will soon be too late, if this inflammation goes on, to risk an operation."

"I can not consent to it," I persisted, thinking of the disadvantage I would be laboring under in attempting to fight the battle of life without my trusty arm. "Besides, the shock of amputation might kill me. It probably would. As well die with my arm on as to have it taken off and then die."

"It might, it is true," said the surgeon; "but the chances of recovery after an operation would be far greater than now. However, if you are determined to hang to it we'll do the best we can for you."

Then he proceeded to dress my wound. The pain the operation caused was terrible. Once I almost fainted away.

"Grin and bear it," said the surgeon. "After a little you will be more comfortable, I think. But I tell you the truth when I say that you will suffer far more with your arm, if you live, than you would in having it taken off."

"It isn't the dread of the pain of amputation that makes me refuse to have it taken off," I answered, "it is simply because I can not bear the idea of going through life with but one arm to depend on."

For a time after my wound was dressed I was tolerably comfortable. Then the shooting pain I have spoken of commenced running all over me again. My suffering was so intense that I could feel the sweat starting on my forehead. I could not keep back the groans of agony which rose to my lips.

Presently the nurse came in. Seeing how terribly I was suffering he called the surgeon, who chanced to be passing through the hall.

"Poor fellow! he's bound to have a hard time of it," the surgeon said. "Give him this powder now, and if it doesn't relieve him give another. It may be necessary to give two; but don't do so unless he suffers intensely."

I swallowed the powder. Gradually the sense of excruciating pain died out, and at last oblivion came.

It was late at night when I woke from the stupor produced by the drug.

Just as it became daylight the pain began again, with redoubled intensity. It would seem to concentrate itself for a moment in my shoulder, then spread all over my body like ripples on a puddle of water into which one drops a stone. Every ripple of pain seemed to burn its way along nerve and artery, and I could not help shrieking out in the intensity of my torture.

The nurse was greatly alarmed when he came in and hastily emptied some powder from a vial he carried into a glass of water, and held it to my lips. I drank the draught eagerly, hoping for relief from pain, or death, I cared not much which.

Again that deadly stupor crept over me, and I felt consciousness leaving my brain. Soon I knew no more.

When again a vague sort of consciousness came stealing in upon my benumbed senses as the first faint beams of coming day steal in upon the gloom and darkness of night, I became aware of the sound of voices in the room. I could hear words spoken, but they seemed far off. Gradually they seemed to come nearer, until at last I could distinguish what was being said.

"He died day before yesterday," I heard the surgeon say, in tones full of respectful sympathy. "The nurse found him suffering terribly and gave him a large dose of morphine. That seemed to quiet him. The nurse reported the case to me, and I came as soon as I could. When I came he was dead. I am sorry that you could not have been here sooner, madam. He often spoke of his mother. If I had dreamed how near the end was I would have telegraphed at once. But I supposed there was no immediate danger."

"I wish I could have been here," a voice choked with tears made reply—the voice of my mother. "O, my poor boy!"

Then I felt warm kisses pressed upon my lips and tears fell like rain upon my face.

Good God! They thought I was dead! The terrible truth flashed over me like lightning.

Dead!

For many hours I had been lying there wrapped in the icy semblance of death, and my mother was preparing to take my body home for burial! I tried to open my eyes, to speak. In vain! No muscle moved in response to the dictates of my will. The current of life was frozen in my veins.

It was terrible, terrible, terrible, the awful, sickening feeling that crept over me when I found that my body had thrown off allegiance to my will and that I was powerless to move a finger or lift an eyelid. I was dead, to all outward appearance. Once the thought came to me that perhaps this was really death and my soul had not yet taken its leave of the house of clay. But I could not believe that, and I strove to shake off the lethargy upon me again and again. But my will could not accomplish its purpose. I felt myself receding into unconsciousness again, as a wave goes out from shore till its identity is lost. I was a wave on the tide of life going out into oblivion. I thought then that I was indeed dying. The semblance of death was fast becoming its reality. Then came another long and utter blank in my existence.

When again consciousness returned, it brought a sensation of intense cold. I seemed to be in some region of ice and frost. All my energies seemed congealed in deadly numbness. Again I tried to move, to open my eyes. Not a muscle stirred.

How long was this to continue? I asked myself that question, but I could not answer it. Then the thought came again that after all I might be really dead. How did I know that the soul left the body when what men call death takes place? Might it not remain and be conscious of earthly things the same as before? Who could tell what happened after the breath of life has left the body? The lips of those called dead never opened to divulge the secrets of death. Perhaps I was finding them out. But no! no! It could not be that I was dead! I was in a trance. But they believed I was dead, and they would bury me alive!

By slow degrees the truth of my position came upon me. I was in my coffin.

I leave you to imagine, if you can, what I felt. But you can not. No one can who has not been through the same terrible experience.

Then steps came into the room. I felt myself lifted and borne out. I was carried for some distance. Then I knew that those who bore me were ascending steps. I heard the creaking of heavy doors, and then the deep and solemn tones of an organ broke forth in the Dead March in Saul.

I knew, then, that I was in the church I had attended previous to my enlistment. I was back in my old home and friends had gathered to pay their last tribute to my memory.

Then the organ's mighty voice died out in a long minor chord, and the minister read in slow, impressive tones:

"I am the resurrection and the life; whosoever believeth in Me, though he be dead, yet shall he live again."

Then came messages of comfort from the word of God to sorrowing hearts. I heard the sobs of friends about me, as the good man spoke. Then he prayed. A hymn was sung. Then the lid above my face was lifted, and friends came about me to take the last look. I felt tears falling on my face. I felt that my last chance had come. Now, if ever, I must shake myself free from the deadly lethargy upon me. It seemed as if my frantic efforts to break the bonds that bound me must avail and set the current of life in motion.

My mother came to me last. She leaned across the coffin and laid her cheek against my face, and whispered: "O, my boy, you were all I had left and I loved you so!"

Somehow those words seemed to touch the hidden spring of life. The stagnant current began to move again, my will resumed its power over my body; I opened my eyes and cried out: "Mother!"

I can not describe the scene of terror and excitement that followed. Imagine how it would be if you saw the dead come to life. For months after that many looked at me with frightened faces, as if they could not rid themselves of the impression that I had really been dead and that they beheld my ghost.

Do you wonder my hair is white? What I wonder at most is that my mind stood the strain of that terrible experience.—*N. Y. Journal.*

NO MUSIC FOR HIM.

A Gentleman Who Believed That He Would Look at the Sick Horse.

Old 'Squire Haggleson, who came to town the other day to urge the petition asking that young Zeb Sailor might not be hanged, was induced by a friend to attend a rendition of "Il Trovatore." The old gentleman put on his spectacles, expecting to see a great caper, but in disappointment, he turned to his friend and said:

"This is a sort of singin' show, ain't it?"

"O, yes, it is an opera."

"Singing, is it?"

"Yes, a grand opera."

"Don't they give no p'ints that a fellar can ketch on? Suthin' that a fellar ken tell the folks when he goes home? A man kain't tell nothin' about a song. He ken only say that he heard it and that's all. Now some time ago I went to a thing that wuz full of pints. Why I sot down an' talked an hour about it, an' at the log-rollin' I showed the boys how the whole thing went, but this thing don't 'pear to have no place to hinge on. Now look at that fellar with the tin clothes on. He don't say nuthin', don't do nuthin'; all I ken say about him is that he wore tin clothes. Then Oscar Piler will say, 'tin clothes?' 'Yes, tin clothes,' I will reply, then he will say, 'that's a deuce of a note. A fellar kain't jump with tin clothes on.' That shuts me up, you see. No, I'm afeerd that I kain't say nuthin' about this show. Lawd a massy! look at that woman with the fine duds. My lands! how she hollers. They call that singin', don't they?"

"O, yes, that's singing. It is grand opera."

"Yas, but when air we going to have some music? It's a strange thing that some folks don't know what singin' is. Now, thar's my daughter Ann. Ef she was here it would tickle her to death to hear that gal squeal. I allus did feel sorry for a pusson that ain't got no ear for music.

"Don't talk so loud. This is considered very fine music by educated people."

"I reckin so. I'm glad they like it. Say, did you ever see a filly r'ar up an' squeal? Wall, that woman puts me in mind o' one. Now a person that pretends to be interested in this thing would be annoyed by the squealin' of a filly, but blamed if I ken see much difference an' I've stirred round a good bit, too. We must all give the filly the credit o' bein' the most nachul. Now look at them fellers singin' at each other. Do you call that music?"

"O, yes, it is the music of anger."

"They air mad, I reckin?"

"Yes."

"Then why don't they say so? Now, when a man gits mad, he don't feel like singin'. Cussin' is more in his line."

"That's all well enough, 'Squire, but this is an opera."

"So I see, but I kain't find out the pin'ts o' the thing. Wall, b'leve I'll go."

"Hold on, 'Squire, don't be in a hurry."

"O, I ain't in a hurry. I like to hear singin' an I can put up with most any sort o' noise, but you must excuse me. I don't like to see people dodge music this way. Wall, good-bye. Jim Anderson's hoss is down with the botts an' I b'leve I'll go round an' look at him a while."—*Arkansaw Traveler.*

A TOUCHING SCENE.

Deaf Mutes Repeating the Lord's Prayer in Plymouth Church, Brooklyn.

A roguish-looking little fellow, probably twelve years old, stood on the carpeted platform near Mr. Beecher's armchair at Plymouth Church the other night and repeated the Lord's Prayer with such infinite pathos—so touching because it was wholly unconscious—that fifty people in the large audience devoutly joined in his "Amen," and nearly 200 more wiped the tears from their eyes. But little more than a year ago the boy was a street waif in Danbury, Conn. People pitied him and gave him pennies because he was deaf and dumb. A benevolent gentleman sent him to an oral school for deaf mutes in Mystic. He watched the lips of people in the audience fifty feet away, and repeated words after them. "Maggie," "Herman," "Hartford," "boy," horse," and several other words were spoken as plainly as four out of five school children of his age would have pronounced them. "Brooklyn" bothered him. He called it Bruglin. The boy could not hear a sound. He never has since he was born. So keen was his observation that he repeated words by watching the shadow on the white wall of the person who uttered them. He did not shirk a syllable of the Lord's Prayer, nor stumble once in his articulation. His pronunciation of some words was peculiar, but the whole was rendered with such plaintive simplicity and peculiar falling inflection at the termination of sentences that many ladies who heard him sobbed.

Another boy stepped on the platform, a sharp little fellow in short trousers. He watched people's lips with eyes like a lynx and shouted the words after them as vociferously as a newsboy. Somebody tried him with hard words, such as Nebuchednezzar, but he pronounced them before the tones of the first speaker's voice had died away. People pointed to articles of clothing, such as a cuff, collar, glove or coat, and the boy told them what they were doing. He never dreamed of the applause that followed him to the seat.—*N. Y. Times.*

—A man's education is not complete until he runs a newspaper for a while. Then he learns a good deal that he did not know before.—*Galveston (Tex.) News.*

—There are said to be 534 seamstresses in New York City, each of whom earns only one dollar a week.

THE FINGER NAILS.

How They Should be Cared for so as to Secure the Maximum of Comfort.

While serving as a protection to the extremities of the fingers, well-preserved nails add much to the beauty of the hand.

On the contrary, nothing renders the hand more unsightly than thick, irregular and soiled nails. But another consideration, making a proper care of them of the highest importance, is the fact that every person who labors with the hands is liable to gather, under the free margin of his nails, foreign matter, which may be very poisonous to the tissues of the body. Many cases have occurred in which the slightest abrasions of the cuticle by means of the finger-nail have resulted in malignant, even fatal, inflammations.

If, from any cause, the nail becomes thick and inelastic, it soon becomes rough, and assumes the appearance of an excrescence rather than an ornament. In this condition it is much more difficult to keep clean. To avoid this, the hand should not be subjected to the action of strong alkalies, such as quicklime, etc.; neither should foreign substances be removed from the surface by scraping, as, from the peculiar manner of its growth, this will cause the nail to thicken.

To cleanse the surface and the margin adjoining the skin, a soft nail-brush, mild soap, and soft water should be applied once each day, while the foreign matter, accumulated under the free margin should be removed as often as the hands are washed, by passing the rounded point of a small knife-blade once or twice beneath it.

This being done while the nail is wet, one movement will generally be sufficient to remove the substance completely; but care should be taken to detach no more of the nail, as this may, if repeated, cause the detached margin to recede until it is necessary to allow a wide growth to protect the end of the finger.

The paring should also be done while the nail is soft from washing, with an instrument which will make a perfectly smooth edge, and sufficiently often to limit the breadth of the free margin to about one-twelfth of an inch. This breadth is best, especially in the case of persons who have to do rough work with the hands, for two reasons; it prevents the breaking of the nail and also the accumulation of much foreign substance. The corners should not be very closely cut, or the troublesome condition known as ingrown nail may be produced.

To prevent the breaking of the cuticle near the root of the nail (commonly called "hang-nail"), the skin should be pressed—not scraped—loose from the nail at least once a week.—*Youth's Companion.*

RICH MEN AND COLLEGES.

What a Few Rich Men Have Done for the Cause of Education.

Johns Hopkins gave $3,148,000 to the university which he founded. His gifts for benevolent purposes amounted to $8,000,000. Judge Packer gave $3,000,000 to Lehigh University. Cornelius Vanderbilt gave $1,000,000 to the Vanderbilt University. Stephen Girard gave $8,000,000 to Girard College. John C. Green and his residuary legatees gave $1,500,000 to Princeton College. Ezra Cornell gave $1,000,000 to Cornell University. Isaac Rich bequeathed the greater part of his estate, which was appraised at $1,700,000, to Boston University. On account of the great fire and shrinkage in value, and other unfortunate circumstances, the University will realize less than $700,000 from this magnificent bequest. Amasa Stone gave $600,000 to Adelbert College by direct gift and by bequest. W. W. Corcoran gave $170,000 to Columbian University in money and land. Benjamin Bussy gave real estate worth $500,000 to Harvard University. Samuel Williston, William J. Walker, and Samuel A. Hitchcock gave between $100,000 and $200,000 each to Amherst College. Whitmer Phœnix gave the bulk of his property, amounting to about $640,000, to Columbia College. J. B. Trevor gave $179,000 to Rochester Theological Seminary. Matthew Vassar gave $800,000 to Vassar College. Gardner Colby gave $170,000 to Colby University and $100,000 to Newton Theological Seminary. J. B. Colgate gave $300,000 to Madison University. George I. Seney gave $450,000 to Wesleyan University. The Crozer family gave $300,000 to Crozer Theological Seminary. It would be easy to add to this list. There are hundreds of men and women whose splendid gifts entitle them to be held in everlasting remembrance. Such gifts are so common now that they are expected. If a rich man should live and die without doing something for the cause of education, he would at once become the subject of adverse criticism.—*Pennsylvania College Monthly.*

MEN'S HATS.

The Fashionable Styles and Colors for Men's Head Gear.

A Boston manufacturer is showing with some success a bell-crowned flexible hat in three heights, and in this connection it may be as well to say that the flexible hat is steadily gaining in popularity all over the country.

In curls the favorites are either a half-inch D'Orsey or half-inch round curl, although two 'fancys" are selling well. One is a half-inch D'Orsey reversed and ironed on to the under brim, and the other is a D'Orsey curl run in wide front and rear and narrow on the sides; both of these curls look better than they sound.

In colors nutria mixtures and blue pearls seem to be the favorites in stiff hats for light colors, and in soft browns, wines and side nutrias seem to prevail.

The stitched cloth hat in round and square crowns has lately come to the front, the demand in New England being something remarkable. These hats are mostly made in tweeds in prominent patterns of checks and plaids, and have been greeted by cloth hat manufacturers as something in the light of a special providence.

The taper square crown bears out our predictions as to its popularity, and will run in light colors. As made, it is a neat and graceful style, and will, from present indications, form one of the staple shapes for a long time to come.—*Hatter and Furrier.*

TEMPERANCE.

DRINK PLAIN COLD WATER.

Eminent English Doctors Singing the Praises of Temperance.

At an annual dinner of the Royal College of Physicians, Edinburgh, instead of such songs as "The Glasses Sparkle on the Board," or, "Willie Brewed a Peck o' Malt," the following ditty was sung:

AIR—"*Love's Young Dream.*"

Oh! the days are gone when Claret bright
Inspired my strain,
When I sang on every festive night
About Champagne.
Prime "Thirty-four"
In floods may pour,
And glasses gaily clatter,
But there's nothing half so safe to drink
As plain cold water.

Though the bard may make a greater noise
Over his wine,
When with other bacchanalian boys
He chances to dine;
Yet if he wake
With a headache,
And wonders what's the matter,
He learns there's nought so safe to drink
As plain cold water.

There's Dr. Hassall, he proclaims
That water's full
Of curious brutes with curious names,
In every pool.
Now you will see
That this must be
A most important matter;
For it's clear there's meat as well as drink
In plain cold water.

Professor Clark of Aberdeen
Says chalk is there,
And Monsieur Chatin, iodine
Finds everywhere.
If this be true
It's clear to you
It's just so much the better,
For there's meat and drink and physic, too,
In plain cold water.

So if your health you would keep good,
With wine have done,
And like that wise man, with your food
Drink water alone.
About he drives,
And well he thrives,
And every day grows fatter,
Which shows that folk can live quite well
On plain cold water.

—*Irish World.*

IS TEMPERATE DRINKING SAFE?

A Woman's Testimony—What She Had Seen, and Known, and Felt—A Dramatic Incident.

At a certain town meeting in Pennsylvania, the question came up whether any persons should be licensed to sell rum. The clergyman, the deacon, the physician, strange it may now appear, all favored it. One man only spoke against it, because of the mischief it did. The question was about to be put, when there arose from one corner of the room a miserable woman. She was thinly clad, and her appearance indicated the utmost wretchedness, and that her mortal career was almost closed. After a moment's silence, and all eyes being fixed upon her, she stretched her attenuated body to its utmost height, and then her long arms to their greatest length, and raising her voice to a shrill pitch, she called to all to look upon her.

"Yes!" she said, "look upon me, and *then* hear me. All that the last speaker has said relative to temperate drinking, as being the father of drunkenness, is true. All practice, all experience, declares its truth. All drinking of alcoholic poison, as a beverage in health, is *excess. Look upon me!* You all know me, or once did. You all know I was once the mistress of the best farm in the town; you all know, too, I had one of the best—the most devoted—of husbands. You all know I had fine, noble-hearted, industrious boys. Where are they now? Doctor, where are they now? You all know. You all know they lie in a row, side by side, in yonder church-yard; all—every one of them filling the drunkard's grave! They were all taught to believe that temperate drinking was safe—that excess alone ought to be avoided; and they never acknowledged excess. They quoted you, and you, and you (pointing with her shred of a finger to the minister, deacon and doctor as authority. They thought themselves safe under such teachers. But I saw the gradual change coming over my family and its prospects with dismay and horror. I felt we were to be overwhelmed in one common ruin. I tried to ward off the blow; I tried to break the spell, the delusive spell, in which the idea of the benefits of temperate drinking had involved my husband and sons. I begged, I prayed; but the odds were against me.

"The minister said the poison that was destroying my husband and boys was a good creature of God; the deacon who sits under the pulpit there and took our farm to pay his rum bills, sold them the poison; the doctor said a little was good, and the excess only ought to be avoided. My poor husband and my dear boys fell into the snare; and they could not escape; and, one after another, were conveyed to the sorrowful grave of the drunkard. Now look at me again. You probably see me for the last time. My sands have almost run. I have dragged my exhausted frame from my present home—your poor-house—to warn you all; to warn you, deacon! to warn you, false teacher of God's Word!" And with her arms flung high and her tall form stretched to its utmost, and her voice raised to an unearthly pitch, she exclaimed: "I shall soon stand before the judgment seat of God. I shall meet you there, you false guides, and be a witness against you all!"

The miserable woman vanished. A dead silence pervaded the assembly; the minister, the deacon and physician hung their heads; and when the President of the meeting put the question: "Shall any licenses be granted for the sale of spirituous liquors?" the unanimous response was: "No!"—*Memoir of George N. Briggs, late ex-Governor of Massachusetts.*

Chocolate Bombs.

The serpent of the still calls to his aid the candy manufacturers and evades the law against selling liquor to minors by sugar-coating his poisons. A chocolate bomb is about the size of a pigeon's egg, and is made of a hollow shell of crystalized candy, filled with sweetened fusil oil and alcohol! They are coated with chocolate and have half a kernel of a maderia nut on top. The contents of three bombs will fill a wine-glass. School children in some of our large cities were made partially drunk on these bombs, and the rock-and-rye drops which are permeated with the same vile compound. Brooklyn was flooded to such an extent with similar candy, that the Board of Health stopped its manufacture. Papers of New York are calling attention to the matter. It is an evil that, unchecked, will spread into all our cities and towns, and parents and teachers must be on the alert for the foe that hides himself in sweet disguise.—*National W. C. T. U. Bulletin.*

Climate and Liquor Drinking.

No climate exactly suits the constitution of the drinking man. In the hot climate he falls an easy victim to cholera and kindred epidemics; in the cold climate he is the first to freeze to death when a cold wave sweeps down from the Northwest. With every severe storm of the past winter the daily papers have made mention of poor besotted drunkards found frozen to death in country fields or city alleys, where they have stupidly lain down to sleep. On the other hand, temperate habits are known to bring added power of endurance against extremes of heat and cold. It was said at the time that the survivors of Lieutenant Greely's exploring party were men who had not injured their constitutions by even the use of tobacco. And now attention is called to the fact that the comparatively slight amount of sickness among General Wolseley's troops in the Soudan, considering the climate and the circumstances, is owing to the sparing use of stimulants by the soldiers. The dispatches state that no liquor can be purchased south of Wady Halfa, and that General Wolseley sternly punishes any native caught selling a drop to one of his men. Ten thousand gallons of rum were shipped to the Commissariat Department in November, but little of it has thus far been used.—*S. S. Times.*

Depleting the Church.

How the saloon depletes the church is most strikingly shown by the following statistics gathered by Rev. H. W. Bennett, formerly of Dubuque, Ia., and now of Bloomington. He says of Bloomington: "There are about 4,500 young men in this city. Of a total membership of the Christian churches of 3,511, only 356, or about one-tenth are young men, and the average attendance upon public worship is placed at 400. Of 854 arrests made by our police in 1884, more than 600 were young men. Think of that! More young men arrested in a year than attend churches. Of 111 people confined in the jail in one year, 81 were young men. Of 1,309 calls made at 49 saloons from seven to eight p. m., Saturday, 1,021 were young men. Only front doors are watched. Notice how the proportion of arrests compare with the visits to the saloons. Here are the open gates to that hell which blackens moral character, blinds moral perceptions, weakens will power, and will engulf with earthly shame and eternal perdition every young man who passes through them to remain. If Christian ministers are not willfully blind, they will engage in this holy war upon the liquor traffic as the surest means of winning souls.—*Union Signal.*

TEMPERANCE ITEMS.

THE "one more" drink has made a hundred thousand drunkards.—*Detroit Free Press.*

THE Catholic Total Abstinence Union of America is only fourteen years old, and numbers over forty thousand members.

THE "wet ticket"—that is what they call the whisky ticket in Georgia. It is a good name for it; the "wet ticket"—wet with the tears of broken-hearted women and drunkards' children.—*Christian Advocate.*

IT looks as though there could be but little doubt as to the ultimate acceptance of prohibition in Canada. So far during this year Lennox and Addington, Lanark, Brome, Guelph, Kent and Carleton counties have added their voices to the long roll of constituencies which have spoken in its favor. Bit by bit in this manner will at length do the work.—*Canadian Baptist.*

THE first woman's benefit society under teetotal auspices ever organized is known in London as the Independent Total Abstinence Sisters of Progress. It has not been over progressive, however, during the twenty-four years of its existence, having but $1,000 to its credit in bank at present. It begins, however, to show tokens of advance, and branches are to be formed outside the metropolis.—*Union Signal.*

IDAHO put in its W. C. T. U. Plea for more scientific Temperance instruction in the schools, and received, not "a stone" for its cry, but "half a loaf." Instead of enacting the law, the Legislature inserted the word "Temperance" in that section of the School law which enumerates the principles to be impressed by public education. So we go—swinging on toward the day when the school-house shall cradle the Temperance reform.—*Union Signal.*

A WRITER in the *Pall Mall Gazette* says that "intemperance is exceedingly common among the Russians, and that the great number of holidays contribute much to this state of affairs. The people become frightfully drunk, and remain so until their money is entirely exhausted. They have a custom there called Pominki—a remembrance service forty days after a person's death. Once a year they visit family graves. This is often accompanied by debauchery. And our own holidays are extending in the same direction. We saw more men drunk on the street last Christmas day and evening than we have seen all the rest of the year."

TEMPERANCE work by the young and among the young has recently received a strong impetus in Wisconsin. The Sunday-school workers of that State have perfected a plan for organizing the Wisconsin Sunday-school children into a "Wisconsin Temperance Army," the schools of each township forming a regiment and those of each county a division. A gentleman interested in the movement is said to have offered a costly silk banner to that county which shall have enrolled the largest per cent. of its children in this total abstinence before June 1. The Wisconsin Sunday-school leaders at the Monona Lake Park Assembly last summer urged the importance of putting more emphasis upon Temperance instruction in the religious training of the young.—*S. S. Times*

FARM AND FIRESIDE.

—Barley is excellent for beginning to fatten cattle, as there is less danger they will cloy on it than on corn.—*N. E. Farmer.*

—White china, with gold bands and the monogram in large gold letters on rim, is coming again into fashion, and very satisfactory it is, since one may then be certain of being able to replace a piece which has been broken.—*Philadelphia News.*

—Potato chips: Cut them round in long strips like peeling an apple and throw them into cold water. Dry them thoroughly in a cloth and fry them in hot fat using a frying basket for the purpose. As soon as they are nicely colored, drain before the fire, sprinkle with salt and serve.—*N. Y. Herald.*

—A brilliant black varnish for iron, stone or wood can be made by thoroughly incorporating ivory black with common shellac varnish. The mixture should be laid on very thin. But ordinary coal tar varnish will serve the same purpose in most cases quite as well, and it is not nearly so expensive. —*Chicago Journal.*

—One of the most delicious dessert dishes for this season of the year, and one which has never to the writer's knowledge met with a word of aught but praise, is this very simple recipe: Slice an equal number of oranges and bananas, and add to suit the taste, a little preserved pineapple and powdered sugar. The resulting salad is served cold.—*N. Y. Post.*

—Mr. William H. Brewer, Professor of Agriculture in the Sheffield Scientific School and President of the New Haven Board of Health, lectured on "Cholera" recently in Hartford, in the course of his remarks saying that he had little faith in quarantine to keep out cholera, which, he thought, would probably reach us, but by no means certainly. A quarantine was useful, but caution on the part of the people should be the chief quarantine dependence. Clean up! said the Professor with emphasis.

—Sponge Drops: Beat to a froth three eggs and one cup of sugar. Stir into this one heaping cup of sifted flour, in which one teaspoonful of cream of tartar has been mixed. Dissolve half a teaspoonful of soda in a very little hot water and add last, after beating well. Flavor with lemon, nutmeg or vanilla. Butter tin sheets with washed butter, free from salt, and drop the mixture in teaspoonfuls upon them, about three inches apart. Bake in a quick oven. Serve with ice cream.—*The Household.*

—It is well known that the common potato is the product of seed which in its wild state is wholly unfit for food. That the quality of potatoes now, however, depends largely on the soil and methods of cultivation is less generally understood. The potatoes grown on soil full of vegetable matter will be large and coarse. In a wet season they will be "soggy" when cooked. If not well covered from the sun while growing the tubers will be green and have a harsh, bitter taste, which is really that of poison.—*Exchange.*

—Economy counts in the course of a year, and the care of the kitchen utensils, the wash tubs, etc., is by no means lost or useless; it is wise also to look after the fruit cans; when the fruit is taken out they should be washed in warm water, hot ammonia put into them and be filled with water, and allowed to stand for an hour or two; then they should be rinsed in clear water, and the rubbers and tops all be taken equally good care of, so that when they are needed the next autumn no loss may occur.—*Rural New Yorker.*

—Charlotte Russe Pudding: Heat one and one-half pints of milk to near boiling; stir into it the beaten yelks of four eggs; one half a tablespoonful of corn-starch dissolved in a little cold milk; one-half cup of white sugar; flavor with vanilla; let it thicken like custard; lay slices of sponge cake in a deep pudding dish and pour over them the custard; when cool beat the four whites of eggs, sweeten with one-half a cup of powdered sugar and spread over the pudding and set in the oven to brown. —*Boston Globe.*

BEES.

The Profits That Can Be Realized by an Intelligent Apiarist.

In these times of seeking for new sources of profit on the farm, as that of grain growing wanes, bees come in for their share of attention. Prof. Cook relates how bee-keeping may be profitably associated with general farming: "We often hear that only specialists should keep bees, that bee-keeping is no business for a farmer or for a person with any other business." The Professor relates the experience of his brother, E. J. Cook, of Owosso, who is one of the best farmers in the State, and whose crops are always among the best in the county where he lives. "A few years ago he purchased a few colonies of bees more to interest his boys than with the expectation of making money. He winters them in a good cellar and has never lost any. In 1883 his colonies reached fifty, and last year sixty. In 1883 his profits from his bees exceeded by a considerable sum those from his farm. Last year the excess was even greater. Either of his boys, one sixteen, the other fourteen, is capable of entirely managing the bees. The apiary has been a source of valuable thought and study to all, and the constant profits have brought no small satisfaction. Mr. Cook and his boys have spared no pains to secure instruction and never refuse needed attention to the bees. They say they had better neglect the farm." Prof. Cook further says of the profits of bee-keeping, that a good, thoroughly prepared bee-keeper can easily care for one hundred colonies with no help. Except from the middle of May to July 1 he could care for two hundred colonies, which, to do well, should be separated into two apiaries which should be at least four or five miles apart. Thus, by hiring an assistant for two or three months during the season for storing, a good apiarist can care well for two hundred colonies. In a good bee region which abounds in such honey plants as white clover, basswood, raspberries and abundant fall plants, it is not too much to expect as the year's average fifty pounds of comb honey per colony and increase to double the number of colonies. This estimate is below rather than above what has been secured by our best bee-keepers.—*Detroit Post.*

OLD-TIME SUGAR MAKING.

Scenes in and About an Old-Fashioned Sugar Camp.

The regular typical "sugar weather," freezing at night, thawing and slopping by day, recalls the scenes and fashions of a day long past, when "home-made sugar"—we never called it "maple" nor misnamed the tree that way, except by Yankee inculcation—was not a fancy confection, a luxury beyond the "barber-pole" candy of infancy, but a necessity, when "Orleans" sugar was not to be had, or was too expensive for the poor in pocket, as many a rich man of to-day was in that day. The free-handed householder laid in his year's stock of sugar by the time the apple trees are in bloom, at the latest, and frequently before the frost was well out of the ground. It deteriorated in the close chests—the protection against ants and flies—or in cloth-headed barrels, and lost much of the peculiar flavor of the early product. It got musty and weak to the "sweet tooth," though possibly not to the tea. For cooking it was never so good as the can product. It did not mix well, and left black spots of undiffused sugar that variegated the taste of cake too gaudily. In molasses it was best, and it is still unmatched for pancakes and fritters and all table use. No syrup equals it, no honey of hive or hand rivals it for these uses. The demand for it has manufactured a score of imitations, but they can't fool the tongue that has been taught in the cradle the taste of the essence of dew, distilled through ten million tubes in the sugar tree.

When the sugar season—"a movable feast," like Easter—came on, sometimes early in February, sometimes early in March, but usually between the two, the owner of a "sugar camp"—some few untutored or overtutored noodles call it "sugar brush" he would, with the customary wastefulness of backwoods habits, go out with his ax and chop fresh cuts in old trees and new cuts in fresh trees, to collect the water in. One primitive fashion was to slope a cut four or five inches into the body of the tree, a foot or more up, and scooped at the bottom into a rude little trough, from which the water was dipped as fast as it gathered sufficiently to be reached. This was wasteful every way, and sensible farmers, after cutting a little notch, would bore a hole a couple of inches or so deep and drive in a spile of elder with the pith punched out. In time, though, the notch was abandoned and the hole bored directly through the bark, and tin tubes substituted in some cases for the elder spiles. "Sugar troughs" made of a cut two or three feet long, of a log a foot or more in diameter, split in half sometimes and hollowed out to hold a couple of gallons or so, were in general use, but they were wasteful and those who could afford money better than muscle bought crocks and buckets. These were emptied, and sometimes by hand, sometimes by sleds or wagons carrying tubs, the water was taken to the kettles at rounds made at regular intervals.

The primitive furnace long remained—probably in many places yet remains—in use, and that was a couple of big logs a dozen feet long and a foot or two in diameter, laid parallel and far enough apart to make room for a fair pile of fuel between them. On these the kettles—sometimes two or three, or more, owing to the number of trees tapped—were set, and the water boiled down, added to as it went down and still boiled down till it grew "thick and slab," and then the fragrance that was on the passing breeze through the grove could have discounted "nard and cassia's balmy smells." Pungent, inviting, suggestive, it is the "bouquet" of our backwoods nectar, and commonly surrounded by blooming hebes of the cabin and kitchen. The fitful flashes of fire, tempered to the bubbling of the kettles, which, unguarded, sometimes boiled over, lit up the woods about with a somber glow that gave the streaks of snow, the bare boughs of the trees, the gray trunks and the brown leaves at their roots a sort of diabolical, gory look, as if a gleam of Pandemonium came through some crack or knot-hole; and the figures standing over the kettles or seated on the end of the furnace-logs might have been mistaken by eyes untaught of the keener perceptions of the nose, for lazy devils loafing about a fire they hadn't energy enough to keep from going out.

The scenes of a sugar camp, however, were anything but somber in spirit, whatever the light upon them. There wasn't much idling, and there was always fun. If the camp owners had families, and the backwoodsman without one was a wonder, the young folks made a frolic of the work of "stirring off" or graining the sugar. The name was eminently descriptive. To keep the sugar from solidifying into a mass of impenetrable candy it had to be incessantly stirred, and the work was too hard for anybody to endure long at a time. But as Shakspeare might have said, and did nearly say, the fun "physicked the pain." The manager, man or woman, frequently tested the condition of the syrup by pouring a spoonful into a "gourd" of cold sugar water and noticing its "ropiness," its rapidity of cooling, its tendency to "grain," and thereby judging when it was necessary to reduce the fire or put it out. And all the while the "stirring off" went briskly on with many a laugh, and giggle and squeal of girlish glee or boyish frolic. Egg shells were filled with the ungrained denser syrup, to cool into lumps as hard as "dornicks," or cast into the mold of teacups greased with butter or clean lard to keep it from sticking, or rudely molded into some uncouth form or formless chunk. Hands and hair and sleeves got sticky, drops of sugar fell on the clothing and cooled and stuck like paint.

Most of the sugar woods anywhere near the city have long been gone in smoke, and ashes, and heat that has mixed with the universe of correlated forces, and it needs no long sighted prophecy or pesimisms to see that the time is on the wing and will soon be here when the sugar tree will be as completely lost as the dodo, and its sugar as impossible as "potable gold." —*Indianapolis Journal.*

—"Main street, about half way up on the left side, in a tall building," was the address on a letter received recently in the Buffalo (N. Y.) Post-office and destined for delivery in that city.

THE RAZORBACK PIG.

An Animal Monstrosity Indigenous to Some Portions of the Country.

Flamaton has two hotels, six houses and about 700 razorback pigs. I will not attempt to give the exact population of the pig family. I approximate; that's all. These pigs are weary of life. They court death every day in a thousand different ways. When an engine or a train starts up anywhere in the yard a score of these pigs will dash recklessly up to and under the wheels. Sometimes they get run over, but they never find it out. They are ferocious-looking beasts. The biggest part of the Flamaton pig is that which runs from his high intellectual brow out to the tip of his nose. If he would stand on his hind legs he would be very tall. As for thickness, he has none. You could seal one up in an envelope and in stamping it the postmaster would never discover that it contained anything thicker than a sheet of brown paper. I thought of mailing you one for an ornament, but I learn that bric-a-brac is no longer fashionable.

Two thousand years from now some lover of curiosities will halt in passing through a museum in front of a queer looking piece of antiquity and ask of his guide: "Is that a model of a flying ship or the side-view of a new fangled penknife, with corkscrew attachment?" The answer will be: "Neither, my son; that is the last remains of a razorback pig that flourished in the nineteenth century in the southern part of what was then known as the United States of America, a place where people had a firm belief that they were free, and felt so secure that they allowed alien and native land thieves to gobble up the best lands in the country, and this pig was forced to grow up and exist in a place where an acre of ground was not rich enough to raise anything except just such a pig, and was so hard that you could not drive a railroad spike through its top crust with a sledge-hammer. The pig is still alive, and he still imagines that he lives at Flamaton. We have to watch him closely, for every time he hears a bell ring or a whistle toot he makes a break for the train with the intention of mixing himself up with the wheels. He's bent on suicide still." —*Florida Cor. Scranton (Pa.) Truth.*

He Had a Wife in Texas.

A sorry-looking specimen was before the Police Judge.

"You are charged with being a vagrant," said the Court.

"I reckon hit's a fa'r deal, Jedge," replied the man.

"Have you no home?"

"Not in these parts, Jedge."

"No friends?"

"I've got a wife in Texas, Jedge."

"Why don't you go home to her instead of starving and freezing up here?"

"Jedge, did yer ever meet my wife?"

"Of course I didn't."

"I thought so, Jedge, er you'd never axed me that question."

"Sixty days," said the Judge, curtly.

"Much obleeged, Jedge; I wuz afeerd yer wuz goin' to sen' me back ter Texas."—*Merchant Traveler.*

CATARRH

HAY-FEVER

METAL POISON.

I am a coppersmith by trade, and the small particles of brass and copper from filing got into sores on my arms and poisoned my whole system. Mercury administered brought on rheumatism, and I became a helpless invalid. I took two dozen bottles of Swift's Specific. My legs, arms and hands are all right again. I use them without pain. My restoration is due to S. S. S. PETER E. LOVE. Jan. 9, 1885. Augusta, Ga.

ULCERS.

For six or eight years I suffered with ulcers on my right leg. I was treated with Iodide of Potassium and Mercury, and I became helpless. Six bottles of Swift's Specific made a permanent cure. Feb. 28, 1885. M. D. WILSON, Gainesville, Ga.

Swift's Specific is entirely vegetable. Treatise on Blood and Skin Diseases mailed free. THE SWIFT SPECIFIC CO., Drawer 3, Atlanta, Ga., or 159 W. 23d St., N. Y.

For Weak Women.

MRS. LYDIA E. PINKHAM: "About the first of September, 1881, my wife was taken with uterine hemorrhage. The best stypties the physician could prescribe did not check it and she got more and more enfeebled. She was troubled with Prolapsus Uteri, Leucorrhea, numbness of the limbs, sickness of the stomach and loss of appetite. I purchased a trial bottle of your Vegetable Compound. *She said she could discover a salutary effect from the first dose.* Now she is comparatively free from the Prolapsus, Stomach's sickness, &c. The hemorrhage is very much better and is less at the regular periods. Her appetite is restored, and her general health and strength are much improved. We feel that we have been *wonderfully benefited* and our hearts are drawn out in gratitude for the same and in sympathy for other sufferers, for whose sakes we allow our names to be used."

C. W. EATON, Thurston, N. Y.

A Dangerous Case.

* * * ROCHESTER, June 1, 1882. "Ten Years ago I was attacked with the most Intense and deathly pains in my back and —*Kidneys.*

"Extending to the end of my toes and to my brain!

"Which made me delirious!

"From agony.

"It took three men to hold me on my bed at times!

"The Doctors tried in vain to relieve me, but to no purpose.

Morphine and other opiates!

"Had no effect!

"After two months I was given up to die!

"When my wife heard a neighbor tell what Hop Bitters had done for her, she at once got and gave me some. The first dose eased my brain and seemed to go hunting through my system for the pain.

The second dose eased me so much that I slept two hours, something I had not done for two months. Before I had used five bottles, I was well and at work as hard as any man could, for over three weeks; but I worked too hard for my strength, and taking a hard cold, I was taken with the most acute and painful rheumatism all through my system that ever was known.

"I called the doctors again and after several weeks, they left me a cripple on crutches for life, as they said. I met a friend and told him my case, and he said Hop Bitters had cured him and would cure me. I pooh'ed at him, but he was so earnest I was induced to use them again.

In less than four weeks I threw away my crutches and went to work lightly and kept on using the bitters for five weeks, until I became as well as any man living, and have been so for six years since.

It has also cured my wife, who had been sick for years; and has kept her and my children, well and healthy with from two to three bottles per year. There is no need to be sick at all if these bitters are used.

J. J. BERK, Ex-Supervisor.

"That poor invalid wife.

"Sister!

"Mother!

"Or daughter!

"Can be made the picture of health!

"With a few bottles of Hop Bitters!

"*Will you let them suffer?*"

A MAN

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE

CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.

The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.

THE GREAT ROCK ISLAND ROUTE

Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.

The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.

THE FAMOUS ALBERT LEA ROUTE

Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.

Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.

For detailed information see Maps and Folders, obtainable, as well as Tickets, at all principal Ticket Offices in the United States and Canada; or by addressing

R. R. CABLE, President and General Manager, Chicago. E. ST. JOHN, General Ticket and Passenger Agent, Chicago.

DAIRYMEN and FARMERS should use only the "Arm and Hammer" brand for Cleaning and Keeping Milk Pans Sweet and Clean. It is the Best for all Household Purposes.

HOG DISEASES.—The "Arm and Hammer" brand Soda and Saleratus is used with great success for the prevention and cure of HOG CHOLERA and other diseases. Mix with the animal's food.

"ARM & HAMMER BRAND"

To insure obtaining only the "Arm & Hammer" brand Soda or Saleratus, buy it in "pound or half pound" cartoons which bear our name and trade-mark, as inferior goods are sometimes substituted for the "Arm & Hammer brand when bought in bulk. Ask for the "Arm & Hammer" brand SALSODA (Washing Soda).

It is a well-known fact that most of the Horse and Cattle Powder sold in this country is worthless; that Sheridan's Condition Powder is absolutely pure and very valuable. Nothing on Earth will make hens lay like Sheridan's Condition Powder. Dose, one teaspoonful to each pint of food. It will also prevent and cure CHICKEN CHOLERA, Hog Cholera, &c. Sold everywhere, or sent by mail for 25 cents in stamps. Also furnished in large cans, for breeders' use, price $1.00; by mail, $1.20. Circulars sent FREE. I. S. JOHNSON & CO., Boston, Mass.

MAKE HENS LAY

I CURE FITS! When I say cure I do not mean merely to stop them for a time and then have them return again. I mean a radical cure. Mr. Nasby Goes to Washington and is Disgusted.

CONEEDERIT X ROADS,
(Wich is in the State uv Ky.,)
March 30, 1885.

It is a long and dreary way to Washington when yoo hev to pay yoor fare, and yoor friends wich put up the money ain't willin to advance enuff for sleepin cars. It is espeshly a terrible thing to make the trip at this pertikeler time. The cars are crowdid with sad-faced men, wich hev bin watin a sentoory for suthin to come wich ain't come yit, and is in dout ez to whether it ever will come; men wich is lookin at yoo ez ef they wuz mentally kalkelatin whether yoo hed 25 cents about yoo wich they cood borrow, and also ez tho the problem uv gittin a bed to sleep in, when they got ther wuz not yit solved.

I didn't look that way. I thot I knew Washington. I cood, alluz, in the old times, ring in at the barrooms fur my likker, and I knew the free lunch routes ez they wuz. I wuz disappointed in all this, but uv this more anon.

Bascom, Deekin Pogram and Issaker Gavitt put up enuff money to git me to Washington, and I insisted that they give me enuff to git me home, but they wuz firm.

'Ef yoo don't git back at all,' sed Bascon, 'we shel be happy, and ef we give yoo a return tikkit yoo will sell it and squander it in whisky. It wood brake my hart to see my good money go into another 'sloon man's till'

So I made my way to Washington in a second-class car, settin up nites and days, and, undismayed, I towunst perceeded to an old haunt uv mine on the avenue wher the lunch yoost to be good. To my horror they wuz nuthin on the counter.

'Wher is the lunch?' I demandid uv the barkeeper.

'We ain't settin out a free lunch this spring,' he remarkt, with a sternness that I never saw ekalled. 'We did it till the sixth uv March, and quit becoz bankruptcy wuz starin us in the face. Ther is a difference between a lunch and full board, and ther got to be sich a rush uv fellers like yoo, with turned paper kollars, wich wood take a full-grown person's dose uv likker and eat a square meal and then tell us to hang up the drink, that we wuz forst to suspend the lunch and require the drink to be paid fur invariably in advance. And we hev a able-bodied pugilist to turn em out at midnite, fur they commenst viggerously sleepin in our chares. We keep a 'sloon, not a hospital or infirmary.'

I tried all my old places with the same result, and becum discouraged. However, I went immejitly to the Postmaster General, and got awjence. I representid to him that the nigger, Jim Lubbock, had held the Post Offis at the Corners sence Linkin's time, and that in the interest uv Civil Servis Reform he shood be moved, and I put in his place.

The Postmaster-Generyl wuz affable, too d—d affable. He recognized the necessities uv the case, and wuz goin to do his best. He said to me that the wuz considerin the cases in alfabetikle order. He wuz eggsamin each case on its merits. Lubbock! L was the tenth letter in the alfabet. There is 40,000 Post offises in the Yoonitid States, and L wuz about half away down. He cood eggsamine about 20 a day, and ef ther wuz about 20,000 before yoo come to the L's he shood say that he would git to the L's in about three years, to determine whether Lubbock should be dismissed at all or not. Then my name, Nasby, commencin with a N, wuz also about half-way down the list, and ez ther wuz, on a average, 50 applicants fur each place, it would require suthin more than that time to determine whether I shood be appointed or not. That wuz the sitooashen. 'Good morin, Call again when yoo come to Washington.'

'But,' I exclaimed, 'ef this is the way yoo are goin to do it I shel be ded uv starvashen an cold long afore yoo git to me. Remember, sir, our sitooashen. The free lunch counter is entirely done away with—they demand cash for likker. I can't stay here and I can't live at home. I wuz a patriot, sir, doorin the campane; I kin show the coal oil on my coat from the torches I kerried, and to me, more than any other man, is doo the result in Injeany.'

'Yoor patriotism duz yoo credit,' remarked he, smilin sweetly, 'and you hev yoor reward in the conshusnis uv doin yoor duty. Look and see wher Mr. Nasby's applicashun comes in,' he sed, turnin to a clerk.

'28,765!' replied the clerk.

'We are now considerin 254,' replied the Postmaster General. 'We shel git to yoors, I shood say, in about three yeers, possibly a yeer later. Good mornin!'

And I wuz hustled out uncermoniously.

Is this Dimocrisy? Is this the way we who electid Cleveland are to be treated? I lived in Washington a week by going into the bars uv first-class hotels wher ther custom is sich that they can't demand payment in advance because Senators and Congrismen paternize em, me and another patriot from Noo York. He wood address me ez we met, ez ef by chance:

'Good mornin, Senator!'
And I wood promptly respond:
'Good mornin, General.'

This very loud so't the bar-keeper wood heer us. I hey the same general appearanse uv most uv the nooly-elected Dimekratic Senators, and the imposishen wuz easy.

Then I wood ask the Noo Yorker to take suthin, and when we hed took suthin I wood hawtily remark, 'Chalk it down!' and walk out. It worked several times, but the trouble uv dedbeetin fur likker is that after yoo git so many drinks down yoo lose yoor proodence, and the result is bein kicked out. Myself and the friend from Noo York hev bin kicked out so many times that we hey both acquired corns under our coat-tails.

I returned to the Corners disgustid, and found our friends disgustid likewise. The party in the Corners is disruptid, and chaos is come again. Bascom hez shut down onto us, and all the Deekin and me hev is a jug wich he bot afore credit wuz abolished, but when that is gone hevin knows wat we shel do.

PETROLEUM V. NASBY,
(Discurridged.)

Scientific Miscellany.

An Australian naturalist has discovered the nervous system of the sponges.

Electrical footwarmers for use in railroad carriages are undergoing experiments by M. de Meritens at his works in the Rue Boursal, Paris.

Liquefied oxygen is lighter than water, and a little heavier than alcohol, according to a french chemist, who has calculated its specific gravity as 0.888.

The quinquennial prize of the Belgian Government has been awarded to Prof. La Paige, of the University of Liege, for his researches in mathematics and physics.

H. M. Leply has from analysis of masses of boiled beetroot obtained an average of 131 grains of nitrate of potassium and 143 grains of chloride of potassium in every 100 kilograms.

Cows are said to eat horse chestnuts very rapidly; but these nuts do not appear to do so well with other animals of the stock raiser. Meal made from horse chestnuts contain 10 per cent. of albuminoids.

Aseptol is said to be a better antiseptic than either salicylic or phenic acid. It is a syrup liquid of an amber color, and it has a peculiar disagreeable odor. It boils at 266 dgr. Fahrenheit and crystallizes at 46 dgr.

Dr. M. Rubner says that, while the experiments of Chossat, Regnault, and others seem to show that small animals consume relatively more nutriment than large ones, he is unable himself to confirm this conclusion.

In Cape Colony the extensive planting of the common tomato is recommended, as it is alleged that insects shun the land on which it is grown. The suggestion is made, however, that the same effect may not be produced in cooler countries.

Mons. Onimus has reported to the French Academy of Sciences that the cholera epidemics of Paris and Marseilles were attended by a low proportion of ozone in the atmosphere, and that the administration of ozone produced favorable results in cases of the disease.

A French archæologist, Mons. Saillard, has discovered the workshop of a prehistoric armorer in a steep rock on the coast of Brittany. The workman lived in a stone age, and his skeleton was found among the various stone weapons and implements upon which he has been working.

A German mining engineer, Herr J. Muller, brings light coins up to the standard weight by the electro-deposition of metal upon them. Unless it is necessary to add considerable to the weight, this process—simply forming a thin and uniform coating—does not deface the characters upon the coin.

Pasteur, the great French chemist, devotes his entire time to original research, although he receives equivalent to $2,000 a year as scientific director of the Superior Normal school of Paris. Koch, the eminent German physiologist, is provided with a laboratory by the government, and is paid a sum equal to $1,500 per annum.

Most experiments with hydrochlorate of cocaine have been confined to mucous surfaces, like the eye and the mouth. By applying it under the skin, however, Mons. J. Grasset has found that the new anæsthetic may be made to produce local insensibility in any part of the body, the duration being sufficient for various surgical operations.

An English observer has reached the conclusion that the musk beetle (Aromia moschata) has the power of emitting or suppressing its odor at pleasure, but that when dying the scent is continuous and very powerful. He mentions a case in which a scent of roses has been known to proceed from the human body in fatigue and weakness. Similar instances are given by another writer.

NEW ADVERTISEMENTS.

A Remarkable Case.

Mrs. Henry Ellis, 500 Scott street, Milwaukee, Wisconsin, writes: "DR. S. B. HARTMAN & CO., COLUMBUS, O.: I am induced by a sense of duty to the suffering to make a brief statement of your remarkable cure of myself. I was a most miserable sufferer from the various annoying and distressing diseases of delicate persons, which caused me to be confined to my bed for a long time, being too weak to even bear my weight upon my feet. I was treated by the most reputable physicians in our city, each and all saying they could do nothing for me. I had given up all hopes of ever being well. In this condition I began to take your MANALIN and PERUNA, and I am most happy to say in three months I was perfectly well—entirely cured, without any appliances or support of any kind."

Mr. G. A. Proehl, New Portage, Summit County, Ohio, writes: "My wife has been sick for about five years. In the first place the doctor called it leucorrhœa, and treated it about one year, and she grew worse, and turned to ulceration of the womb, and was treated for that two years, but she grew worse and the doctor gave her up. Then I employed Dr. Underwood, one of the best doctors of Akron, but under his treatment she grew worse. She was paralyzed; she had lost all of the sense of feeling and her eyesight. She could not walk for nearly two years. About six months ago Underwood gave her up. She tried your PERUNA. She has taken three bottles, and it did more good than any other medicine. The paralysis has about left her; her eyesight is getting better. We will continue the use of PERUNA until she is well."

Mr. Isaac Nicodemus, Schellsburg, Bedford County, Pa., writes: "I am induced, by a sense of duty to the suffering, to make a brief statement of your remarkable help, as a sufferer of catarrh in my head and throat. I doctored with one of the best physicians in our place for that dreaded disease, catarrh, and found no relief. But in 1883 I lost my speech, and was not able to do any kind of work for near three months. I could neither eat nor sleep. PERUNA and MANALIN did wonders for me. I used three bottles of PERUNA and one of MANALIN, and now I am in better health than I have been for ten years, and I can heartily recommend your medicine to all suffering from that dread disease, catarrh."

Mr. I. W. Wood, Mt. Sterling, Ohio, says: "Your medicine gives good satisfaction. My customers speak highly of its curative properties."

Order of Publication.

Benjamin F. Harvey, Plaintiff, vs. Samuel W. Arenhalt, Administrator of Amos W. Arenhalt, deceased, and others.

No. 27 Equity. In the Orphans' Court for Garrett county.

The object of this Suit is to procure a decree for the sale of the real estate of Amos W. Arenhalt, late of Grant county, West Virginia, deceased, for the payment of the claims of his creditors.

The bill states that the said Amos W. Arenhalt was, in his lifetime, seized and possessed of valuable real estate in Garrett county.

That being so seized and possessed of said real estate, the same being less than $2500 in value, and having some personal property, he sometime in the month of January 1885, departed this life, intestate, and unmarried, leaving surviving him as his only heirs at law, the following brothers and sisters, viz: Samuel W. Arenhalt, Mary M. Arenhalt, who is intermarried with a certain David Moreland, David Arenhalt and Keziah F. Arenhalt, who resides in Grant county, West Virginia, Martha Ann Arenhalt, who is intermarried with a certain Thomas Crow, both of whom reside in Garrett county, Maryland; Job W. Arenhalt, Jacob L. Arenhalt, Rebecca V. Arenhalt, Isaac T. Arenhalt and Flora Arenhalt, who are infants under the age of twenty-one years, and reside in Grant county, West Virginia.

That the said Amos W. Arenhalt was in his lifetime indebted unto the plaintiff in the sum of five hundred dollars, and also to divers other persons in various amounts.

That Administration of the personal estate has been granted by the Orphans' Court for Garrett county, to Samuel W. Arenhalt.

That the said personal estate is insufficient to discharge all the just debts due and owing by said Amos W. Arenhalt at time of his death.

That the plaintiff and the other creditors are entitled to have the balance due on their claims paid out of the real estate.

The bill contains a prayer for a decree for the sale of said real estate and for Order of Publication, against the non-resident defendants.

It is therefore this 13th day of April, 1885, ordered by the Orphans' Court for Garrett county, in Equity, that the plaintiff, by causing a copy of this order to be inserted in some newspaper published in said Garrett county, once in each of four successive weeks before the 16th day of May next, give notice to the said absent defendants, Samuel W. Arenhalt, Mary M. Moreland, David Moreland, her husband, David Arenhalt, Keziah F. Arenhalt, Job M. Arenhalt, Jacob L. Arenhalt, Rebecca V. Arenhalt, Isaac T. Arenhalt and Flora Arenhalt, of the object and substance of this bill, warning them to appear in this Court in person or by solicitor, on or before the 13th day of October next, to show cause if any they have, why a decree ought not to be passed as prayed.

MAGNETIC CURES. DR. HILL is to discover the philosophical principle that all nervous pains, aches, and debility should be treated directly from the "brain battery," from whence emanate all nervous force and will power. All other forms of treatment for nervous disorders are failures. Every person who suffers from nervousness knows this, and that medicines only palliate, but never cure. These appliances are magnetic, and differ from all others on the market which are electric. Magnetism is the life of man. Their curative qualities are wonderful in all nervous complaints. The Roman physicians practiced magnetic treatment 1,000 years ago in nervous diseases, but did not treat from the "brain battery." Dr. HILL has made this great discovery, the only sure cure for nervous Headaches, Rheumatism, Neuralgia, Liver and Kidney Complaints, Paralysis, Gout, Spinal weakness, Dyspepsia, Constipation, Cold Limbs and Feet, and General Debility. Miraculous cures noted every day. The Magnetic Brush lifts pains, and the only article of the kind invented. It is the greatest curative agent known and used in a "brush bath" imparts tone, replenishes the debilitated system, and creates warmth. In chronic cases our Magnetic Bands, Belts and Pads should be used. The brushes are warranted to do the work, or the money refunded. Send for circular and testimonials. By giving a description of nervous troubles we will give advice and directions how to use our appliances. HILL MEDICAL MAGNETIC APPLIANCE COMPANY, Lock Box 59, Washington, D. C.

PENSIONS For wound, disease or other disability. Widows, minor children and dependent parents entitled when death resulted. SPEER'S

PORTUGAL GRAPE WINE,

—Also—

UNFERMENTED GRAPE JUICE.

Used in the principal Churches for Communion. Excellent for Females, Weakly Persons and the aged.

ADOPTED IN HOSPITALS AS THE BEST

SPEER'S PORT GRAPE WINE!

FOUR YEARS OLD.

THIS CELEBRATED WINE is the pure juice of the dead ripe Oporto Grape, raised in Speer's vineyards. Its valuable,

TONIC AND STRENGTHENING PROPERTIES

are unsurpassed by any other Wine. Being produced under Mr. Speer's own personal supervision, its purity and genuiness, are guaranteed by the principal Hospitals and Boards of Health who have examined it. The youngest child may partake of it, and the weakest invalid use it to advantage. It is particularly beneficial to the aged and debilitated, and suited to the various ailments that affect the weaker sex. It is in every respect A WINE TO BE RELIED ON.

Speer's Unfermented Grape Juice,

Is the juice of the Oporto Grapes, preserved in its natural, fresh, sweet state as it runs from the press by fumigation, thereby destroying the exciter of fermentation. It is perfectly pure, free from spirits and will keep in any climate.

Speer's Burgundy,

It is a dark rich medium Dry Wine used by the wealthy classes as a Table or Dinner Wine, and by physicians in cases where a dry wine instead of a sweet port is desired.

Speer's Socialite Claret.

Is held in high estimation for its richness as a Dry Table Wine especially suited for dinner use.

Speer's P. J. Sherry.

Is a wine of Superior Character and partakes of the rich qualities of the grape from which it is made.

Speer's P. J. Brandy.

IS A PURE distillation from the grape, and stands unrivalled in this Country for medicinal purposes.

It has a peculiar flavor, similar to that of the grapes from which it is distilled.

See that the signature of ALFRED SPEER, Passaic, N. J. is over the cork of each bottle.

Sold by A. G. STURGISS, and by druggists everywhere. Feb. 16'84 1y.

NEW ADVERTISEMENTR.

AYER'S Sarsaparilla

Is a highly concentrated extract of Sarsaparilla and other blood-purifying roots, combined with Iodide of Potassium and Iron, and is the safest, most reliable, and most economical blood-purifier that can be used. It invariably expels all blood poisons from the system, enriches and renews the blood, and restores its vitalizing power. It is the best known remedy for **Scrofula and all Scrofulous Complaints, Erysipelas, Eczema, Ringworm, Blotches, Sores, Boils, Tumors, and Eruptions of the Skin,** as also for all disorders caused by a thin and impoverished, or corrupted, condition of the blood, such as **Rheumatism, Neuralgia, Rheumatic Gout, General Debility, and Scrofulous Catarrh.**

Inflammatory Rheumatism Cured.

"AYER'S SARSAPARILLA has cured me of the **Inflammatory Rheumatism,** with which I have suffered for many years.
W. H. MOORE."

Durham, Ia., March 2, 1882.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists; $1, six bottles for $5.

DR. JOHN BULL'S

Smith's Tonic Syrup

FOR THE CURE OF

FEVER and AGUE

Or CHILLS and FEVER,

AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration to the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.

BULL'S SARSAPARILLA is the old and reliable remedy for impurities of the blood and Scrofulous affections.

CARPENTER AND BUILDER,

EAST END OAK STREET, OAKLAND.

Furniture repaired. Will also take orders for new furniture. Rustic work on hand and manufactured to order. Give him a call

A PLUCKY BOY.

The boy marched straight up to the counter.

"Well, my little man," said the merchant complacently—he had just risen from such a glorious good dinner—"what will you have to day?"

"O, please sir, mayn't I do some work for you?"

There were a few wisps of hair along the edges of the merchant's temples, and looking down on the appealing face, the man pulled at them.

When he had done tweaking them he gave the ends of his cravat a brush and then his hands traveled down to his vest pocket.

"Do some work for me, eh? Well now, about what sort of work might your small manship calculate to be able to perform? Why, you can't look over the counter!"

"Yes, by standing on your toes—are they coppered?"

"What sir?"

"Why, your toes. Your mother could not keep you in shoes if they were not."

"She can't keep me in shoes any how, sir," and the voice hesitated.

The man took pains to look over the counter. It was too much for him—he couldn't see the little toes. Then he went all the way around.

"I thought I should need a microscope," he said, gravely, "but I reckon if I get close enough I can see what you are like."

"I'm older than I'm big sir," was the next rejoinder. "Folks say that I'm very small for my age."

"What might your age be, sir," responded the man, with emphasis.

"I'm almost seven," said Tommy, with a look calculated to impress even six feet nine. "You see my mother hasn't anybody but me, and this morning I saw her crying because she could not find five cents in her pocket-book, and she thinks the boy who took the ashes stole it—and—I—have—not—had—breakfast, sir." The voice again hesitated, and tears came into the blue eyes.

"I reckon I can help you to a breakfast, my little fellow," said the man feeling in his vest pocket.

"There will that quarter do?" The boy shook his head.

"Mother wouldn't let me beg, sir," was the simple answer.

"Humph! Where is your father?"

"We never heard of him, sir, after he went away. He was lost, sir, in the steamer City of Boston."

"Ah! that's bad. But you are a plucky little fellow, anyhow. Let me see," and he puckered up his mouth and looked straight down into the boy's eyes, which were looking straight into his. "Sanders," he asked, addressing a clerk, who was rolling up and writing on parcels, "is Cash No. 4 sick?"

"Dead, sir; died last night," was the low reply.

"Ah! I'm sorry to hear that. Well, here's a youngster that can take his place."

Mr. Sanders looked up slowly, then he put his pen behind his ear—then his glance traveled curiously from Tommy to Mr. Towere.

"Oh, I understand," said the latter, "yes he is small, very small indeed, but I like his pluck. What did No. 4 get?"

"Three dollars, sir," said the astonished clerk.

"Put this boy down four. There, youngster, give him your name and run home and tell your mother you have got a place at four dollars a week. Come back on Monday and I'll tell you what to do. Here's a dollar in advance; I'll take it out the first week. Can you remember?"

"Work sir—work all the time?"

"As long as you deserve it, my man."

Tommy shot out of the shop. If ever broken stairs that had a twist in the whole flight, creaked and trembled under the weight of a small boy, or perhaps, as might be better stated, laughed and chuckled on account of a small boy's luck, those in that tenement house enjoyed themselves thoroughly that morning.

"I've got it, mother! I'm took. I'm cash boy. Don't you know when they take parcels the clerks call 'Cash?'—well I'm that. Four dollars a week! and the man said I had real pluck—courage, you know. And here's a dollar for breakfast; and don't you ever cry again, for I'm the man of the house now."

The house was only a little ten-by-fifteen room, but how these blue eyes did magnify it. At first she looked confounded; then she looked—well, it passes my power to tell how she did look as she took him in her arms and kissed him, the tears streaming down her cheek. But they were tears of thankfullness.—*English Journal.*

Going in Debt.

The worst mistake the farmer makes, especially at the start, is going too heavily in debt. It seems that on this point farmers are not willing to take experience of others. Although they need but to look around them to see the mistakes others have made in this particular, though they have been warned time and again by their best friends, the agricultural press, yet they seem to think they will fare better than others have done. They do not take into account the very many things that may come to pass which will be against them. In short, they will not take the experience of others as a guide in this matter, and only a bitter personal experience will teach them the lesson; and even then it is somewhat difficult for them to appreciate fully the true case, but they often imagine that other things were the prime cause, and going in debt only the secondary one of their failure.

The great trouble is that "time waits for no man." Hot or cold, wet or dry, whether the seasons and crops are good or bad, pay day is sure to come, and sometimes when a man is sorely pressed time seems to fly.

A man comes along with a new machine of some kind to sell. He is a good talker and will give the farmer six months or a year to pay it in. "I can surely make that much money in that time," thinks the farmer, and the purchase is made. Almost before the farmer is aware of it the time has gone and the note is due. The farmer has not the money and the note begins to draw interest.

I know of a farmer who was once in good circumstances. He got in debt a little at the stores for different articles for his family. He bought several articles of farm machinery on credit, expecting to pay out of his wheat crop. That year wheat was a failure. So far his farm was clear and well stocked, he had plenty and could have got along without going in debt a dollar, by simply economizing a little, but the debts had been made and when the time of payment came he had no money. Then he thought, "Well, I can borrow a thousand dollars on my farm and pay off all these little debts, and have something left over to live on next year until I can make a crop. I can get the money for five years at ten per cent., and one hundred dollars is not very much for me to make on my farm and I can easily pay the interest.

So the money was borrowed and the mortgage given.

At the end of the first year everything seemed to have gone wrong, and he could not pay the interest.

"Never mind," said the creditor, "the note is a compound interest one, and as long as I am safe I will wait."

This was easy enough. Next year he would be more careful, and would surely pay up.

But his crops failed to come up to what he had expected. He had gone in debt at the stores, the blacksmith shop and at other places. These men wanted their money, while the man that held the mortgage would wait.

At the end of four years there still stood the mortgage, no interest paid, and the amount growing larger every day. To him there seemed but one course, and that was to save himself while he could. He sold the farm for all it would bring and went West to make a new start. Going in debt was a bitter lesson to him, but he learned by experience.

A Missouri Man and the President.

Washington Cor. N. Y. Graphic.

The difficulty of criticising the Administration was pretty neatly illustrated by a Missouri man the other night when I asked him what he had to find fault with. "The trouble is," he answered quizzically, "that I haven't got the standard to go by yet. My state of mind is that of a fellow in my town who went to the circus and saw the elephant. Somehow the brute standing there idly, waving his trunk in the direction of one angle and swishing his tail toward another angle, made the man mad. He walked around the leviathan and looked him over on all sides. He chucked a few pebbles at the creature in disgust, but they rattled off the thick hide and the elephant blinked in a scornful sort of way that made the man still madder. At last he burst out savagely: 'Goldarn, ye ugly brute, I'd like to lick ye, if I knew which end to begin at!'"

Notes and Comments.

The matches consumed in the United States require wood to the annual value of $3,298,562; the railroads use about $3,000,000 of wood for fuel and $2,000,000 for ties each year.

A solid silver balustrade, which had stood in one of the Mexican churches since the time of Cortez, was torn down not long ago and taken to the mint, producing over sixty thousand silver dollars.

Some person has calculated that to manufacture the 950,000 tons of paper annually required for the supply of the world, 430 days' medium flow of water down the river Thames would be needed.

Near Chickasawhatchee, Ga., says the Savannah *News*, a line of earthworks can still be seen which were thrown up by Gen. Jackson (Old Hickory) as a protection against Indians on his march to Florida through that section in 1818.

A Bloomington (Ill.) youth of 15, after a course of yellow-back literature, wrote to a merchant that unless he immediately received $100 he would burn down the merchant's store. He confessed afterward that he adopted the scheme from a novel.

Francis Morphy's coat was stolen in Pittsburgh a few days ago. The thief pawned it and sold the pawn ticket, the buyer of which attended a Murphy meeting and took the pledge. Francis Murphy then tied a blue rib. bon in the buttonhole of his own coat on another man.

Alcoholic intemperance is stated to be increasing to an alarming extent among the women of Australia. In discussing the matter at a meeting of the Melbourne Medical Society the physicians present concurred in attributing the trouble to close confinement, anxiety, and the fatigue arising from overwork.

Mr. E. Matthews, Jackson county, Ga., has a colored man living on his place who was left in the Cherokee Nation, in Twenty-nine-mile Stretch, sold twice by John A. Murrell and shot at three times by the Confederate soldiers. He is now the father of 49 children and is 90 years old. He can plow as much in a day as any man.

One of the cases recently reported at a meeting of the Charity Organization of Washington was that of a professional beggar who had two dresses—a begging dress and a society dress. Her name appeared in the society columns of a city paper as receiving guests during the inauguration, and she was found to be living handsomely out of alms,

A serious epidemic of whooping cough has run through the islands of the Fiji group. The malady has carried off all the very young native children, and left a decrease in the population of 3,000. A few years ago 30,000 persons died from an epedemic of measles. Since then the local government have done much to instruct the people in the laws of health.

"I passed through a funny town the other day," remarked a gentleman who is just home from the South. "It was a place called Fulton, on the Illinois Central Railroad, and is built right over the dividing line between Kentucky and Tennessee. The main street of the town is the dividing line. On the Kentucky side of the street local option is in strict enforcement, but you may cross over to the Tennessee side and find a dozen saloons in full blast."

Mr. Walter, of the London *Times* is said to have been the originator of the custom of charging for marriage notices in the newspapers. The charge at first was trifling, and the income of the *Times* from this ssurce was paid regularly to Mrs. Walter as pin money. On her death she passed this prescriptive right of hers to her daughter, and when it was repurchased a few years ago by the present proprietor of the paper it was assessed at from £4,000 to £5,000 a year.

A Remarkable Escape.

Mrs. Mary A. Dailey, of Tunkhannock, Pa., was afflicted for six year with Asthma and Bronchitis, during which time the best physicians could give no relief. Her life was despaired of, until in last October she procured a Bottle of Dr. King's New Discovery, when immediate relief was felt, and by continuing its use for a short time she was completely cured, gaining in flesh 50 lbs. in a few months.

Free trial Bottles of this certain cure of all Throat and Lung Diseases at Sturgiss' old reliable drug store. Large bottles $1.00.

OAKLAND, GARRETT CO., MD.

LOVE'S SEASONS.

'Twas spring when I first found it out;
'Twas autumn when I told it;
The gloomy winter made me doubt,
And summer scarce could hold it:
"She loves," the mating robins sang
In sweet, delicious trebles,
And in the woods the echo rang
In music o'er the pebbles.

The fresh air, filled with fragrant scent
Of blossoms, softly hinted
The self-same song; where'er I went
I found the message printed
On bud and leaf, on earth and sky,
Through sun and rain it glistened,
And though I never reasoned why,
I always read or listened.

The summer dawned and still the birds
Sang in their tree-top glory,
And something seemed to make their words
A sequel to my story:
"You love," they twittered in the trees;
When'er the light wind stirred them—
Distracting words!—on every breeze
They fluttered, and I heard them.

At last the mellow autumn came,
And all the leaves were turning,
The fields and forests were aflame
In golden sunlight burning;
The parting birds sang out again
A sentimental message:
"Go tell her," whispered they, and then
I thought 'twas love's first presage.

O timid-hearted twenty-four,
To faint and lose your courage,
Or half-reluctantly implore
A pretty girl at her age!
For when I stammered what they sung,
And all their secrets told her,
She said the birds were right, and hung
Her head upon my shoulder.

—*Frank Dempster Sherman, in Century.*

BEHIND THE SCENES.

Stage Secrets Revealed by a Newspaper Correspondent.

Description of the Means Employed to Produce Theatrical Tempests, Thunder and Lightning, Baby Cries, Fires, Moonlight, Snow-Storms, Etc., Etc.

Have your readers ever seen the interior of a theater when a performance was not in progress? Of all dreary places this is the dreariest. Nothing can be more depressing than the contrast between that imperfect light which makes everything appear mean and shabby, and the splendid glories of performance time. Seats, then the comfortable resting-places of happy people, are now cold and draped as dismally as the parlor of a farm house. The costliest decorations appear dingy; the effect of the whole is ineffably disagreeable and chilling.

The height of desolation is presented behind the scenes. How different are these coarsely-painted views from the pleasing effects shown at night! The bare walls, cold iron staircases, draughts and miscellaneous seeming rubbish affect one with sepulchral gloom. Can it be possible that only last night was here produced that which delighted thousands with bright wit and brilliant scenes, or stirred the higher nature with great thoughts and generous emotions?

Your correspondent's wish to elicit some information as to how effects are produced on the stage, in aid of the dialogue and assisting to hold the mirror up to nature with a perfection which astonishes, was favored with the courtesy of a thorough gentleman.

Preliminary talk led up to the discussion of the baby as an "element" in the domestic drama.

"How is it, Mr. Fortescue, that you are able to charm the ladies of the audience with an exact imitation of the inevitable bab.?"

"Nothing can be easier, my dear sir, than to procure a good imitation of that endearing but troublesome article."

"Of course not; but by what means do you make the counterfeit cry with a justness of tone and accuracy of pitch which suggest midnight tribulations to the married man, and give ladies mischievous recollections, not to say foretastes, of the woes the little innocent works to the impatient and nightly-habited father?"

"You are a little out of my depth; my time has yet to come. But I will answer your question. You don't care to see the 'baby cry,' I suppose?"

"Not, if it is not necessary."

"Which, as Mrs. Gamp says, it is not. It is merely a tube with a hole or two in it, like those of a flute, and a small bag at the end opposite the mouth-piece. The whole thing while in use is covered by the hand of the 'super,' who blows into it like a child blows into a whistle, making the 'justness of tone and accuracy of pitch' of which you speak, with the additional advantage of prolonging the various cry, by means of the bag at the opposite end, which, of course, is made to contain much or little air at the pleasure of the operator. After a little practice with this instrument the ordinary 'super' becomes an eminently successful cry baby."

"That is all, then; but to jump from a little thing to a great one, I am one of those people who share the terrors of the theatrical tempest."

"Are you, indeed? It would be a pity to spoil your reverence."

"'Barkis is willin'.' Pray proceed."

"What do you say to a storm at sea?"

"Just the thing. Tell me as much about it as you can, there's a good fellow."

"I'll try. The first requisite to the production of a first-class storm at sea is the sea-cloth, which, I need not say, is appropriately painted. This cloth is shaken as long as the storm lasts, from the different entrances on the stage. If four on each side, twice four being eight, eight 'supers' have the job on hand. I assure you that eight muscular Irishmen can make an awful time on the briny deep."

"Is this way of producing an agitated ocean the only one?"

"In all my experience I have not known another practiced."

"I ask the question, because a few months ago a paragraph was running here, there and everywhere in the newspapers, which contained an alleged account of the production of great waves by the exertion of small boys kicking under the sea-cloth."

"Don't you believe that. Why the poor little chaps would have been suffocated by combined heat and dust. There can not be a word of truth in the account. 'How the world is given to lying!'"

"But the pelting rain?"

"An effect easily produced, and in several ways. Beans are a valuable element in theatrical rain."

"Beans? Please explain."

"With pleasure. These symbols of culture are shaken in a large box on the interior bottom of which are iron 'cleats,' so that the beans trip on them and make the natural sound of rain, that is, near enough, as the imagination of the audience amends the device. Frequently beans are used in another way than this, being poured from one barrel to another. You see that when a company is on the road, the readiest way to make rain is to get a couple of barrels and a few gallons of beans from the nearest grocery. Sometimes, if far from Boston, you know, out West, for example, corn is used instead of beans, but beans are better, my dear fellow, always better. Nothing like beans."

"I think I have heard that shot is used in the production of rain."

"Yes: you are right this time. It is rolled down a kind of trough or spout of wood, placed at the suitable angle. But nothing can shake my faith in beans as a help to a stormy time."

"Suppose we assist the storm with a little thunder and lightning."

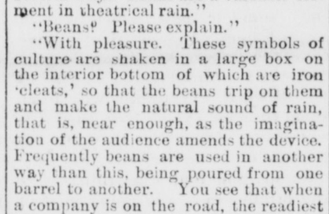
"With pleasure. The proper way to produce lightning on the stage—I do not say that no easier but less effective plan is practicable—but the *right* way is by means of a vessel which is among the properties of all well-conducted theaters."

"I should like to see it, if not too much trouble."

"You shall see it."

Leaving their snug quarters for a while your correspondent and his friend made their way to where the property in question was to be found. Its production necessitated considerable explanation.

"I guess we'll go back to my room and take this thing with us. 'Tis horribly cold here."



We returned to comfort accordingly where the scribe was shown a funnel-shaped tin-box, with a mouthpiece reaching out in a straight line from the bottom, the tube communicating with the inside of the box. The top of the vessel was closed, but was perforated pretty liberally. In the center of the top was a small kind of lamp, a cup with a wick in it. It was difficult to associate this remarkable contrivance with lightning, and your correspondent said so.

"Be patient, now, and I'll throw light on the subject."

"Do, please, for I am very much interested."

"All right. At the druggists' can be bought an inflammable powder, which we theatrical people call 'Lycopodium.' When a coming tempest is to be embellished with lightning, a quantity of the powder is placed in the bottom of this tin box."

"Yes."

"You see that this tube and mouthpiece lead to inside the box."

"I do."

"Thus far all is perfectly plain, then?"

"I am not much the wiser yet."

"No, but you will be, presently."

"This little cup or lamp on the tin top, is filled with alcohol, in which is placed a wick. The wick is lighted; the 'super' blows through the tube, the inflammable powder is blown through the perforations in the top of the box, catches fire, and consumes in a flash, which is lightning itself, so far as its appearance goes."

"Ha-ha-ha."

"What are you laughing at, if I may ask the question?"

"I was thinking of the disillusion which would take place were a spell-bound audience to be suddenly treated with a sight of the 'super' blowing into this queer box."

"That would be truly funny—a fellow in his shirt-sleeves thus occupied, standing on a step-ladder, with the ocean agitating in front of him. But seriously you must not under-value the mechanical devices of the stage. If effective, they are none the worse for being simple and cheap."

"I take your rebuke in all humility, Mr. Fortesque, and hope you will not cut me short in the interesting discoveries I am making. At least I would like to learn something of the mechanical theatrical thunder."

"And you shall, of course. I am delighted to have so interested a listener."

"You have noticed," continued my informant, "how exactly the awful crack which succeeds the flash of lightning is imitated on the stage."

"I have, and wondered how it was done."

"I need not take you out to show you. A large piece of sheet-iron, having a handle at its lower end, is suspended behind the scene. The well-accustomed 'super' seizes the handle and reminds devout people of the crack of doom when he shakes the iron by its aid. To keep up the natural sound of thunder immediately succeeding the crack which follows the flash of lightning large wooden balls are rolled down a common wooden 'shute,' in which are catches at intervals to trip and hinder the balls and vary the noise of their descent. By these ways, you see, both explosive and rolling thunder are successfully imitated."

"I should be obliged to you for information with regard to the manner in which conflagrations are shown on the stage. Sometimes there appears to be the danger of an actual fire in

these very exact representations. Is there not reason to apprehend trouble in this way?"

"Not the slightest, ordinary care being exercised. You probably know that the scenery used in showing a building on fire is strung around with wires in different places. Upon the wire is twisted cotton saturated with alcohol, which is ignited. Red fire can be bought of most druggists, and is burned as long and in as large a quantity as may be deemed proper. There is nothing particularly interesting to be said about theatrical conflagrations, excepting, perhaps, as to the manner of producing explosions in association with them."

"Yes; I was just about to suggest that. When nervous old ladies and other people, too, nearly jump out of their seats for fear, it is time for the public to know that theatrical ingenuity does not endanger the lives of patrons of the histrionic art."

"Perhaps it would be well to treat the matter in the grave manner you suggest, but after the public have read what you are preparing for them, audiences will not be so easily frightened, will they?"

"Perhaps not."

"You have noticed how circumstantial, so to speak, a theatrical explosion is. I will tell you how it is done in as few words as I can. The explosion and its effects are caused by igniting a mixture of pulverized charcoal, sawdust and gunpowder by means of a torch. With the explosion of the powder, the sawdust and the charcoal are thrown up; and, as you say, what with burning alcohol everywhere on the stage and as much red fire as is necessary, with a noisy explosion and its scattering debris, the combined effect is apt to scare the public, more or less."

"'How sweet the moonlight sleeps upon this bank!'"

"I see what you are aiming at. I wonder sometimes how the primitive style of theatrical product on in Shakespeare's time admitted of giving the proper effect to his lines. We indeed fall short, as a rule, of what may be called mechanical faithfulness to the master even now, but, coming back to your suggestion, we can manage to give 'Lorenzo' and 'Jessica' a very good moon."

"I remember to have seen moonlight most cleverly imitated in some representations I have attended."

"Yes, and by very simple means, as you may judge for yourself. The form of the moon is cut in the scene, making it a full, waxing or waning orb as may be preferred. After the space has been cut out, it is covered with some kind of woven material of the proper tint, which will permit the light of a lamp or a candle to pass through it, without showing the means of illumination itself."

"In the words of the immortal Bottom: 'Well done, moonshine!'"

"Your reference suggests how awkward were the means employed when Shakspeare trod the boards, to assist the illusion of the story presented."

"I suppose that was so, and how ready he was to make fun of their imperfection. By the way, when we were talking about storms and tempests, we forgot wind 'quite entirely.'"

"So we did. An omission soon filled, however. When you were a boy did you ever amuse yourself by making a noise by rapidly moving a split, flat piece of wood backward and forward in the air?"

"Many's the time and oft."

"Just so. Well, now, the instrument created by your boyish ingenuity embodied the idea and principle of that used in producing the 'sough' heard in the theater."

"Something a little more elaborate than that, I suppose?"

"Very little more so, I assure you; but decidedly tempestuous effects are produced another way, involving the use of a machine."

"What's the machine like?"

"It has a handle like a grindstone—don't rise; we need not leave the stove to see it—and turns after the same plan. The body, which is turned in the frame, is a cylinder-shaped thing made of laths. Over this is thrown a piece of silk or satin, which the 'super' holds down with his foot on one side, but it is quite short on the other and loose. When, therefore, the operator turns the handle of the machine, the piece of cloth, loosely thrown over the cylinder, makes, in connection with the laths and hollow form of the body of the machine, a sufficiently near approach to the efforts of old Boreas himself."

"We have had a long chat, Mr. Fortescue, and——"

"A pleasant time."

"As I was about to say, my good sir, I dislike to detain you longer, but other mechanical aids to the 'elegant entertainments of the theater' may occur to you, and I am selfish enough to wish to take every advantage of this opportunity."

"You are quite right in doing so. A row of strong-lunged 'supers' make the best possible imitation of bloodhounds in full cry."

"Yes, but to make a snow-storm may not be so easy."

"'Tis, in fact, a great deal easier. A man gets into the 'flies' and throws down torn paper in sufficient quantity. That is all there is to a snowstorm."

Your correspondent was a little puzzled by this assertion, and probably looked puzzled.

His informant observing this, continued: "I ought to add that the snow-covered appearance presented by people passing over the stage is not due to falling paper, but to corn-meal smeared on their clothing before they enter the scene. To change the subject. You have heard in the theater an imitation of the sound of wheels. This is done by rolling a round counter weight of appropriate size on a wooden surface. When the crack of the whip accompanies the noise of the approaching carriage, two pieces of leather attached are snapped together."

"I am indebted to you exceedingly, my friend, for the information you have given me. It makes me think that an injustice is done to somebody."

"Why, what do you mean?"

"I mean the poor 'super.' While he works unseen and unthought of by the public the actor gets all the applause. —*N. Y. Cor. Louisville Courier-Journal.*

Corner in Peas.

In the early fall a Boston firm bought about 5,000 cases of canned peas. The market afterward dropped, but the firm decided to protect the original investment, and accordingly bought freely in Baltimore and other markets, until they held all the canned peas in the country. From the bottom price paid there has been an advance of sixty-five cents per dozen, and they have sold thus far 13,000 dozen. The advance in canned peas has affected other canned goods, and canned tomatoes and canned corn have advanced ten per cent. The corner in canned peas is so complete that the Boston firm referred to is sending canned peas to Baltimore, New York, and other leading markets.—*N. Y. Post.*

—The following story is told of the wild young "Prince" John Van Buren, son of Martin Van Buren: "He once accepted an invitation to address a large gathering of Sunday-school children, and in the course of his remarks undertook to entertain them with the story of Jacob and Esau. Midway in the narrative he was aware that his coat-tails were being vigorously pulled, and, half turning his head to find out the trouble, he was met by this exhortation from his friend in the rear: 'For goodness' sake, John, cut it short and sit down; you're getting the hair on the wrong man.'"—*Baptist Weekly.*

FOR OUR YOUNG FOLKS.

PIP! POP! FLIPPERTY FLOP!

Song of the Corn Popper.

Pip! pop! flipperty flop!
Here am I, all ready to pop.
Girls and boys, the fire burns clear;
Gather about the chimney here.
Big ones, little ones, all in a row.
Hop away! pop away! here we go!

Pip! pop! flipperty flop!
Into the bowl the kernels drop.
Sharp and hard and yellow and small,
Must say they don't look good at all.
But wait till they burst into warm white snow!
Hop away! pop away! here we go!

Pip! pop! flipperty flop!
Don't fill me too full; shut down the top!
Rake out the coals in an even bed,
Topaz yellow and ruby red.
Shade your eyes from the fiery glow,
Hop away! pop away! here we go!

Pip! pop! flipperty flop!
Shake me steadily; do not stop!
Backward and forward, not up and down;
Don't let me drop, or you'll burn it brown.
Never too high and never too low,
Hop away! pop away! here we go!

Pip! pop! flipperty flop!
Now they are singing, and soon they'll hop.
Hi! the kernels begin to swell.
Ho! at last they are dancing well.
Puffs and tuffs of feathery snow,
Hop away! pop away! here we go!

Pip! pop! flipperty flop!
All full, little ones? Time to stop!
Pour out the snowy, feathery mass.
Here is a treat for lad and lass.
Open your mouths now, all in a row.
Munch away! crunch away! here we go!

—*Laura E. Richards, in Youth's Companion.*

HOW BENNY RAN AWAY.

His Week's Experience as a Wanderer, and How Glad He Was to Get Back Home.

It was cold and rainy that morning, the morning that Benny ran away, and this was how it happened:

Benny and his mother lived at Dr. Grey's, and the doctor's little boy, Charlie, and Benny were great friends, but this particular morning there had been a quarrel, and Benny went off to the barn, if the truth must be told, sulking and refusing to play with Charlie—well, not for a long time, not before dinner, at least.

But it was cold at the barn and he soon started for the house. Now, he had been up on the hay-mow while he was at the barn, and so started for the house covered with dust. It rained on him, and he got his feet muddy, and altogether it was rather a dirty-looking Benny that walked into the sitting-room and up to the stove. Charlie, curled up in a big chair with a picture-book, looked up, saw him, laughed at him, pointed his finger at him and said: "Shame! dirty thing," which made Benny very angry.

Benny's mother was very neat, and coming in just then and seeing how dirty he looked, scolded, and tried to make him look somewhat cleaner. But Benny didn't like to have his face washed at any time, and this morning he was so very cross, and made so much fuss and noise that the doctor, sitting by the window studying, after looking up sternly once or twice, rose, set Benny gently outside the door saying: "There! stop there until you can come in and be quiet." Oh! how angry Benny was. He ran to the barn and walked around the floor for a long time. How shamefully he was used—what should he do—how mean Charlie was to laugh at him—and the doctor had treated him still worse—what made his mother stay there—he wouldn't any longer—Mrs. Gray, too, she was kinder to him than any of the rest, but she always made him go to bed at eight o'clock—he would run away, and then maybe they would be sorry—where should he go—perhaps he had better go down South—that gentleman visiting at the doctor's the other day said it was always warm there. Benny had heard him say to the doctor: "To one who has never visited the South, it is truly surprising the difference of climate one finds starting from here some night and traveling until some time the next day." "Well, Benny thought he could stand it to travel one night and part of the next day—he would go at once, so off he started. He heard Charlie calling him as he started but he only ran the harder. He went across the fields most of the time, for he was afraid of so many people and teams.

In the afternoon he began to get rather hungry. But about four o'clock he met a little girl coming from school. She called to him, and gave him what was left in her lunch basket. She tried to coax him home with her, but he would not go. He found a barn standing in the middle of a field and slept there that night, nestled down between some hay and straw.

It was late when he woke up the next morning, for he had got very tired the day before. His supper had been rather light, and he felt terribly hungry. Where was he to get his breakfast? Perhaps if he stopped at the next house they might give him something to eat; he would try. But here he received a terrible fright. He was scarcely inside the gate when a big boy coming out of the house, saw him, and cried: "What are you doing around here? Clear out! We don't want you! Towser, here Towser!" Benny ran away before he had got half through, but he heard the dog barking and expected to be overtaken every minute. But the boy, evidently satisfied, called the dog back and went off in the opposite direction whistling.

Poor little Benny. He had been so frightened and ran so fast he thought his heart was surely coming out of his mouth. As soon as he dared he stopped to rest, down by a bank and some bushes where he was sheltered from the wind, for it was growing colder.

It seemed to him as though he had not rested at all before he heard the sound of wheels coming down the hill beyond. He crept around to the other side of the bushes and lay peeping out. It was Dr. Grey. Oh dear! would he see him—was he looking after him? He thought he had got so far that the doctor could never come, but in reality it was only a few miles from the doctor's house, although it seemed such a distance to Benny—he wished he knew how his mother and Charley and Mrs. Grey were—the doctor is looking in this direction—will he see me?" Evidently he did not, for he drove right on, and after a while Benny started out once more.

He must have something to eat. About noon he saw a house that appeared to have no one around. He ventured into the yard after a time, and found a piece of bread and a cold potato by the kitchen door.

Benny was too hungry to be very particular, but he couldn't help thinking of the nice bread and milk Mrs. Grey gave him.

The snow was beginning to fly and it was growing so cold. Benny thought that he must find a place to sleep, early. How cold he was, how tired he was and how hungry he was. He wondered how much farther he would have to go to reach "down South."

The barn at which he stopped that night was old and dilapidated. The snow sifted through wide crevices over the hay mow.

Dr. Grey's horses were very gentle, and he had often gone up in the stall beside them and laid down. It would have been much warmer than on the mow that night, but those were strange horses and one of them kicked at him that night as he passed through the stable, so Benny dared not attempt to get very near.

He came down from the mow all covered with snow the next morning. A pail of milk was standing on the barn floor, where the farmer had left it for a few minutes while he gave the cattle some fodder.

Benny stole a drink, and hurried away.

He was much discouraged; he was so hungry, he was just starving, he thought; he had frozen one ear the night before and he didn't seem to get "down South," where it was "always warm;" it had grown colder ever since he started from the doctor's.

The result of his meditations you will see when I tell you that just one week from the time he ran away he was seen to walk up the gravel path leading to Dr. Grey's sitting-room door.

He was ashamed to go in. What would Charlie say; he looked worse than he ever did before?

He sat on the step for a minute or two and then began to cry piteously. The doctor himself opened the door. "Oh! ho!" was all he said as Benny walked past him into the house. Charlie jumped up from the hearth-rug, and hugged him, calling: "Why, Benny, where have you been? I thought I had lost you," and then hugged him again. His mother came running to meet him and commenced purring loudly, and walked up to Dr. Grey, who stopped and patted her, then she sat down by the stove and called Benny and began to wash his face, just as she did a week before, and Benny submitted without any fuss this time. Soon Mrs. Grey came in. She petted him and then brought him a saucer of milk. Oh! how good it tasted, and he was so glad to get back. There wasn't a happier kitten in the world than Benny that day.—*Toledo Blade.*

A CUNNING HORSE.

A Mischievous Colt Which Could Do Many Remarkable Things.

Did you ever own a nice horse, who was full of fun and mischief, and whose eye seemed to have a laugh in it? Let me tell you about such a one. She was as black as jet; she had a white star in her face, and a white stocking on her left hind foot. She was round and plump, and very quick in her motions. She could trot, rack, pace and run, and under the saddle was a charmer. Her name was Juliette. As a colt she took the lead in mischief.

She could untie a bow-knot, even when the end of the strap was put through the bough and drawn up tightly. But she was not so foolish as to do this when there was no occasion. But omit feeding her when the other horses were fed, and then step out of the barn for a few moments; suddenly return, and she would be found untied, and in a stall with another horse, helping herself to his grain. She had three associates, whom she led into mischief in the night. She would open the barn door, which was fastened with a hook and staple; open the barn-yard gate by drawing out the pin that held it. She would let down the bars with her teeth, and lead her three trusting companions into the grain field. There they would be found in the morning, while she had returned to the barn before the boys were up. She had such an innocent look when she had been on these excursions that it would call forth one's admiration. When I rode her to bring back the colts she seemed to know what we were after. She would go quite direct to where those wicked colts could be found, and we would chase them home in a hurry.

One night a mysterious noise was heard at the barn. Horse-thieves were not unknown, and, as we had the best horses in the neighborhood, great anxiety was felt. Father drew himself softly out of his warm bed. Revolver in hand, he went carefully and quietly out of the house, followed by a courageous bull-dog.

You can imagine his astonishment when, instead of finding horse-thieves, he found Juliette, standing with the raised pump-handle in her mouth trying to pump water; while the three colts, with unbounded confidence in her ability, stood at the trough watching her with expectant eyes.—*Our Little Ones.*

—Adirondack Murray now keeps a restaurant in Montreal, and he finds time to study Dominion politics. He writes to the Boston *Herald* that there are a large class who believe that Canada is destined to be something more than a colony of the British Empire. They hope for an independent nation. They hold that her population will soon outgrow that number which can be accommodated within colonial limits, and that the day will speedily come when a natural and peaceful separation will take place between her and England.

—The tower of the new city building, Philadelphia, will, with the exception of the Washinton monument, be the highest structure in the world; but, though the pressure on the foundation is nowhere more than nine tons to the square foot, the settlement of the more heavily-laden portion has cracked and broken the polished and sculptured stone in the interior.—*Philadelphia Times.*

—Lieutenant Schwatka has presented to the American Yacht Club the National flag which he had planted at the nearest point to the magnetic North Pole yet reached.

TEMPERANCE.

WILLIAM TURNER'S STORY.

Some months ago, I need not mention where,
There was a meeting in a Temperance hall,
And many workingmen assembled there;
Among them sat a man well dressed and tall,
Who listened anxiously to every word,
Until one near spoke to him, saying thus:
"Come, William Turner, I have never heard
How that you changed so much; so tell to us
Why you gave up the public house! Ah! few,
I'm sure, can tell so strange a tale as you.

Up rose William at the summons,
Glanced, confusedly, round the hall,
Cried, with voice of deep emotion:
"The little shoes—they did it all!

"One night, on the verge of ruin,
As I hurried from the tap,
I beheld the landlord's baby
Sitting in its mother's lap.

"'Look here, dear father,' said the mother,
Holding forth the little feet,
'Look, we've got new shoes for darling!
Don't you think them nice and neat?

"Ye may judge the thing was simple—
Disbel eve me, if you choose—
But, my friends, no fist e'er struck me
Such a blow as those small shoes.

"And they forced my brain to reason.
'What right,' said I, standing there,
'Have I to clothe another's children,
And to let my own go bare?'

"It was in the depth of winter;
Bitter was the night and wild,
And outside the flaring gin-shop
Stood my starving wife and child.

"Out I went and clutched my baby,
Saw its feet so cold and blue;
Fathers! if the small shoes smote me,
What did those poor bare feet do?

"Quick I thrust them in my bosom;
Oh, they were so icy chill!
And their coldness, like a dagger,
Pierced me—I can feel it still.

"Of money I had but a trifle,
Just enough to serve my stead;
I bought shoes for little baby,
And a single loaf of bread.

"That loaf served us all the Sunday,
And I went to work next day;
Since that time I've been a teetotal:
That is all I've got to say."

—*Our Little Ones.*

DESTITUTION.

Caused by Improvidence and Drunkness Among English Workingmen.

The volume of United States Consular Reports for January, which has just been issued by the Department of State, contains three reports by Consul Locke, of Newcatle-upon-Tyne, the first on "Destitution in the North of England," the second on "Iron Workers' Wages in the North of England," and the third on "Trade Depression in the North of England." Many of the facts embodied in these valuable reports have already been given to the readers of the *Blade* in Mr. Locke's letters.

From the report on "Destitution in the North of England," the following portion is given, showing the lamentable improvidence of the English laborers, and the part that the traffic in intoxicating drinks plays in increasing the want and misery of their women and children. The men whose condition is discussed are those engaged in the various departments of the shipbuilding trade:

In times like these lessons are always read the laboring classes as to how they should have lived in order to preserve themselves from such straits as those in which they now find themselves. But it seems impossible for the laborer, of the north of England at least, to benefit by these lessons. This is due to a number of causes, one of the chiefest of which is what seems to be a faulty system of early training.

A few days a young man of perhaps twenty-five or thirty years came to me for assistance in finding one of his brothers in America. He wanted aid from him. He said:

"I have been out of work for fourteen weeks, and there is no prospect of getting anything this winter, and I can't bear to see my wife and two children suffer. I must appeal to my brother in America for help."

"What is your trade?"

"I am a fitter, sir; but you know there is no ship-building here now, and will not be till spring at least, and by that time we may be all starved to death."

"Why don't you go to work at something else?"

"I don't know anything else. I was brought up a fitter, and have always been a fitter; and now that there is nothing for fitters to do I am without any resources."

That explains it all. Instead of learning every branch of a trade thoroughly, these men seem to be content to know simply one part of it, and to that one part they seem to stick all their lives, living well when there is work in that particular branch and totally unable to do anything else when there is not.

The last few years have seen a great improvement in this district, but the fact still remains that the working classes hereabouts are frightfully improvident.

For the past four years wages in the shipbuilding trade (and it is the men in that trade who are suffering most to-day) have been far above average wages, as there was a remarkable demand for high-class vessels, and builders were reaping such harvests that they could afford to and did pay big wages. The workmen, not profiting by the experiences of the past, seemed to imagine that such a condition of affairs was to endure forever, and their money went as fast as it came, no provision at all being made for the possibility of a sudden and total stoppage of the flow of the golden stream. When work ceased from lack of fresh orders, the men found themselves not only without means, but too frequently badly in debt.

Then came the periodical visits to the pawn shop, and the final appeal to the relief committee for the aid their prudence in times of plenty should have provided.

SQUANDERED FOR LIQUOR.

And the Temperance question plays no unimportant part in this matter. In a city of the size of Newcastle, where there are so many diverse interests, the consumption of liquor and the amounts of money expended therein are not so noticeable as in smaller places, where the great proportion of the people are engaged in one branch of trade. Take, for instance, the town of Sunderland, in this consular district, whose population of 104,000 is very largely made up of ship-builders. There are in that town no less than 587 drinking establishments, and a careful estimate places the amount of money received direct from workingmen at £150,000 per annum.

Where the men are paid off Saturday noon, the public houses claim them from that hour till closing time at eleven o'clock at night, and only too often the next night also, the following Monday being devoted to getting into condition to resume work on Tuesday. A thorough, practical Temperance reformation in the north of England would most materially lighten the burden over which the taxpayer moans so unceasingly, and would go a great way towards preventing such frequent recurrence of widespread distress, such as that existing here at the present time.

—*Toledo Blade.*

LAW AGAINST "TREATING."

How Nevada Is Trying to Regulate the Drinking Habit.

The Legislature of Nevada has enacted a law against "treating," which its advocates hope to prove a powerful blow at the drinking habit. As this bill is of interest to those engaged in the war on the whisky traffic, we give it in full:

SECTION 1. It shall be unlawful for any person or persons to treat gratuitously any other person or persons to or with any spirituous or malt liquor or liquors, wine or cider, or any beverage whatever, or to or with any other article whatever, whereby any spirituous or malt liquors, wine or cider, or any other beverage shall be obtained gratuitously in any public bar-room, saloon, beer hall or grocery in this State, or in any other public place of resort or amusement in this State.

SEC. 2. It shall be unlawful for any one to attempt to evade the provisions of this act by any chicanery or subterfuge whatever, such as pretending to sell one article and delivering another, or by falsely pretending to buy or sell such beverage.

SEC. 3. Any person or persons violating the first section of this act shall be guilty of a misdemeanor and, on conviction thereof, shall be punished by a fine of not more than twenty dollars and not less than four dollars, or by imprisonment in the county jail not more than ten days nor less than two days, or by both such fine and imprisonment.

SEC. 4. Any person or person violating the second section of this act shall be guilty of a misdemeanor and, upon conviction thereof, shall be punished by a fine of not more than fifty dollars nor less than ten dollars, or by imprisonment in the county jail not more than twenty-five days nor less than five days, or both by fine and imprisonment.

SEC. 5. In the event of the failure of any person to pay any fine authorized by this act, the said fine shall be served out in the county jail at the rate of two dollars a day. All fines herein specified shall be over and above all costs of court and fees and charges of the trial.

SEC. 6. All moneys collected under the provisions and by the authority of this act shall be paid into the general school fund of the county by which the convict on is had.

JOHN'S MONUMENT.

A Political Structure Built in Thirty-five Years — A Reckless Expenditure of Health, Time and Money.

John Jones began at the age of fifteen to build a monument and finished it at fifty. He worked night and day, often all night long and on the Sabbath. He seemed to be in a great hurry to get it done. He spent all the money he earned upon it—some say $50,000. Then he borrowed all he could; and when no one would loan him any more he would take his wife's dresses and the bed-clothes and many other valuable things in his home, and sell them to get more money to finish the monument.

They say he came home one day and was about to take the blankets that lay over his sleeping baby to keep it warm, and his wife tried to stop him; but he drew back his fist and knocked her down, and then went away with the blankets and never brought them back. And the poor baby sickened and died from the exposure. At last there was nothing left in the house. The poor, heart-broken wife soon followed the baby to the grave. Yet John Jones kept working all the more on the monument. I saw him when he was about fifty years old. The monument was nearly done; but he had worked so hard at it that I hardly knew him, he was so worn; his clothes were all in tatters, and his hands and face, indeed, his whole body, were covered with scars which he got in laying up some of the stones. And the wretched man had been so little in good society all the while that he was building, that he had about forgotten how to use the English language; his tongue had somehow become very thick, and when he tried to speak, out would come an oath.

That may seem strange, but I have found out that all who build such monuments as John's prefer oaths to any other word!

Now, come with me, and I will show you John's monument. It stands in a beautiful part of the city where five streets meet. Most men put such things in a cemetery. But John had his own way and put it on one of the finest lots to be found.

"Does it look like Bunker Hill monument?" asks little Amy Arlott by his side.

Not at all. John didn't want to be remembered in that way. He might have taken that fifty thousand dollars and built an asylum for the poor little children that have no home, and people would have called the asylum his monument.

But here we are at the front door. It is a grand house! It is high and large, with great halls and towers, and velvet carpets, elegant mirrors and a piano, and I know not what all; so rich and grand.

This is John Jones' monument! and the man who sold John nearly all the whisky he drank lives here with his family, and they all dress in the richest and finest clothes.

Do you understand it?—*Eli Perkins' "Wit and Humor of the Age."*

A Shocking Story.

Under the title "A Child of the Prison" the New York *Herald* tells a shocking story of an episode of prison life in New Jersey. It is that of poor Rosa McCarty, ruined by drink, and of her little five-year-old daughter and only companion. Mother and child have just been arrested in Jersey City and consigned to the penitentiary for sixty days. Born in a prison, this little creature has passed four of her five years of life behind the prison bars with her drunken mother. The twain have refused separation, and thus far have been so fortunate as not to be driven into that amputation of a tie which is, perhaps, not the less sacred that its only associations are vile. The picture of the little sunny-faced child accompanying her mother to and from the scenes of degradation and the scenes of incarceration within prison walls is one whose incongruity is its chief lesson to humanity—a lesson of fidelity, or natural love that not all sin and all wretchedness can uproot, of mute, automatic self-sacrifice beyond mortal ken. It is an incident in the drink traffic whose mere relation conveys a moral that must appeal to the most common understanding.—*Irish World.*

Total Abstinence.

Total abstinence never destroyed a home, blighted a wife or cursed a child.

Total abstinence never robbed a man of character, manliness or integrity.

Total abstinence never filled a jail or an alms-house.

Total abstinence never led a pure life into vice, nor blackened a pure heart with shame.

Total abstinence never filled the land with wailing nor its households with want.

Drinking habits destroy, blight and curse.

Drinking habits rob and impoverish.

Drinking habits lead into vice and shame.

Which is better—total abstinence or moderate drinking?—*Christian at Work.*

THE Massachusetts Prison Commissioners, in their annual report on the new "Male Reformatory," ask for a longer imprisonment of inebriates, for purposes of reformation.

SCHOOL AND CHURCH.

—The recent vote of the faculty of Harvard University to dispense with the study of Greek as a requirement was set aside by the overseers.

—In an address at the Louisville University the late Dr. Yandell is quoted as recommending a habit of cheerfulness: "A wide-spreading, hopeful disposition," he would say, "is your only true umbrella in this vale of tears."

—The Anglican Communion now numbers 206 Bishops and 29,668 clergy. This gives an average of one Bishop to every 144 clergy. In England there is only one Bishop to every 553 clergy; in Ireland, one to 146; Scotland, 35; Colonies, 38; and United States, 51.

—The annual report of Mr. Justin Winsor, librarian of Harvard College, shows that much greater use is made of the library by the students than ever before. Nine years ago only fifty-seven per cent. of them used the library; five years ago the percentage had risen to seventy-seven per cent., and last year it was eighty-four per cent.

—The English University constituencies include the whole mass of graduates who choose to keep their names upon the books; the lawyers and the physicians, the 'squires and the parsons, the bankers, merchants, and writers—men of every trade and of every rank in educated England. Oxford has 5,400 such electors, and Cambridge about a thousand more.

—Dr. South, when once preaching before Charles II., observed that the monarch and his attendant began to nod; and as nobles are common men when they are asleep, some of them soon after snored, on which he broke off his sermon and exclaimed: "Lord Lauderdale, I am sorry to interrupt your repose, but let me entreat you not to snore so loud, lest you awaken His Majesty."

—Says the New York *Independent:* "It may be untrue that a certain clergyman advertised, 'Marriages a specialty; strangers particularly invited,' but we fear the story was 'founded on fact,' and that there might have been added the words, 'No questions asked.' Some ministers are altogether too ready to declare vagrant couples husband and wife."

—Several months ago the Russian Government interfered to suppress the mission work carried on in the empire by the Religious Tract Society of London. It is now stated, however, that all the tracts confiscated have been returned by the Government, and permission has been given to resume the work of gratuitous distribution of the religious reading.

—The late Francis A. Drexel, the wealthy Philadelphia banker, left one-tenth of his immense property to be divided among some fifty charitable institutions connected with the Roman Catholic Church, of which he was a sincere member. This money is to be distributed by Archbishop Ryan, of Philadelphia. The remaining nine-tenths of his property is left in trust, the interest to be divided among the three daughters, and the principal to their children, should they have any. If they have no issue, the Church of Rome is to receive the nine-tenths twenty-one years after the death of the last of the three daughters. The Church is thus likely to get a total of $10,000,000.—*Philadelphia Press.*

PUNGENT PARAGRAPHS.

—"Matrimony Made Easy" is the title of a new book, but it does not show how to buy fifty dollars worth of dry-goods with a two-dollar bill.—*Norristown Herald.*

—Recipe for a delicious saucer of Southern strawberries: One decorated saucer, one gill of rich cream, one pound of pure sugar, one strawberry.—*Burlington Hawkeye.*

—An Indian princess has eloped from a Cincinnati dime museum with a St. Louis lawyer. There is no use trying to civilize these savages; their tastes are too depraved.—*Oil City Derrick*

—"Reading maketh a full man," says Bacon; but a man who gives to a Judge that excuse for his unsteady condition will receive a sentence not found in any of Bacon's philosophy.—*N. Y. Herald.*

—A grand old man said at the bar of the Supreme Court the other day that the life of a gentleman includes "not only good manners, but good morals, courtesy, kindness and honor and high-minded principles."—*N. O. Picayune.*

—It is stated that five petrified women were recently found in a small village in New Hampshire. Their husbands gave them money for bonnets without grumbling, whereupon the women were petrified with astonishment.—*Troy Times.*

—It is said that a New York horse recently stole three pies from a baker's wagon and ate them. What! ate three pies—baker's pies? O, no, there must be some mistake about this. It couldn't have been a horse; it must have been a donkey.—*Boston Transcript.*

—"Take her up tenderly, lift her up with care,—" "Ah, that is a beautiful thing, sir," said the pensive stranger. "Wot is?" asked the man with a cast in his eye. "Hood's 'Bridge of Sighs' that I just heard you quoting," replied the pensive stranger. "That ain't no 'Bridge of Sighs,'" replied the man with a cast in his eye. "That's the commencement of an ode to a roller rink!"—*Pittsburgh Chronicle.*

—"I assure you, gentlemen," said a convict upon entering the prison, "the place has sought me, and not I the place. My own affairs really demand all my time and attention, and I may truly say that my selection to fill this position was an entire surprise. Had I consulted my own interest I should have peremptorily declined to serve, but as I am in the hands of my friends I see no other course but to submit." And he submitted.—*Chicago Tribune.*

—At a large college there was a professor who fell under the ill-will of the students. In order to show their contempt the students one morning filed into the class-room and sat with hats on. The professor, entering a few moments later, saw what the boys meant. He stepped upon the platform, bowed with much politeness, and said: "Gentlemen, if you have no objection, I shall take off my hat." The students laughed, took off their own hats, and afterwards treated the witty teacher courteously.—*Golden Days.*

THE REALM OF FASHION.

Spring Openings—Hats, Bonnets, Millinery, Frocks and Costumes.

The spring openings of millinery and dry goods have begun. They are well attended, and the displays of hats, bonnets, dresses, wraps, and novelties of all sorts, but especially of woolen fabrics, are brilliant and bewildering. Not a tithe of the new styles of garments and bonnets will probably be adopted and worn, for the day has gone by when Paris, London, New York, or any particular city, or set of dress and millinery artists can "set the fashion" for the millions of well-dressed people in the world. So our readers will bear in mind that when we report what is seen at the openings this month it is not by any means to be inferred that those styles will be worn without modification. Just at the moment all is chaotic and uncertain.

The objective point of every street or carriage toilet is the hat or bonnet. To what extent the singular and startling headgear shown this spring in the way of Paris hats will be worn in New York and America remains to be seen. To cover the high coiffures, which seem to grow higher from week to week, both hats and bonnets are given large and high crowns. But that is not all. The crowns are made still more conspicuous by having all the trimmings massed in front and actually toppling, nodding and waving several inches above these high crowns. The effect is formidable. Then the colors and combinations of colors and materials on these hats and bonnets add to the startling effect. Gauze ribbons in Moyenage colors striped with moire bands are mingled with tinsel braids, both wide and narrow. Other ribbons of linen, wool or silk canvas are barred with gold or silver threads, while the flowers that help to form the mixture of millinery effects on the front of the crowns are of bold and pronounced form and color, and if nothing else can be said in their favor, they certainly imitate nature with wondrous fidelity. If feathers are used they are curled into huge panaches that encroach upon the brim, sometimes reaching over on the waved, frizzed and banged front hair. Especially is this the feature of the peaked and cut brimmed pokes.

Fanchons are no longer the modest cap-like bonnets of yore. They have high, aspiring crowns, cleft and upturned brims, and with masses of flowers, ribbons, gauze, tinsel braid and curled feathers, pompons and aigrettes placed directly in front of the high crown and on the top of the head, are scarcely less striking and bold in effect than the hats.

Are there no modest creations among all the varieties of hats and bonnets seen at these openings? Yes, but they are few, and are not conspicuously displayed. However, these unobtrusive capotes may become the popular bonnet of the season.

Most of the dresses shown at the openings are scarcely less exaggerated than the bonnets. When they are duplicated for American women they will, of course, be modified. This applies, however, only to the imported toilets. In ready-made American frocks there are good suggestions of the incoming season's styles. The tailor-made suits are particularly admirable this spring. Dressy without being too elaborate, and with excellent combinations of plain and plaid, plain and broche, plain and bourette, and boucie and tinsel shot novelty goods, or simply braided, they are as varied as taste could demand. The cost of such suits ranges from $20 to $40, and every lady ought to have one or more in her collection of summer wardrobe effects.

The dressy Paris costumes have, as a rule, exceedingly long-waisted bodices, high shouldered effects in the top of the armhole, very full pleated skirts, which, however, are not very bouffant, save in the back, where an enormous pouf formed of the stuff rises high above a bustle of horsehair, not crinoline, attached underneath to the waistband. Few side robes are seen, but the hip draperies are exceedingly modest, and, as a rule, composed simply of a scarf drapery which does duty in forming the pouf, and a long drapery in the back, falling in straight lines from below the pouf to the bottom of the skirt. These are the outlines of form in all sorts of frocks, whether for street, carriage, afternoon, or evening wear, save for occasions of highest ceremony, when the trained robe is adopted. Scarf draperies on the corsage, forming fichus, plastrons, waistcoats *a la Moliere*, berthes, and many nameless but graceful decorations are features in spring toilets. Much ribbon in the form of bows, loops, and lattice work is mingled with quantities of lace and chenille fringes. Jet and fine colored cut beads, tinsel thread passementeries, maccaroons, palm leaf patterns, and motifs of various forms also help to make up the ornamental effects. The mingling of two fabrics, one plain the other broche, boucie, bourette, plaided, or barred, and frequently silver or gold shot is the rule for all dressy frocks. Sometimes more than two or even three different kinds of stuffs appear in one costume of high ceremony.

Newmarkets, only slightly different from those of last year, are largely imported and produced for early spring wear. Some have loose fronts, while defining the form perfectly in the back. Others are tight back and front. The fastenings are large metal or small crochet buttons. Long raglans are also shown in the leading houses. Dolman visites, half long and short, with jacket-like effect, just like those of last fall's importations, are brought out in enormous quantities and endless variety, and priced, according to the materials, all the way from $7.50 to $150.

English walking jackets and a variety of military jackets, profusely and tastefully decorated with gold braid and jerseys, both for street and house wear, are shown. Jerseys are so much improved and save such a world of trouble in fitting the bodice, it is safe to predict that they will be more worn than ever.

The gold and metallic braid and tinsel effects used in millinery, costumes, wraps and dress fabrics this spring, though manipulated with much taste and discretion as a rule, do certainly give a rather brassy effect to the toilet. Some of the carriage wraps are a glittering mass of gold bead and chenille fringes all over the sleeves from the high shoulders to the wrist or elbow, and a prevalence of yellow flowers and ribbons mingled with other pronounced colors and illuminated with tinsel in the trimmings of hats and bonnets give them a bold and defiant look, particularly when seen on a woman of marked features, high cheek bones, high complexion, and that indignant expression of countenance which is too frequently seen among the throngs that go to openings and "try on" the new hats and bonnets.

Printed muslins, long discarded, are coming in fashion. The patterns are mostly sprays of flowers, most exquisitely copied from nature, hedge roses, blue corn flowers, forget-me-nots, scarlet poppies, dainty heliotropes and golden-centred daisies, pictured in all their natural tints, on grounds of white, cream, pale blue, rose, pearl gray, pale buff and black.

These new printed muslins, the batistes, printed challies and veilings will for young girls and young ladies not over twenty-five be made up with full gathered skirts, full Grecian bodices confined at the waist with wide sashes tied in big bows in the back, and full sleeves, and full petticoats over a crinoline bustle will be worn under the full skirts.

Brocaded tissues of all kinds are brought out in enormous quantities. The designs are small, large, and medium sizes, simple or elaborate, flowers, zigzags, small blocks, Maltese crosses, bouquets, and when the brocade is all of one color it is generally two-toned or in two or more shades of the same color, the velvet pile cut and frieze all in one design producing exquisite shading, and illuminating effects obtained by tinsel or fine jet or colored cut glass beads outlining the same.—*N. Y. Sun.*

THE FARMER'S HOME.

Incongruities of Rural Home Life as Too Often Exhibited.

There is something decidedly incongruous in a house devoid of life and color, interiorly and exteriorly, set down in the midst of a lovely landscape, where earth and sky combine to give a charm to existence. It is often a matter of wonder that people are content to pass their days in such surroundings, without regard to architectural beauty or adaptiveness to use and circumstances. Too often they are regarded as mere places for staying in over night, a necessary shelter at meal times and during bad weather. They are hastily put together, without any special design or plan in view other than to enclose so many rooms to live in and sleep in, with as little regard for actual comfort, convenience, tastefulness and harmony of arrangement as there would be in building a stable for the cattle. The idea is to put up a *house* in so much time for so much money, and for the rest there will be time to think of it when the crops are in and harvested and marketed and the fine cattle bought and the new barn built.

It is not an uncommon thing to hear some penurious soul say that anything is good enough for the family. Proceeding on this principle, all the best things—the finest apples, the freshest eggs, the choicest butter, the tenderest meat—are sent away to market, while the family must be content with "nubbin" fruit, salt pork, and skim-milk. In such homes music, books, flowers, pictures, soft carpets, easy-chairs and innocent recreations are superfluities, and the ends of existence are satisfied if the mortgage is paid, so many bushels of corn and oats put in the granary and so many tubs of butter in the cellar. It is work, work, in doors and out, the weary year around, with nothing but rheumatism and chilblains in the winter, and occasional sewing bees and donations, to relieve the monotony of existence. Such homes are homes in name only. They are more like prison walls for young and ardent spirits who have tasted the freedom and delights of a larger and truer life. The chill and barrenness repel those who have natural cravings for what is bright and beautiful. They are left without regret, and remembered without longing. No fond memories and pleasant associations cluster around them to call back the wanderer and the wayward, and no tender recollections are awakened at the sight of their bare, leaden walls. They symbolize, if anything, a dry, hard, exacting life, narrow, repressive, unlovely—an existence bounded by breakfasts and dinners, and twelve hours' solid slumber.

If people would only come to understand that the home, in its truest and best sense, is the real center of our earthly life, the rallying point of all its highest and holiest affections, the true object of its loftiest ambitions, the goal of its noblest and worthiest aims, they would cease to give it a place inferior to anything that the world has or can offer. They would then act, as they should, upon the principle that nothing consistent with means and circumstances is too good for the home, nothing too beautiful for its adornment, nothing too costly for its use and convenience.—*N. Y. Observer.*

Coal-Tar Chewing Gum.

The Standard Oil Company is a big thing on wheels when you get to talking about oil, but it is just as big relatively speaking when you get into the province of chewing gum. They control nearly all of the refineries, and it is from them that the gum is evolved, so to speak. The refiners take the residuum from the crude oil after the refined article has been made, and work it in an agitator, producing a certain grade of parafine, a wax-like substance. This is sent to two firms located in Boston and New York, who put it through another refining process and then scent the stuff, cut it up into small pieces and then retail dealers take hold of it and make thousands of giddy girls happy with "somethin' to chaw." The wax, as loaded on the cars, is worth seventeen cents a pound, but when put through the second refining process, its cost is thirty cents a pound. A pound of refined parafine will suffice for the making of five hundred pieces of chewing gum; so the profit in the business is apparent when you recollect that it retails for one and two cents a stick.—*Pittsburgh Dispatch.*

VANDERBILT'S WEALTH.

The Enormous Accumulations of the Chief Millionaire of the Day.

His fortune was at one time placed at as high as $200,000,000, but a good judge lately said that he thought $150,000,000 was now nearer the mark.

Still he is the richest man in the world.

None of the Rothschilds ever had anything like his wealth. The banking business of that famous house still, of course, goes on in London, Paris, and Vienna, but it is now in the hands of young men of the Rothschild family, and its wealth has been distributed among quite a number of its members by will, as one by one, the older men of the firm died. The combined capital of that family is now about $250,000,000, and some writers have declared that Mr. Vanberbilt's fortune exceeded that of all the Rothschilds put together, but this is an exaggeration. It would not be at all surprising if Mr. Vanderbilt's wealth should, before he departs this life, fully justify such a statement, but for the present it is enough to know that he comes as near as he does to the figures mentioned, and that he is not only far richer than any single member of the Rothschild family, but is, as already stated, the wealthiest man in the world. None of the traders of antiquity of which we have any record, none of the present financial barons of France or England, none of the monied princes of Germany, Austria or Russia, or of the world of haute finance anywhere, can really compare with him in point of personal possessions. Old John Jacob Astor with his fortune of $20,000,000 was, forty years ago, the Vanderbilt of his day, but even after making due allowances for the greater purchasing power of money in those times he came nowhere near the enormous accumulation of the chief millionaire of to-day.

His wealth is largely in Government bonds and railroad securities. He takes an inventory of his wealth once a year. In January, 1883, he told a friend that he was worth $194,000,000, and added: "I am the richest man in the world. In England the Duke of Westminster is said to be worth $200,000,000, but it is mostly in land and houses. It does not pay him two per cent." This was an unusual outburst of boastfulness on his part. A year ago he had $54,000,000 in Government 4-per cent. bonds, but the amount was afterward reduced to $35,000,000, partly for the purpose of aiding his sons who lost $10,000,000 by Wall Street speculations. Later on, however, he purchased about $10,000,000 more of the 4-per cents., and he has besides $4,000,000 in the Government bonds that pay three and one-half per cent. His Government bonds are worth, as near as can be stated, $70,000,000. He owned a year ago 240,000 shares of Michigan Central stock, 300,000 shares of Chicago and Northwestern, 200,000 shares of Lake Shore, 30,000 in the Chicago and Rock Island road, 20,000 in the Delaware and Lackawanna, besides some 20,000 shares in other railroads, so that in all he held, approximately, 810,000 shares of railroad stock. A large part of these he still owns, though he is reported to have sold considerable Lake Shore stock.

He owns $22,000,000 worth of railroad bonds, it is said, besides $3,200,000 worth of State and city bonds, and has $2,000,000 in various manufacturing stocks and mortgages. He valued his house on Fifth Avenue at $3,000,000, the art gallery being worth, with its contents, $1,000,000. He sold Maud S. for $40,000 last year. His ordinary expenses in a year, he has said, were $200,000, but his ball given in 1883 cost him $40,000 extra. Mrs. Vanderbilt's diamonds are valued at $150,000. He wears none himself. A Wall Street statistician, in referring to Mr. Vanderbilt's wealth, said: "From his Government bonds he draws $2,372,000 a year; from railroad stocks and bonds, $7,394,000; from miscellaneous securities, $576,695; total, in round numbers, $10,350,000 a year. His earnings are thus $28,000 a day, $1,200 an hour, and $19.75 a minute.

This was a year ago, when his wealth was reckoned at $200,000,000. The value of his securities has decreased since, through the hard times. The depression in trade has not improbably reduced his wealth nearly $50,000,000 but his fortune and his income are of course still almost fabulous.—*N. Y. Cor. Indianapolis Journal.*

The Force of Habit.

Colonel Beasly, who is a Justice of the Peace and accustomed to deal with the criminal element every day, was reclining on the sofa in his palatial residence, taking an afternoon *siesta*, when a female entered and took a chair opposite to him. Not yet fully awake, he imagined that he was in his office, for he said sternly:

"What's your name?"

"Maria Smith."

"How old are you?"

"Twenty-six," replied the female, with considerable hesitation.

"Where were you born? Don't try to fool me. I know your sort. How many times have you been punished already? Don't think up any lies, now."

Just at this crisis Mrs. Beasly spoke up from the adjoining room:

"Why, husband, what is the matter? You are talking to my dear friend, Mrs. Smith, who has come to spend a few days with us."—*Texas Siftings.*

—"I congratulate you, Julia, on your approaching marriage," said Mr. Hyatt, a prominent New York merchant, to his daughter. "Marriage, pa? I don't know anything about it." "I am telling you about it now," replied Mr. Hyatt. "But who is the bridegroom, pa?" asked Julia. "That's none of your business. You must not have so much curiosity. That is a business secret that can not be divulged just now. I'll let you know who he is after the wedding is over."—*N. Y. Graphic.*

—The widest shaving ever made by a woodworking machine is on exhibition in a store in Winchendon, Mass. It is forty-two inches wide, several feet long and of uniform thickness.—*Boston Post.*

—The young ladies of the Ontario Ladies' College have organized two base-ball clubs

THE REPUBLICAN.

OAKLAND, MARYLAND.

JAS. A. HAYDEN,
Editor and Proprietor.

TERMS OF SUBSCRIPTION.

One copy, one year..... $1 50
six months..... 75
INVARIABLY IN ADVANCE.

TERMS OF ADVERTISING.

First insertion, $1 per square of 10 lines 0 cents per square for each additional insertion. Special contracts for advertising longer than three months

Correspondents must enclose full name and address, not necessarily for publication, but as a private guarantee of good faith. Rejected communications will not be returned.

SATURDAY, MAY 2, 1885.

Please Give Attention.

Every section of the county will be represented in Court next week, and this will afford our patrons who are in arrears an opportunity of settling up back subscriptions to THE REPUBLICAN. Look at your receipts and if you find that your subscription is not paid up send the amount with your neighbor. We do not like to urge our patrons to pay, but the dull times affect newspaper men as much as any other class of people. Whether patrons pay or not the expenses connected with a printing office have to be met. Hence patrons of a newspaper will see the importance of settling their bills promptly. Don't stop your paper because you get in arrears, and are courteously requested to settle up, but pay just as soon as you can. Try if possible to get a little in advance, you will then feel happy and probably enjoy the news more when you know that you have paid for what you are reading. A good many subscribers to THE REPUBLICAN always pay in advance and all ought to do so, when it is published at the very low rate of $1.50 per year.

After July 1 postage on letters will be two cents per ounce or fraction thereof instead of two cents per half ounce, and newspapers can be mailed by publishers at one cent per pound.

General Grant Monday passed the sixty-third anniversity of his birth pleasantly. Many beautiful floral tributes and hundreds of congratulatory telegrams were receiyed from all parts of the country.

Immediately after his return from his southern trip Senator Gorman called upon President Cleveland to talk about Maryland appointments. Amongst other matters the postmaster at Baltimore was mentioned, and we are told that the President said he would be pleased to make the appointment in accordance with the recommendation of Senator Gorman. Applicants for the Oakland posoffice might do well to note the fact.

On Monday next the May Term of the Circuit Court for Garrett county commences. The several dockets are small and from members of the bar and other officials of the Court we learn that the term will probably be a short one. If the weather continues fair it will be a great hardship upon farmers to be in attendance to the Court as jurors or otherwise, and the shorter the term the better it will suit them at this busy season of the year. At every point from which we have any information legal business seems to be decreasing, and the dockets of the various courts getting smaller. We think this is an encouraging sign and we hope the term will come when men may be able to so conduct their business that there will be no necessity for law suits, when men will obey the law and crime cease.

This state of affairs would perhaps be hard on the lawyers, but it would certainly be better for everybody else and as we are in favor of the greatest good to the greatest possible number we would be glad to see it come about.

The Democratic stumpers paraded the country last fall and told the people about there being $400,000,000 in the United States Treasury that had been wrongfully wrested from the people, and that this sum was being added to at the rate of $100,000,000 annually. Now comes Secretary Manning, the U. S. Treasurer under the new administration, who in his first report says that the surplus amounts to only $22,000,000. Who has lied about this matter?—*Philippi Rep.*

Colonel Bradley Johnson, of Baltimore, the noted ex-Confederate officer, has been to Washington to warn Secretary Manning against doing too much for Senator Gorman. He spoke freely before a room full of visitors. General Johnson said apprehension was general in the State of Maryland that the Federal patronage of the State was to be used to promote the fortunes of one gentleman, and secure his re-election to the Senate. That impression, he thought was exceedingly injurious to the party. He did not share in it, and he urged the Secretary by some public act to demonstrate that it was without foundation. That public act, he claimed, could only be the appointment of a man to some conspicuous place, who, it will be apparent, was selected because of his qualifications and fitness, and not for personal considerations.

He said that gentlemen of his views considered it extremely important that the Federal patronage should be kept out of the local political struggles in Maryland. He did not ask that any appointment should be made for the purpose of injuring any gentleman's political aspirations, but urged that it would be equally understood that it was not to be used in favor of any one. It ought, he thought, to be bestowed upon the whole Democratic party of the State, and not for or against any one. The experience of the Republican party in New York, in the case of Secretary Folger, showed how the people would resent any interference by the Federal Administration in their local affairs. General Johnson then gave a brief view of the political situation in Maryland from his standpoint. The Secretary, in reply, said he would bear in mind what General Johnson had said on the subject.

Trouble in the Democratic Camp.

Frederick Citizen, Col. Baughman's Paper.

Among the names presented for the position of Internal Revenue Collector for the State of Maryland is that of Mr. R. D. Johnson, a well-known and respected citizen of our sister city of Cumberland. Mr. Johnson has many warm friends in this county and would find a hearty endorsement among our people. It is exceedingly unfortunate, however, that blinded and selfish partisans in Western Maryland should be so foolish as to make the appointment of Colonel Johnson what they call a "test case"—in other words Mr. Johnson must be appointed simply to show that Mr. Gorman and his friends have not the entire control of the Federal patronage in Maryland. Why such an issue, and why select a gentleman from Western Maryland to bear the blunt of somebody else's short-sighted policy? This and other appointments should be made on the broad line of competency and deserving party recognition. Mr. Gorman and his friends might have been just as anxious to serve this gentleman as Mr. Hamilton and his friends, therefore why should the heretofore self-constituted leaders of Western Maryland attempt again to divide our party and make a factional fight in our midst? Western Maryland has strong claims for recognition from President Cleveland and will no doubt be considered at the proper time, but in the name of the young men of Western Maryland, the new blood of the Democratic party, we protest against any man, or set of men, bringing up such a fight as they appear to be doing in the case of Mr. Johnson. If the issue is to be Gorman or anti-Gorman, there can be no choice in the fight, and as soon as the time is ready for action the young men are prepared to take their stand. We trust there can be no foundation in the absurd statements made in reference to this case.

Criticising Secretary Bayard.

Wash. Cor. N. Y. World, (Dem.)

* * * For all of the blunders of the Administration, or for all of the mistakes for which the Administration will be held responsible, one must look to Mr. Bayard, the member of the Cabinet who has had the longest experience in public life. It would seem that a long public career does not necessarily give a politician wisdom, but that on the contrary it may often so inflate him with ideas of his own importance, so prejudice his mind with the warp of unquestionable power, and so separate him in sympathy from the people as to make him the worst of political actors. The country has expected much from Mr. Bayard. His views of the duties of public officials have always been high, yet in the practical application of his duties as Secretary of State he has become the object of the greatest part of the satirical comment which has been directed against the new administration of affairs. * * * To ignore wholly the working members of the party and coldly snub the men who made a Democratic Administration possible in the interest of the inactive coat-of-arms branch of the Democratic party is not a line of policy worthy of the shrewdness of a veteran of Mr. Bayard's experience. He is very restless under the criticism that has followed his personal administratson of his department. If he should acknowledge his faults and seek in the future to be guided by the best opinion of his Cabinet associates he would discover the greater part of the criticism now made here on his political methods and his lack of judgment.

All Torn Up.

CINCINNATI, April 27.—A dispatch to the *Enquirer* from Washington says: The game of politics as now being played by the National Administration is beyond the ken of not only the layman, but the veteran. The Democratic leaders, those who represent the bone and sinew of the party, find themselves, after twenty-four years' battle, without influence with a Democratic President. None are so wise as to guess what the President's plans may be, but few so dull who do not think he is damaging rather than adding to the prestige of a party which has waged for years a political war under the most unfavorable vicissitudes. President Cleveland has, it would seem, strangely disappointed both parties. When his election was assured the whole mass of the Republican office-holders expected to go into private life soon after the 4th of March. Moreover, they were reconciled to the going. Only two glimpses of the moon have elapsed since Democratic ascendency, when these same patriots not only do not expect to give up their trusts, but refuse to let them go when asked. It may very pertinently be asked why the change. It may very truly be answered because of a policy inaugurated to please two political parties instead of one. The so-called Independent press, while it lauds the reappointment of a Rebublican Postmaster in New York, denounces the selection of those Democratic Revenue Collectors in New England.

From this point of observation there is this strikingly noticeable: coincident with President Cleveland's inauguration there assembled in this city as manly and as enthusiastic a body of men as ever congregated at one point under God's canopy. They were full of party loyalty and enthusiasm. The new President was inaugurated amid ceremonies and *ee.at* beyond the memory of the oldest resident. And yet with the change not sixty days old a wail of discontent, if not absolute disappointment, comes up from every Democratic quarter. In the hotel lobbies in this city one hears from the lips of Democratic criticisms upon the Presidents procrastination which are full of bad auguries for the future of the Democracy.

The Temperance Alliance not a Non-Partizan Organization.

The action of the Rev. T. L. Poulson in severing his connection with the Maryland State Temperance Alliance we commend to all sincere friends of the temperance cause as worthy of imitation. The Alliance was organized to advance the cause of temperance, and until last year it did its work well and was deserving of support and encouragement. At that time, however, a clique of selfish and ambitious men obtained control of the organization, and, solely for their own aggrandizement, diverted it from its original and legitimate purpose to make it a side-show to the Democratic party. That movement brought no honor to the men who engineered it, but it gave them the notoriety which they coveted, and whetted their appetites for more glory of the same questionable kind.

At the last annual meeting of the Alliance these schemers were on hand in force, and the adoption of the resolution declaring the Alliance to be a non-partizan organization was a mere blind to hide their real purpose. We have no hesitation in affirming that, all protestations to the contrary, the Maryland State Temperance Alliance is in the power of the very men who are the leading spirits in the Prohibition party, and who, when they consider that the proper time has arrived, will prostitute the Alliance as it was prostituted last November.

Mr. William Daniel has seen fit to tell a reporter that the non partizan wing of the Alliance came to the convention prepared to snub him and those who believed in him. Such a purpose would have been laudable, for we know of no man in this state more worthy of the censure of the true friends of temperance than is Mr. Daniel. But the facts do not bear out the assertions of the late candidate for the Vice-Presidency of the United States. On the contrary, it appears plain that Mr. Daniel's followers made up their minds to run the convention, and that they succeeded in carrying out their plans. The address of welcome was made by a St. John and Daniel stump speaker; nearly all the speeches from the platform were made by St. John and Daniel devotees; the committees appointed were made up almost entirely of St. John and Daniel men; it is true that Mr. Daniel was not elected president, but the St. John and Daniel men triumphed in the election of Mr. Higgins, one of the electors on the St. John and Daniel ticket last fall; Mr. Daniel, presumably a St. John and Daniel man, was elected treasurer, and the anti-partizan resolutions offered by Mr. Janvier were killed in a St. John and Daniel committee and in their place were substituted resolutions prepared by a St. John and Daniel man and adopted by St. John and Daniel votes almost exclusively. This much for the non-partizan character of the Alliance. Now for its connection with the Prohibition party.

William Daniel, head and front of the Prohibition party, is treasurer of the Alliance; C. S. Mosher, secretary of the Alliance, was secretary of the Prohibition convention; William Silverwood, one of the vice-presidents of the Prohibition convention, its temporary chairman and treasurer of the state organization, is a member of the executive committee of the Alliance; out of the fifteen members of the executive committee of the Alliance, seven are identified with the Prohibition party; seven of the Alliance's vice presidents are active workers in the Prohibition party; Rufus Robey, of Charles county, represents the Alliance in its executive committee and the Prohibition party in its state central committee; and so on indefinitely might the inseparable connection of the two bodies be demonstrated.

What further proof is needed that the non-partizan resolution is a mere jumble of words, intended to deceive the public and cloak the designs of Mr. Daniel and his friends, who, caring no more for temperance than for sincerity and fair-dealing, await only the opportunity to use the Alliance to tickle Mr. Daniel's inordinate vanity or advance his wild and impracticable schemes. We do not think that those who have the cause of temperance at heart can afford to permit themselves to be made this man's cat's-paw. It will be discreditable to them and ruinous to the cause which they represent. Let all honest temperance workers take decided steps to repudiate at once Mr. Daniel and his two machines—the Prohibition party and the Maryland Alliance. Bundle all selfish and ambitious schemers out of the ranks, let politics alone and resume the practice of discussing temperance from a moral, not a political standpoint. It is only by such a course that the cause can be rescued from the peril in which Mr. Daniel and his followers have placed it.—*Balto. Morning Herald.*

Trade Matters.

NEW YORK, April 25.—*Bradstreet's Journal* in its commercial summary says: "The warm weather of the past few days has encouraged retailers at the East to make renewed purchases. This they have been doing to a moderate extent, the buying being on small orders. At the West, farmers generally being busy with spring work, country dealers have had less incentive to go into the market. Telegrams to *Bradstreet's* present this view of the situation, although, as is also noted, there has been a better feeling in trade circles, based on the improvement of the weather, and it must be confessed, on a widespread notion that a war abroad is inevitable, and that it will stimulate business in the United States.

There is no better outlook in industrial lines.

The volume of merchandise moving, as per current reports, continues about as last week. Leading freight officials announce that the total weight of freight moved since January 1, both East and West, is not as heavy as in a like portion of 1884.

Our special advices from the North west state that had the war news come a fortnight earlier, the spring wheat acreage would have exceeded that of 1884. Under the circumstances it is notably larger than it would have been were there no prospect of war abroad. The present outlook is for a slightly decreased area.

A special from California reports some damage to the wheat crop. Where the winter crop is reported so heavily short the continued warm weather has shown vitality in the plant in fields where the loss has been supposed to be almost total. It is possible, therefore, that the damage to winter wheat, great as it is, may be overrated.

BOSTON, April 25.—The *Advertiser* in its weekly review of the wool market says: The market has been fairly active for domestic wools, and the total sales, which are so large, are due to extensive transactions in foreign carpet wools, mostly Cordova. Some of the wool has been sold for some little time, but has not been reported until now. The war news had something to do with the extensive transactions, but prices were generally low and thought by many a great bargain, as in the event of a war between England and Russia, wool from the latter country will be obtained with great difficulty and must rise higher. The bulk of the wool sold is to Eastern manufacturers. All the Cordova wool has now been cleared up on the spot. While carpet wools may possibly find a way out of Russia, it must be more costly, with war premiums and additional transportation expenses. The prices made upon the wool are private, but it is common talk that low figures tempted the buyers.

The Woman in the Case--and the Man.

Wheeling Intelligencer.

The other day, in the town of Weston, in this State, a fallen woman was forcibly taken from her house and ducked in the river. There has as yet been no day in 1885 when a plunge in a running stream of West Virginia would have been either pleasant or healthful.

We do not know what specific offense was supposed to justify this rough regimen. The woman may have made herself very obnoxious to the neighborhood, and the ducking on a chill April day may have been intended as a reminder that her room would be more appreciated than her company. There must have been something which seemed to make it right to treat a woman so; for Weston is a town of schools and churches of intelligence and the average public virtue.

Without any special information on the subject, the *Intelligencer* is impressed with the incompleteness of the ceremony of indignation. It does not appear that a man was ducked at the same time, or that there is any intention of ducking a man, by way of making a suitable companion picture. No woman ever falls so low without at least one man to give her a start, and companions on a down grade are never wanting.

Who ever takes the trouble to look up the man or the men in the case? Society does not concern itself with both parties to the commerce of sin. There must be an aggravation of horrid details before the party of the other part loses caste. Ordinarily the woman wallows in the mire of degradation, while the man pursues the even tenor of his way. The forbidden companionship with him defiles her, but by the canons of custom he is not defiled. He loses nothing in business or in social life so long as he keeps his hands out of other people's pockets and has the good fortune not to startle his circle by a flagrant scandal which fills the public nostrils with foul odors.

This is the bad way of the world, which does not stop, to think that without buyers there would be no sellers, and therefore no traffic. All the odium, the pain and punishment are for her, as though she of all God's creatures were to be buffeted about the world and hurled unshriven headlong into hell. He holds up his head, is courted, flattered, petted. To duck him would be to resort to mob violence and punish without law a finer mortal who is entitled to trial by a jury of his peers.

But it is said, sometimes the man reforms; the woman never. Who gives her a chance? Who seeks her out, points to the better life and offers to help her to it? She may only have stumbled in the mad whirl—just once. Her heart may be breaking with remorse, her face buried in her shame. If the world finds it out her doom is sealed. The good people who are so much better and so much stronger—who know that they can never fall—how quickly they burn the scarlet letter into her breast, a stain that no penitential tears can wipe away.

Thieves and murderers are pardoned—Magdalen may die a thousand deaths of anguish; for her the world has no touch of pity in its heart. And so we go on ducking the woman and living on terms of good fellowship with the man. It is the unwritten law—and who shall say there is justice in it!

The value of a good local newspaper in a community is thus aptly set forth in the columns of the Philadelphia *Press*:

"The country newspaper is the most important and least compensated of all the agencies which stamp the impress of progress upon villages and inland cities. Without the aid of local newspapers local towns are as a rule thriftless and dead. It is common for small great men to speak with contempt of the local newspapers, but the village newspaper makes more great men with less material—more bricks without straw—than any other factor in politics, and it is the one ladder on which men climb to local distinction as the beginning to wider fame. The advent of a local paper has always dated the increased thrift of a community. The local newspaper is the life of the locality, and the measure of the support as a rule measures the advancement of the people. Not only subscribe, but pay for your local newspaper. They are the friends and helpmates in all seasons."

Our Washington Letter.

From Our Regular Correspondent.

WASHINGTON, D. C., April 27.

Hitherto there have been few beneficial results from the issuance of Presidential proclamations when they affected the settlement or distribution of the public lands because there were so many interests involved in opposition to them, but the recent proclamation from the executive which absolutely and without reserve orders the removing and destroying of the illegal fences that have enclosed the lands belonging to the people, will be and must be carried out to the letter. The law provides that these fences shall be taken down, and the President declares that the law shall be enforced.

The veto message of the Governor of Dakota, declining to sign the bill providing for woman suffrage in that Territory, is a most ungallant official deliverance, the burden of his excellency's argument being based upon the assumption that women could be too easily persuaded to exercise the franchise, even if a few of them were possessed of sufficient judgment to know how to resist the blandishments of the masculine voter. The women out there think that Mr. Cleveland cannot get after this Governor's scalp any too soon.

A step in the direction of squelching polygamy in this country has been taken by the Supreme Court of the United States in the Clawson case, wherein the court decides that the exclusion of polygamists from the jury-box is not only lawful but is absolutely demanded, to make the administration of justice in Utah anything but a legal farce. To admit to the panel for the trial of a prisoner charged with polygamy, a set of men who believe that the crime committed is justified by Divine decree, and that it is no offence at all, is the highest absurdity and a travesty upon the system of trial by jury. This man Clawson was convicted and sentenced to the penitentiary for a term of four years, and the case came up before the U. S. Supreme Court on appeal based upon the assigned error of excluding polygamic jurors. The decision paves the way for more convictions of the same sort, but the Mormons declare that the enforcement of the law against polygamy shall be resisted even to a resort to arms, because all such prosecutors are nothing more nor less than an infringment upon that religious liberty which the Constitution guarantees to all the citizens of the United States, Utah included.

JUNIUS.

Antiquity of Arizona.

Correspondence Portland Transcript.

Many regard the Southwest as a new country and they look for new things when visiting the far Southwestern land. But in reality the territory teemed with an active population, versed in sciences, in the art of government, in the knowledge of manufacturing, centuries before Milton and Shakespeare and Cervantes and Columbus were born. It is possible, indeed, and quite probable, that Arizona was a progressive and populous region when Noah built his ark, when the battle of Thermopylæ was fought, when Homer wrote his epics. In fact, it is an old country, rich with a history that may never be known, sacked and pillaged, neglected and forgotten during the years in which the East grew up.

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, April 27, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5¾@5 7-10c. that generally rated first quality 4¾@5⅜ cts; medium or good fair quality 3½@4⅛ cts; ordinary thin steers, oxen and cows 3@3½ cts; extreme range of prices 3½@5 7-10cts; most of the sales were from 4½@5⅜.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 1,006 head, against 1,202 last week and 1,302 head the corresponding week of last year, and the sales were 837 head, against 681 last week, and 696 head the corresponding week of last year.

The offerings to day consisted of very good grades generally—quite as good in quality as last week's offerings. Trade was slow throughout. All the dealers report a very dull market, and a decline of ¼c. to ⅜ strong in some cases, and in a few instances some operators accepted ¼c. lower prices than they obtained last Monday, and then they did not all close out. Prices 3@5 7 10c., with most sales from 4½ to 5⅜c.

THE SWINE MARKET.

There is a heavy falling off in the receipts as comparod with last week, and some improvement in the quality of the offerings. Notwithstanding the diminished receipts, prices are off fully ¼c., and quotations now range at 6@6¾c., with extra only a shade higher. Trade is reported as fair to good. Same time last year hogs sold at 7@8c. net; most sales to-day 6¼c. net.

THE SHEEP MARKET.

There is a fairly good trade for good sheep and lambs, while common sheep and lambs are very difficult of sale. We quote wool sheep at 3@5½c. and clipped 2½@5; spring lambs 8@11; wool yearlings and fall lambs 5@6. The quality of the offerings is not as good as it was last week. Last year clipped sheep sold at 3@5¾c.; wool sheep 5@6¾; spring lambs 8@10.

LOCAL NEWS.

LODGE MEETINGS.

OAKLAND LODGE, I. O. G. T., meets in Sturgiss' Hall every Tuesday night.

LOCAL BRANCH, No. 85, of the Iron Hall, meets in same Hall 1st and 3d Saturday nights of each month.

SHEALTIEL LODGE, No. 122, I. O. O. F., meets in Lodge's Hall every Monday night.

ALFA LODGE, No. 574, K. of H., meets in same Hall 2d and 4th Thursday nights of each month.

PATMOS COUNCIL, No. 386, A. L. of H., meets in same Hall 2d and 4th Friday ntghts of each month.

—Florida oranges at Lakin's.

—200 bushels of Red Rust-proof seed oats for sale at John Shartzer's.

—The *Mountain Democrat* will hereafter be issued from the rooms over Mr. C. C. Michael's store, next door to Coddington's Hotel.

—Go and see Naylor & Richardson's hand made wagons.

—Our Circuit Court, which commences Monday, will probably be a short term. The criminal docket will be short and unimportant.

—Take your wagons, harrows, buggies and plows that need repairing to Naylor & Richardson. All work guaranteed.

—Mr. Will. A. Wortman has moved to Oakland and opened a silversmith shop in the Wm. Smouse building. Will. is said to be a good workman.

—The Second Battalion, M. N. G. will attend the Army of the Potomac Reunion at Baltimore next week. The Guards will leave Oakland Wednesday at noon.

—The Oakland and Deer Park Hotels will be opened for the season about June 22, and will be under the management of Capt. Walker.

—Lemons and cocoanuts at Lakin's.

—Mr. S. P. Specht, Jr., paid us a pleasant call Wednesday. He informed us that he had closed out his business at Accident, and will take charge of the store at McHenry for the present.

—All persons indebted to the late firm of Harne & Sons are requested to come forward and settle immediately.

HARNE & LAWTON.

—If you want a good cigar call at Lakin's.

—D. Chisholm, Oakland, Md., who owns a handsome piece of property on Spruce Creek, paid this office a pleasant visit last week. He has enjoyed the wiater here finely and thinks with railroad facilities our coast country will prosper exceedingly.—*Halifax, Fla., Paper.*

—Cheap John wishes the people who attend court next week to know that he is again in his old business, at his old stand, opposite Coddington's Hotel, with a fresh stock of confections, notions, cigars, cakes, nuts, mineral waters, &c., &c. He invites his old friends and the public generally to call and see him.

Church Services--Sunday.

M. E. Church—Preaching at 10½ A. M. and 7½ P. M. by Rev. M. W. Rider.

Stone Church—Preaching at 11 A. M. by Rev. John S. Foulk.

Lutheran Church—Preaching at 7½ P. M. by Rev. C. W. Sechrist.

St. Peter's, Catholic— Preaching every Sunday at 10½ o'clock A. M., except the second Sunday of each month.

New Furniture, Carpets, &c.

Mr. John Shartzer has just returned from Philadelphia and Baltimore with the finest lot of Furniture, Carpets, Matting, Oil-Cloth, Wall Paper, &c., ever brought to Oakland. Call and get his prices before buying elsewhere,

Glendale-Reopening.

Needed repairs having been put upon the old Church at Glendale, by some of its friends who desire to see the old temple preserved as a place of divine worship, a special reopening service will be held at 10 A. M., next Lord's-day, May 3d. Services also on Saturday evening. Rev. Sechrist of Piedmont, will be present, and preach the sermon.

J. B. SHOUP.

Bucklen's Arnica Salve.

The best salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by A. G. Sturgiss.

Bread, Cakes, Pies, &c.

Mr. William Roth has purchased the bakery and confectionery heretofore owned and operated by Mr. C. P. Smith, on Second street, Oakland, Md., where he will keep constantly on hand fresh bread, cakes, pies, &c., &c., as well as canned goods, candies, nuts, fruits, &c. Ice cream in season. Give him a call.

New Store in Oakland.

For a short time only the undersigned will offer to our people, clothing, dry goods, notions, hosiery, Stationery, jewelry, &c., in the room formerly occupied by the *Democrat* office, corner Alder and Third streets.

Do not fail to attend this great sacrifice of goods. These goods are from a firm that failed, formerly in New York, and everything will be sold regardless of cost and value. Call and see our goods and judge for yourselves, and you will admit that a chance to get such bargains will never occur again in this vicinity.

5 2 2t JACOB FELDSTEIN.

Mysterious Firebugs.

There were five separate and distinct alarms of fire in Piedmont and Westernport between the hours of 1 and 4 o'clock yesterday morning, all caused by the firing of buildings by bold incendiaries, whose purpose is supposed to have been plunder. The first alarm was at Miller Bros.' establishment in Westernport, where a fire was started between 1 and 2 o'clock among boxes and barrels in the rear of the building. The fire was discovered and promptly extinguished. Scarcely had the flames died out before a precisely similar fire was discovered in the rear of J. S. Jamesson's store also in Westernport. It was discovered and put out before the flames had made much progress. By this time Westernport was pretty thoroughly aroused and men were soon patroling the streets to prevent a repetition of the alarms.

There was a lull of nearly an hour, when the trouble began across the river in Piedmont. The first fire started on the West Virginia side was in the carriage shed in the rear of W. H. Gilbert's place, shortly before 2 o'clock, followed by another at Suter & Minshall's about 3. At the establishment of the last named firm the fire was built directly under the showwindow in the front of the store. The front of the store was more or less damaged and there was a further loss in broken glass and chinaware. The would-be incendiaries finished their night's work by firing Davis Bros.' mill on the "Island" above Piedmont. All three of these fires were discovered and put out, as those in Westernport had been, before extensive damage was done. That at Davis Bros.' mill wss discovered by the watchman. In each instance the flames were extinguished by means of buckets. Piedmont's only other fire protection is a Babcock extinguisher, while Westernport has a hand engine. Neither were brought into use yesterday morning. The manner in which all the fires were started and their location shows that each was a deliberate attempt at incendiarism. Especially was this so in the Westernport fires, where boxes, barrels, waste, and other inflammable material was carefully piled up and set on fire. The boldness of all the attempts is almost unparalleled. Up to yesterday afternoon there was no clue to the miscreants. A suspicious looking man was seen coming away from the vicinity of Miller Bros.' establishment about the time of the fire. He is described as tall, but was not identified. It is said a man was also seen near Mr. Jamesson's place, but it has not yet been established whether he was the same referred to above. There is little doubt that one or both of them was connected with the incendiary attempts. The citizens of both towns are, of course, much excited over the matter.—*Cumb. News Tuesday.*

Newspapers of To-Day.

People generally, and even those who may be termed steady readers and close observers, have but a faint conception of the magnitude and influence the press of this country has attained. From a careful examination of the advance pages of the 1885 edition of the *American Newspaper Directory*, issued May 1st, by George P. Rowell & Co., of New York, it appears that there are 14,147 newspapers and periodicals published in the United States and Canada; of these the United States has 12,973, an average of one paper for every 3,867 persons. In 1884 the total number of newspapers was less by 853 than at present, and while the gain this year is not so marked as in some previous years, it is still considerable. Kansas shows the greatest increase, the number being 78, while Illinois follows with a gain of 77. It is curious to notice that New York, the scene of so much political activity during the last campaign, should have only about one-third as many new papers as the State of Pennsylvania. As an index to the comparative growth and prosperity of different sections of the country, especially the Territories, the number of new papers forms an interesting study, and may well occupy the attention of the curious.

Leading medical authorities indorse Ayer's Sarsaparilla as the best blood purifying medicine in existence,

[Published by request.]

I Could Not Forget Thee.

DEDICATED TO MISS MAGGIE TOWER.

I could no more forget thee,
Than the fixed stars of night
Could forget to hang out
Heaven's lanterns of light.

I could no more forget thee,
Than the bright orb of day
Could forget in the morning
To start on its way.

I could no more forget thee,
Than the warm southern breeze
Could forget to kiss softly
The young budding trees.

I could no more forget thee,
Than the sands on the beach
Could prevent the fine grains
God's memory to teach.

I *could not* forget thee,
Dear love of my heart,
Tho' our paths should forever,
Through life, lie apart.

CYGNET.

Baltimore, April 27th, 1885.

Bonnets and Hats.

We have now open a fine assortment of Ladies' and Childrens' Hats, Ladies' Bonnets, Ribbons, Flowers, Feathers, Pompons, Gilt and Silver braids, Hat Scarfs in beautiful colors.

Ladies' and Childrens' hose, in black and solid colors.

We have on hand the nicest lot of gloves we have ever bought. Kid, Silk and Thread gloves in all colors, black silk lace mitts.

Ladies' Jerseys.

Childrens' lace Bonnets, Ladies' underwear, Ladies' neckwear, and many other desirable articles.

M. L. SCOTT.
Baltimore Store.

Chance for Investment.

For sale or rent, two cottages, furnished, with use of horses and carriages.

MRS. E. A. KILBOURN,
4 11 Oakland, Md.

Deer Park.

Our little town is a very busy one just now. The new B. & O. cottages are being pushed on so fast that a small army of workmen may be seen every day going to and fro. Every available boarding place is filled to overflowing.

Mrs. Phillips and Miss Florence Phillips are visiting Deer Park at present.

Mrs. C. H. Tillson is in Piedmont for a few days.

Mr. T. Harrison Garrett's cottage is to be papered and painted throughout this month, and painters have also been employed on the Hotel for some weeks past.

Mr. Robert Brown has moved to Elk Garden.

Mr. Joseph Friend is still lying very low and evidently near the end of a long life. He is one of the oldest settlers of our county and one very well known and highly respected. His wife who died some years ago was a daughter of the celebrated Meshach Browning, Maryland's famous hunter.

Senator Davis' men are busily employed plowing and sowing his extensive oat fields.

The Band of Hope hold their regular meeting on next Saturday evening, and every one should be present to help us rejoice that the 1st of May ushers in Local Option for our district.

Word has just been received (Wednesday noon) that the house on Mr. Spencer's farm, about two miles from Deer Park, occupied by Mr. Theo. Hoff, was completely destroyed by fire this morning. Caught from a defective flue.

Registered at Wing-and-Wing:

***

Elder Hill.

As this place is not represented by a correspondent, we scratch down a few thoughts, simply heading them Elder Hill, but for the origin of the name will refer the reader to "A Sojourner," of Deep Creek, whose mind appears to be well stocked with historical knowledge, and pen readily adapted to portraying the various facts and circumstances giving rise to the names now applied to the numerous mountains and mountain chains of our mountainous county.

Quite a number of our *vocalists* were attending a concert at Friendsville on last Sunday, given by Mr. Geo. E. Bishoff, at the close of a course of instruction in vocal music.

Our Sunday School is making good progress with Mr. J. H. Enlow Superintendent, and F. M. Conneway Assistant.

Mr. Archibald Casteel and family are just recovering from an attack of the "old-fashioned measles," of which they all have had a trial.

There is also several cases of French measles in this vicinity.

Mountain Lake Park.

The pleasant weather has made business more lively here.

Mr. Jarboe has about completed the exterior of the Hall and is now putting additions to the Sharp and Richardson cattages.

Mr. M. L. Selby has returned from his winter hiding place and has resumed his painting.

Mr. Joseph Lashorn, of Deer Park, is plastering the addition to Miss Jennie Smith's Cottage.

The Burns family have returned to the Carr cottage.

Mr. Lloyd Chambers, of Oakland, is doing the stone work for the rerection of the restaurant.

The quarterly election of officers in our temperance lodge was held last Saturday night. For W. C. T., G. P. White; W. V. T., Mrs. F. L. Sperry; W. R. S., Miss Julia White; W. F. S., W. A. Wonderly; W. T., A. Lower; W. C., Johnson White; W. I. G., Miss J. B. Umbel; W. S., R. Ream.

Our lodge is in good condition. There has only been three meetings since we organized that there has not been one or more joined.

The cottages are again secured from fire by burning the leaves off nearly the entire grounds.

J. A. E.

Selbysport.

Spring has apparently come to stay. We hope so, at least.

Our farmers are trying very hard to get their oats in before Court, as many of them will be obliged to attend its session.

Mr. C. H. Liston, our Constable, is kept quite busy.

Mr. H. M. Frazee has his new saw mill in operation.

Our farmers are building a great deal of board fence this spring.

Mr. A. J. Frazee lost about three thousand rails by fire last Wednesday. Persons should be more careful about fire this time of the year.

There were but few accidents on the river this spring, as but four rafts were wrecked. Their remains still lay along the river.

There has been considerable sickness in our town this spring.

Mr. D. W. Frazee leaves this spring for the West, where he will engage in business. Dennis is a very enterprising young man, and will make a success of any business in which he may engage. He has the best wishes of the many friends he leaves behind him.

Messrs. E. J. Frantz and Austin Brown have completed the contract they had taken from farmer Matthews.

Mr. John M. Kessler will soon leave this place to take charge of the grist mill at Friendsville.

Helping the Editor.

We like the volunteer journalist—fricf, if he is young, and boiled, if he is old—but we like him. The good people who lie awake nights devising plans to improve their paper—doubtless think they are doing the world a great service, and they are—not. If a journal is not properly conducted, the public will find it out. The subscription list and advertising patronage will tell the business manager that something is wrong, and the remedy will be applied without outside assistance. There are few people who would have the impudence and effrontery to stop a physician on his way to visit a patient and tell that physician that he was pursuing exactly the wrong course of treatment, and would surely kill his patient. Nobody but a lunatic would interrupt a judge in the midst of his charge to the jury, and say: "See here, you are not giving those twelve men the proper instructions; you ought to know better than that!" People don't rush into a dry goods establishment in breathless haste and tell the proprietor he made a mistake in buying calico last week, and ought to wait until next week. Our greatest millers and manufacturers are not besieged by a horde of wise idlers who are loaded to the muzzle with information about the proper time to buy wheat or the necessity of limiting the product until the demand increases. They are allowed to attend to their own business, and if they do not conduct it properly, decreased patronage soon warns them of their danger.

In the newspaper office it is different. One volunteer thought-molder advises the decapitation of a correspondent because he writes that ear muffs are not fashionable in Cuba. He fears it may injure the ear muff trade in Minneapolis. Another complains that the death of John McNiff, which occurred in Arkansas last May, was not chronicled with the postcript, "Pine Bluff and Moccasinville papers please copy." A tender miss of nineteen summers and an equal number of hard winters flutters in with a poem on "Love's Young Dream," and complains that hitherto too little attention has been paid to the muses. She adds that she would like to have her effusion printed on the first page, top of column, and will present her bill at the cashier's window. One man wants more foreign news, and another thinks it is an outrage to print rubbish from across the water at all. And so it goes. If the editor printed everything he is ordered to, he would have to issue a sixty-four page paper every day; and if he omitted everything his anxious advisers tell him to, his journal would be as white as the driven snow.—*Minneapolis Tribune.*

A Battle in Asia.

LONDON, April 28.—The St. Petersburg correspondent of the *Daily News* says: "I am informed on good authority of another engagement on the Afghan frontier. Of 1,700 Russians who engaged the Afghans, nearly all were killed."

The *Standard* (Conservative), in an editorial says: "Mr. Gladstone's speech was wholly worthy of the occasion. It was manifestly intended to convey more than we thought it well to say. The upshot of the whole is, we take it, that Russia declines to admit the conduct of her officers to question."

The *Times* editorially says: "If Russia's policy is founded upon belief that England will submit to any exactions rather than rupture relations. Mr. Gladstone's speech may dispel the illusion. The cheers with which the speech was greeted will be echoed throughout the country."

The new President has had his first experiment with the typical Western steamboatman. Capt. Thos. Crummer, one of the veteran engineers on the Mississippi, called at the White House to present in his person his application for a Supervisorship of Boilers in the New Orleans district. He was accompanied and introduced by Representative Ellis. President Cleveland listened attentively, and then asked: "Captain, are you a mechanical engineer and machinist?" "Yes, sir," responded the old captain, with the emphasis on the "sir." He then added, in a burst of enthusiasm: "I can build an engine that will pull me into this office." The President smiled and asked: "About what power would you suggest, Captain, for such an engine?" "Well," said the engineer, reflectively, "when I left New Orleans I thought a two-horse engine would pull me in, but since coming to Washington and talking with numerous other office-seekers I have come to the conclusion that it will take a sixty horse power." The President laughed outright, and when the visitors withdrew was still looking as if something had amused him greatly.—*Chicago Times.*

Weights and Measures.

Every family should be furnished with scales and weights; and it is also advisable to have wooden measures.

About sixty drops of any thin liquid will fill a common sized teaspoon.

Four tablespoonfuls, or half a gill, will fill a common sized wineglass.

Four wineglasses will fill half a pint measure, a common tumbler, or a large coffee-cup.

Ten eggs usually weigh one pound before they are broken. Eight large ones will weigh one pound.

A tablespoonful of salt will weigh about one ounce.

One pint of water or milk will weigh one pound.

One pint of molasses will weigh one and one-quarter pounds.

Three tablespoonfuls of baking-powder should weigh one ounce.

One quart of flour weighs one pound.

One quart of Indian meal weighs one and a quarter pounds.

Law of the Road.

Judge Biddle, of Philadelphia, last week expounded the law governing drivers of vehicles in using the highways. A new trial had been asked for by Moulton Thomas, against whom a verdict had been given for damages done to the wagon of Henry Brooks, in a collision with a vehicle of his. The judge said: "There is no rule of law which requires a traveler to drive over any particular part of a public highway. He can drive over the middle or on either side, no matter in what direction he may be going. What is called the "law of the road" is that persons meeting on the highway must each keep to the right. This rule is modified in the case of a footman or horseman, who cannot compel a teamster with a heavy load to turn out of the beaten track, or even a light wagon with a heavy draught. In those cases, if the horseman or light vehicle can pass with safety on the left of the heavily-laden team it is their duty to give way and leave the choice to the more unwieldy vehicle. Travelers naturally keep as near as they can to the right side of a highway, not because of any legal obligation so to do but because they are then in a position to require any one meeting them to turn out. They may travel on the left side if they please, but then, if they are met by a person driving in an opposite direction, they must turn out. The obligation is not to keep any particular part of the highway, but simply to turn to the right when others meet them."

The danger of war in Europe has started emigration to the United States on a grand scale, more than five hundred people a day leaving Queenstown during most of last week. At the same time there is a great exodus from Russia Finland, the people being afraid of conscription in case of war.

NEW ADVERTISEMENTS.

SMITH & CALLIS.

JOHNSTOWN, MD.,

Desire to inform the people of Garrett county and the rest of mankind, that their stock this season will be fuller than ever heretofore, and their prices lower. Their stock consists in part of

Dry Goods, Groceries, Notions,
Hats, Caps, Boots Shoes, Patent Medicines, &c., &c.

FINE LOT OF SUMMER HATS JUST RECEIVED.

We especially desire the patronage of the farmers in this neighborhood, and guarantee to sell as low as anywhere in the county, for the same grade of goods.

Patronize us and keep your money at home.

Johnstown, April 28, 1885.—6 n.*

NOTICE.

All persons are hereby warned not to trust my wife, Anna Bray, who left my bed and board without just cause or provocation, as I will not pay any bills contracted by her.

NORMAN M. BRAY.

Oakland, Md., April 21st, 1885.

NOTICE TO TRESPASSERS.

All persons are hereby warned not to trespass upon our lands near Oakland in any manner.

4 25 3 NATHAN CASTEEL.
T. W. CASTEEL.

NOTICE!

Merchants and others are hereby notified to give no credit to any person whatsoever on account of L. Levering or Thomas J. Crouser, from this date.

OAKLAND, GARRETT CO., MD.

THE SCENT OF A FLOWER.

The scent of the flower is a wonderful thing!
It plays round the heart like the zephyrs of spring;
So subtle, so soft, so resistless its power,
No monarchy rules like the scent of a flower.

Some odors so blend with past happier years
They move us like melodies breathing through tears;
For they bring back the faces and forms that are cold,
And walks in the wild woods 'mid sunsets of gold.

A fragrance exhales from a flower that I know,
(Dear pledge of a love in the sweet long ago,)
When tastes were more simple, and purer our pleasures,
And gifts of fresh blossoms were holiest treasures.

One eve, when the dew on the leaves glittered bright,
He proffered the prize with a tender "Good Night;"
And my spirit grew faint with ecstatic emotion,
For I felt in that flower lay a life-long devotion.

He is gone—yet the scent of that delicate flower
Still holds me with all the old passionate power;
And oft my sick heart would lie down in despair
But that mercy divine melts my sorrow in prayer.

"Consider the lilies." Lord, grant us to be
By the field and the garden brought nearer to Thee;
To read in sweet blossoms Thy goodness and power,
And an infinite love in the scent of a flower.

—*The Quiver.*

SHIP OF THE DESERT.

What the Arab Calls the Most Useful of Beasts.

The Land of the Camel—His Speed and the Load He Carries His Powers of Endurance—In the Service of Warlike Sovereigns.

The camel, whose area of servitude extends over a wide range, embracing Arabia, India, Persia and the largest portion of Africa, unlike the rest of man's four-footed friends and servants, seems to be a total stranger to the pleasures of freedom. At what era men first enlisted the camel into their service it is impossible to guess, but that it was at a very early period is plain from the fact that 6,000 camels formed part of the wealth which the patient patriarch was awarded after his terrible trial. The Moors during their rule in Granada introduced the camel into Spain, but the East was always the real land of the camels, the peculiarities of the animal being especially adapted for the vast deserts for which that quarter of the globe is famous. To carry men and merchandise across the arid waste an animal was needed at once speedy, untiring, sure-footed and capable of subsisting where vegetation was scanty and water scarce; all these qualifications are combined in the camel. The pads of its spreading feet, divided into two toes without being externally separated, prevent its sinking in the sand, over which it moves so noiselessly that it has been poetically and appropriately termed "the ship of the desert." The callosities on the flexures of the limbs and chest, upon which the animal rests or kneels to receive its load, prevent the skin from cracking from contact with the hot sand. The nostrils, closing at will, exclude the burning grains when the simoon sweeps across the desert, while the peculiar contraction of the stomach enables the camel to go without water for several days. He is as easily satisfied in the way of eating, delighting in the tough plants he passes on his march, which his strong, nipper-like teeth enable him to masticate with comfort. These good qualities are not, however, unalloyed. The camel is liable to slip in sloppy places and disjoint his hips, bears cold and wet weather but ill, and has so little recuperative power that when fagged out he generally succumbs altogether and is left to the jackal and vulture. Even if he should recover he becomes a poor, weak object, piteous to behold, a burden to himself and of little use to his master.

How many days the camel can go without drinking has never perhaps been exactly ascertained; in fact, the power of endurance varies greatly in different individuals, but it has been stated on very good authority that the dromedary can subsist nine days without water, though exposed the whole time to a heat resembling that of a furnace. It is certain that when the camel does drink he always appears to be laying in a stock for a week or so, and has even been known to swallow seven gallons and a half at one time. This allows three quarts a day for ten days, which, though not sufficient properly to quench the thirst of so large an animal, may yet be able to keep him alive. Comparative anatomy, which has indulged in a legion of experiments on the structure of much inferior animals, has not extended a proper degree of attention to the camel. It has, no doubt, been ascertained that this extraordinary creature possesses one stomach more than other mammalia, but curiosity has not been sufficiently busy with that immense bladder streaked with sanguine veins, which the animal sometimes blows out of its mouth in spring. In strings of thirty or forty I have noticed, during the greatest heat of the day, a majority amusing themselves after this fashion. On such occasions they will raise their heads, look around wildly and then, with a strange, offensive noise, draw up the bag from their throats and blow it out inflated to its fullest extent, as if to cool it by the touch of the external air. In a few minutes they would suffer it to collapse and suck it back with a ruckling noise into their throats. Is not this bag intended to contain, in addition to the fifth stomach, a supply of fresh water? And is it not in this that travelers, when compelled to kill their dromedaries to preserve their own lives in the Sahara, find the pure transparent fluid spoken of on such occasions?

It is during a sandstorm, or on the approach of the simoon, that the camel displays the most striking proofs of sagacity. Before the human eye can detect the swiftly approaching column of yellow or lurid gas which instantly strikes dead all creatures that breathe it, the camel discerns the danger and, uttering a wild roar, turns round and plunges his nose into the sand. The traveler also, who springs instantly to the earth, presses his face against the face of the desert, tightly closes his lips and protects his nostrils with both hands. What signs of suffering or agitation the poor dromedary exhibits, the traveler is too much terrified to observe, but he himself experiences throughout his frame, first a quivering, shooting pain, then a numbness and paralysis of all the limbs and vital functions, which prolonged for many seconds would be death. But the mysterious vapor, which comes almost like lightning, in the same manner departs. In many cases the sudden death of the beast and his rider reveals the fatal power of the simoon; but when they escape with life the process of reviving from the stroke resembles that experienced by patients after a long illness—languor, feebleness, prostration of the whole system, giddiness of the head, dimness of sight, a partial loss of memory and a bewildering of ideas. Foreigners flee to brandy as a remedy, the Arabs to coffee, while the camel, kneeling as if under a heavy burden, groans, grunts and looks ruefully about upon the waste.

The amble of the camel—a curious amalgamation of rolling and pitching simultaneously executed—would scarcely be extolled by any one accustomed to the pleasant canter of a good horse, but it has its advantages. The rider may sit sideways, backwards or in the orthodox fashion, with his feet in or out of the stirrups, he may let his legs dangle carelessly or sit cross-legged, after the manner of Turks and tailors, without any fear of his seat or equanimity being disturbed by the sure-footed beast stumbling, kicking, shying or bolting. A habit rather perplexing to the inexperienced camel rider is the animal's propensity for snatching at dwarf acacias and other vegetable delicacies as he wanders along. But these slight drawbacks are fully compensated by the measured regularity with which he moves, while the elevation enables the traveler to see all that is to be seen, and gives him the benefit of every welcome breeze that blows. The riding gear of the dromedary consists of a large double pad of goats' hair cloth, stuffed with grass or straw. This is thrown over the back of the animal. A wooden frame of flat sticks united into a pair of conical pommels six or eight feet high is placed on the pad, into which it settles itself comfortably, the hump of the camel forming the center of the apparatus and keeping everything in its proper place. Across this gigantic saddle the saddle bags are thrown, and the whole covered with carpets and cushions, until a sort of pyramid is formed, upon the apex of which the traveler is perched, his water bottles, carpet bags and other paraphernalia swinging below. The harness is completed by a halter of goat and camel hair twisted together passing around the beast's nose like our common stable halter.

The average speed of the ordinary caravan camels, which are seldom less than ten hours and sometimes twenty-four hours continuously on the march, is about two miles per hour, but the maherrie, or dromedary, can accomplish a much swifter rate of progression, being able to travel seventy miles a day for two or three days successively. Laborde went from Alexandria to Cairo (one hundred and fifty miles) in thirty-four hours, and mails have been carried between Bagdad and Damascus in seven days, at the rate of sixty-nine miles per diem. Still greater celerity was attained by Mehemet Ali, when he wished to communicate from Cairo with Ibrahim Pasha at Antioch. By adopting the system of relays the distance of five hundred and sixty miles was traversed in the short space of five days and a half.

The camel not being himself sociable is averse to encouraging sociability in others. It is only after much toil and a vigorous application of the whip that this stubborn animal can be made to move in line with individuals of his own species, though both in India and Africa the enterprise has been accomplished—in the former country by the creation of camel trains, in the latter by accustoming the dromedary to military evolutions, to charge and retreat in compact bodies, and otherwise to imitate all the movements of cavalry. But your trading camel having acquired different habits far exceeds a mule in obstinacy when you attempt to break through them. He will then oppose to your will a passive resistance utterly unconquerable; will lie down if he thinks you have put too much on his back, and refuse to rise though you should beat him to death. To show that this is often a mere crotchet, the Arabs remove two or three small packets from the load, upon which the animal, no doubt with an inward chuckle of satisfaction at having gained the victory, gives a loud grunt and rises without perceiving that during the operation the packages have been restored. As, however, he believes his load to have been lightened he trudges along merrily, if so sullen a heart can ever be said to be merry. But though serious and gloomy, this patient creature must not be supposed to be entirely without sentiment. When kindly treated, when patted on the shoulder, when gently spoken to, but more especially when treated to a song, the dromedary will exhibit strong signs of pleasure in his prominent eye, will turn round his long snake-like neck, look at you steadfastly, as if to express his thanks, and then gaze forth upon the outspread desert more proudly than before.

The load for a camel in India is fixed by the Government at 330 pounds; in Arabia it varies from 360 to 400 pounds; in Persia from 500 to 600 pounds; in Egypt it averages 800 pounds, while, according to Tavernier, the Turcoman camels will carry as much as 1,500 pounds weight. Where the road is tolerably good the burden camels of a caravan are tied to each other, the noose rope of one being fastened to the the tail of another, and so they march on, three to ten in a string, in single file, and such creatures of routine are they that a camel will refuse to proceed if the camel before him is changed for another. In Egypt caravans move abreast, and one of fifty camels will show a front for a mile in extent. The pilgrim caravan pursues its route principally during the night, lighted on its way with torches. It has been shorn of much of its splendor in modern times. Bagdad's celebrated ruler performed the pilgrimage to the Prophet's shrine no less than nine times, with a caravan of 120,000 camels, 900 of that enormous number being employed in carrying Haroun's wardrobe. The Sultan of Egypt was accompanied by 500 camels laden with sweetmeats, and 280 bearing pomegranates and other fruits. Every year the Sultan of Turkey sends a mahmal—a beautiful covering for the shrine of Mohammed—to Mecca. The camel honored by being chosen for carpet bearer is magnificently adorned with ribbons, lace, feathers and imitative gems. When Hasselquist saw the procession start from Cairo in 1750 this favored beast carried a pyramidal pavilion six feet high, covered with green silk, under which the mahmal was supposed to lie; but, like other great officials, the carpet camel did his work by deputy, the precious gift being actually carried by some of his less fortunate brethren. As a reward for "not doing it," the mahmal camel becomes exempt from all labor for the rest of his life, which is passed in a lodging provided for his special use, and he has servants to wait upon him, and due provision made for his sustenance.

The camel has served other purposes than those of commerce and religion: he has been pressed into the service of warlike sovereigns, and employed not only to carry the luggage of their armies, but to draw scythed chariots and to carry bowmen and swordsmen. The legions of Xerxes suffered by their camels being carried away by lions in the night, and Cyrus defeated Crœsus by craftily taking advantage of the antipathy the horse bears to the camel. He mounted some of his soldiers on camels, and ordered them to charge the famous Lydian light horse. The chargers of the latter, rendered ungovernable by fear, fled from the field, and with them the hopes of the wealthiest of monarchs. The time is possibly not far distant when the camel will be superseded by the great iron horse; but as long as the Arab finds in him a useful servant, meat, drink, clothing and fuel, we need not wonder at the faith of the true believer, who expects to find a white-winged camel awaiting him as he steps out of his sepulchre to convey his soul to paradise.—*Brooklyn Eagle.*

THE OLD CLO' MEN.

How They Manage to Dispose of Their Accumulations.

Some very amusing characters are conspicuous in the streets of New York. I met one of these the other day. He was a middle-aged man, with a shrewd face and dark eyes. He was dressed in coarse, loose stuff, much the worse for wear, and he carried several garments over his left arm. He was what we call an "old clo' man"—a gatherer of cast off coats and trousers, shoes and boots and hats. As I was passing him he asked me if I had any old clothes to sell, and assured me that he paid the highest market prices. Then this little dialogue, inspired by my own curiosity, ensued:

"What do you do with the things you pick up?" I inquired.

"What do I with them?" he said, with a laugh, "I get rid of them—at a profit."

"How?"

"How? Easy enough. I sell them to the Westerners, and this is the way I do it: As soon as I get a big stock I make up a lot of bundles, as a pair of boots, a hat, a coat, or something else in each. I stuff the bundles into cheap bags and then start for some Western town. I hire a store there and sell off the bags at auction. When that's done I take the first train out of that place. If I stayed till morning I'd be lynched. There's a hundred places I don't dare to show my nose in. Once—only once—I was caught; badly to. I lost the train and had to stay all night in a Mississippi village. The next day I was kept mighty busy, I tell you, buying back my bags and old clothes. I never saw such mad people. The trade is dangerous you see, but it pays."

The philosopher whistled briskly and went his way.—*George Edgar Montgomery, in Newark Advertiser.*

A Lofty Pyramid.

Fresh proofs are reported to have been discovered of the existence of an ancient civilization in Mexico. In Sonora, about sixty miles southeast of the town of Madeline, some explorers have found in the heart of the virgin forest a pyramid which is 4,350 feet around in the base and 750 feet high—that is to say, nearly double the size of the great pyramid of Cheops. From the base to the summit there is a roadway on which vehicles can travel round the vast erection in a spiral. The outside walls are built of granite blocks carefully tooled and bedded. A little further off is a hillock, with hundreds of caverns and chambers cut in it, from five to fifteen feet wide and ten to fifteen feet long. They have no windows, and are entered by the roof. The walls are covered with hieroglyphics and curious pictures with the feet and hands of men. Stone utensils have also been found there. Who the builders of these ancient monuments were is still unsettled, but, according to *El Liberal*, they probably belonged to Mayos, who formerly inhabited Sonora, and were a different race from the Indians, having blue eyes, a white skin, and blonde hair.—*Rehoboth Sunday Herald.*

Lead Diseases.

An appalling list of diseases which arise from "repeated minute doses of lead" was given by Dr. Wynter Blyth in a lecture at the Parkes Museum of Hygiene. Paralysis, colic, gout, rheumatism, kidney disease, blindness, and insanity may all come, it seems, from drinking water with lead in it. Under these circumstances, a simple test for discovering the presence of lead in water may well be useful. It consists of adding a little tincture of cochineal which, if there be the least trace of lead in the water, will color it blue instead of rose.—*London Truth.*

YOUNG WIVES.

If They Only Knew It the Way to Keep a Husband is to Practice the Pretty Arts They Used so Cleverly to Win Him.

Why do all the watery-eyed, shaky-kneed young wives appeal to you for sympathy when they have rocked their first seraph to sleep in a cut-teeth Mother Hubbard (only meant for babies), and why do they all, as a class, wipe the corner of their off eye with a new ten-cent pink-bordered mouchoir and plaintively tell you that "Dick has changed; O, how horribly changed!" and that he doesn't love baby one bit—not half so much as his nasty sleuth-hounds, pointers and poodles? As for horses, "goodness knows, he prizes them away beyond her and young Richard."

Now all this is sadly true and truly sad. One by one they come, too, for a key to the family rebus, after a trip to Europe and a disappearance for a time in Ohio, which is a great State for Presidents.

When you shake your head, which knows a vast deal too much, you say you know not the reason why of this wherefore. You tell a big story and think she will take that round-eyed young Dick to the park, leaving you to answer your last love-letter in answer to one in which he promises so many kingly things and a dog-cart.

But she takes up baby, who is swallowing his left leg and mewing like a milk-hungry kitten, and she looks at you so soberly that you dare not trifle with her. In turn you gaze on her who was one of the jolliest, neatest girls you ever saw thirteen months ago.

Dick is still jolly to everybody but his wife, of whom he seems in awe because she is the daughter of her mother. He has lately walked on tip-toes, and romps only in the stable-yard with the dogs.

The real fact of the matter is that young girls lop down after having caught a man, tired from the effort, and they spend two-thirds of the year with "mar," who points out frailties in Dick's constitution much too often to suit Dick. He loved a jolly, cleanly girl, but he did not bargain for a weary, pale, slipshod wife, who never crimps her hair for him any more, nor wears pretty house dresses or clean collar unless company comes. He expected that some time he should have to do the right thing by an heir, but again he did not bargain for a damp, sickly, bottled-reared, poor, almshouse style of baby, who moans his days away and howls out the nights.

A jolly mother brings up jolly babies—you may be sure of that—and vice versa. Dick's smoking den is full of slop-water and baby garments in the process of drying. Smoke hurts Alice and young Dick, so her mother says. His old bright-eyed, red-cheeked girl has grown into a down-at-the-heel, quiet, non-reading, non-talking woman, full of complaints and neuralgia, with only a thin crust over her tears, and, to cap all, she is jealous because he can still laugh and admire a pretty woman neatly dressed. No woman expects to change so, but they make the grave mistake of fancying that maternity will also rouse some hidden paternity, and that the father will grow solemn and teary with the mother. Not a bit of it. The baby adds another chap to romp with, and if he isn't that kind of a little animal he is voted "N. G." until he is old enough to know dada and to know a papier-mache pistol from a doll.

All the time this youngster is looked upon as an interloper if his pretty mother gets slouchy and wears old flannel, musty, condensed-food smelling wrappers. Be bright, talk to him of the day's news, save some pin-money, and get a trusty woman who will look after the baby when you go out with Dick, but for your child's sake, don't trust him always to that social fraud and horror, a baby-nurse.—*Cor. Chicago Tribune.*

A SOCIAL TYPE.

The Unmannerly Pig of the Boarding House.

A person frequently met with at the seaside is the boarding-house pig. The breakfast bell has hardly sounded when you see him scuttling down the stairs, pushing and jostling every one; when you reach the room he is already seated; he has gathered two or three eggs, some bacon and sundry and divers other articles around his plate, but still he is not happy; he watches the door with breathless interest—there are always one or two delicious little dishes brought in delightfully hot at the last moment; perhaps it is kidneys, perhaps chops and mushrooms; anyway the pig wants them.

The waiter and dish appear—the pig gets wonderfully agitated; the waiter comes nearer and nearer—the pig watches him eagerly and calls his name; the coveted dish is put down two or three persons away from him; he sighs and leans forward.

"Mr. Grey," he says, "may I trouble you for those kidneys? I'er—I'mm," smiling, "particularly partial to them, so if you would be so kind."

Mr. Grey, perhaps, replies that others nearer to him are also partial to them, and the dish is cleared before the pig's face, the blood surges up into his head, and his eyes grow watery with vexation. He falls to on his eggs, etc., still keeping a sharp lookout at the door; when the next dish appears he starts up, leaves his seat, relieves the waiter of his burden and returns to his place triumphant. He invariably eats with surprising rapidity, tucks the end of his *serviette* as a rule into the top buttonhole of his waistcoat, and pushes his plates into the middle of the table as he finishes with them. The other visitors hate and circumvent him on every possible occasion; the waiters loathe him; but for all that, by his own untiring exertions, the tidbits generally find their way to his plate.—*Tinsley's Magazine.*

—A lesson in Pushtu: Kabool is pronounced Kayble; Merve is pronounced Mahriv; Herat is pronounced Heraht; Kurrachee is pronounced K'rahchy; Peshawur is pronounced Peshower. In such words as Bolan, Robat, etc., the accent is on the second syllable and the "a" is pronounced broad, like "ah."—*English Paper*

A FAST MAIL.

The Experience of an Austin (Tex.) Gentleman in Posting a Letter.

Colonel Yerger, of Austin, had just finished writing a letter. It was very important that it should go off by the next mail, so he rang the bell, and upon the colored servant, Matilda, appearing, he handed her the letter, saying:

"Take this letter to the letter box on the corner as fast as you can. It is very important."

Matilda, the colored girl, went out with the letter, and meeting the coachman, handed it to him, remarking:

"Jess you take dis hear letter to de letter box."

The coachman started out with the letter. He happened to see a friend passing, and it occurred to him that he might save himself the trouble, so he handed his friend the letter, requesting him to post it without delay, as it was very important. That night the coachman's friend, just before retiring, made the discovery that he had forgotten to post the letter, so he gave it to one of the boys at the stable, enjoining him to put it in the letter box early next morning.

The stable boy was about to comply with the request next morning, when a baker, with whom he was acquainted, happened to drive past in his cart.

"Hello! Tom," exclaimed the stable boy; you take this letter and drop it in the letter box and save me the trouble."

Among the customers of the baker boy was Colonel Yerger himself. Just as the baker boy drove up to the Yerger mansion, Matilda, to whom the letter had been originally given, was just going out of the gate on her way to market. The baker boy handed her the letter with the request to shove it in the letter box. But just at that moment Mrs. Yerger happened to open the door and saw the boy hand her servant a letter.

"I will have no such goings on as that in this house," exclaimed Mrs. Yerger, and she seized the letter from Matilda's hand, and running into the house, exclaimed, in an excited voice to Colonel Yerger:

"It is not safe to have that Matilda about the house any longer. Here she is getting letters on the sly."

She handed the letter to Colonel Yerger, who recoiled in astonishment when he perceived the identical letter he had written and addressed the night before. Uttering an exclamation too profane to print in a family paper, Colonel Yerger violently forced himself into his coat, remarking:

"Now I will post that letter myself, and then I will know it is done."—*Texas Siftings.*

A CLERICAL ERROR.

The Very Natural Mistakes Made by a Philanthropist.

"Say, sonny," said the philanthropist, as he looked down at the mere mite of a newsboy in Park Row, "do your parents or any one help you to exist?"

"Not much," quoth the mite; "the ole man's doin' a stretch up the river and the ole woman's on the bum most o' the time."

"Does any institution house or feed you?"

"You bet your sweet life they don't."

"Pray how do you live?"

"O, I plug along on my own account. I'm pooty fly, and it takes a live chicken to do me up."

"My, my! So precocious!" marveled the philanthropist, "how want matures the faculties!" and he said: "Sonny, how do you pass the day?"

"O, I've got a shine route in the mornin', and just as soon as I work it off I tumble in on Fatty's for 'a plate' to grease the inside works. Next I clap on steam and pike along to get a lot o' *Tellys* 'fore enny o' the Degoes or Guineas around the row git their work in. Then I tackle Oliver for 'beef and,' sneak up the Bowery and catch the swell blokes that the show don't fit for an admission. Afterward me and some other ducks amuse ourselves with suckers we pick up. Catch on, Cully?"

"What strange precocity!" said the philanthropist, and went off and wrote an account of the effect of poverty in maturing the intellect of a youth—aged five years.

Next day he saw the mite again and thought he would make everything sure.

"Sonny," he asked, "how old are you?" and wondered if he hadn't overshot the mark.

"Goin' on fifteen, ole buck," said the mite. And the philanthropist went home and burned the narrative.—*N. Y. Herald.*

FOR ANTI-VACCINATIONISTS.

A Few Facts Showing the Beneficial Effects of Vaccination for Smallpox.

While the deaths from smallpox last year throughout the entire German Empire averaged one or two a week, and never exceeded four, there died in Prague, a city of about 270,000 inhabitants, no fewer than 828 persons between January and June, besides 409 in the last four months of 1883. Between October 1, 1883, and March 31, 1884, 56 cases nearly all children under five years of age, were admitted into the Polyclinic Hospital wards under Dr. Ganghofner. Of these 52 were unvaccinated and 4 vaccinated, 2 of the latter, however, not until after infection. Of the 52 unvaccinated 14 (21 per cent.) died; of the vaccinated none. There is a strong local prejudice against vaccination, with which several medical men, we regret to say, sympathize. Buenos Ayres is a city of about the same size—namely, 287,000 inhabitants; and vaccination is not compulsory, and is unpopular. While the births in 1883 were close on 11,000, the total number of vaccinations and revaccinations was 8,643. The deaths from all causes were 8,248, or 28 per 1,000, and those from smallpox 1,487, or 5 per 1,000 of the population, and 18 per cent., or nearly one in five, of the total deaths. In Prussia the mortality since 1875 has been from 0.34 to 3.62 per 100,000 yearly; in Austria, 5.57 to 50.83. In Berlin, in 1882, it was 0.43, and in Vienna 108.29 per 100,000. Since 1875 not a single Prussian soldier has died of smallpox; in the Austrian army 10 to 47 per 100,000 annually, and in the French 2 to 27 have died.—*British Medical Journal.*

MISCELLANEOUS.

—Parisians ate 13,000 donkeys, mules and horses last year. The *Academie de Medicine* has awarded a prize to an essayist who strongly recommends a more general use of such diet.

—A London firm of pencil-makers manufactures its shavings and sawdust into an article which they call the "Dust of Lebanon." It is sprinkled upon the fire to remove the unpleasant smell of cooking noticeable in a room after a meal.

—British Columbia is realizing the benefits of its excellent harbors and magnificent forests. Two milling companies with an aggregate production of 35,000,000 feet of lumber, are now cutting exclusively for the export trade. They ship to China, Australia, Sandwich Islands, and even to England.

—We had in 1880 nearly 2,000,000 "common laborers." The number of clergymen in 1880 was 64,000, against 43,000 in 1870; the number of lawyers 64,000 in 1880, 40,000, in 1870; the number of physicians increased during the decade from 62,000 to 86,000. In 1880 there were 4,800 actors and 12,000 journalists in the country.

—An insane German, named William Weicht, created a sensation in the United States Supreme Court-room recently by announcing that he had several suits of clothes in a carpet-sack which he carried that he wanted the Chief Justice to wear. He thought they would be more becoming than the black silk robes that the Justice wears.—*Washington Post.*

—In Morocco recently a man was accused of having stolen a bullock from one of the local native authorities who acted as judge in his own case and gave orders that the supposed thief should have his eyes cut out, which horrid sentence was carried into effect. A writer cites this as a sample of a series of brutal atrocities continually occurring in that country.

—African colonization has already affected the price of elephants. An India exchange quotes Asian elephants six feet high at $2,000, tigers at $750, and panthers at $475. Yet at recent sales in England elephants have been sold as low as $500, six lionesses with cubs at $750, a tiger that had devoured two keepers brought only $252, and a panther was traded even for a poodle.

—The boys of Turner, Me., says the Lewiston *Journal*, are noted for training domestic animals—dogs, calves, sheep and steers are broken to all kinds of vehicles. One day Earnie Morse will drive by with a tandem team—a sheep and a calf. He may be followed by Harry or Ralph Bearce driving a span of merino bucks. Then a string of Jersey calves driven by a dozen boys. Willie French has a nice Jersey heifer trained to do all sorts of fine things.

—At the Bald Mountain extension drift mine, near Forest City, Cal., recently, the steel wire cable broke while loaded cars were descending the incline 360 feet long. One of the boys, by the name of Veal, employed at the mine, had the rare courage and presence of mind to jump on an empty car and chase the fleeing train down the tunnel, over 6,000 feet in length, and overtook and stopped it before the cars collided with the incoming train.

—The new servant girl came to her mistress crying and holding on to her finger. "What's the matter?" asked the lady of the house. "I run one of the forks into my hand, and if it is this plated stuff I'll get lockjaw." "Don't be alarmed," said the mistress, "all my silver is genuine; I don't keep any plated ware." Next morning the servant girl was gone and so was the silver. —*Texas Siftings.*

—The "law of the road," as understood in Pennsylvania, was laid down by Judge Biddle of the Common Pleas Court of Philadelphia a few days ago. It is to the effect that persons meeting on the highway must each keep to the right. This rule is modified in the case of a footman or a horseman, who can not compel a teamster who has a heavy load to turn out of the beaten track, or even a light wagon with a heavy draught. If a horseman or light vehicle can pass with safety on the left of a heavily-laden team it is their duty to give way and leave the choice to the more unwieldy vehicle.

—When a Finland girl wishes to leave that country, according to the Cardiff *Mail*, she has to go first to her clergyman and partake of the sacrament and procure a letter of recommendation from him; next to a physician and obtain of him, after an examination, a certificate of permission to remain absent a certain specified number of years. This certificate costs her about twenty dollars. If she returns promptly at the end of the time prescribed all is well, but if not her name is erased from the book in which it has been entered, and she is considered as having violated her contract with the Government and loses her citizenship forever.

Preservation of Negro Dialect Hymns.

An old colored woman of Atlanta was asked how their dialect hymns were brought into existence. She answered:

"Well, I reckon de spirit was a crowin' and dey jess had to come out."

A good definition of inspiration, was it not?

Among the more intelligent negroes I find a strange disposition to eschew these wonderful slave songs. The young men and women of Atlanta University seem to share, in a measure, this slightly contemptuous estimation of the old melodies. I suppose it is because their awakening intelligence associates them with the degradation of their race, and they have not the penetration to see that these wonderful hymns embody the very genius of their people.

Another fact makes it hard to gather together a reliable collection; the various hymns are sung differently in different localities, so that frequently two versions of the same piece would hardly be recognized as akin. This was the inevitable result of the illiteracy of the negro, whereby both words and music were unwritten for so long a time.

It is a matter of regret to me that in most of the Southern city colored churches an effort has been made to discard these plantation melodies, except in social religious meetings.—*Salt Lake Tribune.*

FARM AND FIRESIDE.

—Before whitewashing a poultry-house smudge the house faithfully by mixing carbolic acid, turpentine and sulphur, and firing the same, confining the smoke for two hours. Then air and whitewash, and you will save the fowls from the liability of lice, save feed, get more eggs, and have a clear conscience of duty done to your stock.—*Prairie Farmer.*

—Jelly Roll Cake: Three eggs, one teacupful of sugar, one teacupful full of flour; beat yelks till light and then add the sugar; then add the whites beaten stiff, and lastly stir in the flour gradually; bake in a long, shallow greased pan; turn out on a damp towel on the bread board and cover the top with any kind of jelly or thin layer of marmalade and roll up while warm. Slice as needed.—*The Household.*

—In almost all litters of pigs there will be one or more that are under sized. If the larger and stronger pigs are taken from the sow first and well fed they will not suffer, while the weaklings, if left with the mother somewhat longer, will grow rapidly, catch up to the others, and make the whole lot more even in size than if all be taken away at once, and it will be no worse for the sow.—*Toronto Mail.*

—A correspondent asks: Can apple trees be moved of five or six years' standing from a clay to a sandy soil without loss of trees, if so, at what time of year, and how to move them? In reply we would say that apple trees will do well enough on a sandy soil if it has a clay sub-soil; and if the trees are not too large you can remove them in the spring.—*Western Rural.*

—If horses or cattle are troubled with constipation, give such animals half a peck of potatoes each day for a week or two. Two quarts of wheat bran, mixed with a horse's oats night and morning, has a tendency to prevent and relieve costiveness. Bran fed moderately and regularly to cows, ewes and brood sows will keep the bowels in proper condition.—*Exchange.*

—Cocoanut Cheese Cakes: Take the white part of a cocoanut, three ounces of lump sugar and half a gill of water. The sugar must be first dissolved in the water and the cocoanut grated, to be added to it. Let all boil for a few minutes over a slow fire, let it get cold, and then add the yolks of three eggs and the white of one well beaten up. Put the mixture into small tins with thin paste at the bottom and bake in a slow oven.—*N. Y. Herald.*

—To take up a young forest tree, first wind a wet sack around the stem, close to the ground, so tightly that it can not slip; then take a timber stitch with a small chain cable, cut off a few roots on the side opposite the steady team, and you will get nearly every root whole and plenty of soil. I took up 100 rock maples in this way last spring, after I had learned to wind the sack properly, without damage to the trees. In this way two men with a team will take up more trees in an hour than they could without a team in half a day.—*N. E. Farmer.*

WHEAT.

The Folly of Discouraging Production Because the Price Is Low.

In certain parts of the West it is reported that the winter wheat has been killed by the cold weather, and while it is not possible to discover what extent of the wheat area has been affected, enough is known to warrant the belief that the deficiency in produce in the new crop, as compared with last year's crop, will be large. This may lead to important results, for it is only one of the causes, and not one of the most active, that are tending to a "short" wheat crop this year. The great fall in the price of wheat can not but be a factor in the situation, for it will discourage the breaking in of new wheat lands, and will also lead to the devoting of area hitherto under wheat to other crops. The season is not sufficiently far advanced to determine to how great an extent this movement has occurred. It is reasonably safe to say that its results will be very marked.

For the world is always within one year of starvation; each year's produce being only a little more than is necessary to support the population. The United States has for fifteen years been very favorably situated. In no year since 1870 has the export of wheat been less than seventeen per cent. of the total crop, and it once reached as high as forty per cent., though the conditions under which this occurred were peculiar. But in the period 1870–1880 the area under wheat increased in every year save one, 1877, and then the falloff was only about 650,000 acres, while the actual yield was 75,000,000 bushels greater than that of 1876. In 1882, as compared with 1880, the wheat area had decreased by 900,000 acres, and the yield was about 5,000,000 bushels larger. Since 1882 the market price of wheat has fallen almost to the cost of production under the most favorable circumstances, so that it is very likely that this alone would cause an absolute decrease in the yield, apart from the damages arising from natural causes, like cold.

In the meantime the demand for wheat is continually increasing. England imports more than one-half of her needs; France, Germany and Austria have within recent years become importers and not exporters of wheat. These countries have largely looked to the United States for their wants, and in the event of a dearth here they would be obliged to depend upon the already known fields of Russia and India and the possible granaries of South America. It is not probable that the United States would have to go into foreign markets for wheat. The crop of last year was large, and much of it is still held. A loss of one-third even of the new crop would leave enough for our own wants. It is very likely that the price of wheat will rise, and this will not be a local movement. In that event the populations of France, Germany and Austria will have brought home to them the delights of increased taxes on the necessaries of life, and it would not be strange to have this result in renewed activity in socialistic movements. And in this country the folly of advising the farmer to go out of wheat because the price happens to be low may be demonstrated. There can never be too much food produced, for population keeps up with the supply.—*N. Y. Herald.*

THE BUFFALO GNAT.

Suggestions Which Ought to be Heeded in Sections Afflicted With These Insects.

The Buffalo gnat, which causes such distress and destruction to cattle, horses and mules after an overflow, and which infested the overflowed portions of Louisiana and Mississippi to a worse degree last spring than ever before known, has been the subject of observation and study by Professor Riley, who suggests the following remedies in his report to the Commissioner of Agriculture:

The good effects of a smudge or thick smoke in keeping off the gnats has long been known. This method is used in the South at the present time and also in Hungary. In Hungary the inhabitants collect large and longish heaps of straw, hay, foliage, etc., both near their houses and also in the pastures. A brand is put in the middle and the heap begins to burn slowly and causes a thick smoke which prevents the approach of the gnats. The cattle there understand the effect of the smoke and make their way eagerly to the smoke heap as soon as they perceive a cloud of gnats, or when the gnats annoy them greatly, lay themselves down by the heap and always on that side of it to which the smoke will be driven by the wind or current of air.

The use of oil of tar by the employes of the Hudson Bay Company against the "black fly" of the northern woods, and the fact that long experience has shown it to be preferable to pennyroyal or any of the common prophylactics suggests a simple and easily applied wash, which has been several years recommended by Prof. Riley. A quantity of coal tar is placed in the bottom of a large shallow receptacle of some sort, and a small quantity of oil of tar or oil of turpentine, or any similar material, is stirred in. The receptacle is then filled with water, which is left standing for several days until well impregnated with the tar, etc. The animals are then washed with this water as often as seems to be necessary.

These smudges and washes are simply preventive in their character; as yet there appears no process by which the number of insects can be lessened. Prof. Riley thinks it not unlikely that the Southern Buffalo gnat breeds in the smaller tributary streams of the Mississippi River, in the shallowest and swiftest water. Such breeding places, once ascertained, it ought not to be difficult to kill the insect in its earlier stages, or on a large scale, by the introduction of some poisonous substance. If, on further investigation, it should be found, however, that the larvæ live attached to the stems of the water plants in the Mississippi itself, attempts to prevent the multiplication of the species will have to be abandoned as impracticable.—*N. Y. World.*

Profit in Growing Beets.

The experiment of making beet sugar in England is being tried with every promise of success. During the past year an area of about 640 acres in the vicinity of the sugar factory was planted, this acreage being distributed among some sixty farmers. Notwithstanding an exceedingly unpropitious season, by which it was calculated that the crop was only about half of what it should have been the product averaged over ten tons to the acre, in some cases running as high as twenty tons, and in others to five tons or less. The percentage of sugar was about thirteen, or a product of a ton and a half of sugar to the acre. The price paid the farmer was twenty shillings (fifty dollars) per ton for the beets, delivered at the factory. This, at the rate of ten to twenty tons to the acre, would seem to be a very fair return. To secure the best results the most careful cultivation and care are required at all stages of growth, but with a favorable season and a full harvest it would seem hard to find a better paying crop. When such results are reached in such a climate as that of England, there seems no good reason why California should not lead the world in the production of sugar from beets.—*San Francisco Chronicle.*

Storm Signals.

As the coming of a great storm is heralded by the display of cautionary signals, so is the approach of that dread and fatal disease, Consumption of the Lungs, usually announced in advance by pimples, blotches, eruptions, ulcers, glandular swellings, and kindred *outward* manifestations of the internal blood poison, which, if not promptly expelled from the system, attacks the delicate tissues of the lungs, causing them to ulcerate and break down. Dr. Pierce's "Golden Medical Discovery" is the great remedy for this, as for all diseases having their origin in bad blood. It improves the appetite and digestion, increases nutrition and builds up the wasted system.

A pensive maid often develops into an expensive wife.

Throat Diseases commence with a Cough, Cold, or Sore Throat. "*Brown's Bronchial Troches*" give immediate relief. *Sold only in boxes.* Price, 25 cents.

Hens are very exclusive; at least each one likes to stick to her own set.

STATUE
—OF—
"Liberty Enlightening The World."
This committee are now prepared to furnish a Perfect Model of this Colossal Statue to the "Public at One Dollar Each, delivered to any part of the U. S. This Attractive Souvenir and Mantel Ornament is a perfect fac-simile, six inches in height, of the model furnished by the artist. The Statue of Bronze, Pedestal of Nickel Silver. The committee are also prepared to furnish a model in same metal, twelve inches high, at Five Dollars Each, delivered. This design of Statue and Pedestal are protected by U. S. Patents, and the models can only be furnished by this committee. Address, with remittance,
RICHARD BUTLER, Secretary,
(American Committee of the Statue of Liberty),
33 Mercer Street, New York.

Caution! Some dealers recommend inferior goods in order to make a larger profit. This is the original S Shoe. Beware of imitations which acknowledge their own inferiority by attempting to build upon the reputation of the original. You can not be sure of getting the genuine article unless you are careful to examine and see that this stamp appears plainly on the soles:
JAMES MEANS $3 SHOE.

This Shoe for gentlemen is made of finest Tannery Calf-Skin, stitched with large Silk Machine Twist, and is unequaled in Durability, Comfort and Appearance. It is made in various widths to fit any foot. It is made with either broad or narrow toes. Made in style shown. In cuts also in Congress and Lace. The quality of this Shoe has won for it so high a place in public estimation that it stands without a rival. Wherever you live, this Shoe is within your reach; ask your dealer for it, and if he can not supply you with a good fit, send your address on postal card to JAMES MEANS & CO., 21 Lincoln St., Boston, Mass.

NEW THING! Of great value. Every man, woman and child wants it. We furnish our agents samples FREE, with goods for people to try FREE OF CHARGE. Agents say it pays better and gives better satisfaction than anything out. We deliver our goods prepaid and protect our agents. We give every agent a fine $3 Fly Fan free of charge. Address, with stamp, THE ROSE JELLY M'F'G CO., New Midway, Frederick County, Maryland.

I CURE FITS!
When I say cure I do not mean merely to stop them for a time and then have them return again. I mean a radical cure. I have made the disease of FITS, EPILEPSY or FALLING SICKNESS a life-long study. I warrant my remedy to cure the worst cases. Because others have failed is no reason for not now receiving a cure. Send at once for a treatise and a Free Bottle of my Infallible remedy. Give Express and Post Office. It costs you nothing for a trial, and will cure you.
Address Dr. H. G. ROOT, 183 Pearl St., New York

CONSUMPTION.
I have a positive remedy for the above disease; by its use thousands of cases of the worst kind and of long standing have been cured. Indeed, so strong is my faith in its efficacy, that I will send TWO BOTTLES FREE, together with a VALUABLE TREATISE on this disease to any sufferer. Give express and P. O. address.
DR. T. A. SLOCUM, 181 Pearl St., New York.

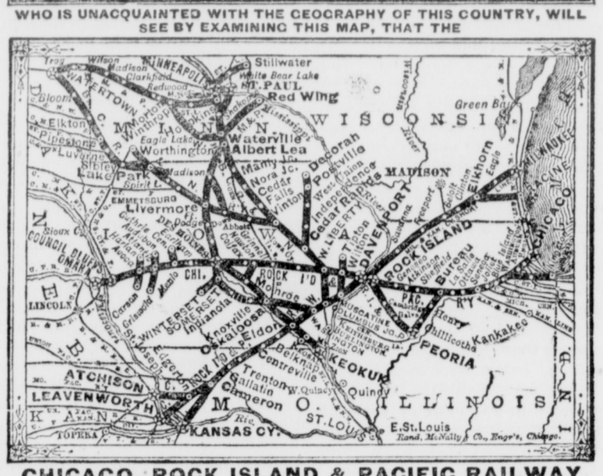
they know all about Mustang Liniment. Few do. Not to know is not to have.

A MAN
WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE



CHICAGO, ROCK ISLAND & PACIFIC RAILWAY
By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.
The Rock Island System includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.
THE GREAT ROCK ISLAND ROUTE
Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.
The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.
THE FAMOUS ALBERT LEA ROUTE
Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.
Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.
For detailed information see Maps and Folders, obtainable, as well as Tickets, at all principal Ticket Offices in the United States and Canada; or by addressing
R. R. CABLE, President and General Manager, Chicago.
E. ST. JOHN, General Ticket and Passenger Agent, Chicago.

PARSONS' PURGATIVE PILLS
MAKE NEW RICH BLOOD.
Positively cure SICK-HEADACHE, Biliousness, and all LIVER and BOWEL Complaints, MALARIA, BLOOD POISON, and Skin Diseases (ONE PILL A DOSE). For Female Complaints these Pills have no equal. "I cheerfully recommend them as a valuable Cathartic and Liver Pill.—Dr. T. M. Palmer, Monticello, Fla." "In my practice I use no other.—J. Dennison, M.D., DeWitt, Iowa." Sold everywhere, or sent by mail for 25 cts. in stamps. Valuable information FREE. I. S. JOHNSON & CO., BOSTON, MASS.

For Good Purposes.
Mrs. A. M. Dauphin, of 1939 Ridge Ave., Philadelphia, is well known to the ladies of that city from the great good she has done by means of Lydia E. Pinkham's Vegetable Compound. She writes Mrs. Pinkham of a recent interesting case. "A young married lady came to me suffering with a severe case of Prolapsus and Ulceration. She commenced taking the Compound and in two months was *fully restored.* In proof of this she soon found herself in an interesting condition. Influenced by foolish friends she attempted to evade the responsibilities of maternity. After ten or twelve days she came to me again and she was indeed in a most alarming state and suffered terribly. I gave her a tablespoonful of the compound every hour for eight hours until she fell asleep, she awoke much relieved and evidently better. She continued taking the Compound, and in due season she became the mother of a fine healthy boy. But for the timely use of the medicine she believes her life would have been lost."

Health and Longevity a Natural Inheritance.
A sad phase of life is the large number of premature deaths constantly occurring. Health and longevity are our natural inheritance, but alas! too many squander the priceless heritage for a mess of potage. An observer may notice on every side a deplorable violation of Nature's inflexible laws. With many it is only the present moment that is considered, while to-morrow and its consequences remain unheeded. "He liveth long who liveth well," and to live out the allotted space of "three score years and ten" one must, indeed, live well, and walk circumspectly, carefully avoiding the many alluring by-paths of life that too late are found to be only short cuts to death and destruction. Pity the man, pity the woman that lead butterfly lives, thoughtless and heedless of future years, striving only for momentary enjoyments, unrestraining their appetites and their passions, ruining stomach, liver, kidneys, nerves and brain by improper foods and excessive indulgences. To all such the writer cries *Stop!* HOLD!! change your ways of living, restore strength to these important organs of life, become again perfect in mind and body, get yourselves again on the right road to health and longevity by using the only remedy that never fails to rebuild a broken-down constitution, known far and wide by the name of DR. GUYSOTT'S YELLOW DOCK AND SARSAPARILLA. Your druggist will get it for you. Take no substitute. It restored the writer to robust health and will save you!

$75 a month (salary or commission) to agents for THE WORLD'S WONDERS. Write for full particulars. Hist. Pub. Co., St. Louis, Mo.

Success for Boys.

The study of the lives of great men shows that certain principles enter into and control humanity in all those life undertakings which are worthy of youthful endeavor. Not luck but labor, not chance but a clerly defined and settled purpose, not day dreaming but will power, not impulsive effort but concentrated toil, not listlessness but perseverence, not fretfulness but patience, not selfishness but economy, not exaggeration but truthfulness, are some of the things which must be observed to worthily win any vocation. A successful man *thinks* about what he is going to do. The world call him "long headed," "deep," "shrewd," "a natural genius," and the like. He is simply thoughtful. He thinks out his plans before he executes them, just as an artist conceives his picture in his own mind before he paints it. A mathematician once said: "If I had a problem to work in two minutes, I would employ the first minute in thinking how to do it." Successful men exercise forethought. They plan, they deliberate, they study their business, master it, and then push it ahead with enthusiasm. They are energetic. They show practically that they have will power. They use their friends face their enemies, create opportunities, venture their fortunes, and hold fast. Having deliberately concluded that a thing ought to be done, they vow to accomplish it. General Grant voiced their sentiment when he said: "I'll fight it out on this line if it takes all summer." They concentrate all their powers in one endeavor. "This one thing I do," is their motto. They are workers. They have staying qualities, too. They are always there. They believe in the old adage that "a rolling stone gathers no moss." They are contented to be "one idea men." Though they advance but slowly they are satisfied to advance at all.—*Michigan Christian Advocate.*

Inauguration Balls.

It is said by statisticians that we now have nearly four millions of Methodists in the United States, and between two and a-half and three millions of Baptists—more than five millions in these two leading evangelical denominations. Presbyterians and Congregationalists, about two millions; and enough other Protestant denominations to make in all about ten millions of what we call evangelical Protestant communicants. Counting four adherents for every communicant would give a Protestant population of forty millions. All of these ten million Protestant Christians in all their ethical teachings are pronounced in teaching that the promiscuous dance, as now practiced, bears evident marks of its pagan origin; lecherous in its inception, and demoralizing in its tendency. The Roman Catholics claim a population of six millions. Whatever may be the practice of that Church, it is known to be a fact that the best element of that communion believe and teach that the promiscuous dance especially the "round dance," is fearfully demoralizing in its tendency, leading to lechery in thought and feeling, and prostitution in practice. Can forty-five millions of nominal Christians afford to have the Chief Magistrate of this nation inducted into office to preside over the destinies of fifty-five millions of American free men, amid the orgies of an "Inauguration Ball?" How does it look for myriads of Americans to hear the man whom they have called to the highest office in their gift, before taking the oath of office, declare in the face of the civilized world, that he needs and must have, as a condition of success in his office, the aid of the Almighty, and then in a few short hours, he and these spectators in the midst of the revels of a pagan-like dance? And shall these things pass without a protest?—*John B. Stevenson in Nashville Christian Adv.*

Pennsylvania leads all the other States in the amount of freight handled by railroad. During 1883 for every inhabitant of that State her roads carried 25 tons of freight. In the West the average is 7½ tons per inhabitant, and in the South only two tons. Pennsylvania's tonnage was more than one quarter of the total of the United States, or 105,000,000; New York comes second with 50,000,000; Ohio third, with 43,000,000; Illinois fourth, with 35,000,000. New Jersey is fifth and Indiana sixth. The Pennsylvania Railroad alone carried more than one third of the tonnage in Pennsylvania.

Kenward Philp has been awarded $5,000 in his libel suit against the New York *Tribune*. The libel was contained in the charge that Philp was the author of the notorious Morey letter.

For dyspepsia, or any stomach derangement, no other remedy can be found so pleasant, prompt, and effective, as Ayer's Cathartic Pills.

The Dime-Novel Cure.

Boston Herald.

A trustee of the Providence Public Library has undertaken to cure the small boy of his interest in the dime novel, and can be said to have succeeded. He has met the antecedent with its consequent. He has gathered into a scrapbook the adventures of the boys who read dime novels, and has made it his business in a quiet way to ask the boys one by one who are interested in these stories to spend an hour or two in reading, not the imaginative story, but the way in which the small boy has attempted to realize how boys ought live and what they ought to be allowed to do. It is said that the dime-novel boy usually reads the scrapbook, which is rapidly increasing in size as the fresh exploits of the dime novel adventurers are added to it, about two hours. He then lays it down in disgust, and nothing can induce him to return to those stories again. He asks the person in charge of the reading-room for a better class of books. This cure of a disease with its own poison has been so effective in Providence that the trustee in question is thinking of taking out a patent for the proces, lest other libraries and the heads of families and the guardians of the small boy generally may appropriate his invention without due credit. This gentleman is the first among moderns to give point to the old saying, "Look on this picture and then on that," and it is the other picture that is powerful enough to wind up the dime-novel business. These are the realism in literature, and this man, going further than Mr. Howells or Mr. James, or even M. Zola, has substituted the pastepot and scissors for the imagination, gathering his horrors and tragedies from actual life, in the firm belief that if truth is not stranger than fiction it has a wonderful power at the right moment over an awakened mind.

A Popular Medical Notion.

Among the modern medical whimsies is that of medication by pads. Some external applications are of use, and because they are, quacks find people ready to believe their assertions that their particular pad will perform wonderful cures. The circular of one of these pads shows it to be a reciprocating, back-action affair, as it both draws disease from the body and sends its curative influence into the system. Much of the belief in medication by pads rests upon the fact that a pad which is not medicated is of real service. Let one apply to any part of the body a piece of rubber cloth, or oiled-skin, or other water-proof and air-proof material and bind it in place. At the end of a few hours he will be surprised to find the material dripping wet, from the confining of the insensible perspiration. The surface thus covered will be in a soft parboiled condition, while any neuralgic or rheumatic pain that may have been located in the spot thus covered, will be likely to disappear. It is not necessary for a pad, in order to be useful, to contain "liver medicines" or even horseradish. Let those who are tempted to pay a high price for medicated pads, first see what virtue there is in an unmedicated piece of rubber or similar material.—*American Agriculturist for April.*

Permanently Cured.

Chicago Herald.

"Talk about a change of heart," said a long-haired and big-whiskered man at the Rock Island depot, last night, "I've just come from the biggest revival you ever saw." "Where was that?" asked a by-stander. "Why, out in Western Utah," the first speaker continued, "we had a Mormon settlement in Milliard county, and thought we were getting along mighty slight, when all of a sudden the United States Grand Jury fell on us like a snow-slide and clapped us all in jail. There was more'n a hundred of us, and when we come to talk the matter over we came to the conclusion that it was a good time to repent. So we held a revival right there in jail and sent for the preacher one of the Methodists, and I'm blamed if he didn't have us all enrolled inside of an hour. The District Attoaney paroled us just then, and as we filed out we ran into women. Do you see that welt over my ear? Well, that's where I caught the broom that my third wife dusted me with. The other fellows took to the mountains." "Will the conversion be permanent?" asked a listener. The stranger hitched up his trousers and taking a long breath observed: "As to the others, I don't know, but the jail and the broom cured me. I'm off for Jersey, and it will take the whole United States army to get me back."

The widow and children of the late President Barrios, of Guatemala, will reach San Francisco this week, and then, probably, a complete account will be obtained of the ambitious general's fall. Mrs. Barrios's parents live in San Francisco, and she will make that city her home. It is said that President Barrios settled upon her and her children a fortune in real estate valued at $8,000,000.

NEW ADVERTISEMENTS.

She Had Confidence.

Mrs. H. C. Harshbarger, Manor Hill, Huntingdon County, Pa., writes: "DR. S. B. HARTMAN & Co., Columbus, O.: I have been afflicted for three years, caused by over-work too soon after confinement. My kidneys became seriously affected; could not retain my urine day nor night. It was high colored, thick and bloody. My monthlies had left altogether for fourteen months, during which time I was confined to my bed with a beating in right ovaries. The discharge from the womb was so offensive no one could stay in the room. The urine continued bloody, with pain in voiding it, and when in bed would pass from me in my sleep. I have had three doctors attending me regularly, one for four months, one of the others one whole summer, and the third all winter. We had two others in consultation with them, and used twenty bottles of different kinds of patent medicines, all to no good. I then got a bottle of PERUNA, and before I had three-fourths of the bottle taken I quit wetting the bed and could retain the urine sufficient to attend church, which I had not done for three years, and my monthlies came back as natural as ever; indeed, I considered myself a well woman again. Since that time I have had pneumonia. My confidence in PERUNA was so great that I did not send for a doctor. I followed the directions in your "Ills of Life" and am over it, as well as can be expected of one so delicate as I have been. Others in my neighborhood had the same disease, and among these were strong men, and had the best physicians, and yet died, while I sailed through in safety on PERUNA and MANALIN. I sincerely believe, and would say to all the afflicted in the wide world, that PERUNA and MANALIN are the only two medicines that any one needs in any disease, if used as directed in your book entitled "The Ills of Life."

J. E. Fleming, publisher of the New Dominion, Morgantown, W.Va., writes: "Some months since, I received some of your medicine in exchange for advertising. My wife has taken five bottles of it, and has derived great benefit from it."

Mr. M. C. Pershing, Bradenville, Pa., writes: "My wife has been using PERUNA for some time for weak lungs and liver and kidney complaint, and thinks it is doing her great good. Has used only one bottle as yet. Please send your book on the 'Ills of Life,' as we can't get any from our druggist."

Mr. John Denny, Mt. Vernon, O., writes: "We have a large sale in PERUNA. It gives satisfaction."

Order of Publication.

Benjamin F. Harvey, Plaintiff, vs. Samuel W. Arenhalt, Administrator of Amos W. Arenhalt, deceased, and others.

No. 27 Equity. In the Orphans' Court for Garrett county.

The object of this Suit is to procure a decree for the sale of the real estate of Amos W. Arenhalt, late of Grant county, West Virginia, deceased, for the payment of the claims of his creditors.

The bill states that the said Amos W. Arenhalt was, in his lifetime, seized and possessed of valuable real estate in Garrett county.

That being so seized and possessed of said real estate, the same being less than $2500 in value, and having some personal property, he sometime in the month of January 1885, departed this life, intestate, and unmarried, leaving surviving him as his only heirs at law, the following brothers and sisters, viz: Samuel W. Arenhalt, Mary M. Arenhalt, who is intermarried with a certain David Moreland, David Arenhalt and Keziah F. Arenhalt, who resides in Grant county, West Virginia, Martha Ann Arenhalt, who is intermarried with a certain Thomas Crow, both of whom reside in Garrett county, Maryland; Job W. Arenhalt, Jacob L. Arenhalt, Rebecca V. Arenhalt, Isaac T. Arenhalt and Flora Arenhalt, who are infants under the age of twenty-one years, and reside in Grant county, West Virginia.

That the said Amos W. Arenhalt was in his lifetime indebted unto the plaintiff in the sum of five hundred dollars, and also to divers other persons in various amounts.

That Administration of the personal estate has been granted by the Orphans' Court for Garrett county, to Samuel W. Arenhalt.

That the said personal estate is insufficient to discharge all the just debts due and owing by said Amos W. Arenhalt at time of his death.

That the plaintiff and the other creditors are entitled to have the balance due on their claims paid out of the real estate.

The bill contains a prayer for a decree for the sale of said real estate and for Order of Publication, against the non-resident defendants.

It is therefore this 13th day of April, 1885, ordered by the Orphans' Court for Garrett county, in Equity, that the plaintiff, by causing a copy of this order to be inserted in some newspaper published in said Garrett county, once in each of four successive weeks before the 16th day of May next, give notice to the said absent defendants, Samuel W. Arenhalt, Mary M. Moreland, David Moreland, her husband, David Arenhalt, Keziah F. Arenhalt, Job M. Arenhalt, Jacob L. Arenhalt, Rebecca V. Arenhalt, Isaac T. Arehhalt and Flora Arenhalt, of the object and substance of this bill, warning them to appear in this Court in person or by solicitor, on or before the 13th day of October next, to show cause if any they have, why a decree ought not to be passed as prayed.

THE TRIED and TRUE REMEDY FOR CROUP, BURNS, CUTS, Bruises, Sores, Boils.

FOR SALE BY ALL DRUGGISTS

HALL'S VEGETABLE SICILIAN Hair Renewer.

Seldom does a popular remedy win such a strong hold upon the public confidence as has HALL'S HAIR RENEWER. The cases in which it has accomplished a complete restoration of color to the hair, and vigorous health to the scalp, are innumerable.

Old people like it for its wonderful power to restore to their whitening locks their original color and beauty. Middle-aged people like it because it prevents them from getting bald, keeps dandruff away, and makes the hair grow thick and strong. Young ladies like it as a dressing because it gives the hair a beautiful glossy lustre, and enables them to dress it in whatever form they wish. Thus it is the favorite of all, and it has become so simply because it disappoints no one.

MAGNETIC CURES. DR. HILL is the first man to discover the philosophical principle that all nervous pains, aches, and debility should be treated directly from the "brain battery," from whence emanate all nervous force and will power. All other forms of treatment for nervous disorders are failures. Every person who suffers from nervousness knows this, and that medicines only palliate, but never cure. These appliances are magnetic, and differ from all others on the market which are electric. Magnetism is the life of man. Their curative qualities are wonderful in all nervous complaints. The Roman physicians practiced magnetic treatment 1 000 years ago in nervous diseases, but did not treat from the "brain battery." Dr. HILL has made this great discovery, the only sure cure for nervous Headaches, Rheumatism, Neuralgia, Liver and Kidney Complaints, Paralysis, Gout, Spinal weakness, Dyspepsia, Constipation, Cold Limbs and Feet, and General Debility. Miraculous cures noted every day. The Magnetic Brush fills nails, and the only article of the kind invented. It is the greatest curative agent known and used in a "brush bath" imparts tone, replenishes the debilitated system, and creates warmth. In chronic cases our Magnetic Bands, Belts and Pads should be used. The brushes are warrented to do the work, or the money refunded. Send for circular and testimonials. By giving a description of nervous trouble we will give advice and directions how to use our appliances. HILL MEDICAL MAGNETIC APPLIANCE COMPANY, Lock Box 55, Washington, D. C.

PENSIONS For wound, disease or other disability. Widows, minor children and dependent parents entitled when death resulted. Claims reopened, restoration, increases, bounty, back pay and discharges obtained. Apply at once, delay prejudices your rights. Fees fixed by law. VOLUME 9. OAKLAND, MD., SATURDAY, MAY 9, 1885. NUMBER 11.

NEW ADVERTISEMENTS.

SPEER'S

PORTUGAL GRAPE WINE,

—Also—

UNFERMENTED GRAPE JUICE.

Used in the principal Churches for Communion. Excellent for Females, Weakly Persons and the aged.

ADOPTED IN HOSPITALS AS THE BEST

SPEER'S PORT GRAPE WINE!

FOUR YEARS OLD.

THIS CELEBRATED WINE is the pure juice of the dead ripe Oporto Grape, raised in Speer's vineyards. Its valuable,

TONIC AND STRENGTHENING PROPERTIES

are unsurpassed by any other Wine. Being produced under Mr. Speer's own personal supervision, its purity and genuiness, are guaranteed by the principal Hospitals and Boards of Health who have examined it. The youngest child may partake of it, and the weakest invalid use it to advantage. It is particularly beneficial to the aged and debilitated, and suited to the various ailments that affect the weaker sex. It is in every respect A WINE TO BE RELIED ON.

Speer's Unfermented Grape Juice,

Is the juice of the Oporto Grapes, preserved in its natural, fresh, sweet state as it runs from the press by fumigation, thereby destroying the exciter of fermentation. It is perfectly pure, free from spirits and will keep in any climate.

Speer's Burgundy.

It is a dark rich medium Dry Wine used by the wealthy classes as a Table or Dinner Wine, and by physicians in cases where a dry wine instead of a sweet port is desired.

Speer's (Socialite) Claret.

Is held in high estimation for its richness as a Dry Table Wine especially suited for dinner use.

Speer's P. J. Sherry.

Is a wine of Superior Character and partakes of the rich qualities of the grape from which it is made.

Speer's P. J. Brandy.

IS A PURE distillation from the grape, and stands unrivalled in this Country for medicinal purposes.

It has a peculiar flavor, similar to that of the grapes from which it is distilled.

See that the signature of ALFRED SPEER, Passaic, N. J. is over the cork of each bottle. Sold by A. G. STURGISS, and by druggists everywhere. Feb. 16'84 1y.

GOLD for the working class. Send 10 cents for postage, and we will mail you free, a royal valuable box of samples that will put you in the way of making more money in a few days than you thought possible at any business. Capital not required. We will start you. You can work all the time or in spare time only. The work is universally admired by both sexes, young and old. You can easily earn from 50 cents to $5 every evening. That all who want work may test the business, we make this unparalleled offer; to all who are not well satisfied we will send $1 to pay for the trouble of writing us. Full particulars, direction, etc., sent free. Fortunes will be made by those who give their time to the work. Great success absolutely sure. Don't delay. Start now. Address STINSON, & Co., Portland, Maine.

AGENTS wanted for The Lives of all the Presidents of the U. S. The largest, handsomest best book ever sold for less than twice our price. The fastest selling book in America. Immense profits to agents. All intelligent people want it. Any one can become a successful agent. Terms free. HALLETT Book Co., Portland, Maine.

NEW ADVERTISEMENTR.

To Dyspeptics.

The most common signs of Dyspepsia, or Indigestion, are an oppression at the stomach, nausea, flatulency, water-brash, heart-burn, vomiting, loss of appetite, and constipation. Dyspeptic patients suffer untold miseries, bodily and mental. They should stimulate the digestion, and secure regular daily action of the bowels, by the use of moderate doses of

Ayer's Pills.

After the bowels are regulated, one of these Pills, taken each day after dinner, is usually all that is required to complete the cure.

AYER'S PILLS are sugar-coated and purely vegetable—a pleasant, entirely safe, and reliable medicine for the cure of all disorders of the stomach and bowels. They are the best of all purgatives for family use.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists.

DR. JOHN BULL'S

Smith's Tonic Syrup

FOR THE CURE OF

FEVER and AGUE

Or CHILLS and FEVER,

AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain of cure, if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Generally this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.

BULL'S SARSAPARILLA is the old and reliable remedy for impurities of the blood and Scrofulous affections.

A WIFE'S INFLUENCE.

"So you don't want me to marry Louis, Aunt Sophie?" came from the trembling red lips. Georgia Arnold, the willful young beauty, was not in a mood to appreciate the wise counsel of her aunt.

"I do not want to give my consent to a union that would render you miserable, Georgia," replied the lady firmly, "and you—would—would be the wife of a drunkard?"

"He promised me that he would quit drinking," said Georgia, a little tearfully this time.

"How long since?"

"More than a month ago."

The lady was silent for a few moments then said, gravely:

"Georgia, I told you at first that a habit was confirmed with Louis Howe. He was sixteen years old when I first saw him intoxicated. He is now twenty-four."

"But he may have kept his promise Aunt Sophie."

"Don't delude yourself with that belief, Georgia; Louis Howe passed by here last night so deeply intoxicated that he could scarcely hold the reins. You need not look incredulous, child, it is true. If he was a man of high moral principle, I would hope that a wife's gentle influence might save him. But I think there is no human help for him."

A long pause, during which Georgia was endeavoring to restrain the tears that would come. After a while Miss Chester continued thoughtfully:

"I have known one instance when a wife's gentle influence saved a noble man from disgrace and a miserable death, perhaps. But he had only just began to quaff from the poisoned cup, and besides he was far superior in character to Louis Howe. You remember that you were remarking only the other day upon the happiness of your cousin, Ada Melbourne, and her husband. They were married while you were at boarding school."

Georgia looked in eager expectation.

"I will tell you of it all now. Not because I believe that any pure influence could actuate Louis, but because it happens to be *mycousin's* husband. Ada was always a strange girl—reserved, modest and gentle, yet very firm and decided sometimes. I was never tired watching her face—she lived with me then, you know. She was in all respects such a woman as was rarely to be found."

"One day she came to me and told me that one of her admirers had proposed."

"What was your answer, Ada?" I asked, "I rejected him decidedly, Aunt Sophie," she replied. "I would not marry a man who gave promise of filling a drunkard's grave.

"He drinks moderately," I said, just for the purpose of trying her.

"My husband must be totally abstemious," she said firmly.

"I rejoiced at her decision, and was still happier when she gave her promise to Charley Melbourne to be his wife. They were married, and, at the urgent request of both, I went to live with them in their new home. Their sky was cloudless for a time, but after a while I saw that Ada was looking sad and care worn. I did not question her about it, but waited until she should come to me—which she did before long.

"Oh, Aunt Sophie, I am so miserable!" she exclaimed. I soothed her tenderly, and after a while, when she had become calmer, she told me all. That her rejected suitor, from motive of revenge, probably, was endeavoring to draw Charley away from the home influence. "I have tried to warn him," she said, "but he is generous to a fault, and will not believe in the possibility of such an act of treachery. He went to the club last night with him, and was almost angry when I tried gently to remonstrate. Oh! what shall I do!"

Ada was almost dispairing then, and it was nearly beyond my power to encourage her. At length, however, she arose, understanding that she alone could save him, and determined to do everythiug in her power.

That night Charley did not come to tea. I knew that Ada anticipated a repetition of the last night's experience. I could not sleep, and for dreary hours I could hear her walking restlessly up and down in her room. Just at twelve Charley came home.

With a wisdom which few persons of more mature years seem to possess, she said nothing to him then. His voice floated into me somwhat huskily, and I feared the worst. An hour later my door opened softly and Ada came in and threw herself down on the side of the bed, murmuring sadly:

"Oh, Aunt Sophie, it is just as I feared; Charley has been drinking. He led him into temptation, and will never be satisfied until he leads him on to ruin. He came to the door with Charley. I saw him waiting outside, thinking, perhaps, to hear my reproaches and my grief. Like the Indian at the stake, however, I suppressed all."

"You have acted wisely, dear Ada!" I replied soothingly; "but don't despair yet. He has only just entered upon the downward path, and you can save him, if any earthly power can."

"I wish I could think so," she returned. "But if you had only known my anguish when he entered the room an hour ago. He has never tampered with intoxicating liquors, and a little has sufficed to overthrow him completely."

For a long time she mourned thus; then she recollected her determination of the day and arose in firm hope. Poor Ada! I could appreciate her agony.

Not one word of reproach to her husband came from Ada's lips the next day. With smiling face and cheerful words she greeted him on every occasion, and would have seemed the most sunny-hearted creature in the world to a casual observer. It was not a business day with him, therefore he had no occasion to leave home. I rose from the tea-table first, and, as I passed up the stairs, glanced into Ada's sitting room. Everything was arranged as only Ada's hand could have arranged it neatly and gracefully. I understood the tender care she had employed, and hoped that the loving wife would receive her reward.

They came up together a few moments later, and since my door was ajar I could hear every word. Ada opened her elegant melodeon and proposed music. Charley hesitated, and at length told her that he had promised him—the man of whom I have spoken—to meet him down There was a short pause. "Charley," Ada's voice was trembling—"I know well what he wants. Twice now has he led you into temptation. Will you blindly follow him again?"

"You are unjust to him," said Charley loftily.

"No, Charley, I am not unjust. But would my love for you be love, indeed, if I were silent when you are on the road to ruin?"

It was a hard struggle. Ada pleaded with all the earnestness of a true woman's love, and prevailed at length, for I heard him say:

"Ada, my noble wife, with heaven's help and yours, I will never go astray again."

There were sleepless eyes and happy hearts in Ada's home that night.

Months passed away, and Charley, awakened to a full sense of his danger, succeeded in withdrawing himself wholly from the subtle web that the tempter was weaving around him. One evening in December we three were gathered in the sitting-room. I sat in the lamp-light sewing, Charley in his luxurious arm-chair reading the dailies, and Ada stood by the window, absently gazing down into the street. Suddenly an exclamation of surprise and astonishment burst from her lips, and both of us arose and joined her. Passing, or rather staggering along the streets, under the full blaze of the gaslight, was Charles Melbourne's tempter, deeply intoxicated, looking the wreck of what he might once have been.

Charley looked down at him with pale face until he had passed from view, then placed his hand on Ada's head, and exclaimed with emotion:

"Ada, my noble wife, I owe my recovery from that threatened ruin to you."

"And that man, Aunt Sophie," asked Georgia, with interest, "who was he, and is he still living?"

"That man, my dear niece, is Louis Howe!"

"Oh, Aunt Sophie!" The blue eyes had a look of sudden fright; then her face flushed haughtily. "It is enough I know what answer to give him now."

The next morning, when Mr. Howe called to hear his final answer, he received a very decided "No."

If your blood is vitiated, cleanse it without delay by the use of Ayer's Sarsaparilla. Safe and effective.

A Postmaster Who Won't Go.

The postmaster of a burg about 25 miles from Detroit was in the city the other day in search of influence. He had been informed that his official head was in danger—not from the new administration, but from his fellow townsmen.

"I tell you," he exclaimed, as he wiped the sweat from his brow, "it's an awful strain on a feller's brain. We got our postoffice about twenty years ago. Our first postmaster was too high nosed to play checkers with the boys and we got up a petition and bounced him."

"For a better one?"

"Which was me. Yes, the hoss put me in, but after a year or two they began to growl. I wouldn't lick the stamps on for 'em any longer, and the first thing I knew old Davey had my place."

"Good man?"

"Tolerably; but the first thing he did settled his hash with us. Got his wife a new silk dress and had a doorbell put up. It took us two years to bounce him, but we got thar."

"And the next?"

"Wall, we gin the place to a woman, and she held it 5 years and died. Then we gin it to the storekeeper, and he held it till he busted. Then the boys rallied on me agin, and I've held it for several years."

"And they want to get you out?"

"They do. I've had six circus horses wintering on my farm, and it's made 'em all jealous. A lightning-rod man has also made my place his headquarters, and that's another reason they are down on me. Jist the minit a feller begins to climb up in the world they want his scalp. Soon's I heard they had a petition around to dust me and put in old Smith, my wife went out and washed the front windows, to show 'em that she didn't consider herself no duchess and I put on my old duds and sawed two cords of wood, but it didn't stop 'em. They might have got over the circus horses and the lightning-rod man, but I've been appointed State agent for a patent windmill painted in three colors. The galled jade can't forgive that."

"And what will you do?"

"Die in the harness. I've come slys old Smith was sent to State Prison, in Indiana, and I'm going to have about fifty influential citizens sign a certificate to the effect that if *my* services are dispensed with they can't guarantee the safety of this country fur more'n a week from date."—*Detroit Free Press.*

People talk with bated breath of the dangers of a tornado, and speak of the terrible accidents occuring in various sections, by which hundrdas of lives have been lost, and yet the same men stand listless, inactive, at the cry of sixty thousand men who are annually sacrificed by strong drink. It is well enough to dig cellars in which to hide from the fury of the storm, but who will deride the fathers and mothers who desire protection from the great scourge of intemperance sweeping broadcast through the earth, its hands red with murder, and its voice made up of curses? The man or woman who asks protection from such a moster iniquity should not be regarded as either a crank or a fanatic. There is no mistaking the fact, intemperance is the crime of the age.—*Inter-Ocean*

An Enterprising, Reliable House.

W. D. Nydegger can always be relied upon, not only to carry in stock the best of everything, but to secure the Agency for such articles as have well-known merit, and are popular with people, thereby sustaining the reputation of being always enterprising, and ever reliable. Having secured the Agency for the celebrated Dr. King's New Discovery for Consumption, will sell it on a positive guarantee. It will surely cure any and every affection of Throat, Lungs, and Chest, and to show our confidence, we invite you to call and get a Trial Bottle Free.

"What did you have to give for that bonnet, Mrs. Crimsonbeak?" asked Mrs. Yeast, while on their way to the matinee. "Twenty-two dollars!" replied the fashionable lady, proudly. "I don't mean the trimmings, dear. I mean the bonnet alone." "Oh; 16 cents!"

Ella Wheeler Wilcox, the poetess, says she goes to sleep "draped in soft, luxurious gloom." We go to sleep draped in a 65-cent nightshirt. Tastes differ.—*Drake's Magazine.*

OAKLAND, GARRETT CO., MD.

A COY COQUETTE.

Zeekel Moses, leab, me sah!
  Don't be crowdin' quite so clus;
Luff dat lamp alone, too, please, sah,
  Else dey's gwine to be a fuss.

Took dat han' from off my shoulder—
  P'raps ye tink I'm no count trash;
Ebery night ye git more bolder—
  Tink yer smart to be so brash.

What d'ye praise dat Calline foah?
  If dat gal's so mighty dear,
Leab dis kitchain! dar's de doah;
  Court dat Calline. What do I keer?

Course I keer—I—don't be leabin';
  But yer nuff to rile a saint!
Ain't yer shamed yo'self for bleabin'
  Calline's han'some when she hain't?

Please, now, don't git wuss'n ebber—
  Keep dar now—oh, well,
If yer 'tarmined—kiss me? Nebber!
  Stop dis instep or I'll yell!

Well, if you ain't tarned bashful!
  Pshaw! who'd hab a man wid skeers?
Dar, now, don't git ober rashful,
  Fo' de fack I'll box your ears.

Bless me! what's de use ob sistin'?
  'Cause yer boun' to hab yer way.
Not afore one week—now, listen—
  Say jess one week from dis day?

Marry now! and what's de harm in't?
  Zeekel Moses! why, fo' shame!
How I blush! Well, if yer 'tarmined,
  (Dat beats Calline jes de same.)

—*C. H. Turner, in N. Y. Mail and Express.*

THE HUMAN MOSQUITO.

A Creature Which Exists But to Torment.

How He Wounds and Tortures his Hapless Victims—The Different Varieties of the Species—A Possible Reason for his Existence.

He is ubiquitous; and, taking him morally, he has solved the problem of perpetual motion; for he is never quiet, never tranquil, and as for letting well or his fellow-creatures alone, he does that as little as he pays the national debt. Like his entomological prototype, the human mosquito has various methods of attack. Now he comes on you slily, without note of warning prefacing attack, and the first proof of his presence—a sting: now the shrill discordance of his challenge rouses you to attention and the vain attempt at defense and retaliation. For you can not defend yourself nor yet retaliate. The human mosquito is too subtle in his attack to be evaded, too quick in his retreat to be caught; and your hands only fight the air, when they do not fall, like boomerangs, with a sounding blow on your own pate.

The life's business of the human mosquito is to wound, and his mildest pleasure is to annoy. Woe to you, poor hapless wight, if, in a weak moment, you have allowed the tormentor to find out your sore places or discover the secret of the weak joint in your armor. Henceforth you may bid a lieu to peace for so long as this creature is within hail. He never lets drop a subject which he knows is painful; and when he has once been able to make you wince, he never wearies of repeating the experiment, your cheek burns, your eyes flash with ill-suppressed fury, if you are a man—with voiceless scorn or darkening tears, if you are a woman—such fun! He would not forego that pleasure for worlds, life, indeed, having no greater to bestow. Vivisection? Are there not men who would vivisect for the mere love of torturing, and the brutal curiosity of seeing the victim's behavior under pain? So in like manner does the human mosquito torment and torture you for the mere love of the sport; and to make you dance to his piping, shod in the red-hot shoes of the German fairy tale, is as exquisite a delight to him as were the cries of the racked heretic to Torquemada, as are the fluttering agonies of the wounded bird to the snake. Has your favorite son proved a failure, with passages in his history you would rather not remember, still less have remembered by others? The human mosquito never meets you without asking carefully after young Graceless—where is he—what is he doing—and has he paid his debts yet? and is that sentence of outlawry rescinded? and what a grief it must be to you that one who promised so well when he was a lad should have kicked over the traces to such an extent as he has done! Did your daughter run off with the penniless Lieutenant, and are you notoriously unreconciled to the marriage—hopeless as is your displeasure? The human mosquito takes every opportunity of speaking in your presence of the regiment to which your unwelcome son-in-law belongs; and though he can not tell you personally, does tell your neighbor in your hearing, where it is, what it is doing, and how this officer and that have distinguished themselves and been rewarded, your undesirable connection being conspicuously absent from the roll-call of merit. If your old aunt has died and left you nothing, while she favored your cousin and made him her heir, to your not unnatural disappointment, the human mosquito develops the most extraordinary interest in that cousin's doings, and either asks you of his well-being under his new honors, or gives you anecdotes of the splendor of his surroundings and the astounding luxury of his home—anecdotes which set your teeth on edge, hampered as you are in all your goings and comings. Or, if it be the other way, and you have been the favored and the rightful heir has been dispossessed, then does the tormentor regale you with harrowing accounts of the disgraced one's trials and penury, and the bitterness of his disappointment, which clings to him like a Nessus shirt, poisoning the very current of his blood.

Not to be successfully fought, not to be captured, not to be barred out, this tormentor of men's lives is as terrible as are those germs which float in the air and bring woe illimitable to all who breathe them. Your only chance with him is impenetrable reserve; wrapping yourself up in silence which nothing can cause to break into confidence or self-betrayal; showing a demeanor as stolid as a triple wall of brass; suffocating your feelings, your very thoughts as though they were crimes which would land you in the county jail if repeated aloud. This is your only chance—the sole kind of mosquito-net which will protect you. No appeal to reason will be successful; still less will have a chance of an appeal to feeling, humanity, gratitude. Of gratitude, indeed, he has no more knowledge than he has of the origin of life or the cause of crystallization; for ingratitude is his characteristic, as—with some kinds—insolence is the method. Like the brute which turns and rends the hand that has fed him, this kind of creature, this human mosquito, turns against you, when you have done all for him that he desired and when he has no more hope of your help. Then you learn the true quality of his nature, and find out for yourself of what base material it is made. It is only after repeated trials, however, that he is convinced of your finality in the way of help; for he is of the same *gens* as the daughter of the horseleech, and cries ever "Give! give!" When you have once allowed a man or woman of this kind to prove that you are puncturable, that you are so much nutriment for bold suckers, you are done for; and nothing short of a lawyer will free you from attacks which, made at first insidiously—may be with flatteries, mute appeals, humble representations, gentle prayers—grow by time and success into bold and burglarious assaults, accompanied with threats and enforced by moral bludgeons. Then you must address yourself to the law, which is to the human mosquito of determined attack what petroleum is said to be to his winged prototype, the only effectual defense known. To do good to a man or woman of this kind is to illustrate the truth of the hard old Cornish saying: "Save a man from the sea, and he becomes your enemy." To sow golden grain on the barren fields of such a one is to reap sorrow for yourself; and to give your coat is but the preface to the demand for your cloak. Your inch ever becomes his ell; and when you do not concede all that is demanded, then are you stung, as a kind of waymark between what you have done and what you have not.

At home the human mosquito is restless and exacting. He interferes in everything afloat, and always adds a drop of bitterness to such honey as the family may have garnered in its hive. Is there a fete-day on hand? He takes out the sweetness, rubs off the gloss, by restrictions if he be in the place of command; by temper if he be a subordinate who can only damage and not destroy. As the former, he harrasses his wife by finding fault with her arrangements, substituting his own; he annoys the servants by contradictory commands; irritates the governess by doubting her capacity for taking care of her charge; and causes the children to weep or to sulk, according to their natures, by scolding them impartially all round, with reason or without. Then, when he has made every one thoroughly miserable or uncomfortable, and more inclined to perform penance than to undertake pleasure, he puts on a hilarious manner, and, when this is not responded to, rates the wretched little flock for their gloominess on a holiday, and says, if this is to be the manner in which they thank him for the treat he has given them, he will take good care how he allows them to have another.

As a subordinate, he is just as worryservant whose functions are vital to the thing on hand—say the cook on the day of a dinner-party—the human mosquito makes every one suffer. For just as "England's extremity is Ireland's opportunity," so is the day of social consideration in the household that wherein the cook, who is also a mosquito, is most troublesome and most annoying. To believe her, there will not be a dish fit to eat, and there is not enough of anything. Something has gone wrong with the stock for soup; the fishmonger has skimped the weight, which was already too closely calculated; and the butcher has not sent the proper joint for the roast; the chickens are skinny and the "birds" are tough: the cream is deficient and the milk is turned; and the vegetables are not fresh nor is the fruit ripe. Perhaps she shams the sullenness of despair, and will not give an answer, or one only of pessimistic forebodings, when her mistress tries to put the best face on the matter; or she may assume a falsely heartsome air, and, after she has plunged her poor lady into the depths of despair and nervous apprehension, says she will do what she can to remedy the long tale of disasters recounted, but the dinner will not be up to the mark, let her do the best she can. It all depends on the proportion of her cruelty to her love of annoying, whether she sends up a dinner really damaged, or one in her best style and perfect throughout. In either case she has had her pleasure—in serious hurt or in simple teasing.

We need not go through the whole list of domestic mosquitoes. From the lady's-maid who pulls her mistress' hair when brushing it, and lets her go to a state ball with a string unfastened and a tape showing below her train, to the page-boy who breaks in a month, the worth of his year's wages, they all make their service the cause of annoyance to their employers; and some add to annoyance, graver disaster. But what can you do with them? Accidents will happen, you know, and an unfortunate servant is not necessarily a bad person. Your page-boy, for instance, is smart in taking messages, and quick to learn the niceties of his office; he is clean in his person and respectful in his manners. How can you say that his unlucky fingers are the result of malice prepense? and it is not worth while to keep him on, you hoping that he will learn more deftness in handling china and glass—his past clumsiness condoned by his future improvement? Just so; and yet we may be very certain of one thing—once a mosquito, always a mosquito; once the love of annoying or hurting gets hold of the moral system, and there it stays rooted, like couch-grass, or that Australian enemy the thorn-grass, a source of damage to everything that lives near it.

As a child, the human mosquito is the "limb" of the nursery, according to the vernacular of the nurse. As a boy, he is the bully over his little brothers and the incarnate plague of his sisters. As a man, he is the tyrant and tormentor of his household. If he runs to gishness, he makes his children's a burden to them because of fract and declensions; if he is an athlete, maybe ruins them for all time by brutal vigor of his training; if he is effeminate, he interferes with the maid, takes the reins of domestic government out of his wife's hands, orders the dinners, and looks after the children like an Indian bearer or a supernumerary nurse. He is at all times the mosquito of the establishment, buzzing here, stinging there, creating fever and irritation everywhere; making one wonder for what purpose such as he are sent into the world at all, and what good end they subserve. In politics, the restless obstructive and the pert querist, the oppositionist for the sake of opposition, and insolent to the extremest point, he keeps things alive in the sense in which a fire of thorns can make the water boil. But suppose you want the water to be cool and fresh and still, what good then does your crackling fire of thorns? Is it not a hindrance rather than a help? and a bane instead of a blessing?

No! view him how we may, we are forced back to the same position—the human mosquito is a mistake in anthropology, and in no sense a creature to be preserved for its uses in the general economy. When we shall have mended all the moral fractures and put society straight and square, then will there be no room for the human mosquito; and the force expressed in his ugly energies now, will have merged into nobler and better forms. Meanwhile, seeing that fighting is useless and all defence-work illusory, we must bear him with what patience we can command—no other moral catholicon having yet been discovered able to heal the hurts made by the creature in its attacks. And perhaps—who knows?—patience being in itself one of the sweeter virtues—it is in the teaching and the exercise of this to his fellow-men that the human mosquito has his *raison d'etre.*—*Chambers' Journal.*

GENERAL GRANT.

His Connection With the Wall Street Affair Not Generally Understood.

There has always been a matter of wonder that so intimate a friend of General Grant's as Anthony J. Drexel, the keen and wealthy banker, of this city, did not steer him away from the whirlpool of Wall Street. As a matter of fact the General thought that he was simply a special partner to the extent of $50,000 with Ward, and that the operation was an ordinary business one, and he did not discuss it with Mr. Drexel. There are a good many things indeed about this Wall Street horror that are not generally known. To a friend who warned the General that Ward's scheme was visionary, and that no business could yield such profits as were promised, Grant repeated that in any event he was liable only to the extent of $50,000, and added. "There are able and experienced business men who are engaged with Ward. They would not be likely to take part in any foolish scheme. Ward has a smelting machine in Colorado, too, that yields very large profits." The General, at Ward's suggestion, put some capital in the Colorado enterprise. Accounts were presented monthly and subdid not knowanything about this particular machine, but he knew that there were a few concerns of a similar sort in Colorado reputed to be making money, and the accounts presented by Ward were cheering. General Grant, however, withdrew his capital from the smelting enterprise and put it with the rest into the Wall Street business. Long afterwards a relative of Ward called on him and said: "General, I want to tell you that Ward is a rascal. He never had a smelting-machine of any kind in Colorado. His representation that he had was fraud, and the monthly accounts that he submitted to you were all cooked up."

The hold that Ward got upon General Grant was so absolute as to seem almost incredible. He robbed not only the General but the General's family and relatives as well. For example, here are some facts and figures that have never before been made public: The house on Sixty-sixth Street in New York that was bought for General Grant chiefly by gentlemen of Philadelphia was valued at $75,000. It was ascertained that there was a mortgage upon it for $45,000. The mortgage for some reason could not be removed at once, and a check for the amount was placed in the General's hands. Ward by skillful maneuvering soon managed to get hold of the check. Before the failure General Grant made over to his wife a quarter of the $10,000 which he derives, after certain payments, from the trust fund of $250,000 raised for his benefit Ward got that, too. He also succeeded in getting $12,000 that Nellie Grant had saved up from her pin-money; $25,000 from Mrs. Honore, of Chicago, Fred Grant's mother-in-law; $6,000 of the savings of Mrs. Honore's daughter Ida, Fred's wife; and $25,000 from Mrs. Kraemer, the General's sister, besides the thousands that he got from General Grant, Buck, and the rest of his victims. When the crash came the Grants had been so completely bled that they had less than $100 in cash among them.—*Philadelphia Cor. Chicago Tribune.*

—A correspondent sends the following account of a mistake made by a little girl in his vicinity. She always joins the family in reading the Scriptures during the family devotions, taking her verse in turn. She easily reads the shorter words, but needs some help on the longer, but is always eager to pronounce all the words herself and sometimes guesses. Recently it came her turn to read the verse: "No man can serve two masters, for either he will hate the one and love the other, or else he will hold to the one and despise the other. Ye cannot serve God and Mammon." She made a slight variation at the end and finished the verse: "Ye cannot serve God and women."—*Chicago Tribune.*

—There is not an acknowledged sinner on Block Island, the quaint ocean resort off the Rhode Island shore. All the inhabitants claim to have been converted in one winter revival some years ago.—*N. Y. Sun.*

I.

"Give me your hand, sweet maid," he cried,
"And I will help you o'er the tide!"

Infantile Relic Hunters.

Scientists and their imitators have suggested that the young of any species betray during their process of development the instincts and habits of their prehistoric progenitors. Apply this theory to the small boy, and it becomes plain that one of man's earlier states was that of the bower bird. Restless, inquisitive, and acquisitive, the bower bird collects every brightly colored or odly shaped object it can find, and with this plunder decorates its bower. So the small boy at the bower bird period wanders up and down the face of the earth after bird's eggs, stamps, coins, postmarks, newspaper headings, autographs, monograms, buttons, advertising cards, and seals.—*Boston Advertiser.*

Imposing Upon the Poor.

"It all comes o' bein' poor," said an old lady, trembling with indignation, to her sick husband. "I jist stepped in a minit at the Riches to tell 'em as how you wasn't gittin' any better, and Mrs. Rich sed she was sorry, and wanted me to bring you a bottle of wine."

"Did you bring it?" asked the sick man eagerly.

"No; I heard her say it had been layin' down in the cellar ever since 1855, an' when she offered it to me I jist walked off without saying a word."—*N. Y. Sun.*

II.

Ah! lackaday! what joys supreme
Went down with George into that stream!

The Festive Cat.

The cat sings on the fence.
The cat is sad.
You can tell that from the song it sings.
Cats sing most when they are most sad.
The boy hears the cat, and is sad too.
The boy has a toy gun.
He thinks if he could shoot the cat it would make it less sad.
Kind boy!
At least, it would make it sing less.
The boy hides behind the bush and shoots.
Has he shot the cat?
No, he has shot his pa.
How his pa howls!
He is the sad one now.
But the boy will be sad soon.
Will he be spanked?
You can bet your uttermost picayune he will—spanked till he is blue.—*Minneapolis Tribune.*

An Easy Situation.

Minks—"You seem to have plenty of time on your hands just now."

Winks—"Yes; I hardly know what to do with myself."

"But heretofore you have been head over ears in business. Have you retired?"

"No; I've got a new job."

"Indeed! What?"

"I have become the husband of an actress."—*Philadelphia Call.*

III.

For when he rose, Miss Clare De Mer
Said, no more poodles now for her,
And laughed in such immoderate way
That George ne'er stopped to say good-day.

AN Alabama editor winds up an editorial on the corn crop with the remark: "We have on exhibition in our sanctum a couple of magnificent ears." 8

TEMPERANCE.

DREAM OF THE RUMSELLER.

The rumseller slept on his downy couch,
And dreamed a vision rare:
He saw by his pillow a horrible spook,
With snakes for the locks of his hair.

"Dear friend," said the spook, with amiable grin,
"I have called to present you my hand;
You'll perceive, by my courtly high bearing, no doubt,
I'm Beelzebub, king of the damned!

"I regard you, dear child, as a faithful soul,
And worthy my love and esteem;
I honor your courage and your elegant pluck,
So much like my courtiers you seem.

"I rejoice at the widows' and orphans' tears,
I hate all the good and the pure,
And you, dear friend, will make many orphans, I ween,
And hundreds of widows, I'm sure.

"I honor your zeal, my valuable friend,
You're worthy your brothers below;
I suppose you're aware they're expecting you soon,
You'll not disappoint them, I know!

"Go on! I approve of your selling the stuff;
It fills up the caverns of death,
And many priceless souls that were spotless and pure
Are mine by its poisonous breath."

The spook's snaky locks quite hissed with delight,
And he rattled his spiritual bones,
While he opened his cavernous mouth of a beast,
And thundered in demoniac tones.

The rumseller awoke with horrors untold,
He uttered a terrible scream,
Convinced that King Beelzebub wasn't a joke,
He pondered his wonderful dream.

He knocked in the heads of his barrels of rum,
He emptied his bottles of gin,
He smashed his decanters of brandy and rum,
And swore: "A new life I'll begin."

Take warning, rumsellers, cease from your gains;
Old Nick, as you see by this dream,
Has an ardent desire for your priceless souls;
Stop, stop selling the fiery stream.

—*John Newell, in Watchman.*

TEMPERANCE INSTRUCTIONS.

The Success Which Has Already Attended the Efforts in This Direction.

Much has already been accomplished in this direction. Every one of the admirable Normal schools of the State of New York is obliged to make a specialty of drilling the teachers in hygienic physiology with special reference to the effects of alcoholic stimulants and narcotics. The same is true of Michigan, Vermont, New Hampshire and Rhode Island. Every child in those States must be equally instructed in this branch of study. This area comprises one-seventh of all the school children in the Nation, and these laws have been secured in two years of effort by the Woman's Christian Temperance Union. Since I began this article Missouri's Legislature has adopted the same law, and Massachusetts and Pennsylvania are almost sure to follow before their sessions close. Nor is there a State or a Territory in the Nation wherein we are not making strenuous efforts to secure a similar law. Mrs. Mary H. Hunt, of Boston, is at the head of this department, and has a genius worthy of a Major-General for strategic points and skillful combinations. In each State and Territory she has an official coadjutor, who in turn has one in each local W. C. T. U., so that ten thousand lines radiate from the headquarters of our national society to as many towns where our local members are at work. But we do not by any means wait for a law to be adopted. We constantly petition local educational boards and individual teachers to use their influence for hygienic teaching. There are thousands of schools today where our new and complete series of text-books has been regularly introduced, and thousands more in which earnest teachers find opportunity, by oral and reading lessons, subjects for essay, declamation and debate, to lay the foundation for more systematic work. We induce persons of wealth to offer prizes for the best essay on the evil effects of intoxicants—twenty-two thousand children having been thus reached in San Francisco, Cal., and tens of thousands in other States. Prizes are also given to teachers in Normal schools for similar essays, and reference libraries are furnished to such schools. We have devised text-book covers on which total abstinence arguments are printed, and which many of our unions furnish free to the schools of their own towns. The Teachers' Conventions in many States and counties have adopted resolutions declaring their adhesion to this movement, and last summer the National Educational Association at Madison, Wis., gave an emphatic utterance to the same purpose. President Bickhell in his address said: "Two persons stand at the threshold to protect the incoming generation from becoming an easy prey to the devourer of health, happiness and Heaven. The natural protectors of our youth are the parents and the teacher, as home and school are the citadels for their defense. Formation, not reformation, is now the educational watchword which woman has proclaimed as the signal to be sent to all of her allies in the world, and the two words, Woman and Temperance, each the symbol of the good and the true, shall be for ever united."

Talking with teachers on this subject of Scientific Temperance Teaching, I have found their sympathy almost universal, but they have often said: "We are already so overcrowded with duties that the practical difficulty is, how can we add this to our cares or find time for the children to take up another branch?" It seems to me that the Superintendent of Schools in a leading city of Massachusetts made a conclusive reply to this objection when he said recently, in reply to the President of the W. C. T. U.: "This subject ought to be taught. If the schedule is too much crowded already we will take something out and make room for this, because it is entitled to the right of way."

I believe this systematic instruction, which both forewarns and forearms them, to be the road out of bondage for the children of America. No other institution of the Republic reaches them all. Powerful as are the forces of pulpit and press, the former does not attract all ears, and the latter is largely influenced by the saloon in finance and the saloon in politics. But to the schoolhouse door come white and black, native and foreign-born; inside its walls are invested their formative years, and the laws of their being, as set forth by science, must appeal to their self-love, an attribute upon which we may always confidently base our calculations. The German, who learns that the laws of nature take sides with total abstinence, will gradually cease the cry of "fanaticism." His boy comes home from school and tells him that in times of pestilence and sunstroke the beer-drinkers pay forfeit and the total abstainers get off scott free; that these last are at a premium with the life insurance companies; that they win in the athletic games; that they are the successful explorers and victorious soldiers, and that chemistry, physiology and hygiene prove that they must always be so. Mein Herr scoffed at the crusading women, but the dignity of science will do much to silence him, and it will convince his children. I beseech you, then, as the truest guardians of the State and the most intelligent and helpful friends of the child in our midst, who is also in the market-place, and who is sure to be auctioned off to the forces that bid highest for them, stand by the mothers of the Nation in their brave and tender, loving labors to save

The little soldiers, newly mustered in
To the army of temptation and of sin.

—*From "Timely Talks," by Miss Frances E. Willard.*

A TIMELY WARNING.

Convincing Evidence That Liquor-Drinking Is a Powerfully Predisposing Cause of Cholera Where That Epidemic is Prevalent—Comparative Safety of Temperate People.

In view of the dreaded approach of the cholera scourge to our shores perhaps the following evidence on the manner in which the use of spirits predisposes the person using them to the attacks of the dread disease may prove a warning to even the so-called moderate drinkers.

The *Messenger des Chambres* gives the following extract from a letter of a Warsaw physician: "It is a positive fact that the cholera does not seize on its victims at hazard, as many say. This contagion up to the present period has respected all persons who lead a regular life and live in healthy places, and has struck without pity every man worn out by excess and weakened by dissipation. It has been ascertained that out of every hundred individuals who die of this disease ninety are in the habit of drinking ardent spirits to excess. Women rarely addict themselves to strong liquors, and, accordingly, few of them are attacked by the cholera."

Prof. Mackintosh, of Edinburgh, who ranks high in the medical profession, and who was physician to an extensive cholera hospital, states that drunkards were the persons generally attacked. In contrasting the causes predisposing to cholera he also remarks: "And above all, the dissipated, particularly those addicted to the habitual use of ardent spirits. It has been computed that five-sixths of all who have fallen by this disease in England were taken from the ranks of the intemperate and dissolute."

Dr. Bronson, of Montreal, says: The habitual use of ardent spirits, in the smallest quantity, seldom fails to invite the cholera, and to render it incurable when it takes place.

Dr. Rhinelander, who visited Montreal during the prevalence of cholera there, in the summer of 1832, says: That the victims of the disease are intemperate. In that city, after there had been 1,200 cases of the malady, a Montreal journal states: "that not a drunkard who had been attacked has recovered, and almost all the victims have at least been moderate drinkers."

Dr. Sewell, who visited the cholera hospitals of New York, states that of 204 cases in the Park Hospital there were only six temperate persons, and that these had recovered; while 122 of the others had died when he wrote, and that the facts were similar in all the other hospitals.

Mr. Huber, who saw 2,160 perish in twenty-one days, in one town of Russia, says: It is a most remarkable circumstance that persons given to drink have been swept away like flies. In Tiflis, containing 20,000 inhabitants, every drunkard has fallen; all are dead, not one remaining.

Dr. Adams, of Dublin, affirms: Our foreign reports testify that drunkards are carried off at once by this dire disease; but those who, by daily use, debilitate the tone of their stomachs and biliary organs, become easy victims to the cholera.

G. Hamilton Bell, F. R. C. S. E., in his publication on cholera, says: Above all, intoxication and dissipated habits have been found, whenever the disease prevailed, powerfully to predispose to cholera.

George K. Paterson, surgeon, Dundee, says: There can not be a doubt held for a moment on the subject, that low and intemperate habits are strong inducements in favor of the disease at any time, but far more to an epidemic that is prevalent. For example: in Dundee, more individuals, on an average, have been attacked in the beginning of the week, and this has been ascribed, with much apparent truth, to the drinking habits and irregular modes of living of such on the previous Saturday night.

Dr. Mussey, U. S., says: Upon boats on the river the increase of brandy drinking, consequent upon the approach of the cholera, has been frightful, and the mortality on board of those vessels has been terrible and unprecedented. One boat lost 43, another 47, and a third 59 of its passengers and crew. Brandy is not a prophylactic in any case. To the temperate it is an active-exciting cause. To the drinker it is not advisable to drop off the use suddenly; but the quantity should be diminished rather than increased. In 1832, in Albany, where 336 cases of cholera occurred in a community of 26,000 inhabitants, one-third of whom were members of the Temperance societies, only two of the members died. Last winter this dreadful scourge was raging in New Orleans, the papers of that place disclose the same fact. Among the hundreds that were swept off by the disease only two were Sons of Temperance, and among the 1,200 in the city, only three were attacked.—*Irish World.*

A MAN lowers himself, even if he does get "high" on whisky.—*Whitehall Times.*

SCHOOL AND CHURCH.

—The colored Baptists of Kentucky have 45,000 communicants, and a college with over 200 students.

—It is said that three-fourths of the Bibles shipped from New York to foreign mission stations go to Mexico and South America.

—Massachusetts stands at the head of the Congregationalists in the United States as to numbers, having 532 churches, with 90,350 members and 941 ministers.—*Boston Post.*

—The American Missionary Association has at the New Orleans Exposition a fine display of work done by Indian children and others in the various fields of labor.

—The will of Guy Little, of Bismarck, D. T., recently probated, leaves $50,000 in trust for the benefit of Pembroke Academy, at Pembroke, N. H., subject to the life interest of the widow.

—The attendance on the public schools of England is shown by a recent report to have risen within a few years from 2,000,000 to 5,000,000. As a result juvenile crime has considerably diminished.

—Baptists of the South have, since last May, sent into the foreign mission field twenty-one missionaries. It is estimated that it will take $16,000 each month to meet the demand of the foreign field.

—A New England preacher says that the Chinese students who have returned to this country after a two years' absence in China have great difficulty in remembering the English language, which they were supposed to have learned so well.

—Miss Black, who recently started for China under the auspices of the Woman's Missionary Association of the English Presbyterian Church, is the fifth daughter that has gone out from one manse to the foreign field.—*N. Y. Sun.*

—Children of school age must be remarkably scarce in some sections of New Hampshire, judging from the following taken from a Boston paper: In Warner there is one school district which contains but one pupil, four districts have but two pupils each, and two have only six between them.

—The California millionaires appear to be doing their best to build up the educational and artistic interests of the coast. The latest benefactor is Mrs. E. B. Crocker, who proposes to deed her art gallery to San Francisco, provided the people raise one hundred thousand dollars to maintain the collection.—*Current.*

—Over-reading as well as over-study is one of the evils of modern education. The evil has been commented on by educators for many years past, but the multiplicity of books and their growing cheapness stand in the way of any permanent remedy. Of course it goes without saying that reading in itself is not only harmless, but most beneficial. But children too often read so much that they fail to assimilate what they read, and thus the exercise is a dead loss. Much fun has been made of "the man of one book;" but he possessed at least the virtue of knowing one book thoroughly—a virtue which many modern readers do not possess. If school children were taught to read less and think more, it would be a gain all around.—*N. Y. Tribune.*

CRACK STEPPERS.

A Mild Species of Insanity With Which Old and Young Are Often Afflicted.

"See that man over there?" exclaimed a gentleman to a reporter yesterday, pointing to an old man who was walking down Chestnut Street in front of Independence Hall; the old fellow had his head bent and seemed in deep thought. "That's a crack stepper."

"A crack stepper!"

"H'm; you watch him and see how he walks. He won't step on a single crack between the flag-stones, no matter how it inconveniences him. There are a quantity of men who are in the habit of stepping over the cracks in flagstone pavements; it's a mild form of insanity; I do it myself occasionally."

"So do I."

"Do you? Well, most city men do. Children play games in this way and men keep it up all their lives. Sometimes they vary it by stepping on all the cracks and taking particular care not to miss one. There goes another."

In the course of a half-hour no less than fourteen men were observed going up and down this pavement stepping over the cracks. Of fifteen men taken at random, twelve acknowledged that they occasionally practiced this peculiar habit. They said they didn't know why they did it, and sometimes did it unconsciously, but the interesting fact remains that about seventy-five per cent. of city men are crack steppers.—*Philadelphia Times.*

PRACTICAL.

The Editor Who Didn't Appreciate a Witticism.

A fat old man who should have known better dragged himself up three long flights of stairs and entered an editorial room.

"Whew! Coming up these stairs makes me blow," he said.

"Yes," the editor replied. "What can I do for you?"

The old fellow laughed as he took a small piece of paper from a tin spectacle case. "Here's something that I jotted down," he said. "You needn't put my—" laughed heartily—"my name to it."

The editor took the scrap of paper and read the following:

"'If a war should occur between England and Russia it would be a Wall Street affair—between the Bull and the Bear.'

"Wall Street will have nothing to do with it," said the editor.

"O, don't you see? It is a pun that I made up myself."

"No, I don't see. It appears to read all right, though if there were really anything of it the telegraph would have——"

"Hand it here!" The old fellow snatched his contribution and lugged himself down stairs.—*Arkansaw Traveler.*

PRETTY FEET.

Very Small Extremities to a Large Extent a Female Hallucination.

A woman with a disproportionately large foot is by common consent entitled to pity. But it is not the size of the foot which good taste objects to, but its relation to the rest of the body. A large woman with the tiny foot of a girl would be as disproportionate as the small woman with a large foot. What is known in the market as the No. 1 boot can not by any means be made to go upon the foot of any woman whose physical proportions bear any comparison with those of the Venus de Medici, which is the representation of a large and voluptuous woman. Women who wear the No. 1 boot do not, as a rule, come under the head of voluptuous women. They are petite, vivacious, pert, pretty, anything you like, but they are not the Medician type. Large women, said a well-known artist and expert, must have feet that to be beautiful would be very ugly on a smaller woman.

It is to a much larger extent, perhaps, a female curse, for those women who dare not undergo its miseries grow sooner or later to believe that they do, and fire can not burn out of them the conviction that their shoes are No. 1. Nobody but the woman herself knows what tortures are undergone by the slave with a No. 2 foot who is chained to a No. 1 shoe. Professional women who exhibit their feet are, of course, more subject to this tyranny of the shoe than other women, and it may not be generally known that there are emotional and tragic actresses who, when all other means of simulating agony and awakening pity fail, rush to the No. 1 boot. They put that on, and a sad, far-away look of unutterable despair comes into their eyes, neuralgic shadows play about their mouths, their chins quiver with unexpressed grief, their temples throb with indescribable woe. Then the spectators are moved. The fountains of human sympathy are opened, and the critics call it soul-agony, and that touch of nature that makes the whole world kin. Seen from the front the No. 1 boot on these occasions is apparently sweet and guileless.

No one could possibly suspect it of pains that would make an inquisitor sick. For the wearer does not let the boot take the credit of her tears when they can be imputed to soul and heart and other things than feet. But could we see the same feet as they really are, in all their flat, stale and unprofitable naturalness, we should begin to understand how infamously mistaken that wretch was who said that nature unadorned is adorned the most.

And here it is worth while to remark, en passant, that the ballet dancer's foot, contrary to the popular notion, is not and can not be a small one. The development consequent upon continuous physical exercise settles the conventional idea of comeliness. A ballet dancer never wears a tight boot, and when she is dancing she wears shoes which are models of adaptability and freedom. But nevertheless the muscles and tendons of the foot are enlarged, the veins stand out, and there is a general appearance of strength rather than of beauty. All this may be obnoxious to the fastidious taste of the Greek sculptor, but there is really nothing repugnant to good sense in it. By the side of the ordinary society foot, when bared to the light, the ballet dancer's is a thing of beauty. There is not one society belle in ten that dares to bathe at the seaside without hose on. Do you know why? Ask the No. 1 boot.

To find the classic foot in these degenerate days we shall have to look a long way. The peculiarity of the classic foot is the wide gap between the large toe and its neighbor. This in the Greek was undoubtedly caused by the thong of the sandal that came up between the toes and kept them apart. Mr. Sarony, in determining the fine point of a model's foot, is said to have doubled up a ten-dollar bill compactly and inserted it between the toes with the jocose remark that if it fell out it was the model's. And his experience is that it generally stays there until it is pulled. The American women as a rule have smaller feet than the English women. But this is not altogether a matter of temperature. Habit in a large measure determines the size of the feet, as it will of the arms, and the English women use their feet far more than do the Americans.

The Spanish women are celebrated for their high insteps, which for a long time was held to be a sign of good blood and fine breeding. But that notion has been exploded of late years by the investigations of Darwin and others, who find that the osseous formation of the foot follows certain unknown congenial laws which make it possible for the peasant's daughter to have a Cinderella foot while the princess of the blood may be born with large and ungainly feet.—*N. Y. World.*

Turkish Proverbs About Women.

The references to woman are as ungallant as they are unjust. She is to be treated as a child, and as such contemptuously pardoned for her shortcomings. "You should lecture neither child nor woman;" it would be waste of time. Her intelligence, too, is underrated, "Her hair is long, her wits short!" It is she who as a mother "makes the house and mars it," and she is classed with good wine as "a sweet poison." But it must be admitted that in this want of gallantry the Turk is far surpassed by the Persian, who says "The dog is faithful, woman never."

The lover is regarded as a lunatic, unfit for the society of his fellows. "If you are in love fly to the mountains," for "Lover and king brook no companion." He is "blind" and distance is nothing to him; for him "Bagdad is not far," and the only cures for his malady are "travel and patience."

A word of advice to those about to marry: "Marry below you, but do not marry your daughter above you;" and "Choose cloth by its edge and a wife by her mother."—*London Spectator.*

—Crawford, Ga., boasts of a negro who can neither read, write nor figure, yet who can correctly multiply any two figures up to one hundred as rapidly as they can be given out to him.

CROCODILES WITH EAR-RINGS.

Some Interesting Passages from Early Egyptian History.

The greatest edifice which Amenemha III. built was the Labyrinth, consisting of a number of small chambers communicating with one another, and of which this monarch appears to have built the greatest portion during his reign, leaving to his successor the completion of the edifice. The object of this singular edifice was stated to be for the reception of the prince and other dignitaries of the country. It preceded by centuries the celebrated one of Lassus in Crete, in which King Minos kept the monster called the Minotaur, half man half bull. This Cretan work consisted of a series of meandering passages, in which the intruder, who had not the requisite clue, lost himself and fell a victim to the monster who dwelt within. Probably some reason of suspicion and security caused the construction of this singular building, which, with the pyramids and obelisks, was another marvel of Old Egypt. In Egyptian the Labyrinth was called Mera, and had the same name as the lake. The same word was also applied to streets, which probably in Egypt originally did not run in straight lines as at present, but followed a tortuous or meandering course. The Pyramids, for there were two on the borders of the lake, are supposed to have had colossal statues of the kings at their summits. In the time of Herodotus, who visited Egypt in the reign of Darius, or about B. C. 455, the Lake Moeris, its Pyramids and its Labyrinth, were still existing, although they are now an almost indistinguishable mass of ruins. The Labyrinth greatly astonished the ancient Greek traveler. It had, according to his description, twelve courts, all roofed with stone, which was unusual in Egyptian buildings, most of which had no ceilings and were open to the sky, or *hypæthral*, as the Greeks called them. It had twelve courts with gates exactly opposite one another, six facing the north and the same number facing the south, and a great number of chambers, according to the account of Herodotus, 1,500, above and below. The subterranean chambers or crypts Herodotus did not see, but he heard that they comprised the tombs of the kings who built the Labyrinth and those of the sacred crocodiles which were attached to the temple of Sebak, the crocodile god, of Ta. These great reptiles were exceedingly tame and wore earrings, and the Labyrinth seems to have been their sepulcher, although the principal pits in which the mummies of the crocodiles are found are at Manfalut. The courts of the Labyrinth had colonnades and entrances into the various chambers. The whole was surrounded by an outer wall and the walls covered with hieroglyphics; but little is known of the purport of the inscriptions and the mere fragments which have been found contain the titles only of two kings. At one of the corners of the Labyrinth stood a pyramid, forty-one fathoms, or 246 feet high, which was entered by a subterraneous passage. Two other pyramids stood in the center of the lake, 300 feet high above the surface of the water, which was of the same depth at this spot. On the apex of each of these pyramids was a seated colossal figure. These three pyramids were the sepulcher of the kings. The Greek account gives different names to the king of the Labyrinth, but the fragments of it which have been found near the walls of the crypts or subterraneous chambers show that it was Amenemha IV. and his sister, whose mummies were perhaps buried in the pyramids placed in the middle of the lake. The arrival of Joseph in Egypt has been placed by some in the reign of Apepi II., and some considerations are very favorable to that conjecture. The name Potiphar, from its composition, is evidently Heliopolitan rather than Theban. Joseph married the daughter of the high priest of Heliopolis, occupied by the shepherds during their occupation of the country. No mention is made in the narrative of Memphis or Thebes. The 430 years of the bondage of Israel in Egypt correspond with the monumental date of 400 years from the Shepherd ruler Set or Saites to Rameses II. and the opinion generally entertained by Egyptologists is that the Exodus took place in the reign of Meneptah, son and successor of Rameses II. The elevation of a foreigner to the high office held by Joseph is also more consonant with Egypt being at the time in the hands of the Hyk-shos, while the Pharaohs of Heliopolis must have known the patriarch, whose eventful story would have been unknown to the native dynasty, which expelled from the soil of Egypt the hated Hyk-shos, their traditions and antecedents.—*Birch's Egypt from the Earliest Times.*

—Paul Howes, a Chicago drummer, while traveling in South Carolina, joined with a fellow-drummer in buying a one-thousand mile ticket. The conductor refused to allow but one of them to ride on the ticket, saying that while it could be issued to two or more parties, only one person could ride on it at one time, and Mr. Howe was put off the train. He at once took steps to sue the road for damages, when the managers concluded they had better settle the matter, and paid him $1,000 to drop the suit. The adventure proved a very profitable one for the drummer.—*Philadelphia Press.*

—A novel Viennese invention is a "talking piano," which gives the vowels very distinctly and the consonants fairly.

THE TOMBS BARBER.

What He Says About the Persons Whose Faces He Lathers—Particular Customers.

"Yes, I am the Tombs barber," said Morris Haber, an intelligent young German, who was found in his barber shop on Canal Street by a reporter, "and you are the first newspaper fellow to find me out, although I have held that position for nearly two years. Any other barbers admitted to the prisons? No, sir; I am the only one, and was appointed by the Commissioners of Charities and Correction. Salary? Not any. My earnings consist of what the prisoners give me, except in cases of condemned murderers, and then the Sheriff pays me.

"I am allowed to enter the prison at any time, but usually only go there three days of the week, on Mondays, Wednesdays and Fridays. I am now shaving about twenty prisoners a day there, and what I get averages about eight dollars a week. No prisoners are compelled to get shaved, but the greater number who have any spare change always wish to. This is generally the case with those who are about to go into court. They want to make their best appearance before the court and jury, and it has come to be a common saying among them that a clean shave means ten years off their sentence.

"In winter I go there regularly every morning at eight o'clock and in summer at seven o'clock. I carry my razors, scissors, soap and bottles in a small hand-bag, and my hair-clipping machine in a leather case. I generally take five or six razors with me every time. When I get there, the first thing I do is to look over the slate and find the prisoners' names marked with an 'X.' This means that they are the ones who are to go to court. As court always opens at ten o'clock, and as I have learned from experience how much importance is attached to a 'clean shave' by the prisoners with reference to their appearance in the court-room, I always take pains to get through with the 'court cases' early and as soon as possible, even leaving my regular customers there—and I have several—until they are out of the way.

"So I go along each row of cells the first thing, and I ask each prisoner whether he wants a shave or not. Sometimes I find a great many who do and then it is lively work, for I have to shave them in their cells, and there are no chairs in them for the men to sit on, consequently I have to shave them sitting on the edge of their narrow beds. In each case the keeper locks me in with the prisoner, and I have to call his attention by knocking on the door when I am done and want to get out.

"I have never had a prisoner molest me or even act rudely to me while at my work there, notwithstanding the fact that the Tombs has an average of from 150 to 200 prisoners all the time, and from all classes of criminals. The prison seems to have a quieting influence on them and they are more polite to me as a rule, in saying their 'good morning,' and 'good day,' than many outsiders. I have never had them ask me to bring them things they are not permitted to have, or try to get me to the keepers. As for the sight of my razors stirring up any desperate thoughts in the minds of any of them, if they have I've never known of it.

"The new prisoners seldom talk to me, and of course I don't ask questions. Naturally, the faces are changing all the time, in the going away of some and coming in of new prisoners. Every now and then some new comer will greet me with a 'how-dy-do,' and I will find that he is an old offender who has been in the Tombs before and remembers me. But they all seem glad to see me, for it makes a little change in their prison life. Those who have been there some time talk more, and sometimes tell me about their cases, but I don't take much interest in the particulars, naturally, though I give the poor fellows all the sympathy I can.

"My oldest customer here? Let me see. It is Conroy, I guess, the policeman condemned to be hung on the charge of murder. He has been in the Tombs about seventeen months, and is now waiting for a new trial, I believe. I have shaved him regularly twice a week since he has been there, and he is one of those who have talked to me about their affairs.

"Another of my regular customers there is Donovan, condemned to imprisonment for life for killing a man with a billiard cue. He is also waiting or trying to get a new trial. He has been there a year. John Carpenter, condemned to be hung for killing his wife, is another of my customers there. He has been in the Tombs eight months, hoping for a new trial.

"People might readily think that these men, knowing that they must stay there so long, and perhaps in prison forever, or be hung, would get careless about their appearance, and let the barber go by. But they don't, and they are as particular to be shaved twice a week as my customers here at the shop. They will take pride in their looks, and as they have frequent visitors, they want to look nice for them, I suppose.

"One of the most particular customers I ever had in there was Rhinelander, the man that was claimed to be insane. He was in a long time, and always paid me extra, but he was very particular to be shaved three times a week, and just so. If I missed a day he would get very angry. Very few, however, pay me extra. They are not lavish with their money when they get in the Tombs, and those who are fortunate enough to have any keep it very close.

"Billy McGlory paid me extra, though, and I found him a very nice man. Another man I thought was pretty nice was Martin, the celebrated counterfeiter. He became blind while in there and was in the hospital. He had a long beard and was very particular to have it trimmed to a hair. Another very particular man was a negro of Spanish descent, a young man condemned for murder. He was always one of the neatest and cleanly-looking men of the whole lot, and he always wanted me to take great pains over him, to fix his hair just right and give him a close shave."—*N. Y. HON. D. D. S. BROWN, Rochester, N. Y., used Warner's Tippecanoe, The Best, for stomach derangements, and was astonished at the good it did him.

S S S

I am an old man. For 23 years I suffered with ulcers on my right leg as the result of typhoid fever. Amputation was suggested as the only means of preserving life. The doctors could do nothing for me, and thought I must die. For three years I never had a shoe on. Swift's Specific has made a permanent cure and added ten years to my life.
WM. R. REED, Gainesville, Hall Co., Ga.

I have taken Swift's Specific for blood poison contracted at a medical college at a dissection, while I was a medical student. I am grateful to say that it gave me a speedy and thorough cure after my parents had spent hundreds of dollars for treatment.
AUGUSTUS WENDEL, M. D., Newark, N. J.

Swift's Specific is entirely vegetable. Treatise on Blood and Skin Diseases mailed free.
THE SWIFT SPECIFIC CO., Drawer 3, Atlanta, Ga., or 159 W. 23d St., N. Y.

Human Endurance.

It is an acknowledged fact that man possesses the power of endurance to a greater degree than any of the lower animals. Professional pedestrians have been known to walk an average of one hundred miles per day for six consecutive days, which would be a wonderful accomplishment for a horse, and surpass all the known records of that nag, the power of endurance to its fullest extent must be in perfect health. One who is troubled with weak urinary and digestive organs, whose pulse is irregular, whose heart palpitates, and who feels a sense of burdensome fatigue after the least exertion, would be very unwise to compete in a pedestrian contest. Should you suffer from a want of endurance, you can regain robust health and strength by using DR. GUYSOTT'S YELLOW DOCK AND SARSAPARILLA. This remedy has saved thousands of weak, nervous, debilitated, rickety head-aching mortals to lives of usefulness and the full enjoyment of perfect health. It removes all blood impurities, aches, pains, sores, pimples, etc., and assists nature in controling and supporting a harmonious routine of bodily functions, so essential to every one's physical welfare.

WILHOFT'S FEVER AND AGUE TONIC

A warranted cure for all diseases caused by malarial poisoning of the blood, such as Chills and Fever, Fever and Ague, Sun Pains, Dumb Chills, Intermittent, Remittent, Bilious and all other Fevers caused by malaria. It is also the safest and best cure for enlarged Spleen (Fever Cake), General Debility and Periodic Neuralgia. For Sale by all Druggists.
CHAS. F. KEELER, Prop., Chicago, Ill.

SATURDAY, MAY 9, 1885.

The Times, a new Democratic weekly newspaper has been started in Baltimore city, with Henry J. Ford as editor and proprietor. We hope financial success may attend the enterprise.

Falling walls and a fire in an old factory building in Brooklyn, N. Y., Tuesday caused the loss af a number of lives. It is not definitely known yet how many perished. Several bodies have been taken from the ruins.

Brigadier-General Irwin McDowell died in San Francisco at midnight Monday night. His death was due to pylaric disease of the stomach. He had been in a critical condition for two weeks, being unable to retain any nourishment, and delirious most of the time.

Mr. Gladstone announced Monday night in the House of Commons that Russia had agreed to submit the Afghan dispute to arbitration, not the fight at Penjdeh, but the agreement of March 16. This was regarded as a clear back down of the British Cabinet, and Lord Churchill savagely attacked the government for its cowardice, and intimated that its policy might lead to the loss of India.

The *Presbyterian Observer* says that local option, or more properly local prohibition, now prevails in twenty counties of Maryland as a whole, with the exception of about four or five election districts; and also in nearly the half of Frederick, five out of the eleven districts in Garrett, five or six localities in Baltimore county, and a number of districts or localities in other counties, equaling, say, nearly or quite another county. The total will thus be what is nearly, or quite, seventeen counties of the State. About seven of these counties are on the Eastern Shore and six on the Western.

Mr. Johnson and the Collectorship.

Hagerstown News, Dem.

The Cumberland *Times* is mistaken in saying that the *News* has endorsed Mr. R. D. Johnson for collector of internal revenue for this State. Whilst the *News* has its preference, and very decided ones, it certainly does not endorse Mr. Johnson, who, whatever may be his good qualities in other respects, has been known as a very active and earnest worker for a faction of the Democratic party in Allegany. And if he should fail to receive the appointment it may be because of the known determination o. the administration to steer clear of anything like factionalism in the Democratic party.

Hagerstown Mail, Dem.

We have seen nothing in the presentation of Richard D. Johnson, Esq., of Allegany county, for the position of collector of internal revenue which would make the "test" as alleged, in last week's Frederick *Citizen*. It is not a question of Mr. Gorman and his friends, as the *Citizen* would charge, either for or against them, but whether we shall have a capable and honest man and a true Democrat as collector.

The question of "test" alluded to in connection with the subject has reference to the delegation in Congress, and not to any single one of them. It has been reported that the delegation were to meet and then apportion out the offices in the State. This course of proceeding would create a sensation in the party that might have most serious results.

This plan of action, if accepted by the administration, would compel every Democrat having an aspiration to public service to go to the delegation for favor, and not to the President or heads of departments.

In electing Mr. Cleveland the masses of the party never contemplated the establishment of any oligarchy like this; and our belief is that the President will never recognize any such system or office-dispensing syndicate.

We have no Democratic Congressman from this large and potential district, where 16,000 Democratic votes are cast—more than double the majority the President received in the State—and if it is to be supposed that the intelligence, independence and worth of the party in this district is to be at the footstool of the Congressional delegation and to be shambled by Congressmen who will, perhaps, and may naturally, be overaxious to get everything for their own people.

To all this we object, and every good, sensible Democrat, we think, will agree with us. Instead of the manhood of this district or of any other district being left to the absolute decision of Congressmen or any one of them, it should go to the fountain of power and of justice—the President; and although not clothed in the robes of a brief office tenure, but endowed with Democratic rights, it will, we have the confidence, be heard.

Our views is that while members of Congress have their rights of recommendation and should be always regarded with respect, the people, upon the other hand, have theirs, and the latter should not be unjustly or unduly thrown aside for the former.

The Quarrell Between England and Russia.

As war between England and Russia appears to be inevitable, the general reader will be interested in a clear and concise statement of the trouble which has led these giant powers to measure strength with each other. England, as everyone knows, has an immense empire in India. Russia has of late years been pushing her conquests in the direction of India, and about two years ago, when the Russians seized the oasis of Merv, and got control of the great Turcoman desert, they came right up against what has always been regarded as one of the bulwarks of India—Afghanistan. Then England became alarmed.

Look at a map of Asia and you will see that all along the northern edge of India, like a wall of defense, runs the gigantic chain of the Himalayas, the greatest mountains in the world. At the northwestern corner of India this range of mountains splits up, and, turning toward the southeast, spreads out into a number of diverging ranges which cover Afghanistan, the backbone of the system being the colossal Hindoo Koosh mountains. This rugged country of Afghanistan, therefore, forms a sort of natural breastwork for India toward the northwest, the direction from which an invasion by Russia would come, and so England has for years kept a sharp oversight of things in Afghanistan. In the northwestern corner of Afghanistan lies, the account of its commanding position, has long been known as the key to India. Right over against Herat, on the north and only some 200 miles away, is the new post of the Russians at Merv.

After the Russians had got control of the country thus bordering on Afghanistan the question immediately came up as to where the exact boundaries of the latter country were. England was so anxious to keep the Russians from advancing further, and so fearful that their next step would carry them to Herat, that she lost no time in demanding that these boundaries be definitely settled, and a joint commission of Russians and Englishmen was appointed to deal with the question on the spot. This commission has been on the ground during the past year, but has not reached an agreement. The Russians it appears, claim a piece of territory between the rivers Murghab and Heri Rud, issuing from the Afghan mountains, the control of which, it is alleged, would give them command of the road to Herat. The town of Penjdeh, which, it is said, the Russians have just captured, lies upon this road, and, according to English claims, within the edge of the Afghan territory.

The recent negotiations between England and Russia relate to the question as to where the line should be run, and what should be regarded as debatable ground for the purpose. Two or three weeks ago the two governments agreed not to make any further advance on either side, pending the negotiations—that is, Russia promised not to push her troops further into the debatable ground. England undertook to restrain her friends, the Afghans. The recent battle between the Russians and Afghans, however, shows one side or the other has failed to keep back.

As England believes that the safety of her Indian empire depends upon the keeping of the Russians out of Afghanistan, the world looks on to see her aid the Afghans against Russia with all the power and prestige of her arms.

Disgruntled Southern Spoilsmen.

It is not at all likely that Mr. Cleveland will lose any sleep on account of the political revolution which Senator Eustis, of Louisana, proposes to stir up in the South. Mr. Cleveland is President of the United States, the head of the Democratic party and the man who, for four years, will hold in his hand the power to make or mar the political future of every Democrat in the country. Mr. Cleveland has certain ideas about the way in which public affairs should be conducted, and, as this is his administration, he not unreasonably proposes to put these ideas into force. And, while we do not know how Mr. Cleveland feels on the subject, we think that he ould be justified in regarding as impertinent those who object to his having his way because it conflicts with theirs.

Upon a number of occasions he has shown that he possesses the determination to do as he thinks right, whether the office-seekers of the Democratic party agree or disagree with him, and when it comes down to a clear and well-defined struggle between him and this horde of spoilsmen we see nothing ahead of the latter but defeat and humiliation, and the chill prospect of losing even the few crumbs that now fall to them.

History will charge up to Mr. Cleveland and the Democratic party, as a party, the sins and honor-marks of this administration. We have no reason to believe that the names of such men as Eustis, Hendricks, Gorman or Manning of Tennessee will appear when the record is made up. Mr. Cleveland's first care, therefore, should be so to conduct himself as to merit the esteem of posterity; his second, to reflect credit upon his party, and his third, to reward those whose political services are entitled to recognition. In doing the latter he must necessarily consider the relation of such action to the other aims and purposes of his administration. And the course which he is pursuing indicates that he recognizes this fact.

Mr. Cleveland, after carefully looking over the whole field, has evidently determined that he will do himself and his party most honor by following out a certain line of policy. Of course, no one can tell exactly what this includes, but it evidently does not include an immediate and wholesale discharge of office-holders of such men as Eustis desires to see inaugurated. Mr. Cleveland has doubtless, and wisely, concluded that the welfare of any party rests with the people and not with the politicians. It was a protest of the people against the sins of the Republican party that brought about Cleveland's election, and, learning wisdom by observation, he is not inclined to turn over his administration to the mercies of men whose aim, ambition, methods and frailties are similar to those of the men who first gained [illegible] then wrecked it.

So long as the people are as well satisfied with Mr. Cleveland's administration as they now seem to be, the President can afford to ignore the politicians if to do right be to ignore them, and smile at their anger if to gain the respect of the great majority of all parties be legitimate cause to excite it. But can Eustis and Manning and their ilk afford to make war on the President? Official patronage means political power and if these men assail Mr. Cleveland, how quickly can he dethrone them and put their rivals into power? How many Democrats are there in the states in which these disgruntled statesmen reside who would refuse to accept office from Mr. Cleveland, because these local bosses withhold from him the sanctifying oil of their approval? And with these rivals in places of influence and power, where would the power of these disgruntled statesmen be in four years? Having nothing wherewith to reward fidelity, in what way will they exact it, for, as they have avowed themselves spoilsmen, we take it that their followers are spoilsmen too; and spoilsmen, whether Democrats or Republicans, flock where the patronage is, and desert a falling leader quicker than rats leave a sinking ship.

Nothing so soon fades from the view of the American public as a vanquished politician. If Senator Eustis doesn't know this, some one ought to take him aside and whisper it to him before he monkeys with a buzz-saw which is evidently built for heavy work and plenty of it.—*Balto. Morning Herald.*

A surgeon in New York has performed an operation within the last few days that brings out in bold relief the value of the new anæsthetic, cocoaine. A young lady had a club foot to be operated upon, and it was necessary in order to straighten it to make several deep longitudinal incisions in the sole where the nerves are in the greatest abundance. The doctor merely made a hypodermic injection of the cocoaine in the foot and then proceeded to carve it without the least inconvenience to the patient. She smiled under the operation and said that it was like seeing some other person's foot cut. This experiment demonstrates that the new anæsthetic is one of the great medical discoveries of the age, and will probably at no distant day take the place of chloroform and ether in most surgical operations.

A Battle with Stone Cutters.

LEMONT, ILL., May 4.—About one thousand striking quarrymen assembled at the depot here this morning with the intention of capturing the militia, if they came. They afterwards went to Walker & Singer's quarries and routed them. At 9:30 four companies of militia and a detachment of battery "C" arrived from Joliet with Gen. Vance and Col. Bennett in command. They stopped at the Excelsior quarry and one company deployed as skirmishers. The other three companies are now marched to the quarries where the mob was congregated, The troops were mere met in the edge of the town by a mob of three or four hundred. Company B, of Joliet, and Company G, of Bloomington, under command of Colonel Bennett, formed the front, and charged up the main street with fixed bayonets. Company A, of Streator, commanded by Capt. St. Clair, with a detachment of Battery C, of Joliet, formed the right on a side street, and Company I, of Ottawa, commanded by Capt. Blanchard, formed on the left on a side street, and the command, "Forward, charge bayonets!" was given.

The mob, with wild hooting and cheering, met the main front with clubs and rocks. As the troops advanced steadily, the mob gave way to the side of the street and hurled a shower of rocks at them, and one fired a shot. Colonel Bennett ordered them to be dispersed, and a number that refused to leave were probed with bayonets. One man—a Pole—named Quinkowsky, was seriously stabbed. Further up the street the mob reformed and commenced hurling stones. A detachment sent to disperse them fired a volley and the rioters scattered. Two men named Andrew Stiler and John Quagra were killed. The troops are now clearing the streets, of the howling women and children. More trouble is apprehended. The troops will encamp at Singer's quarries. The militia displayed cool bravery. It is reported that a woman and a child were killed. A number of the soldiers were badly hurt by the flying missiles.

The following official report from Adjutant General Vance has been sent to Gov. Oglesby. "Col. Bennett removed his command, except one company, from Joliet to Lemont, arriving at about 9 A. M., and forming a line south of Lemont. Deputy Sheriff Potter conducted troops into Lemont near the Alton Depot, where a mob of about 500 to 1,500 strikers were congregated. They were commanded to disperse and go to their [illegible] by Deputy Sheriff Potter, but they would not. The strikers rushed toward the troops, throwing stones. Major Heffernan and one or two others were struck, and slightly wounded. The air was full of stones. In self-defense, the troops fired. Two strikers were killed and several wounded. Before the troops fired, a pistol was fired from a house into the troops. The troops have passed on to their original destination at Singer & Tolcott's quarry. A great many people are on the streets now, but are quiet."

How the Matter Stands.

CHICAGO, May 4.—A dispatch to the *News* from London says: The government continues to give out large orders for war stores of all kinds. The Admirality is surveying additional steamers with a view of freighting or purchasing them. Though the Russian papers are not so outspoken as they formerly were, prabably in consequence of their government's hints, it is well known that Russia is making strenuous efforts to increase her armament. The Indian banks have given notice that they will not advance money against shipments unless the vessels are insured at war risks. The Indian government is enforcing rigid economy in all departments to meet the expenses of war preparations, in order to avoid the levying of fresh taxes, which would be likely to disturb the native loyalty. It is reported that the Afghans of Badakshan have asked to be annexed to Russia, and negotiations toward that object are proceeding through the Ameer or Bokhara and the Governor of Turkeystan. Many continental papers are still skeptical of a peaceful issue of the dispute.

The *Pesther Lloyd* says that a trifling mishap in the Afghan frontier may annihilate all hopes of peace. The *Deutsche Zeitung* says that Russian diplomacy is not as yet anywhere near the end of its artifices and tricks. Russia may again and again put a difficulty in the way of a settlement, and, perhaps, at last, openly declare that she will make no concession in the boundary question.

The London *Standard*, in referring to the Queen's return, says that everything has been done to drag the nation into slumber, philters and rhetoric and adulation having been copiously applied to stupefy its conscience. Parliament participates in the sleep as it has participated also in the draught, but the crown does not share in the general abasement, and is, perhaps, watching for the restored sobriety and returning manliness of the nation.

Our Washington Letter.

From Our Regular Correspondent.

WASHINGTON, D. C., May 4.

One of the most complete proofs of the excellence of Republican management is the fact that Mr. Cleveland and every member of his Cabinet have firmly resolved to go slow, not only in the matter of removals from office, but in the details of the routine of business in all of the departments, where the new administration has found everything so nearly perfect that no innovations have been thought of. Of course when things get in working order, many of the chiefs of diyisions and head clerks will be expected to give way to their successors, but the rank and file who really do the work of the departments have been assured of retention so long as their conduct will deserve it. The vast amount of crookedness and corruption in the management of the last four Republican administrations that the Democratic campaign orators promised to unearth, have not been reached yet, while the only case of official malfeasance yet discovered is that of the Rome (N. Y.) postmaster, in which the Government did not lose a cent. On the whole, I do not believe that Mr. Cleveland's administration is really expecting to find any great amount of downright depravity, because of the fact that Republicans caught and punished their own thieves, an example that Democrats will do well to follow.

One admirable effect of the operations of the civil service delusion, is the impetus it has given to the business of the office broker. For a sufficient consideration these influential gentlemen hold out to the office-seeker the inducement that any ordinary clerical position with a good salary attachment can be secured under the provisions of the act without any formula of examination or other preliminary. This, of course, opens the door for the admission of all sorts of incompetents, whose tenure of office depends upon the influences that secured their appointment, and not by any civil service rules, or clerical capacity. To say that these office brokers are now driving a rushing trade, is to demonstrate to the civil service reform admirers the beauties of the system, which admits to the very best places in the Government the class of incompetents that the civil service law has vainly intended to eliminate.

JUNIUS,

State of Trade.

NEW YORK, May 2.—The general tenor of the special telegrams received by *Bradstreet's* to-day corroborates the views taken by this journal early in the year, that, while the Spring season would be likely to result in a moderate degree of commercial activity, which, by comparison with the Winter's business, might suggest a trade revival, the volume of merchandise distributed would fall behind the total during the like period of 1884, and that the end of the season would bring no prospects of a revival in the near future.

This forecast holds true at the present time—the close of the spring season. The past week revealed no gain in the distribution of merchandise in any line, with a possible exception in favor of boots and shoes from Boston. Dry goods are as slow of movement and as unsatisfactory as to the margin of profit as heretofore. The sales of groceries and provisions have not yet increased. The damage to the winter-sown wheat, reported by the Government to amount to a shortage of 93,000,000 bushels as compared with the crop of 1885, points to a harvest of 420,000,000 bushels, a quantity equal to the harvest of 1883. Prices of wheat and flour have been unsteady under the varying rumors as to the prospects of war abroad. In accordance with the tenor of late reports, the movement has been upward. Hog products have been dull and inactive. Speculation has been light and purchases for export as limited as for grain.

Raw wool is in little better demand if any, notwithstanding the improvement in the request for certain lines of woolen goods. The prospective pressure of the new clip prevents a gain in prices. The war news exercised a depressiug influence on prices of cotton, and middling uplands closed higher. The movement of grocery staples is still disappointing. Coffee and tea are lower. Sugar advanced on speculative buying. Canned goods are weak. Dairy products are lower and quiet. There were 167 failures in the United States and thirty in Canada during the past week.

CONNELSVILLE, May 1.—The *Keystone Courier* says: The past two weeks have not developed any brighter prospects for the coke trade; though it cannot be said that trade is any duller or the future any blacker than it was two weeks ago. During the past fortnight, the syndicate has closed down the pool ovens three days and thus restricted the output until the stock of coke is all worked off the yards, or nearly so. The output still keeps up to the average, but it shows no signs of going beyond it. During the past two weeks the syndicate shipments, exclusive of three idle days, averaged 620 cars daily; the outside shippers averaged 185 cars every day; total average daily shipments 650 cars. As stated, this does not promise to be increased. The period has now come when any improvement in the iron trade must make itself shown; it has not done so, and there is no reason to expect it unless something out of the usual course of events transpires. Labor is plenty, in spite of the summer season. Cars are likewise abundant.

NEW YORK, May 2.—Trade is of the ordinary routine character, and of about the same average volume that it has been for some time past. There is no apparent change in the nature of the demand, nor do the movements of sellers indicate any variation on their part. In short, the general state of affairs is precisely the same as previously described week after week during the past two or three months. Going beyond the present and touching upon the outlook for the future, it is impossible to discover anything that foreshadows prospective change at a near date. Consumers are found wholly indifferent and content to let the future take care of itself. Sellers seem to be in a very similar mood, with but little hope of matters brightening up, but generally of the opinion that they will be no worse. On prices there is not the slightest alteration; standard Lehigh brands being held very steady, while inferior product shows merely the moderate variation that has been general heretofore. Fair sized lots, Lehigh make, sell at $18 for No. 1 X foundry, $17 for No. 2 X foundry, and $16 for gray forge.

The following letter, signed by more than 500 children, from 5 to 13 years, was sent to General Grant. The letter was beautifully written, and tied with broad white satin ribbon. The roll must have been at least 12 feet in length:

SIXTY-FIRST ST. METHODIST EPISCOPAL CHURCH, April 5, 1885.

TO GENERAL U. S. GRANT—*Dear General:* We little ones of the "Children's Hour" of the Sixty first Street Methodist Episcopal Church have heard that you are sick. We are very sorry, and pray to God to make you well again. We know that you were once our President, and we have heard our fathers tell how wise and brave you were in the great war. We shall remember you when the big people now living are all gone. We hope your example will help us to lead more noble lives than we would have done if we had never heard of you. Please accept our hearty love, our good wishes, and our prayers.—*New York Times.*

Falling out of the hair may be prevented, brashy hair made soft, and the growth of the hair renewed, by the use of Ayer's Hair Vigor.

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, May 4, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5½@5 4 5c. that generally rated first quality 5(@5½ cts; medium or good fair quality 4@4¾ cts; ordinary thin steers, oxen and cows 3½@3¾ cts; extreme range of prices 3½@5 4-5cts; most of the sales were from 4¾@5¾.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 1,089 head, against 1,006 last week and 1,514 head the corresponding week of last year, and the sales were 599 head, against 837 last week, and 933 head the corresponding week of last year.

The market has been by no means active to day on the Hill. Efforts to advance prices were partially successful, and as a result an improvement, considering quality, of 10 to 12½c. for 100 lbs. was effected. Trade was not active. The quality was of a much better average than last week—indeed, than for several months past—the Lehmans selling a superior bunch of Washington county fed Cattle to J. W. D. Pentz, of this city, at a price on private terms, much above our highest quotation—$5 80 per 100 lbs.—and sales ranged down to 3½c., at which only a few head were sold. Most sales were made from 4¾ to 5¾c.

THE SWINE MARKET.

There is a small increase in the receipts over last week's offerings, and their quality is fully as good as that of last week. Trade is fair to good, the supply being equal to the demand. We quote common rough hogs, sows and stags, at 5½@6c., and the better grades at 6½@6¾c. net; most sales 6½; same time last year 6¾@7¾ net.

THE SHEEP MARKET.

There is quite a good trade for good Sheep and Lambs, but common stock of any kind is exceedingly dull—not wanted, in fact, at any price. The quality of the offerings does not average as good as it was last week. Wool Sheep (of which there are but few offered) sell at 3@5½c., and spring Lambs at 8@11; sheared Sheep sell at 2@5½, fair bringing the latter figure; fall Lambs sell at 5½@6. Same time last year clipped Sheep sold at 3½@6¼c.; Wool Sheep 5@6¾ gross,

LOCAL NEWS.

LODGE MEETINGS.

OAKLAND LODGE, I. O. G. T., meets in Sturgiss' Hall every Tuesday night.

LOCAL BRANCH, No. 85, of the Iron Hall, meets in same Hall 1st and 3d Saturday nights of each month.

SHEALTIEL LODGE, No. 122, I. O. O. F., meets in Legge's Hall every Monday night.

ALTA LODGE, No. 574, K. of H., meets in same Hall 2d and 4th Thursday nights of each month.

PATMOS COUNCIL, No. 386, A. L. of H., meets in same Hall 2d and 4th Friday nights of each month.

—Florida oranges at Lakin's.

—Mrs. General Crook is now in Oakland.

—If you want a good cigar go to Newman's.

—200 bushels of Red Rust-proof seed oats for sale at John Shartzer's.

—Go to Newman's for oranges, lemons and bananas.

—Go and see Naylor & Richardson's hand made wagons.

—If you want a good cigar call at Lakin's.

—Groceries and flour at Newman's. 5 9 4t.

—Lemons and cocoanuts at Lakin's.

—The Garrett Guards left Oakland for Baltimore Wednesday noon on a special train.

—Only behold the fine lot of toys at Newman's, sold so cheap that you can't help but buy them.

—Mr. Jacob Brown, of Cumberland, was attending court here this week.

—Take your wagons, harrows, buggies and plows that need repairing to Naylor & Richardson. All work guaranteed.

—Mrs. M. E. Davis has just received and is displaying a full line of millinery and fancy goods. Call and examine her stock.

—Mr. Charles Bolden is engaged in enlarging his store room on Second street. When completed the building will be occupied as a residence and store room by Mr. Wm. Roth.

—Mens' Laced and Buttoned Shoes, Boy's Shoes, Boy's Shoes, Boy's Shoes, Ladies' and Childrens' and Baby's Shoes, and "*Loo Choo*" at Grant's.

—The Oakland Base Ball Association will meet next Tuesday evening at 8 o'clock, in the *Democrat* office, for the purpose of effecting a permanent organization.

—Lima beans, soup beans, dried sweet corn, evaporated apples, dried apples, hominy, B. W. flour, corn meal and ivory soap, at

HARNE & LAWTON'S.

—Mrs. Theo. F. Combs has opened an ice cream parlor on the corner of Liberty and Wilson street, near the REPUBLICAN office. Families will be supplied in Oakland or Mountain Lake Park.

—Mr. Daniel Chisholm returned to Oakland Monday from Florida, where he has passed the winter, engaged in planting an orange grove and otherwise improving his farm in that State. He will remain here during the summer and return to his Southern home in the fall.

—The May Term of the Circuit Court for the county convened Monday morning at 10 o'clock. Judge Seyster on the Bench. Mr. C. M. Miller was appointed Foreman of the Grand Jury. Such a small amount of business of general interest had been transacted at the time of going to press (Thursday morning) that we defer a report of the proceeding until next week, when we will give the full proceedings. The session will probably extend into next week.

Church Services--Sunday.

M. E. Church—Preaching at 7½ P. M. by Rev. M. W. Rider.

Stone Church—Preaching at 11 A. M. by Rev. John S. Foulk.

St. Peter's, Catholic— Preaching every Sunday at 10½ o'clock A. M., except the second Sunday of each month.

The Best is the Cheapest!

That's what we mean when we say Newman keeps the finest candies in town. Call and see his stock.

New Furniture, Carpets, &c.

Mr. John Shartzer has just returned from Philadelphia and Baltimore with the finest lot of Furniture, Carpets, Matting, Oil-Cloth, Wall Paper, &c., ever brought to Oakland. Call and get his prices before buying elsewhere,

List of Letters.

List of letters remaining unclaimed in the Post Office at Oakland Garrett county, Md., May 9th, 1885.

Bowman, Joshua	Hyde, Greeley
Clark, Thomas Elder	Myers, S. A.
Hook, James J.	Perry, A. D. Rev.
Herse, Wm.	Wilson, John

Persons calling for them will please say they are advertised.

R. THAYER, P. M.

Chance for Investment.

For sale or rent, two cottages, furnished, with use of horses and carriages.

MRS. E. A. KILBOURN,
4 11 Oakland, Md.

U. B. Quarterly.

The First Quarterly Conference for Allegany Circuit, U. B. Church, will be held at Bethlehem, June 20th, at 2 o'clock P. M. Preaching Saturday night, Sunday morning at 10:30 and afternoon at 3, by Rev. J. W. Hicks, P. E. A full attendance of the official members is earnestly requested at the Quarterly.

ALBERT DAY, Pastor.

Jew Store in Oakland.

For a short time only the undersigned will offer to our people, clothing, dry goods, notions, hosiery, Stationery, jewelry, &c., in the room formerly occupied by the *Democrat* office, corner Alder and Third streets.

Do not fail to attend this great sacrifice of goods. These goods are from a firm that failed, formerly in New York, and everything will be sold regardless of cost and value. Call and see our goods and judge for yourselves, and you will admit that a chance to get such bargains will never occur again in this vicinity.

5 2 2t JACOB FELDSTEIN.

Bonnets and Hats.

We have now open a fine assortment of Ladies' and Childrens' Hats, Ladies' Bonnets, Ribbons, Flowers, Feathers, Pompons, Gilt and Silver braids, Hat Scarfs in beautiful colors.

Ladies' and Childrens' hose, in black and solid colors.

We have on hand the nicest lot of gloves we have ever bought. Kid, Silk and Thread gloves in all colors, black silk lace mitts.

Ladies' Jerseys.

Childrens' lace Bonnets, Ladies' underwear, Ladies' neckwear, and many other desirable articles.

M. L. SCOTT.
Baltimore Store.

Mountain Lake Park.

Mr. Oliver, of Somerset county, Pa., moved here last week for the season, and is occuying the Vance cottage.

Mr. J. C. Bandal, of Moundsville, was here last week and let the contract for plastering the Fullerton cottage, which he has bought, and is making ready for occupancy this season. Also improvements to be made on the Weaver and Bandal cottages.

Rev. Joseph Lee, of Grafton, was here this week and is having shutters put to his windows, his lot graded and fenced, &c.

Miss Jennie Smith and Miss Addie Sherman have returned from their extended trip South. They report unusual success in their work.

There has been, during the past spring, a Dining Hall erected on the grounds, which will be conducted by W. H. Hagans, of Oakland.

The Hall is located near a cluster of Cottages, where persons can secure Lodging at moderate rates, and take meals at the Hall.

Families desiring to escape the duties of housekeeping can rent Cottages, taking their meals at the Hall. Terms for Board—Dinner, 50 cents; Breakfast and Supper, 35 cents each, or $1.00 per day.

Johnstown.

Pleasant weather, after an unusually cold snap.

Health again restored in the neighhood.

Quite a number of persons attending court.

We feel the effect of business depression here in the country as well as in towns and cities.

Farmers are making unusual efforts to raise larger crops per acre, by more thorough cultivation, and more extensive use of fertilizers. The past dry season and the severe and long continued winter has stripped us of provender, and left much of the stock in poor condition, so a greater effort on the part of farmers to brace up against those emergencies is in place.

Mr. M. Mattingly takes the lead in large horses, which he has lately purchased.

Smith & Callis are alive in the mercantile business, and know what the farmers need.

Our "Sojourner" correspondent has settled down and gone into the farming business near Elder Hill. May he be as successful at this as he was at teaching public school, and still continue to fling his pen for the REPUBLICAN. B.

Bucklen's Arnica Salve.

The best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by W. D. Nydegger, Druggist, Oakland, Md.

Shade Mills.

Farmers in this section of the county are busy putting out their spring crops.

Rye and wheat will not be more than half a crop.

French measles have visited several families in this section.

Noryal M. Layman, who was recently married, is now occupying the dwelling house vacated by A. J. Moore.

Miss Lulu G. Michael was visiting friends here last Sunday.

LOGAN.

The Elk Garden Men on a Strike.

In pursuance of the notice posted in the Elk Garden region, Monday evening, that no coal would be mined after May 5 at less than 50 cents a ton, the greater part of the men employed there "came out" Tuesday. In the three mines of Davis Bros.' only a few men were at at work, and in the other mines, the Windom and Atlantic and George's Creek, the men are said to be all out. The indications are that the demand for an increase will not be complied with and that the mines will remain closed for some time. Little excitement is reported from the Elk Garden region.

Watterson on Cleveland.

WASHINGTON, May 4.—Mr. Henry Watterson, who has been here for the past week, will to-night send the following to his paper as expressive of his impressions of President Cleveland and his administration: "A slight attach of sore eyes suggested a visit to Washington, and having tried the executive and departmental treatment for nearly a week, it has occured to me that a brief account of some impressions of the administration may not be without interest to the readers of the *Courier-Journal*. On a certain occasion Artemus Ward stepped in front of his canvas, and pointing to the passing scene, said to his audience: 'Ladies and gentlemen: These are horses. It was only this morning that artist came to me, with terrs in his eyes, and exclaimed, I can conceal it from you no longer, Mr. Ward, *they are horses.*' In its entire utterances and appointments, the administratiom has so spoken to the country. It can conceal it no longer; it has a Democratic administration. For my part, I have never doubted this in the least. If I had been given the making of it, I could not have better suited myself. Indeed, I have been so well pleased, that I have been content to stay at home and play at philosophy, leaving others to play at patronage, quite satisfied that the President and the eminent and accomplished men with whom he has surrounded himself, might be trusted to give us a civil service capable and clean to handle the public business with fidelity and efficiency, and to discharge adequately their obligations, both to the people and the party. Personal contact and opportunities for getting at both sides of points of criticism and dispute have strengthened these original impressions, and I am happy to say that the case of sore eyes with which I started from home has entirely disappeared.

"The President is a less reserved and a more likable man than I had been in the habit of thinking him. He is at once exact and exacting, but there is beneath his unmistakable business-like purpose and exterior a doughtiness of spirit and an engaging candor, which come out strong for very little provocation, and which save his manners from severity. Genial is hardly the word to describe the sunny side of him, for he is a serious man, and hard worked and hard working man. But he has the gift of appreciation, a simple school-boy love of fair play, and a repose altogether unaffected, and complete and singularly lacking both in cynicism and vacuity. I observed the latter of these admirable qualities in Miss Cleveland, whose rapid advancement and elevation to the highest social honors and duties have nowise disconcerted her, and who will add one more name to the very short list of ladies who have signalized and adorned the mistresship of the executive mansion. Her brother is not so deeply or so seriously read as she, not so much of a doctrinaire, if, indeed, a doctrinaire at all, for I should say he has been a student rather of men than books; but he has an undeniable genius for command, and, for one of so little ostentation, the most unpromising subject of familiarity imaginable. His weight and reach of brain have, perhaps, never been tested or measured. He has yet to put forth his full mental powers and resources. Time, which developes, can only disclose the nature and extent of these. But there is one thing about him which nothing can obscure, which shows itself in all he says and does, and which is blazoned upon all his aspects. That is *character*, and the older I grow and the more I see of life and men, the more respect I have for character when brought to contrast with intellect. Many a man called dull and slow has, by honest purposes and inflexible will, enlightened by nothing more luminous than plain, good sense—the offspring of every-day experience—conferred inestimable blessings upon his kind, whilst the history of the world is full of examples of curses brought by brilliancy corrupt and genius misapplied. Mr. Cleveland is a plain, sober man. There is nothing dramatic or sensational about him. He has not, like so many politicians, a long conscience and a short memory. His hates and loves are few, positive and sincere,. He has shown himself abundantly able to say "no;" and yet, as I have seen him, no man has a livelier wish to gratify the wishes of others. He wants to do the right thing and the kindly thing, and there is not the smallest doubt that since his election he has been inspired by the truest spirit of justice and the most conscientious sense of duty, equally loyal to his great place and party, asking no favors and looking to his work to vindicate itself.

"Very great forbearance and a patient temper should be extended by the public to such a public servant. He selected his political advisers by the rules of fitness, and he has inspired them with his own business-like spirit. The departments are in hands most uniform and methodical. In every one of them there circulates the atmosphere of the workshop. To say nothing about practical benefits and utilitarian performance and promise, all this has a moral value incalculable. It is, in itself, a sort of democracy, and a much needed sort at that.

"The attack of Mr. Eustis upon the administration seems to me equally unjust and unwise. As long as senators and representatives insist upon sharing the patronage of the government, they should be willing to share its responsibilities. * * * This adminsstration is trying to do its duty. Beset on all sides by complications, and badgered day in and out by importunities, it has kept its temper passing well, and has made no more mistakes than are common to newcomers in office, and not so many as might have been expected."

The English Soldier.

Under the existing system a soldier in the British army is provided by the State with a uniform, including boots, renewed periodically, but he is often required to pay out of his own pocket for a new pair of trousers, serge frock, or forage cap, while it is evident that his two pair of boots annually are not sufficient, and the cost of additional boots and repairs to those he possesses is defrayed by the man himself. He also, on enlistment, is furnished with a free kit of necessaries, comprising under-clothing, knife, fork, and spoon, blacking, brushes, braces, razor, towels, soap, etc. This kit he has to keep up at his own expense. It is plain from the above that the soldier is not clothed by the State. The result of this arrangement is constantly recurring stoppages, which often leave the soldier with only 1d. a day pocket money, cause great irritation and discontent, and are fruitful causes of desertion. Neither is he fed by the State, for all he obtains in the shape of rations is 1 pound bread and ¾ pound meat daily. The balance, in the shape of groceries, vegetables, milk, etc., is defrayed out of the messing fund, for which 4d. a day is stopped from his pay. In addition he is charged with washing at ½d. a day, haircutting 1d. a month, and barrack damages, for which he is lucky if he gets off at 1d. a month. If he belongs to the library the subscription is 3d. a month. We indorse Sir Frederick Robinson's recommendation that whatever sum is called pay should be free of stoppages, so that the soldier may know exactly how he stands, and the captain and color-sergeant be relieved of much clerical work and time-consuming accounts. As the most careful infantry soldiers, under fairly favorable circumstances, clear 7d. a day, it would be desirable to fix his pay at that sum, and for the State to defray all charges connected with the items above mentioned, unless, of course, in cases of carelessness and waste.

Working on His Book.

NEW YORK, May 4.—Gen. Grant has been at work on his book to-day. He is feeling about as strong and cheerful as yesterday and passed a fairly good night. Dr. Douglas will not return until this evening.

At the Baptist pastors' meeting to-day, in discussing an essay which had been read, entitled "Modern Faith Cures," Rev. Dr. Patton said that he thought General Grant an example of faith cure, and spoke of it as the result of the prayers of the people of this country for the preservation of his life.

Frank Miller, of Indianapolis brother of the Commissioner of Internal Revenue, arrived in Washington yesterday morning, and it is said will take a place in the Internal Revenue Bureau.

Bill Nye in Verona.

From the Detroit Free Press.

Verona is noted for the Capitular library, as it is called. This is said to be the largest collection of rejected manuscript in the world. I stood in with the librarian, and he gave me an opportunity to examine this wonderful store of literary work. I found a Virgil that was certainly over 1,600 years old. I also found a well-preserved copy of "Beautiful Snow." I read it. It was very touching indeed. Experts said it was 1,700 years old, which is no doubt correct. I am no judge of the age of manuscript. Some can look at the teeth of a literary production and tell within two weeks how old it is, but I can't. You may also fool me on the age of wine. My rule used to be to observe how old I felt the next day and to fix that as the age of the wine, but this rule I find is not infallible. One time I found myself feeling the next day as though I might be 138 years old, but on investigation we found that the wine was extremely new, having been made at a drug store in Cheyenne that some day.

News in Brief.

General Grant continues to improve.

An incendiary attempt was made to burn the Childrens' Homs, in Coyington, Ky.

The reports of a strike in the Tuscarawas (O.) Valley are denied as without foundation.

Work in the Navy yard at Portsmouth, N. H., is suspended, and all employes discharged.

Richard Whaling, Postmaster at Goldman, Ark., was shot and killed by W. O. Turnage, an editor.

Charles E Fuller, of Linwood, O., committed suicide through despondency occasioned by family sorrows.

The striking coal miners of the Belleville (O.,) District, have decided to return to work, giving up the fight for higher wages.

Judge William M. Merrick has taken the oath as successor of Judge Wylie on the Supreme Court of the District of Columbia.

The Secretary of the Treasury issued a circular carrying into effect the suggestion of Assistant Secretary Fairchild that baggage of passengers arriving from abroad may be transported in bond to all the places embraced in the immediate delivery act.

NEW ADVERTISEMENTS.

TRUSTEE'S SALE!

Under and by virtue of a deed of trust from Thomas Coddington and Cecilia J. Coddington, his wife, executed to me and recorded in the office of the Clerk of the Circuit Court of Garrett county, for the benefit of the creditors of the said Thomas Coddington, I will

ON TUESDAY,

THE 2D DAY OF JUNE, A. D. 1885,

at ten o'clock A. M., at Coddington's Hotel, Oakland, Md., offer at public auction to the highest bidder without reserve the following described property, to-wit: All the right title and interest of the said Thomas Coddington and wife in and to the real estate which was conveyed to the said Thomas Coddington by William P. Totten, executor of Ezekiel Totten, by deed bearing date April the first, A. D. 1884, and recorded in Liber W. H. T. No. 8, folio 502, it being the

HOTEL PROPERTY

where the said Thomas Coddington now resides. The interest of the said Thomas Coddington in said real estate being the Equity of Redemption, and the said real estate will be sold subject to two mortgages, the first in favor of M. A. R. F. Carr for seven hundred dollars and payable on the first of April, A. D. 1887. The second in favor of Ida M. Crow for one thousand dollars, and payable on the twenty ninth day of July, A. D. 1887. Said Hotel Property is more particularly described as Lots Numbers ten and twelve on the plat of Totten's Sub-Division to the town of Oakland, Maryland. Said Lots are improved by a large two-story frame Hotel building, also large stable, ice-house and necessary outbuildings. This is one of the best locations for a Hotel or boarding house in the town of Oakland.

Immediately after offering the above described real estate I will offer in like manner all the

HOUSEHOLD AND KITCHEN FURNITURE

formerly used by the said Thomas Coddington in running said Hotel, consisting of six heating stoves, two cooking stoves and utensils, twelve bedsteads, beds and bedding, large number of chairs, washstands, bureaus, carpets, lamps, hat racks, tables, stands, &c., &c. Table ware, consisting of knives, forks, plates, dishes, &c. One sofa one marble top center table, also barroom fixtures, including one large bar mirror, one elegant bar counter, stock of whiskey, brandy, wines, gin, cigars, tobacco, bar bottles and decanters, &c; also one buggy, one set of harness, four shoats and many small articles too tedious to enumerate.

TERMS OF SALE:—On the real estate one-half cash on the day of sale, and one-half in sixty days from the day of sale. On the personal property, all sums of twenty dollars and under cash, all sums over twenty dollars a credit of sixty days. On all deferred payments the purchasers to give their single bill, with security to be approved by the trustee. If the sale is not completed on the said Second day of June, it will be continued from day to day until finished. No property will be delivered until terms of sale are complied with.

JOHN B. BRANT, Auctioneer.

A SONG OF SPRING.

The sun that through the winter days
  Was staying where the orange grows
Returns again with genial rays,
  That dissipate slow, straggling snows.

I strolled among the meadows, where
  The green its first appearance makes;
Rejoicing, that, without a care,
  The dainty violet awakes.

The glow of sunshine; balmy air;
  The blue sky brightly arching o'er;
All make me think, ere we're aware
  The Spring will gladden us once more.

Up street I saw, through many a tear,
  The monkey bring again to view
The old hand-organ that each year
  Its dreaded visits will renew.

I more than saw; the beast so free
  Had brought a man without a fear,
Who tortured all that could not flee;
  And can I doubt that Spring is here?

I hastened further on to where
  The crowd a circle made around
A mangled body lying there,
  Disfigured o'er with wound on wound.

Amazed, I could not understand
  Why no one pitied, 'till I spied
The long fair hair, pale face and hand
  That grasped a roll with ribbon tied.

More eloquent than words it taught
  The story of where he had been;
How he, with Verse of Welcome, sought
  The editor and found him in.

Up by the shattered window stood
  The editor who smiled, while some
His deed approved as best they could;
  And now I'm *sure* that Spring has come.

—*Henry S. Kiehl, in Judge.*

THE MADNESS OF MUSIC.

Its Effect on the Central Molecule, and Dr. Selsam's Cure.

On the evening of the 19th of September, 1855, I made a call upon my old university friend, the illustrious Dr. Adrien Selsam, professor of general pathology, chief of clinics, family physician to the Grand Duchess, etc., etc. I found him alone in his magnificent apartments on the Bergstrasse. His elbow was resting on a small black marble table, while his eyes were plunged, so to speak, into a crystal bowl, which appeared to me to contain perfectly limpid water. Notwithstanding the purple rays of twilight which effected an entrance through the three high windows which overlooked the palace gardens, the thin face, sharp nose and peaked chin of my friend Selsam—as I now saw them reflected in the glass bowl—assumed a ghastly hue. One might readily have imagined it a guillotined head, an illusion which was heightened by the scarlet lining of the dressing-gown.

Raising my voice, I asked:

"What are you doing there, my friend? Meditating, I should judge, upon the doctrine of Sangrado?"

But he met my raillery with such an ambiguous expression of countenance that I was completely surprised.

"Theodore," said he, after a pause, "this is not a subject for jesting. I am studying the malady of your respected aunt, Lady Annah Wunderlich. Her symptoms, as you described them yesterday, are very serious; those exaltations, those ecstasies, that nervousness, and, above all, the exaggerated expressions of the venerable lady in alluding to Haydn's creation, Handel's oratorios, and the symphonies of Beethoven—all indicate a very alarming disorder."

"And you pretend to have discovered this in that bowl of fresh water?"

"Just so; it was a most fortunate chance that brought you here. I was wishing for you."

Then, pointing to a violin which hung upon the wall:

"Will you play for me the 'Requiem' by Mozart?"

This request seemed so singular that I could not but wonder whether my friend Selsam, like my poor aunt, was not becoming a little childish; but he, divining my thoughts, smiled ironically, saying:

"Reassure yourself, dear Theodore, my intellectual faculties are unimpaired. I am on the eve of a grand, a sublime discovery."

"Good! That's all sufficient."

And taking down the violin I examined it with a covetous eye. It was one of those famous Levenhaupt, a dozen of which had been made by order of Frederick II. wherewith to accompany his flute—perfect, irreproachable instruments, which are deemed by certain connoisseurs the equal of the Stradivarius. Be that as it may, scarcely had I run the bow across the strings, than all that I had heard in its praise fell short of the reality. The elegance of the work, added to the exquisite purity of its tones transported me to the seventh heaven.

"O, great, great master!" I exclaimed. O, sublime musician! Who could be insensible such grace, strength and inspiration!"

My hat fell upon the floor, my eyes sparkled, my knees trembled, I was beside myself. Selsam, the crystal bowl, and my aunt's illness no longer existed for me.

Finally, after the lapse of an hour, I arose, as from a dream, from Dr. Adrien's lounge, upon which I had been reclining, and asked myself wonderingly, what had transpired. I saw Selsam holding a strong magnifying glass before the bowl; the waters in it were troubled; thousands of infusioria crossed one another in every direction.

"Well, Selsam," said I, in a feeble voice, "are you satisfied?"

Then with a beaming face he approached me, and taking both my hands in his impressively, he exclaimed:

"Thanks—thanks, my dear and worthy friend, you have rendered science a valuable service."

I was wonder-struck. "What! by playing a piece of music I have contributed aught to science—I?"

"Yes, dear Theodore, I will not leave you in ignorance of the glorious part which you have taken in the solution of a grand problem. Come, follow me; you shall see all—understand all."

He lighted a candelabrum—night having fallen—then opened a side door, and signed to me to follow him. I experienced the most profound emotion while passing through several successive apartments, as though my entire being were about to undergo some subtile change, that I would now receive the key to hitherto invisible worlds. The candelabrum cast a lurid light over the sumptuous furniture of the elegant establishment; the ornaments, the pictures, the carpets faded away in the shadows; smiling faces peeped at us from out their frames as we passed by. The light crept in and out of the gilding, and finally conducted us to the top of a high stair-case, the baluster of which was of bronze. We descended into an interior court, the sound of our furtive footsteps echoing in the distance like a mysterious whisper. Several doors opened upon this court; before one of these Selsam stopped, and turning toward me said:

"This is my amphitheatre. It is here that I work, that I dissect. Do not be alarmed—Nature parts with her secrets only through the hands of the dead."

It is useless to deny that I was frightened. I would have receded, but Adrien having passed in without awaiting my reply, I could not but follow him. I therefore entered, pale with emotion, and on a large oak table saw a corpse—the corpse of a young man—extended, the hands crossed upon his bosom, his head thrown back, his eyes open—as motionless as a clod of earth. He had a fine face. In his left side was a deep wound which penetrated the cavity of his chest. But it was not the sight of this wound, nor yet the sombre character of the head, which most impressed me, but the immobility—the silence.

"This, then, is man!" thought I; "inertia, eternal repose!"

I was pondering this overwhelming thought when Selsam, placing the edge of his scalpel on the resistless body, said:

"All of this lives—all of this will soon revive! Thousands of beings, enslaved by a like force, will recover their independence.

The only thing which absolutely ceases to be, in this body, is the power to command; the power which indicates a single direction to all these individual lives—the will! That power is there."

He struck the head, which gave back a hollow sound, as though it were made of wood. I was shocked, even though Selsam's words reassured me somewhat.

"All, then is not annihilated," thought I; "so much the better. I prefer to live in detail rather than not live at all."

"Yes," cried Selsam, who seemed to read in my face the thoughts which passed through my mind; "yes, man is immortal in detail; each of the molecules of which he is composed is imperishable; these live always and forever! But their lives, their sufferings are transmitted to the soul which governs them, consults their needs, and holds them subject to will. We have sought the highest type of government; we presume to have found it in a hive of bees, in an ant-hill; the ideal model of government is —— there."

Thereupon he plunged his scalpel into the corpse and opened it completely. I drew back from it with horror; but he, appearing not to have observed the movement, calmly continued:

"Let us first observe the mode of action and transmission of the soul. You see these thousands of white fibers which branch out all over the body; they are the nerves, the highways of this vast country, whereon incessantly come and go, quicker than lightning, dispatches carrying to the extremities the orders of the central molecule, or warning of one of the necessities and dangers which affect or threaten its innumerable subjects. Thus all move, all act, all tend to the one end assigned by the soul. Nevertheless, each molecule has its own task and individual nature; thus: here are the respiratory organs, the lungs; here are those by which the blood is circulated, the heart, veins and arteries; here those of the digestion, the stomach, the intestines. Do not imagine that they are composed of the same elements, the same beings. By no means. When decomposition takes place, the lungs produce that class of insects called doures, or gourd-worms, who fasten themselves on like the leech; their bodies are long and filiform. The intestines produce the lombuct, or lob-worm, formed of fleshy rings; they are cylindrical, of a red color, thin at the extremities, and in no particular do they resemble the gourd-worms. The heart produces yet another variety, and so on with each organ. The living being is a whole universe subject to a single will. And rest assured that each of these infinitesimal creatures has an immortal soul. The Supreme Being shows no preference in the gift of immortality, because, from the smallest atom to incommensurable space, all are subject to absolute justice; there is never a molecule out of the sphere assigned to its capacity. That alone illustrates the admirable order which prevails in the universe. Even as man—mere particle of humanity that he is—necessarily obeys God, even so does the molecule act in compliance with the will of the living man. Can you now conceive, Theodore, the infinite power of that Great Being whose will acts upon us as our souls act upon our flesh and blood? Nature, in its entirety, is the flesh and blood of God. He suffers through it, sees, thinks, acts through it; hence each of these atoms is imperishable, for God can not perish in the least of His atoms.

"But where, then, is liberty?" I exclaimed. "If I am an enslaved molecule, how can I be responsible for my actions?"

"Liberty is intact," replied Selsam, "for the molecule of my flesh can revolt against my soul; but when that comes to pass it destroys itself, and my organism is eliminated. It has found its liberty, it has also paid the penalty; I am also free. I can revolt against the laws of God; I can abuse my power over the beings of which I am composed, and so effect my dissolution. The molecules become again independent, and my soul loses its power. The mere fact that we suffer for our faults proves that we are responsible for them, and consequently are free."

As I could offer no reply to this a pause ensued, during which we looked at each other as though trying to fathom each the other's soul.

"All this, my dear Selsam," said I, finally, "appears very logical—a superb theory; but I fail to perceive its connection with your bowl of water, my aunt's malady, and the air of music which I played for you."

"Nothing more simple," said he, smiling; "you are certainly aware that vibration of sound causes sand heaped upon a drum to take the impress of rapid movements, making it trace geometrical figures of marvelous regularity?"

"Certainly; but"——

"But," exclaimed he, impatiently, "allow me to finish. Even thus does sound act upon the molecules in liquids, whence result infinite combinations, but always with this difference, that the molecules being susceptible of motion, the figures resulting from them are inanimate; that is what physicians call equivocal creation. Now, sound acting upon the nervous system produces an electric current which, in its turn, acts upon the liquids contained within the body, whence spring thousands and millions of insects which attack the organism and produce a multitude of diseases, such as deafness, dullness of sight, epilepsy, idiocy, nightmare, convulsions, whooping-cough, ringing in one's ears, St. Vitus' dance, nervous colic, and all those other numerous ills to which women who are fond of music are particularly subject, and the cause of which has been an unsolved mystery until this day. The insects in question are—viz.: the milleped, the parasite, the coleopteran, the lepidopteran, the neuropteran, the hymenopter. All these gnawers ravage the interior of the body until it resembles a piece of worm-eaten furniture. It is the history of the Roman people, enervated by Asiatic luxury, devoured by the barbarians without resistance."

Selsam's description positively made my hair stand on end.

"And you believe," said I, "that music is the cause of these disasters?"

"Unquestionably. It is sufficient to see old musicians who play the organ, piano, or harp, to be convinced of it. Your unfortunate aunt is menaced with ruin. I know of but one remedy by which she can be saved."

"And that remedy, Selsam? Inasmuch as I am her heir-apparent it behooves me to use every means to protract her existence."

"Yes," said he, "I appreciate your intuitive delicacy; it is affection, not self-interest, which actuates your conduct. But it is late, Theodore—I just heard the clock strike midnight; return to-morrow evening at ten o'clock, when I will have prepared the only remedy by which Lady Annah may be saved. The cure will be radical—I pledge you my professional word to that effect."

"Doubtless, doubtless; but can you not tell me?"

"To what purpose? To-morrow you will know all. Now sleep overcomes me."

Once more we crossed the court-yard; he let me out through a gateway opening on the Bergstrasse. We shook hands on saying good-night, and I regained my chamber, lost in the saddest reflections.

* * * * * * * * * *

I found it impossible to close my eyes that night; I racked my brain wondering how Selsam would expel the ascarides from my worthy Aunt Wunderlich. This idea never left me throughout the following day. I walked back and forth. I asked myself the question audibly, and the passers-by in the street turned back to gaze at me, so apparent was my agitation.

And in the evening, when dining *tete-a-tete* with my aunt, I could not help gazing upon her with an eye of compassion. "Alas!" thought I, "what would you say, poor Annah Wunderlich, were you aware that millions of ferocious microscopic beasts are bent upon your destruction, while you are tranquilly drinking a cup of tea?"

"Why do you look at me so strangely, Theodore?" she suddenly asked, nervously.

"O, for no reason—none at all!" I stammered.

"Yes, I see that you think me ill to-day. I look ill, do I not?"

"I can not deny it. You are very pale. I will wager that you have received some new music."

"You are right. I received yesterday the opera of 'The Great Darius,' a sublime work, a"——

"I was certain of it. You have passed the night at the piano, enraptured."

She became crimson. "What am I to understand by this, sir? Have I no longer the right?"——

"Certainly. I have said nothing to the contrary. But it is ridiculous! You are ruining your nervous system. You"——

"Nervous system? You are demented. You do not know what you are talking about."

"For Heaven sake, be calm, aunt! Anger excites electricity, which produces, in its turn, insects by the millions."

"Insects!" she cried, springing from her seat; "insects! Have you ever perceived insects upon my person? Wretch, how dare you? Insects? Louise! Katel! show monsieur the door."

"But, aunt"——

"Go! Go! I disinherit you!"

She shrieked, she stuttered, her cap fell off—altogether it was frightful.

"Come, come," I exclaimed, rising from my seat, "do not let us quarrel. The deuce take it, aunt, I was not referring to such insects as you supposed. I was speaking of the milleped, the coleopteran, the parasite—in short, to the innumerable multitude of little monsters who are lodged in your body, and are gnawing into it."

At these words, Aunt Wunderlich fell back upon the sofa, with arms extended, head fallen forward upon her bosom, and her face so pale that the rouge on her cheeks looked like a blood-stain.

With a single bound I reach Selsam's hotel. Arriving there, I was as white as a corpse.

"My friend," I exclaimed, breathlessly, "the crisis is reached!"

There I stopped, transfixed with astonishment. Large company had assembled under Selsam's roof. There was M. the Conservator of the Archæological Museum, Daniel Bremer, wearing a powdered wig and maroon coat; his face was round, his eyes level with his forehead, like a frog's; he held at his mouth a gigantic bag-pipe, in the use of which he seemed to be instructing the others. There was also present M. the Precentor, Christian Hoffer, with an opera hat, seated in an arm-chair, with his long legs lost to sight under the table. His long, bony fingers were playing with the keys of another strange-looking instrument, formed like a tube. So absorbed was he in the examination of this that he did not even raise his eyes as I entered the room. MM. Kasper Marbach (a director of St. Catherine's Hospital) and Rebstock (dean of the Faculty of Belles-Lettres) each attired in black with white neck-ties, were also of the company, the one armed with an immense bronze-plate, the other fenced in by a species of kettle-drum

These grave personages, seated around the candelabra, some with inflated cheeks, others with drum-sticks raised in the air, all with serious faces, impressed me as so grotesque that I stood transfixed, like one in a dream. Selsam, without arising, gravely assigned me a chair, and M. the Conservator of the Museum continued his explanations.

"This, gentlemen," said he, "is the famous *buscatibia* of the Swiss; its power of sound is tremendous; it can prolong an echo until it resounds above the breaking of the billows. If M. the Counselor Theodore wishes to try it, I doubt not he can draw from it magnificent sounds."

He handed me the pipes, with an air of solemnity, and then addressing himself to M. Kasper Marbach:

"Your drum, sir, is the most admirable of its kind; it is the *karabo* of the Egyptians and Abyssinians. The jugglers have recourse to it to make serpents and bayaderes dance."

"And those?" inquired Marbach, waving alternately to his right and left hand.

"Fine!—all fine! You can not fail to succeed."

"And as for M. the Dean, he has but to give a blow from time to on his plate, the famous *tam-tam*, the lugubrious sounds of which resemble the knell of the great bell of our cathedral. The effect, under any circumstances, would be grand, but in the silence of a night it will be superb."

"Do you understand everything, gentlemen?"

"Perfectly."

"Very well, we can go."

"One moment," said the Doctor, "It will be necessary to advise Theodore of our determination." Then addressing himself to me:

"My dear friend, the case of your worthy aunt demanded a powerful remedy. After giving the matter careful deliberation, a brilliant idea enlightened me. What is her trouble? Nervous prostration—debility, resulting from the abuse of music. Good. What action does such a case demand? The most radical is to combine in the same treatment the principal of Hippocrates—*Contraria contrariis curantur*—and that of our immortal Hahnemann—*Similia similibus curantur*. What is there more unlike the insipid and sentimental music of our opera than the wild, fantastic music of the Hebrews, the Caribs and the Abyssinians? Nothing. So I borrow their instruments, I execute an air of the Hottentots in the presence of your respected aunt, and the principle *contraria contrariis* is satisfied. On the other hand, what more closely resembles music than music? Nothing. Hence the principle *similia similibus* is also satisfied.

The idea appeared to me sublime. "Selsam," I exclaimed, "you are a genius! Hippocrates has established the thesis and Hahnemann the antithesis of medicine; but you have just created the synthesis. It is a wonderful discovery!"

"Yes, I am well aware of that," said he; "but allow me to finish. I laid the matter before M. the Conservator of the Museum of Travels, who not only consented to lend me the *tam-tam*, the *busca-tibia*, the *karabo* of his collection, but kindly volunteered his co-operation by offering to play the fife himself, which completes our harmonic improvisation in a most happy manner!" I bowed profoundly to M. the Conservator in recognition of my deep gratitude. He appeared touched, and said:

"M. the Counselor, I am happy to be of service to you, as well as to Lady Annah Wunderlich, whose numerous virtues are obscured by this most unhappy exaggeration of musical enjoyments and abuse of stringed instruments. Can we not succeed in bringing her back to the primitive and simple tastes of our forefathers?"

"Why not?" I cried.

"Proceed, gentlemen," said Selsam; "proceed."

We all descended the main staircase. The clock struck eleven. The night was dark; not a star shone in the sky. A rising wind-storm caused the weathercock to creak and the panes of glass in the street-lamps to rattle. We glided along within the shadow of the walls like criminals, each one concealing his instrument under his coat. Arriving at my aunt's door, I noiselessly introduced the key into the lock, and, Selsam having lighted a taper, we entered the vestibule in silence. There each one took up his position facing the bedroom, and with his instrument in readiness, awaited the signal. All was accomplished so far with so little noise that nothing had stirred about the house. Selsam gently opened the door, leaving it ajar; then, slightly raising his voice, said:

"Begin!"

I breathed into my bagpipes—the *tam-tam*, the fife, the *karabo*, all resounded simultaneously. Impossible to describe the effect of this wild music. It is a wonder that the roof of the vestibule did not fall through. We heard a cry; but, far from heeding it, we seemed to be incited by a sort of frenzy; the kettle-drum, the *tam-tam*, redoubled their noise with such effect that I could not even hear the sound of my pipes, whose din would put thunder itself to silence; but the *tam-tam* was louder yet; its long, lugubrious vibrations awakened in us a feeling of indescribable terror, such as one might experience on the eve of a feast of the cannibals, at which he expected to figure as a roast; our hair stood on end—the trumpet of the last judgment sounding the resurrection could not produce a more tragic effect. Twenty times Selsam called to us to stop. We were deaf; a sort of diabolical frenzy had taken possession of us. Finally, exhausted, out of breath, and unable longer to stand, so fatigued were we, the horrible tumult ceased of itself! Then Selsam, raising his finger, whispered:

"Silence! Listen!"

But our tingling ears could not detect the least sound. After a moment, the doctor, slightly anxious, pushed open the door and entered the chamber to observe the effect of his remedy. We impatiently awaited his return. His protracted absence made me uneasy, and I was about to investigate the cause of it when he reappeared, as pale as a ghost. He looked at us strangely.

"Gentlemen," he said, "we will depart!"

"But what is the result of the experiment, Selsam?"

I laid my hand on his arm; he turned away abruptly, and replied:

"Well" (hesitatingly) "she is dead!"

"Dead!" I cried, recoiling.

"Yes; the electrical commotion was too violent; it has destroyed the ascarides, but, unfortunately, it has also destroyed the central molecule. However, this proves nothing against my discovery; quite the contrary. Your aunt died cured!"

And he walked out.

We followed him, pale with terror. Once in the street we dispersed to the right, to the left, without exchanging a word; the denouement of our adventure had terrified us.

On the morrow the whole city learned that Lady Anna Wunderlich had died suddenly. The neighbors and servants pretended to have heard strange, unusual, terrible noises, but as there happened to have been a violent storm that night, the police did not investigate the matter. Moreover, the physician called in to ascertain the cause of death, declared that Lady Annah Wunderlich had died by a stroke of apoplexy while playing the final page of "The Great Darius." She was found seated in an arm-chair before the piano.—*Translated from the French for the San Francisco Argonaut, by Sallie Ritchie Heath.*

ABOUT PEARLS.

Necklaces and Bracelets Still in Fashion—How the Gems are Cared For.

Decolette ball dresses with no sleeves at all, and Worth's promise of flowing sleeves next summer, explains in part, at least, the increased favor with which necklaces and bracelets have been received in the world of fashion this winter. Single stone necklaces and pearl necklaces are the sort most worn by milady on full dress occasions, while gold and silver beads form a necklace to her liking for afternoon and reception wear. In the single stone necklaces those composed of small, but fine diamonds are much sought after, the stones being mounted so that no gold is visible. Often a pendant containing a flawless colored gem of great value is suspended from a diamond or pearl necklace, or it may be fashionably worn pending from a simple gold chain.

Pearl necklaces are composed of pierced pearls strung on silk threads. Sometimes the pearls are graded in size and color, the more decorative specimens finding a place in the front of the strand.

Pliny placed the pearl next to the diamond in value, and supposed the former preceded from drops of dew swallowed by the oyster. Importers and dealers of the present day, while they may not adopt the dew drop origin theory, concur in giving great value to drop pearls of large size that possess the wonderful polish and luster characteristic of the gem. Black pearls, when perfect, rank exceedingly high, as do also pink pearls of good form. Of small pearls and such as are more or less defective in form and lustre, it may be said, as of inferior grades of diamonds, ruling prices are considerably less than before for some years.

Pearls deteriorate by age, contact with acids, gas and noxious vapors of all sorts. This is especially true of pierced pearls. Various means of restoring them have been tried, but experience shows them to be useless. The best way to preserve pearls is, wipe them with a clean linen cloth after being worn and deposit them, wrapped in linen, in a closed box or casket. A leading importer of pearls advises that pearl necklaces, which are liable to deteriorate by coming in contact with the skin, be restrung once a year, as drawing the silk thread out and in through the pierced parts tends to cleanse the pearls. In Ceylon, we are assured on fairly good authority, that when it is desired to restore the lustre to oriental pearls the pearls are allowed to be swallowed by chickens. The fowls with this precious diet are then killed and the pearls regained in a white and lustrous state.

With the present tendency to a more decorative style of dress, and to oriental effects in jewelry, colored stones, including gems and what are termed semi-precious stones, such as the spinels, tourmalines, chrysolites and the like, remain fashionable as ever. Among precious gems the sapphire is the most popular stone as well as the cheapest in price, owing to a plentiful supply. The emerald, without flaw, especially if of good size, is rarest of all, though not so much of a favorite as the ruby of perfect tint.—*Jewelers' Circular.*

—Cataract in the eye really means an opaque or clouded condition of the lens. With us the operation for the removal of cataract is considered a very delicate one, and is intrusted generally to specialists. A correspondent of *Chambers' Journal* says that in India he has seen a native operate in the street with his pen-knife in a few moments—receive his fee of one rupee, and pass on among the crowd shouting for more patients, and yet the operation under their hands is generally successful. —*Health Monthly.*

—While eating its food a horse belonging to a citizen of Williamsburg, N. Y., was bitten in the lip by a rat, and died from the effects of the wounds thus inflicted.

LINCOLN AS A LAWYER.

In What His Peculiar Strength at the Bar Consisted.

As a lawyer Mr. Lincoln never attained the high rank and reputation of Evarts, Brady, Seward, Carpenter or Webster. He never had their kind of practice, nor did he have fifty thousand dollars as a retainer, or a great city press to report his speeches to the million. His largest fee was $5,000 in a railroad case.

Although notably successful, his peculiar strength lay in his reasoning of facts more than the law he cited. Few men ever lived with a broader grasp of human nature and a clearer way of explaining things. This came to him by his genius and intuition, and that early battle with poverty of resources to gain wisdom that gave him a marvelous memory of all he learned.

A large, ungraceful frame, that to others would have been a hindrance, was to him, in Illinois, an element of greatness. As a trial lawyer, his grasp of the merits and mastery of the right theory to win with made him a powerful advocate before a jury. His manner was so plain that it enforced attention; his eyes were piercing, his look so earnest, his words so apt while speaking, that even an adversary became convinced by his reasoning. One who heard him in Leavenworth, during the early Kansas troubles, said: "Although his audience was largely of enemies, fifteen minutes later they were cheering him like friends." He put a clear reason in all that he said, and clinched it by an incident that carried conviction straight to the hearts of his hearers. His keen, quaint, crisp stories were only side-lights to bring out his word-painting in bolder relief. Like the brilliant Carpenter, whose style was somewhat similar, he held his audience by a flower or a tear, as best suited his purpose, even without seeming to be eloquent.

His modest office in Springfield was in the second story of a plain red-brick block, reached by narrow, dingy stairs; large and poorly furnished, supplied with numerous odd-looking chairs and tables and not very inviting in appearance. Such conveniences as typewriters, file-cases, letter-files and book-racks were then unknown in Springfield. A few old briefs remained in his plain hand-writing, and very many law-books lined the walls, in cases, but neither rich carpets nor fine ceilings adorned the firm's office. The windows were of small glass and not attractive. The days of good law offices had not arrived, and the solid comforts of the average city lawyer were all unknown to Mr. Lincoln, save as he found them with his favorite counsel, Leonard Swett, in Chicago.

Born and reared in poverty, he inherited by it both a fund of humor and a vein of sadness that never left him. In his struggle with the world in youth, and with war in manhood; called to high stations before he was fully known to the people, it is doubtful if he ever fully realized the fame he had won as an advocate or the genius he possessed as a man. He was born of his time, a creature of the age of giants, a genius from the people, all the greater for his struggles, for he really did more than any man of his day to destroy caste and give courage to the lowly, and therein he wrote the brightest pages of human progress.

With Lincoln promoted labor became honorable, and men no longer denied their humble beginning.

Lincoln, the lowly, the exalted, the pure man in rude marble, the plain cover to a gentle nature, the giant frame and noble intellect! The shaft that marks his silent resting place, the books he read, the office he used, the strong body that covered his warm heart and wise purposes were only the outer symbols to the higher gifts of his Creator! All gifts and graces are never found in one person. He is great if the good predominates. All are not born equal. Gifts are diversified; but if ever a man had the *genius of greatness* it was Lincoln. As all are eloquent in that which they know, he was eloquent in the affairs of life.—*J. W. Donovan, in Current.*

A Great General.

Major John A. Rudd, formerly of the Confederate army of the Southwest, and who met Grant and his men on the gory field of battle several times, said to the *Hatchet* yesterday:

"Grant was a great General. He has never been given full credit for his ability nor the full measure of his goodness of heart. General Grant is loved by the Southern soldiers, to whom he has always been a true friend. Should he die they will be found among the most sorrowful of the mourners at his bier. But I hope he may yet survive the treatment of his scientific attendants. Some people in the South complained of certain objectionable things that General Grant did. To these he said: 'I am simply enforcing the laws as I found them on the statute-book. The best way to get rid of a bad law is to enforce it strictly.'"

Major Rudd related the following anecdote of the great Captain:

"I called on him several years ago in behalf of a certain ex-Union officer who was incarcerated in the Missouri State prison, unjustly in my opinion. I made a plain statement of the case to him and concluded with the remark that, as a Confederate soldier who had been shot all to pieces, I asked that the facts in the case be given the attention they deserved. General Grant replied: 'The matter shall be attended to.' On the following day the Union veteran was released. Grant saw the injustice of his incarceration at once, and acted promptly, and in the same manner that he struck his telling blows during the war."—*Washington Hatchet.*

—A young man in Abbeville, S. C., suffering from pneumonia, called in a physician, who left him a small vial of veratrum, to be taken internally, and a liniment composed of hartshorn, turpentine and chloroform for external application. The patient reversed the directions, swallowing the liniment, and the next day was well.—*Louisville Courier-Journal.*

—New York barbers put mustaches in curl papers in order to give them a fine curl by the time their owners have been shaved or had their hair cut.

PUNGENT PARAGRAPHS.

—A Lewiston seamstress carelessly left a needle in the back of a young lady customer's dress, and now a particular friend of the family has his arm done up in arnica.—*Lewiston (Me.) Journal.*

—It is claimed that you can tell when it is noon-time by looking at a cat's eyes. We can't see what a cat's size has to do with noon-time unless you are thinking of having rabbit for dinner. —*Burlington Hawkeye.*

—There are said to be over two thousand postmasters in the United States with a salary of less than ten dollars a year. At Redelia, N. C., last year, the salary was nine cents.—*N. Y. Mail.*

—When the fire reporter gets as far as "the lurid glare of forked flames shooting athwart the dark-domed sky," it is time for the city editor to put on a condenser and get at the facts of property destroyed.—*N. O. Picayune.*

—Not sugar-coated: She—"There is often a vast difference between a boor and a bore." He (fishing)—"And are most men either one or the other?" She (wearily)—"Well, a man is a boor when he does not call on us, and generally a bore when he does."—*Life.*

—Maxfield Bean was in a manufacturing town last week, when a very fashionably dressed young man passed along. He was told that it was a clerk in one of the cotton mills and quite a lady's man. In fact the girls had spoiled him. "That was my idea of him," said Maxfield Bean; "if not spoilt, I thought he was a little mill dude."—*Melrose Journal.*

—"Are you fond of etchings?" asked the young man who had taken the hostess' pretty niece from the country down to supper. "As a general thing, yes," she answered, looking up into his eyes with an engaging frankness that threatened havoc to his heart; "but, she added hastily, as he started to say something pretty, "not any to-night, thank you—it is rather late. A very little of sherbet is all I care for."—*Boston Beacon.*

—First Bohemian—What's the matter? You look ill. Second Bohemian—I am suffering from writers' cramp. "Indeed! But you seem to have the use of your wrist, and I did not suppose you had had much chance to be overworked." "Ah! it is not in my wrist, and is not caused by overwork." "Then where is it, and what is the cause?" "It is in my stomach, and is caused by a vacuum."—*Philadelphia Call.*

—A nice old gentleman, seeing a lad eating an orange, told the boy not to swallow the skin, because it would make him sick. The lad was thus saved from probable sickness by the nice old gentleman's thoughtfulness. The lad threw the skin out at the window, and the nice old gentleman went out and sat down very hard upon the sidewalk. The nice old gentleman will not tell lads hereafter that orange peels should not be eaten—*Boston Post.*

—Dear to the heart:

How dear to the heart are the chestnuts of childhood—
  The baldheaded jokes that our infancy knew,
The puns prehistoric we vented in wild mood,
  And ancient conundrums so feeble and few!
What sweet recollections rise quickly and work us
  High up to that pitch where the briny tears well,
When we hear from the lips of the clown at the circus
  The crutch-ridden chestnuts we all love to tell!
The moss-covered chestnuts, the mildewed conundrums,
  And jokes that were aged before Adam fell.

EL MAHDI.

A Hint to Good Boys Who Desire Information of Current Events.

A boy about twelve years of age entered a store on Michigan Avenue the other day and asked for the proprietor, and when confronted by that individual the lad hesitatingly inquired:

"I—I wanted to ask you for some information about El Mahdi. Man up the street said you were posted, and that you'd be glad to help a boy along."

"Y-e-s," said the proprietor as he scratched his ear—"jess so. El Mahdi—y-e-s. Say, bub, I'm awfully busy this morning. Ask the cashier, and here's a quarter for you. I like to help a boy along, but I'm rushed this morning."

The boy went down to the cashier's desk and said:

"'Nother boy and me are seeing who can find out the most about El Mahdi. Please tell me all you know."

"El Mahdi—y-e-s," replied the cashier. "Hang it! I've read of him a dozen times over, and the name is very familiar. Y-e-s—jess so. Say, bub, our floor-walker knows everybody and everything. Here's fifteen cents for you if you don't bother me to-day."

The boy passed along to the gentleman mentioned and said:

"My teacher wants me to find out all I can about El Mahdi. Where was he born—how old is he—what does he do for a living—please give me all the facts you can?"

The floor-walker looked the innocent boy in the eye for a long half-minute. Then he pulled a quarter from his vest pocket, passed it over, and kindly whispered:

"Not to-day, my son, but some other day. They'll probably tell you next door, as they aren't rushed!"—*Detroit Free Press.*

A Handsome Reward.

While walking on a Galveston wharf Mrs. Snively fell into the bay and was rescued with difficulty by a stranger. Mr. Snively shook the hand of the rescuer of his wife, and said:

"You have saved my wife from a watery grave, and I must reward you for it."

"I only did my duty. I do not desire any remuneration."

"Well, if you will not accept my money I'll give you a piece of advice that will be worth something to you. It will save you a doctor's bill. Don't eat sausage in summer. I know what they are made of. I'm a butcher by trade."—*Texas Siftings.*

—Thirteen hundred houses were built last year in Washington, at a cost of $4,000,000.

FOR OUR YOUNG FOLKS.

A BOY'S JUDGMENT.

It's strange as people grow older what lots of
sense they lose,
And how they get full of notions, and begin
to pick and choose,
And start on such strange ideas, and want
such queer things done—
Why, what is a fellow to live for, if he never
can have any fun!

Now there are fathers and mothers, as good
as good can be,
But they fret if a boy goes coasting, for fear
he'll run into a tree;
They fret if a boy goes skating, for fear he'll
get a fall;
And they're sure that he'll come home
broken, if he asks to play base-ball.

And as for stealing a ride as the big teams roll
along,
And as for a swim in the river, if the current
be swift or strong,
Or climbing a roof on a ladder, or shinning a
good high pole—
Why, they look at a boy if he tries it as if he
had got no soul!

They want you to enter the parlor and bow
like a grown-up man;
They want you to move without racket—just
show me the fellow who can!
To come down stairs on tiptoes just creeping
as still as a mouse,
And to keep things quiet and chilly as if boys
never lived in the house!

When you open your eyes in the morning and
are lying awake in bed,
They'd rather you wouldn't take pillows to
shy at another one's head;
They'd like you to talk in whispers and never
to rant or shout,
And empty your jacket pockets so they never
would look bulged out.

Then, in spite of all this nonsense, they'll look
in a fellow's eyes
As if you were the ones who were foolish, and
they were the ones who were wise;
You'd think as people grow older, they ought
to grow wiser, too,
But I wouldn't make such blunders in talking
to boys—would you?

—*Wide Awake.*

FUNNY FISHING.

Uncle Harry's Story of How He Learned a New Way to Catch Owls.

"Where did you get the big owl, Uncle Harry?" asked Tom, as he lounged into his uncle's room one afternoon and threw himself into a chair. The owl referred to was a large, gray fellow, handsomely stuffed, and perched above Mr. Ferris' desk.

"I fished for him," said Uncle Harry, looking up from his work.

"Fished for him?" repeated Tom, staring at his uncle incredulously.

"Yes; you know there are a great many ways of doing some things, and one way of catching owls is to fish for them," said his uncle, smilingly.

"Tell me about it," pleaded Tom, settling himself for a story.

"Well," said Uncle Harry, laying down his pen, and turning in his chair, "I was out gunning one afternoon down on the east end of Long Island. Your cousins Frank and George Ford were with me, and we had just seated ourselves under a tree for lunch, when George, who is an enthusiast on the subject of natural history, happened to see some peculiar-looking balls at our feet.

"What are those things?" asked Frank, as George was poking at them with his pen-knife.

"Pre-Adamite marbles," I suggested, laughing.

"Some new-fangled bug that George is going to take home with him and let loose in his room," growled Frank, who rooms with him, and does not sympathize with this love of natural history. George kept on turning over the little balls with the point of his knife, and finally our curiosity got the better of our love of fun and we both joined in asking:

"What are they, anyway?"

"Owls' pellets," answered George, laconically.

"What are owls' pellets?" I pursued.

"Well," said George, slowly, "you know that when an owl eats a mouse or a bird he takes down skin, bones and all, and then after a while he rolls the skin and bones up in a little ball, and spits them out. Here is the skull of a mouse," he continued, holding up a delicate bit of a bone on the point of his knife.

"Well, said Frank, "I don't see anything very wonderful about that."

"No," answered George, quietly, "but these owls' pellets indicate that there is a nest in the tree." We all started and looked curiously up into the tree; we had not got over our boyish love for birds-nesting, and an owl's nest was certainly a curiosity.

"There is no nest on this tree," I exclaimed, after a careful search.

"In the tree, not on it," said George; "you see that hole up there. There is an owl's nest there unless I'm much mistaken."

"Do owls always live in hollow trees?" asked Tom, interrupting his uncle's story.

"Always," answered his uncle, "except the burrowing owl of the far West, which lives in the ground with the prairie dogs. When we had decided that an owl's nest was in the hollow tree," continued Uncle Harry, resuming his story, "we immediately began to make preparations to capture the inmates. Frank threw off his coat, and was about to climb the tree, when George stopped him.

"Hold on," he said, "you must not go to work in that way, for in the first place, the hole is probably too deep for you to reach, and if you should get your hand down, the owl would probably make you take it out much more quickly than it went in."

"How are you going to catch them, then?" asked Frank.

"Fish for them," replied George.

"How?" I inquired.

George thought for a moment. "Of course neither of you has a ball of worsted?" he said musingly.

"No," said Frank, sarcastically, "nor an embroidery frame, nor a crochet needle, not in this crowd."

"Because if I had a ball of worsted," pursued George, unmindful of Frank, "I would lower it into the hole, and the natural instinct of an owl seems to be to first attack a thing with his claws; then, if it does not go away, to turn on his back and clutch it with his claws; the worsted being soft, they either can not or will not let go, and you can draw them up out of their nests."

"I have on a pair of woolen stockings," said Frank, pointing to his long tennis stockings. "Why couldn't you make them into a ball and let them down?"

"We could," answered George. "Take them off."

No sooner said than done, and, with the aid of a bit of twine I happened to have in my pocket, the strange fishing apparatus was soon made. "Better let George fish for them, as he seems to understand it," I suggested.

After some trouble George clambered up to the branch just beside the hole, and let the stocking down. He bobbed it up and down with no result, when a strange whirring and clucking was heard in the tree, and George began to pull up the stocking. When the owl had got nearly to the top he stopped. He pulled one way and George pulled the other, and it seemed for a moment doubtful which would gain the mastery. Suddenly the obstruction gave away, and George came tumbling to the ground, pulling after him, its claws securely fastened in the stocking, a large gray owl. I jumped toward it and clutched it tightly before it had a chance to get away.

"Who has the owl?" asked George, feeling of himself to see that no bones were broken.

"I have," I answered. "Ouch!" This latter exclamation was caused by the owl's fastening his strong bill in my hand.

"Or he has you," exclaimed Frank, springing to my assistance. In the struggle the owl was killed, and George was inconsolable, for he had wanted to take him home and tame him.

"A pretty time you would have had taming him," said I, crossly, wrapping my hand in my handkerchief.

"Better begin on a young one," commented Frank.

After examining the dead bird, and some further talk, George decided to try again, and after several ineffectual attempts to make the young owls take hold of the stocking, he succeeded in bringing up two young birds almost fully fledged. George and Frank each took one, I claiming the dead bird as my share.

The young birds lived for some time, and George's got quite tame, so that he would answer to his name and eat from George's hand, but finally they both died. For my part, I have that fellow over my head and this scar on my hand to remember the time I learned a new way to catch owls.—*Brooklyn Advance.*

A CURIOUS PET.

The Pranks of a Tame Woodchuck—How He Played with the Kittens.

Perhaps some of the young readers would like to hear about a tame woodchuck I had a few years ago. There was a boy coming from town one day, and saw some boys tormenting something they had on the ground; when he got near enough he saw it was a little baby woodchuck that had not its eyes open. Being fond of pets he asked them what they would take for it. They replied five cents. So the exchange was quickly made, and he brought it home and laid it in my lap and wanted me to take care of it. I got a teaspoonful of warm milk, but the little thing could not drink, so I opened its mouth and dropped a drop at a time till he had swallowed two teaspoonfuls, then I made him a bed of soft grass and laid him in it, and what do you think he did? He made a small hole and crawled into it out of sight and went to sleep. But when he woke up he was hungry and I had to feed him as I did before, I don't know how many times a day, till he was two weeks old, then he began to drink and open his eyes and began to play just like a little kitten. After he got so he could eat nicely, I used to take him into a lettuce bed I had in the garden. Oh, how he did love it! he would eat till he could not walk into the house, and I would take him in and put him to bed and he would go to sleep. When he woke up he would run after me and bite my dress and take hold of it with his little hands. His feet looked like small hands, and I never was too busy to stop and play with him a few minutes; he was the nicest little pet I ever had. Whenever we had cheese in the house he would smell it and he would run from his hiding place and make a peculiar whistle until we were glad to give him all he wanted. He would sit upon his hind feet, take whatever you gave him and eat every crumb. We had two little kittens that used to play around where he was, and Chuck would watch them; then he would step in and help play, just as they did, lay on his back and kick both back and front feet, but as he grew older he would play so rough it would end in a quarrel, kitties running one way and he another.

One day I heard a noise in Ollie's sleeping-room, and in going in there what do you think I saw? Why, Chuck on the bed between two sleepy kitties, patting first one, then the other, till he woke them up to play; and for about ten minutes they played, when the kitties went out of the window and he rolled over and went to sleep. Every day he would crawl into the window and lay down between the kitties and sleep. No matter where he was, if we wanted him we would call Chuck, Chuck, Chuck, and he would come. He stayed with us till late in the fall; he was large and fat, and he could just waddle along. On Sunday morning he came and wanted his breakfast; then, after a good play with me, he went out into the cellar. We had been troubled with rats. He found their roads and enlarged them and drove them all off, but this Sunday night he did not come when we called Chuck, and we never saw him again, and we felt badly at losing him. There were a great many rats around, and I suppose he found them and liked their company better than ours.—*Detroit Free Press.*

—There are twenty-four gambling-houses in Paris, in which between $30,000,000 and $35,000,000 has been lost during the last five years. The minimum profits of the banks in the club are put down at $1,200 daily. The average income of the bankers is $20,000 per annum.

—During 1884 forty-one steam vessels, 146 sailing craft and seven large barges were built in New England, the total value being placed at $4,313,400. This is a decrease of $1,000,000 in the value of vessels built as compared with 1883.—*Boston Herald.*

—Among the 1,200 laws regulating the French press is one centuries old, which threatens the proof-reader with death for even one error.

FARM AND FIRESIDE.

—A tablespoonful of powdered alum, sprinkled into a hogshead of water and stirred, will, in the course of a few hours, precipitate to the bottom all the impure particles and leave the water clear and pure as spring water. Four gallons would need but a teaspoonful.—*Boston Globe.*

—To make a good water, air and rat-proof floor, first grade the floor and cover with a concrete of coarse gravel and hydraulic lime. Melt asphalt and saturate the concrete with it, leaving a thin coat of hot asphalt on the surface; then scatter hot sand over this and beat it firmly.—*N. Y. Herald.*

—In building wire fence use more wire. Five strands are much safer than three, and the extra cost is money well spent. Ninety cases of injury in a hundred can be averted by this simple expedient. Put light scantling in place of the top strand to make the fence visible.—*Troy Times*

—Composition cake: One and three-fourths pounds of flour, one and a half pounds of sugar, three-fourths of a pound of butter, one pint of milk, five eggs, one nutmeg, two pounds of raisins, two pounds of currants, one teaspoonful of soda.. This will make several loaves.—*The Household.*

—The worst kind of a cribber can be dissuaded from indulgence in his vice by the following means: Nail a piece of sheepskin about eight inches in width, the entire length of the crib; select a skin with long wool, and sprinkle it freely with cayenne pepper. The cure will be speedy and permanent.—*Rural Home.*

—The *American Agriculturist* has a description of a barrel barrow for carrying liquids. A barrel, open at the top, is fitted into the frame of an ordinary barrow with cleats, about one-third being below the top of the frame. It can be advantageously employed in carrying slops to hogs or cattle as well as water for plants.

—What is called a "curiosity table" is the latest novelty for the drawing-room. It is an ordinary round ebony table decorated with anything and everything available, such as photographs, Christmas and Easter cards, handsome buttons, small specimens of crazy patchwork, etc. It is astonishing how ingeniously a table can be covered when time, taste and also sense of humor are brought to bear upon it.—*N. Y. Post.*

—Rice Muffins: One pint of rich milk, one quart of sifted flour, one pint of soft boiled rice, three well-beaten eggs, a tablespoonful of sugar, one teaspoonful of salt, one of soda and two of cream of tartar. Mix sugar, salt, soda and cream of tartar with the flour and rub through a sieve; add the eggs to the milk and stir gradually into the flour; when a smooth, light batter or paste add the rice and bake thoroughly; bake thirty-five minutes in buttered rings in pans.—*Boston Budget.*

—In order to hasten the growth of pieplant, Mr. Allen recommends in the New York *Tribune* sawing flour barrels in two, and placing a half around each plant as early in spring as possible, sinking far enough into the ground to prevent blowing over. Put several inches of horse manure over and around the head of the plant, and if enough can be spared spread a ring one foot wide and six inches thick around the barrel. After the plant begins to show leaves, scrape away the manure from the top, but leave it all around it. On warm days, remove the half barrel, so that the sun can shine full on the plant. After frosty nights are past remove it entirely.

SPRING OVERCOATS.

A Subject of Interest to Gentlemen—Little Change Except in Minor Details.

In spring overcoats there is but little change in style since last season, and an overcoat made then would pass as a fashionable garment now except in the matter of length and a few minor details. One style shown is made of a fancy overcoating. The length for a man five feet eight inches in height varies from thirty-seven to thirty-nine inches, thirty-eight being about the average. The form is clearly defined, but is not closely fitted. The width across the back is but little more than natural, but the shoulder is made about a half inch wider than a year ago. The shoulder seam is straight and high. The side seams are moderately curved, and the tack is a trifle deeper than a fourth of the entire length. A V is taken out under the arm. The edges are bound when the goods are suitable; otherwise they are double stitched close to the edge. The seams are turned and stitched one-eighth inch back. A free roll spring roll overcoat is made of a light-colored wide wale worsted, with a three button cutaway coat of a medium diagonal worsted, a figured white vest and trousers of fancy plaid English trousering. These coats should be cut for the short roll, with only a small V taken out at gorge. The edges should be drawn in but little, and the collar should go on easy at the side of the neck, and have the crease pressed out to within two inches of the center. The shoulders and breast should be made as soft as possible, and the breast should finish nearly flat. Made in this way the fronts will roll free to any point desired or close to the throat.

Another spring overcoat is made of extra wide wale pattern worsted. The lapels are light and turn five inches. The buttons are placed from two and one half to three inches from the edge and five inches apart for the average height. The breast pocket is finished with a welt, but the side and ticket pockets have light flaps to go in or out. The sleeves are cut to show the seam in front of arm, are of medium width, and put in with but little fullness. They are bound to represent shallow cuffs, and have one hole and button. The edges are flat braided. The silk shows to the end of holes.—*American Fashion Review.*

—An interesting point in connection with the sale of the George I. Seney pictures is the prices obtained for the works of American artists. They were comparatively higher than those paid for pictures painted by foreigners.—*N. Y. Tribune.*

THE St. Louis (Mo.) *Post-Dispatch* says, that Mrs. Phoebe Rice, 1208 Madison street, a sister of Hon. H. Clay Sexton, Chief St. Louis Fire Depart., had been a sufferer from inflammatory rheumatism for seven years; the muscles of her hands and limbs were contracted and she used crutches. By a single application of St. Jacobs Oil she was benefited instantaneously, and finally completely cured.

WHY is an escaping prisoner like a musical cat. Because he scales the wall.—*Golden Days.*

NO DEPRESSING effects from Red Star Cough Cure; no nausea; no reaction; no constipation.

"THEY'RE wearing wagons now" was a Vermont little girl's way of announcing the exit of sleighs.

Best Goods are Put in Smallest Parcels.

The old proverb is certainly true in the case of Dr. Pierce's "Pleasant Purgative Pellets," which are little, sugar-wrapped parcels, scarcely larger than mustard seeds, containing as much cathartic power as is done up in the biggest, most repulsive-looking pill. Unlike the big pills, however, they are mild and pleasant in their operation—do not produce griping pains, nor render the bowels costive after using.

RAISINS are sometimes like prophets—for instance, when they are stoned.—*Lowell Courier.*

Woman's Face.

"What furniture can give such finish to a room, as a tender woman's face," asks George Elliott. Not any, we are happy to answer, provided the glow of health tempers the tender expression. The pale, anxious, bloodless face of the consumptive, or the evident sufferings of the dyspeptic, induce feelings of sorrow and grief on our part, and compell us to tell them of Dr. Pierce's "Golden Medical Discovery," the sovereign remedy for consumption and other diseases of the respiratory system as well as dyspepsia and other digestive troubles. Sold everywhere.

ACROSTIC—A rafter. Don't give it away.—*Somerville Journal.*

* * * * Delicate diseases of either sex, howeverinduced, radically cured. Address, World's Dispensary Medical Association, Buffalo, N. Y.

THERE will be three Quakers in the next Congress; undoubtedly they will be great Friends.

The Hotel Colfax.

This summer resort near the "Old Magnesian Chalybeate" and "Colfax" mineral springs, at Colfax, Iowa, 24 miles east of Des Moines and 333 west of Chicago, on the Rock Island & Pacific R'y, will be opened on May 6, for the season of 1885. This splendid hotel can accommodate 300 guests. All its appointments are first-class. Its tables are supplied with all the substantials and delicacies, and its parlors, reading and sleeping rooms with every convenience. Croquet, billiards, bowling alleys and other facilities for recreation. Thayer's orchestra engaged for the season.

The grounds include the "Old M. C." and Colfax springs, which are unequaled for their remedial virtues. Thousands certify to their efficacy; they are a powerful alterative and tonic, and an infallible cure for rheumatism, dyspepsia, indigestion and other ailments.

The Hotel Colfax furnishes the water fresh from the original fountains for drinking and bathing, hot or cold. Its charges are moderate, $10 per week and upward. Parties desiring quarters for the summer should secure them at once.

A Dangerous Case.

* * * ROCHESTER, June 1, 1882. "Ten Years ago I was attacked with the most Intense and deathly pains in my back and —*Kidneys.*

"Extending to the end of my toes and to my brain!

"Which made me delirious!

"From agony.

"It took three men to hold me on my bed at times!

"The Doctors tried in vain to relieve me, but to no purpose.

Morphine and other opiates!

"Had no effect!

"After two months I was given up to die!

"When my wife heard a neighbor tell what Hop Bitters had done for her, she at once got and gave me some. The first dose eased my brain and seemed to go hunting through my system for the pain.

The second dose eased me so much that I slept two hours, something I had not done for two months. Before I had used five bottles, I was well and at work as hard as any man could, for over three weeks; but I worked too hard for my strength, and taking a hard cold, I was taken with the most acute and painful rheumatism all through my system that ever was known.

"I called the doctors again and after several weeks, they left me a cripple on crutches for life, as they said. I met a friend and told him my case, and he said Hop Bitters had cured him and would cure me. I poohed at him, but he was so earnest I was induced to use them again.

In less than four weeks I threw away my crutches and went to work lightly and kept on using the bitters for five weeks, until I became as well as any man living, and have been so for six years since.

It has also cured my wife, who had been sick for years; and has kept her and my children, well and healthy with from two to three bottles per year. There is no need to be sick at all if these bitters are used.

J. J. BERK, Ex-Supervisor.

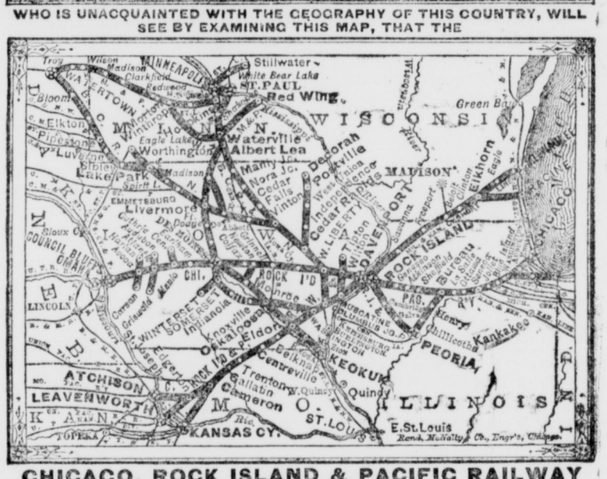
A MAN

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE



CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.

The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.

THE GREAT ROCK ISLAND ROUTE

Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.

The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.

THE FAMOUS ALBERT LEA ROUTE

Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.

Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.

Many a Lady

is beautiful, all but her skin; and nobody has ever told her how easy it is to put beauty on the skin. Beauty on the skin is Magnolia Balm.

Notes on Scientific Topics.

In a paper on the laws of solution, read before the Academy of Sciences, M. H. Le Chatelier concludes that solubility increases with the temperature for bodies whose solution absorbs heat, decreases for those that liberate heat, and remains unchanged when the heat of solution is null.

It is said that an English firm has been experimenting with rangoon earth oil as fuel, with satisfactory results, for steam street-railway motors. An engine to burn this kind of fuel has, in consequence, been sent to Burmah for working street-railways there. It is estimated that the use of the new fuel will reduce the working expenses 20 per cent.

A method of taking the specific heat of solids by measuring the weight of water condensed by the solid when hung up in an atmosphere of steam has been advanced by Mr. Joly before the Royal Society, Dublin. His method, he says, gave great accuracy of results, and it might be used with much advantage in identifying minerals by thus ascertaining their specific heats.

Filter-paper which has been immersed in nitric acid and washed with water, Mr. E. E. H. Francis asserts, is toughened to a remarkable degree, the paper being then pervious to liquids and quite different from parchment paper made with sulphuric acid. Such paper can be washed and rubbed without damage, like a piece of linen. It contracts in size under treatment and the ash is diminished. It undergoes a slight decrease in weight and it contains no nitrogen.

A French authority gives the following receipt for a transparent cement which possesses great tenacity and has not the slightest yellow tinge: Mix in a well stoppered bottle 10 drams of chloroform, with 10½ drams of non-vulcanized caoutchouc cut in small pieces. Solution is readily effected, and when it is completed add 2½ drams of mastic. Let the whole macerate from eight to ten days without the application of any heat, and shake the contents of the bottle at intervals. A perfectly white and very adhesive cement is the result.

Among the prizes to be awarded by the Academy of Sciences, Paris, is the sum of 100,000f. left by M. Breant as far back as 1849 "to whoever shall find an efficacious remedy for Asiatic cholera, or shall discover the causes of this terrible scourage." To secure this valuable prize it will be necessary (1) to find a means of curing Asiatic cholera in the immense majority of cases; (2), or to indicate with absolute certainty the causes of Asiatic cholera, so that by their suppression the epidemic shall cease; (3), or to discover a certain prophylatic as infallible as, for instance, as vaccination is for smallpox.

Near Seefeld, in the Tyrol, there has been discovered a mineral hydrocarbon which occurs crudely in the form of a bituminous rock of peculiar construction. The bitumen is supposed to be composed of the decomposed remains of marine animals. Treated with strong sulphuric acid, the bitumen yields a soft substance, which, when neutralized, is not unlike vaseline in consistence, but resembles coal tar in color. It differs from all known vegetable and mineral tars, however, by its odor and by the possession of peculiar physical properties. The name "ichtol" has been given to the substance. It has also a very marked characteristic in its exceeding richness in sulphur.

Desirous to Emigrate.

Major George L. Lane, colored, of the North Carolina State Guard, says there is a strong feeling among the colored people to emigrate to Liberia. He gives as the cause for this feeling that wages are so low that colored people cannot make anything beyond a living. Wages for farm hands are only seven dollars a month and rations, which cost about sixty cents a week. There are now 700 families in the State who have each paid into the treasury of the Emigration Society in this place ten dollars. Fifteen dollars more is expected from each of these families, and with additional aid to be furnished by societies in Washington and New York, they will be able to reach Liberia with a full supply of clothes and all their tools of various kinds. The young negros are more anxious to leave than the older ones, and the number who are joining the society is increasing every day.

One of the duties of Judson Macumber, an intelligent colored man employed in the Austin Postoffice, is to cut a daily supply of kindling wood for the stoves in the building. A few days ago the supply was short. "Why don't you chop up two or three days' supply of kindling wood, so we can always have some on hand?" asked Colonel DeGress, the Postmaster. "No, sah, I don't cut up kindlin' for the day ahead. We are liable to hab our heads chopped off any minute, and I don't hab no kindlin' wood in the cellar for de Democratic niggah what gits my place."—*Texas Siftings.*

Trained Elephants.

Elephants can be taught to do a great many wonderful things. They are valuable assistants to man in traveling and in work. They are intelligent enough to understand the word of command, and docile enough to obey it. This is more than can be said of some human beings. In the beautiful Zoological Garden in Amsterdam, Holland, we saw, two years ago, an elephant which went through all sorts of manœuvers at command of his keeper. The orders were given in Dutch, but the elephant understood enough of the language to know what the keeper meant, which was more than we did. It was very humiliating to confess that an elephant knew more of the Dutch language than an editor.

It is a very risky thing to play a trick on an elephant. One of those pests of society, "a practical joker," visited a caravan in the west of England fair, and tried his stupid tricks on an elephant there. He first doled out to it, one by one, some gingernuts, and when the grateful animal was thrown off his guard, he suddenly proffered it a large parcel wrapped in paper. The unsuspicious creature accepted and swallowed the lump, but immediately began to show signs of intense suffering, and snatched up a bucket handed it to its keeper for water. This being given to it, it eagerly swallowed quantities of the fluid.

"Ha!" cried the delighted joker, "I guess those nuts were a trifle hot, old fellow."

"You had better be off," exclaimed the keeper, "unless you wish the bucket at your head."

The fool took the hint just in time, for the enraged animal, having finished the sixth bucketful, hurled the bucket after his tormentor with such force that, had he lingered a moment longer, his life might have been forfeited. The affair was not, however, yet concluded. The following year the caravan revisited the same town, and the foolish joker, like men of his kind, unable to profit by experience, thought to repeat his stupid trick on the elephant. He took two lots of nuts into the show with him—sweet nuts in one pocket and hot in the other. The elephant had not forgotten the jest played upon him, and therefore accepted the cakes very cautiously. At last the joker proffered a hot one, but no sooner had the injured creature discovered its pungency than it seized hold of its persecutor by the coat-tails, hoisted him up by them and held him until they gave way, when he fell to the ground. The elephant now inspected the severed coat-tails, which, after he had discovered and eaten all the sweet nuts, he tore to rags, and flung after the discomfited owner.

This miserable jester lost his coat-tails; he might have lost his life. He certainly had a very narrow escape. What must be the feelings of a man who tries to torment a brute? What pleasure can he find in such efforts? We should never give needless pain to any being, brute or human. Who ever seeks for pleasure in giving pain to others will sooner or later be punished for it. If in no other way, he will be punished in the fact that he will become hard and brutal in his feelings, and this will make him cruel toward his fellow men; and this in turn will bring on him the vengeance of the law.—*Classmate.*

Remarkable Hallucination.

On the 13th ult. there died in a well known private asylum in the neighborhood of Berlin an eccentric old gentleman who some time ago had the misfortune to lose his wife, once an eminent actress on the Vienna stage. This loss, coming, as it did, after thirty years of uninterrupted conjugal felicity, so deeply affected him that his mind lost its balance, and he began to indulge in a variety of strange, though harmless fragaries. In the principal room of his town residence he had the walls hung with black drapery, and in the centre a large podium or catafalque erected, also draped in black, on which were placed two coffins. One of these he supposed to be occupied by the remains of his wife. In the other he would lay himself at night, under the belief that he was dead. Huge tapers were placed at intervals around the room. The landlord of the house did not think it necessary to interfere so long as these symptoms of insanity were not attended by any grave results. Besides, he did not like to part with a tenant who had occupied the suite of rooms for a period of twenty years. But in course of time the old gentleman, under the impression that decomposition had set in, began to lay in a stock of deodorizers, and burnt large quantities of incense, and other more pungent but less fragrant fumigants, to the great discomfort of the other tenants in the house. Then he had to be conveyed to his country seat a few miles out of town, where he was left to indulge in his odd freaks to his heart's content, until he began to abstain from all food as being unnecessary and highly improper in his condition as a corpse. This necessitated his removal to the asylum, where he ended his days.—*Borsen Zeitung.*

Gratefulness.

Mr. H. Sampsel, Ottawa, Kansas, writes: "DR. S. B. HARTMAN & Co., Columbus, O.—Gentlemen: I have suffered for seven years; have tried every thing and many physicians, and all have failed. I went to Pittsburgh, and while there fell on the street, my breath seemed to leave my lungs, and numbness overpower me. I determined to give PERUNA and MANALIN a fair trial. I used four bottles of each, and my trouble left, never, I hope, to return. I left Pittsburgh three weeks ago for Kansas, and thought, as I was going to a new country, I had better take a bottle of MANALIN with me, on account of bad water, etc. I arrived here with one-half bottle. I found one of my friends in a pretty bad condition. The doctors were treating her for chills and fever. I did not know what her trouble was, though I persuaded her to use the MANALIN. She did so, and the first day she was up doing her work. Now this seems strange, but it is, nevertheless, a candid truth. She used it all, and has never had cause to lie down during the day since she took the first three doses."

A Case that was Pronounced Incurable.

Miss C. C. Peck, 714 Jackson street, Milwaukee, Wis., writes: "DR. S. B. HARTMAN & Co.—Gentlemen: I take great pleasure in stating to you the benefit I received from your valuable PERUNA. I have been suffering for about fifteen years with a severe cough and bronchitis (so the doctors call it). I was treated by different physicians, and spent considerable money for different kinds of patent medicines, but received no benefit whatever. Dr. Fox, of this city, claimed I had consumption, and there was no hope for me ever getting better. I was so bad that I coughed almost continually. Mrs. Henry Ellis, a friend of mine, induced me to try your PERUNA. I am happy to say I began to notice a change after I had taken my second bottle. I took eight bottles in all, and now I feel like a new woman. If it hadn't been for PERUNA I think I would be in my grave now. It is a wonderful remedy, and I recommend it to all my friends."

Messrs. Baker Bros., Mt. Vernon, O., write: "Your PERUNA sells well. Customers speak of it as being a good medicine."

Mr. Daniel R. Spry, Portsmouth, O., writes: "I have a good trade in PERUNA. It sells well and gives satisfaction."

Order of Publication.

Benjamin F. Harvey, Plaintiff, vs. Samuel W. Arenhalt, Administrator of Amos W. Arenhalt, deceased, and others.

No. 27 Equity. In the Orphans' Court for Garrett county.

The object of this Suit is to procure a decree for the sale of the real estate of Amos W. Arenhalt, late of Grant county, West Virginia, deceased, for the payment of the claims of his creditors.

The bill states that the said Amos W. Arenhalt was, in his lifetime, seized and possessed of valuable real estate in Garrett county.

That being so seized and possessed of said real estate, the same being less than $200 in value, and having some personal property, he sometime in the month of January 1885, departed this life, intestate, and unmarried, leaving surviving him as his only heirs at law, the following brothers and sisters, viz: Samuel W. Arenhalt, Mary M. Arenhalt, who is intermarried with a certain David Moreland, David Arenhalt and Keziah F. Arenhalt, who resides in Grant county, West Virginia, Martha Ann Arenhalt, who is intermarried with a certain Thomas Cory, both of whom reside in Garrett county, Maryland; Job W. Arenhalt, Jacob L. Arenhalt, Rebecca V. Arenhalt, Isaac T. Arenhalt and Flora Arenhalt, who are infants under the age of twenty-one years, and reside in Grant county, West Virginia.

That the said Amos W. Arenhalt was in his lifetime indebted unto the plaintiff in the sum of five hundred dollars, and also to divers other persons in various amounts.

That Administration of the personal estate has been granted by the Orphans' Court for Garrett county, to Samuel W. Arenhalt.

That the said personal estate is insufficient to pay the just debts due and owing by said Amos W. Arenhalt at time of his death.

That the plaintiff and the other creditors are entitled to have the balance due on their claims paid out of the real estate.

That the plaintiff claims a power for a decree for the sale of said real estate and for order of Publication, against the non-resident defendants.

It is therefore this 13th day of April, 1885, ordered by the Orphans' Court for Garrett county, in Equity, that the plaintiff by causing a copy of this order to be inserted in some newspaper published in said Garrett county, once in each of four successive weeks before the 15th day of May next, give notice to the said absent defendants, Samuel W. Arenhalt, Mary M. Moreland, David Moreland, her husband, David Arenhalt, Keziah F. Arenhalt, Job W. Arenhalt, Jacob L. Arenhalt, Rebecca V. Arenhalt, Isaac T. Arenhalt and Flora Arenhalt, of the object and substance of this bill, warning them to appear in this Court in person or by solicitor, on or before the 15th day of October next, to show cause if any they have, why a decree ought not to be passed as prayed.

FOR SALE BY ALL DRUGGISTS

An Old Soldier's EXPERIENCE.

"Calvert, Texas, May 3, 1882.

"I wish to express my appreciation of the valuable qualities of

Ayer's Cherry Pectoral

as a cough remedy.

"While with Churchill's army, just before the battle of Vicksburg, I contracted a severe cold, which terminated in a dangerous cough. I found no relief till on our march we came to a country store, where, on asking for some remedy, I was urged to try AYER'S CHERRY PECTORAL.

"I did so, and was rapidly cured. Since then I have kept the PECTORAL constantly by me, for family use, and I have found it to be an invaluable remedy for throat and lung diseases. J. W. WHITLEY."

Thousands of testimonials certify to the prompt cure of all bronchial and lung affections, by the use of AYER'S CHERRY PECTORAL. Being very palatable, the youngest children take it readily.

MAGNETIC CURES. DR. HILL is the first man to discover the philosophical principle that all nervous pains, aches, and debility should be treated directly from the "brain battery," from whence emanate all nervous force and will power. All other forms of treatment for nervous disorders are failures. Every person who suffers from nervousness knows this, and that medicines only palliate, but never cure. These appliances are magnetic, and differ from all others on the market which are electric. Magnetism is the life of man. Their curative qualities are wonderful in all nervous complaints. The Roman physicians practiced magnetic treatment 1,000 years ago in nervous diseases, but did not treat from the "brain battery." Dr. HILL has made this great discovery, the only sure cure for nervous Headaches, Rheumatism, Neuralgia, Liver and Kidney Complaints, Paralysis, Gout, Spinal weakness, Dyspepsia, Constipation, Cold Limbs and Feet, and General Debility. Miraculous cures noted every day. The Magnetic Brush lifts nails, and the only article of the kind invented. It is the greatest curative agent known and used in a "brush bath" imparts tone, replenishes the debilitated system, and creates warmth. In chronic cases our Magnetic Bands, Belts and Pads should be used. The brushes are warranted to do the work, or the money refunded. Send for circular and testimonials. By giving a description of nervous trouble we will give advice and directions how to use our appliances. HILL MEDICAL MAGNETIC APPLIANCE COMPANY, Lock Box 55, Washington, D. C.

PENSIONS For wound, disease or other disability. Widows, minor children and dependent parents entitled when death resulted. Claims reopened, restoration, increases, bounty, back pay and discharges obtained. Apply at once, delay prejudices your rights. Fees fixed by law. Address, with stamp, the old established firm of EDSON & CO., Attorneys and Claim Agents, 917 F. St., Washington, D. C.

VOLUME 9. OAKLAND, MD., SATURDAY, MAY 16, 1885. NUMBER 12.

NEW ADVERTISEMENTS.

SPEER'S

PORTUGAL GRAPE WINE,

—Also—

UNFERMENTED GRAPE JUICE.

Used in the principal Churches for Communion. Excellent for Females, Weakly Persons and the aged.

ADOPTED IN HOSPITALS AS THE BEST.

SPEER'S PORT GRAPE WINE!

FOUR YEARS OLD.

THIS CELBRATED WINE is the pure juice of the dead ripe Oporto Grape, raised in Speer's vineyards. Its valuable,

TONIC AND STRENGTHENING PROPERTIES

are unsurpassed by any other Wine. Being produced under Mr. Speer's own personal supervision, its purity and genuiness, are guaranteed by the principal Hospitals and Boards of Health who have examined it. The youngest child may partake of it, and the weakest invalid use it to advantage. It is particularly beneficial to the aged and debilitated, and suited to the various ailments that affect the weaker sex. It is in every respect A WINE TO BE RELIED ON.

Speer's Unfermented Grape Juice,

Is the juice of the Oporto Grapes, preserved in its natural, fresh, sweet state as it runs from the press by fumigation, thereby destroying the exciter of fermentation. It is perfectly pure, free from spirits and will keep in any climate.

Speer's Burgundy,

It is a dark rich medium Dry Wine used by the wealthy classes as a Table or Dinner Wine, and by physicians in cases where a dry wine instead of a sweet port is desired.

Speer's (Socialite) Claret.

Is held in high estimation for its richness as a Dry Table Wine especially suited for dinner use.

Speer's P. J. Sherry.

Is a wine of Superior Character and partakes of the rich qualities of the grape from which it is made.

Speer's P. J. Brandy.

IS A PURE distillation from the grape, and stands unrivalled in this Country for medicinal purposes.

It has a peculiar flavor, similar to that of the grapes from which it is distilled.

See that the signature of ALFRED SPEER, Passaic, N. J. is over the cork of each bottle.

Sold by A. G. STURGISS, and by druggists every where. Feb. 16'84 1y.

GOLD for the working class. NEW ADVERTISEMENTS.

FROM THE PRESIDENT

OF BAYLOR UNIVERSITY.

"Independence, Texas, Sept. 26, 1882.

Gentlemen:

Ayer's Hair Vigor

Has been used in my household for three reasons:—

1st. To prevent falling out of the hair.
2d. To prevent too rapid change of color.
3d. As a dressing.

It has given entire satisfaction in every instance. Yours respectfully,

WM. CAREY CRANE."

AYER'S HAIR VIGOR is entirely free from uncleanly, dangerous, or injurious substances. It prevents the hair from turning gray, restores gray hair to its original color, prevents baldness, preserves the hair and promotes its growth, cures dandruff and all diseases of the hair and scalp, and is, at the same time, a very superior and desirable dressing.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists.

DR. JOHN BULL'S

Smith's Tonic Syrup

FOR THE CURE OF

FEVER and AGUE

Or CHILLS and FEVER,

AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain of cure, that it is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.

BULL'S SARSAPARILLA is the old and reliable remedy for impurities of the blood and Scrofulous affections.

Why and What.

Boston Globe.

Why is the key that unlocks the door to Nature's storehouse where she keeps all her rich and curious things.

What is a collection of a few samples that different people at different times have brought away from the storehouse.

If you have the Why you can always get the What. Why is the only coin that passes current in the realm of knowledge. What represents collectively the many things you can buy. What is a great, miscellaneous collection of facts, facts of all sizes and kinds, most of them labelled and arranged systematically—we can't tell yet. But that there is a systematic arrangement would never have been known to man had it not been for Why. And you and I, reader, if we do not keep Why constantly at hand, will get this arrangement of What in our minds all jumbled up, and we must always use Why to straighten out such a jumble.

Why is small and can be conveniently stored away in the head. What is a big, clumsy thing, and the head will not hold much of it. It is better to keep it in books. Books hold facts better than the head. They hold more and keep them in better condition. Facts are very apt to get mixed in the head. In books they can be kept moderately straight.

What is force in operation. Why is latent energy. What is a most excellent servant. Why is a delightful companion. What will carry your burdens. Why will point out to you the beauties of a landscape. What will read to you from a book in dreary monotone. Why will tell you fresh tales, always exciting and entertaining. What can play for you on a hand-organ. Why will sing you new songs. What is always commonplace. Why is always original.

Still, What and Why are good friends, for Why is always adding to the stock of What and What is constantly enlarging the bounds of Why.

Any educational system which is not built upon Why cannot be a very great success.

Any educational system which is built upon What must be always either a partial or complete failure.

Until a child knows Why 2 times 2 are 4 he will never be able to learn the multiplication table. Why tells him how to make discoveries, how to do things in new ways. Why invented the steam engine, the cotton gin, the printing press, the loom, the sewing machine, the telegraph, the telephone and everything else contrived by man. What simply constructs these contrivances. Why is genius, What is trained mechanical skill.

Why is progressive, always a thing of to-day, always of living interest, and it sticks in the mind of a child. What is always becoming old, dry and inoperative. The mind does not retain it. Why expands in the mind and the mind expands with it. What never grows. It is the same yesterday, to-day and to-morrow. To stuff the mind with What makes it no bigger. In fact, What takes up so much room that it crowds out the mind. It crowds out Why, the growing principle of the mind.

A child's mind should be regarded as a garden, not a corn crib. It is to constantly produce new crops, not to be stored full of the fruit of other gardens. Why is a fertilizer to enrich the ground. What is the crop raised. Keep just enough of this crop in the mind for seed, store the rest away in books or works.

Why is enterprise, What is business ability. Why is shrewdness, Why is smartness, Why is luck. Why makes fortunes, Why makes statesmen, Why makes all manner of success. What without Why makes plodders, makes mediocrity.

What is a chest of tools. Why is the hand that works with them. The tools can always be bought or made, but the cunning of the hand must be trained. Tools will never beget tools. What is not productive. Why alone produces.

With all thy getting get understanding. Understanding is Why.

What is a cyclopedia. Why is the key to the universe.

Don't forget three little words—"If you please." Life is made up not of great sacrifices or duties, but of little things.

Ayer's Pills are pleasant, safe and sure, and excel all other pills in healing and curative qualities. They are the best of all purgatives for family use.

How Paper Hangings are Made.

The making of paper-hangings is an interesting process, and the valuable hints in regard to this and some other matters treated in this article are taken from a paper read by W. F. Adams, of Whitney & Adams, before the Springfield Art Association some time ago. Paper-hangings are reported to have been produced in Spain and Holland previous to 1552. Specimens of leather paper used in a Moorish Castle in the fifteenth or sixteenth century have been found, and the designs equaled those of modern times, while the material surpasses anything attempted by manufacturers of to-day. The Japanese, whose acquirements have long since ceased to awaken surprise, are also adepts in paper-hanging making; but their distorted conceits and unique combinations of colors are not destined to more than a temporary popularity, anywhere outside of Japan. Indeed, when a Yankee originates any device so odd that he does not care to father it himself, he dubs it "Japanese." Phlegmatic Germany has given little play to fancy in paper-hangings, but France and England had the field almost to themselves till American enterprise wrested superiority from them. The Yankee, as has been said, is quick to copy effects, combining also in his origination the brighter tints and fancies of the French, with the more massive English designs.

New York and Philadelphia produce most of the paper-hangings used in this country, much the larger share coming from Gotham. The grades, as classified by the trade are numerous. There are the "brown blanks," made from the cheapest kind of material and the lowest-priced hangings in the market. "Bluff blanks," are an improvement in quality. The "white blanks," the "grounded," so called from the ground color given before the paper is printed. The "satin" paper, with a polished surface; the "machine bronze," the most popular quality of gilt goods; the "embossed gilt" and the hand-made follow. The process of making all machine goods varies little. Having placed a large roll of paper in position for being fed out to the machine, the paper is "grounded" or passed under a series of brushes which apply color of one shade evenly over the surface. The paper is then caught up in loops, carried by an endless chain over steam pipes, being completely dried in its journey of about 400 feet, and then reeled up for the printing. A second trip takes it over a large cylinder, having a series of nicely adjusted rollers, each one printing a separate pattern and color. The rollers are of wood and the patterns are skillfully cut in brass on their surfaces. The drying process is then repeated, and if gold or bronze is used in the pattern, the paper, in its progress by the endless chain, passes through an auxillery machine which deposits gold or bronze dust on parts that have been printed with varnish instead of the colors used. When finished the paper is reeled into rolls of eight yards or double rolls of sixteen yards.

The costliest papers, the rich borders, special orders where the quantity to be printed would not warrant the expense of preparing rollers, specimen patterns, etc., are hand-made. The designs are cut on wood-en blocks, each color having a separate block, and as only a small part of the paper can receive an impression at a time, and great care is necessary, the stamping process is monotonous and slow. While a machine will print about 2,000 rolls of twelve colors each in a day, a man can print only 100 rolls of one color. Velvet papers are also made by hand, the design being built up in layers.

An Accomodating Judge.

Lewistown, (Me.,) Journal.

One of the keenest things ever said on the bench is attributed to Judge Walton. While holding a term of the supreme court in Augusta he sentenced a man to seven years in prison for a grave crime. The espondent's counsel asked for a mitigation of the sentence on the ground that the prisoner's health was very poor. "Your Honor," said he, "I am satisfied that my client cannot live out half that term, and I beg of you to change the sentence." Well, under those circumstances," said the judge, "I will change the sentence. I will make it for life instead of seven years." It is needless to add that the respondent agreed to abide by the original sentence, which the judge permitted him to elect.

Wild Game in Afghanistan.

From the London Telegraph.

In the valley of the Kushk Rud we saw deer of various kinds—wild boar, and the goorkal or wild ass. A large drove of them passed our line of march one morning, but we saw little of them except the great cloud of dust they turned up as they hurried off to higher ground. I understand that there is little difference between the goorkal and the kyang, or wild horse of Tibet. Marmots are also very plentiful, they have burrowed their holes into the ground everywhere, and it is dangerous to horses, as their feet sink into the honeycombed earth. These marmots may be said to be now the real possessors of the land, for there is scarce a yard of it which is not occupied by them.

Partridges are also in considerable numbers, and in the Kushk Valley some of our party found pheasants plentiful, and wild pigs are still more numerous there than on the higher ground. There are large spaces on the side of the stream covered with tall reeds, and the pigs find cover in them. One morning on the march I saw a drove of about 30 pigs, led by a large boar, walking up the side of the hill. They had been disturbed by the baggage animals passing. They went up the hill-side, and about half a mile to the north they descended again into another bed of reeds. They came down in Indian file, forming a long straight line, led still by the boar, and as they descended their speed became greater, till they disappeared in the reeds. While watching the drove as it came down hill, it was impossible not to recall an event described in the Gospel of St. Mark.

The boars are ferocious, as some of our party found who had attacked them, and were attacked in return, and, not having the right kind of pig-sticking spears, flight was deemed necessary. Not being able to deal with the boars bas in some instances interfered with the pheasant shooting for it would be awkward to be caught by one of these huge tuskers in a jungle of tall reeds with only a fowling-piece in your hand.

Thorough Cultivation.

Thorough cultivation of nearly all kinds of crops is absolutely essential to produce good returns, for even richnes, of soil will not alone compensate for the neglect to cultivate deeply and constantly. One of the greatest troubles with nearly all of the tillers of the soil is planting far more land, each spring, than can possibly be properly cultivated during the growing season, and this accounts, in a great measure, for the poor average yeild per acre. When more crops are planted than can be properly attended to, not only are they partially neglected, but the farmer or planter is constantly driven with his work. He is never done, and is always behind-hand with everything, which is an additional and very serious source of loss. There are some cases where cultivation, for the time being at least is undesirable, as in the case of fruit trees after they are several years in bearing, when they require a couple of years rest, and even when cultivated, up to that time, the cultivation must be done by careful, experienced persons, else many of the roots will be needlessly destroyed, and perhaps the trees otherwise injured or destroyed. By thorough cultivation, we mean systematic and common sense cultivation, reference being had to the needs and requirements of each crop or kind of produce grown.

A Wonderful Discovery.

Consumptives and all, who suffer from any affections of the throat and lungs, can find certain cure in Dr. King's New Discovery for Consumption. Thousands of permanent cures verify the truth of this statement. No medicine can show such a record of wonderful cures. Thousands of once hopeless sufferers now gratefully proclaim they owe their lives to this New Discovery. It will cost you nothing to give it a trial. Free trial bottles at Nydegger's Drug Store. Large size, 50c. and $1.

I've noticed it often among my own people around Snowfield, says George Eliot, that the stroug, skillful men are often the gentlest to women and children; and its pretty to see 'em carrying the little babies as if they were no heavier than little birds. And the babies always seem to like the strong arm best.

The largest factor in making hard times in the United States is the $900,000,000 spent annually for intoxicating liquors.

The Republican.

OAKLAND, GARRETT CO., MD.

"COUNTRY LOVE."

O, "Country Love!" so sweet a story—
To Nature true, portrayed with art—
Shall be rehearsed till Age is hoary,
And find response in every heart.

As some bright sunset glow at even
A day of storms may supplement,
So is, in thy perusal given,
A solace sure for discontent.

Blest "Country Love!" thy repetition
Has swept the chords of Memory true
And woke, as if by intuition,
The sweetest strains love ever knew.

For, as in some entrancing vision
Of trembling spirit sheen, appears
The light that made the world elysian,
And brightness still Life's changeful years.

Love in a cottage, pure and tender,
In sterling worth may far eclipse
The careless vows in halls of splendor
That fall from giddy Fashion's lips.

In vain the city belle's flirtation
With subtle heart shall humble him
Whose heart revives the radiation
Of "country love"—no longer dim.

Affection truest comes unbidden,
As softly as if angels stepped
Into the soul's recesses hidden
And thrilled our being—while we slept.

O, "Country Love!" bewild'ring fancy!
The picture radiant we see
And dream, in wild extravagancy,
Of "Reuben Grey and Percy Lee."

—*Hattie Howard, in Hartford Post.*

THE "BUNCO STEERER."

His "Modus Operandi" as Described by a Recent Victim.

Remember, then, what, when a boy, I've heard my grandma tell:
"Be warned in time by others' harm, and you shall do full well!"
Don't link yourself with vulgar folks, who've got no fixed abode,
Tell lies, use naughty words, and say "they wish they may be blowed."

—*Ingoldsby Legends.*

Since the time of the benevolent old gentleman of Margate who was so shamefully robbed by "the little vulgar boy," other benevolent old gentlemen—and young ones, too—have been made the victims of the smooth-tongued gentry.

It is wonderful how slow we are to learn by the sad experience of others. Although numberless cases of misplaced confidence have been duly exposed in the public press, yet several travelers from the rural districts, who pay occasional visits on business or pleasure to the large cities, always

"I am not Senator Spoonbill, but plain John Smith."

prove themselves sure game for the various types of cheats who eke out a perilous livelihood by trading upon their credulity.

The world never will hear the complete details of all the tricks played on the unwary. Many who have come to grief reason philosophically that they have bought their sad experience at the price of the amount out of which they have been cheated, and so will not by recourse to the aid of the authorities, and its consequent publicity, allow themselves to be the butt or laughing stock of their friends.

Foremost among the many cheats of all varieties who are always sure to infest thickly populated localities, are the "bunco" men. Their methods are very simple, and are unfortunately too often attended with success. A "bunco steerer" must, however, bring some brains into his nefarious calling, and it is sometimes wonderful to see what keen perception and persuasive faculties, which, if honestly applied, would win distinction for their possessor, are brought into play by the "bunco sharpers."

It takes a little ring of confederates to carry on this game successfully. There is first the "spotter," who scents out, as it were, the game, and then quickly apprises the "beaters," who, if they succeed in hooking their man, pilot him into the hands of the lottery man and his confederates, who "play the greeny" for all he is worth, and then instantly vanish to meet again at some pre-arranged trysting-place, where the "swag" is honorably (?) "divied up."

The reader is familiar with the oft-recited details of the "bunco" man's method; how the victim is accosted by a stranger in mistake and his name and address are secured, and then, armed with this valuable information, some young friend whom he has forgotten addresses him by his name and with an insinuating manner, of which the "bunco steerer" is complete master, wiles him into a saloon or a lottery shop, where the *coup de grace* is given, and, a sadder, wiser and poorer man laments over his misadventure.

A too-confiding old gentleman, who does not give his real name, has furnished us with that portion of his diary which relates to a "bunco" trick. As it is eminently graphic and quite comprehensive, we think it unnecessary to indulge in further comment, so give it to our readers in his own exact words:

SANDUSKY, O., April —, 1885.—To the Editor of —Sir: I send you herewith, according to promise, the leaves from my diary bearing upon the little trouble I got into in New York. As I do not wish my charitable neighbors in this locality should have the pleasure of commiserating with me, you will please withhold my proper name and for all purposes of identity and in this narrative call me yours truly, JOHN SMITH.

THE DIARY.

* * * I am at home, safe and sound in Sandusky, thank God for that! and save that I am a little poorer in pocket and somewhat crestfallen in spirit, I am none the worse for my adventure. I had a little business to transact in New York, which could have been, perhaps, as well done by letter, but then a bachelor of my time of life often likes to run away from the dull routine of home surroundings to experience for a while the bustle and unrest of a great city.

I never travel without money. Some people tell me it is dangerous to carry about with me as much as I do on these occasions. Perhaps it is, but having had a sad experience in my youth of a journey I undertook without being burdened with the circulating medium, I have arrived at the conclusion that a fair allowance of money in one's pocket is an essential ingredient to one's enjoyment when out in the pursuit of health or happiness.

I did not encumber myself with much luggage, but merely filled my pocket-book with moderate sized bills, took a little hand valise with a necessary change of clothing, and full of good spirits and philanthropy duly installed myself at the Astor House.

I like lounging about the Astor House rotunda and steps. One can pick one's

"Hello! Mr. Smith; by Jove, you here?"

teeth, meet an occasional acquaintance, and delight one's gaze with the motley collection of human beings to be met there upon any day in the year.

It was old Dr. Johnson, I think, who said, when asked for material for thought and description: "Let us take a walk down Fleet Street." Now, if the old doctor were alive in these days, and on a lecturing tour in America, and if asked what public promenade he would suggest to engender food for mental reflection he would, in my opinion, certainly reply, "Let us take a walk on Broadway."

I don't exactly know whether I was thinking of the learned Doctor or not, or whether I was allowing my mind to wander fancy free, as I strolled up Broadway to make a call upon a friend. For convenience, I had placed a lot of papers and other matters in my hand valise, and, having plenty of time at my disposal, I lounged along, gaping from one side to the other and reflecting meditatively on the babel of sounds and the immense throng of people who surged and rushed in all directions.

I think I had just passed Canal Street, when I was accosted by a rather genteel kind of man, who timidly stretched his hand out as if to greet me, and then, gazing at me with deep intent, said: "How d'ye do, Senator?"

"You mistake, my good fellow," said I, elevating one hand and warding off his advances. "I have not the honor of being a member of the Legislature, but am only a plain citizen and a mere visitor in this city."

"Well, well, well," repeated the shabby-genteel party, "'tis really extraordinary. I could take my oath you were Senator Spoonbill; the same height, side-whiskers, long hair and dignified, gentlemanly appearance. Excuse me, sir, but you are not really joking?"

"I assure you, on my honor," said I, impressively, as I withdrew out of the throng of passers-by, "that I was never more serious in my life. I am not Senator Spoonbill, but plain John Smith, of Sandusky, O."

"Dear me!" ejaculated the rather genteel party, "I should never have thought so. Besides, one of the Senator's eccentricities is always to carry in his hand a black traveling bag with many of his valuables inclosed in it, just such a one as you have in your hand at present."

"My friend," said I, "I know nothing of the Senator's peculiarities, and furthermore I am not the man to carry my money or valuables in a hand bag, which might be snatched from me by the first desperado I should meet. No, sir; whatever money I carry about me is safely inclosed in my pocket-book, where the thief or designing rascal can not even see or lay a hand on it."

"You do quite right, sir," meekly replied my new acquaintance, and I hope you will excuse me for the mistake I made in stopping you."

"Don't mention it, my friend," I replied,

Enjoying the "Yellow Label."

encouragingly. "The likeness, as you said, was so striking that you are not to blame, but before I leave you let me give you what we call down in Sandusky 'a pointer.' Never carry your valuables in a hand-bag like your acquaintance, the Senator. Keep your money safely rolled up in your inside vest pocket, and then you can laugh at the thieves, ha! ha! ha!"

With a chuckle of satisfaction at my own humor and a bow of respectful recognition at parting, I continued my walk up Broadway.

I can't exactly say how I ever cultivated the taste for looking into shop windows. I know that every window I passed during the next half hour was scanned by me with such attention that I almost seemed to myself to be indulging in the process of appraising the value of goods set out for show. As I was turning the corner of Fourteenth Street, entering into Union Square, a foreign-looking young man, somewhat dudeishly attired, recognized me, and rushing over, grasped me firmly by the hand saying: "Hello, Mr. Smith; by Jove, you here? What in the name of wonder brought you down from Sandusky?"

I was a little nonplussed at this warm greeting from a stranger, but as he knew me I thought it wiser to await developments, and said, with some politeness:

"O, just ran down on a little business, and hope to be back home in a few days; but, you will excuse me, I can not exactly place you, although you seem to know me very well."

"Know you," said my friend, with evident delight. "I should smile!" Why, Mr. Smith, I knew you when I was a mere child. How long have you been living in your present residence?"

"Well," said I, "ever since my brother and myself dissolved partnership, and I retired from business."

"And how is your brother now?" he inquired.

"How?" I said, in some surprise. "How the deuce can I tell? He was the first man incinerated in the new crematory. I guess what's left of him is all right at home on the mantle-piece."

"Poor fellow," said my young friend, with some sadness in his tone, "it was so sad, his taking off."

"Yes," said I, "You seem to have known him well. He was too fond, unfortunately, of taking rum at unseasonable hours, and that's how he got so quickly incinerated. But might I ask your name."

"Come, now," he replied, "look me straight in the face and give a guess. Mind, though, I have been out of Sandusky a long time, knocking about Europe, and I am on my way home now, not like the prodigal son, either, as I have been in luck of late, and only this morning drew a prize of a thousand dollars, which I am this moment on my way to get cashed. But that is another matter. Now, as to my identity, I wish to please you with a surprise. Do you know the manager of the First National Bank?"

"Do I! I should think so. He is my own banker, and as decent a fellow as ever I met. There's not another man in the State of Ohio I have a greater regard for than Joe Hawley."

"Did you ever know that Joe had a son who went away to Europe?"

"No; not as I've heard, young fellow. Joe is, like myself, an old bachelor, and all the boys he ever took an interest in were his nephews, Jim's son's. I guess one of them, Egbert, or Eggy, as they used to call him, did run away, but I always heard that he kinder got his blood up agin the Indians."

"No, sir; you are on the correct trail, but we must leave the Indian war-path. I gave it out that I was going West, but, by Jove! I did better and went East, made money in England, and now I am on my

The False Alarm.

way back with lots of money to see dear old Sandusky."

"My dear boy," said I, "I am delighted to meet you, and if you are not in a particular hurry to go home, guess you ought to wait for me. I am stopping, for the present, at the Astor House, and I am now on my way up to Sixteenth Street to meet an old Sandusky friend, Dr. Tobias Earwig."

"Friends again, by Jove!" ejaculated my companion. "Do you know Dr. Earwig? the second man I called on after leaving the landing-pier a short time ago. I promised to call on him, too, this very afternoon. In fact, he placed it upon me as an obligation. But there's no use your going there now if you wish to see him."

"Why? may I ask."

"Because he is at this moment giving a demonstration at the Clinical in Harlem Hospital. You must have patience like myself, until four o'clock, and we can call on him together."

"Very good," said I, resignedly; "I confess I am not in any great hurry, but I don't relish the idea of walking about here carrying this confounded bag."

"Then I'll settle that. I don't mind confessing to you that the joy of getting home again has made me do a little too much in going round to see the Elephant, you know; and I guess a glass of good wine—Yellow Label, old man—won't at all be out of place in my stomach. In fact, Dr. Earwig, our mutual friend, ordered me to take it. Come on."

I don't know now why I yielded to the invitation of this stranger; but there was something in his easy manner which must have prepossessed me in his favor, and as I had a couple of hours' lounging to do I easily fell a victim to his toils.

My newly-found friend beckoned to a cabman, and before I could fully make up my mind, or even utter one word of expostulation, I was seated alongside him, and we were whisked up town at a rattling pace, until our conveyance stopped up with a sudden jerk at the door of a quiet-looking restaurant.

We had the Yellow Label, as my friend called it, and as it was really good wine I felt bound to order a second bottle, when an acquaintance of my friend joined us, and I was duly introduced to him. This friend would insist upon a third bottle of the Yellow Label, and all the time kept wishing my young Sandusky acquaintance joy over his good fortune in winning such a large prize in some lottery.

"Eggy," said he, "I guess I'll have another go at fortune. I have a few dollars which I can spare, and maybe I should have luck if you will only favor me with your—and your friend's company."

"I don't mind, old fellow," was the reply. "Guess I want to get cash for my check, anyhow, but I won't play any more, as I am going home to Sandusky as soon as possible."

"Come on, then," said the other, "here's a cab at the door. I am in a hurry, and can't stay more than half an hour, play or not play."

I suppose it was the wine—Yellow Label—which rose in my head, but once more I found myself in a cab, and in a short time was ushered into a small apartment fitted up in office style, and my young Sandusky friend presented his check for payment.

The party in charge was very polite, and begged my Sandusky friend to wait a few

"Keep a safe distance between yourself and the bunco steerer."

moments until he procured a counter signature of some other official before handing out the cash. Meanwhile the other friend said he would try his luck, and depositing a ten-dollar bill on the desk drew a ticket out of a little revolving mahogany box. He won. I saw him paid out fifty dollars, and I then began to take an interest in the game. My Sandusky friend asked the man in charge if he would give him credit pending the arrival of his winnings from his check, and as he prepared to play he beckoned me aside and confidentially informed me that if I followed his example, and invested the same amount as he did, we could win as much as would pay all our expenses and leave us a nice balance in our hands on landing at Sandusky. Perhaps it was the effect of the Yellow Label stuff, or perhaps the fellow mesmerized me, but I unfortunately accepted his advice and drew out a ten-dollar bill, and we won fifty dollars each. One of the party then suggested that a bottle of wine should be opened to our good fortune, and after partaking of a glass, my Sandusky friend whispered me that he was going now for a thousand, which he would add to the thousand already owed him. Again I am forced to make the sad confession that I resigned myself blindly to his advice; but luck did not seem to cling to him, as he won and lost by turns until he commenced, as he called it, to plunge. Of course, I plunged too, and my big roll of bills, amounting to over $300, soon dwindled down to a very small sum, until to my surprise I found myself compelled to borrow from my friend. His finances were drained out as well as my own, so he whispered me to take a chair and wait for him for a few minutes until he should return with the cash requisite for us to take out our revenge.

So I sat down and saw my young Sandusky friend politely bowing to me as he took his departure. I think I pulled nervously at my whiskers, and it began to dawn upon me that all was not as straight as it might be. I was thus engaged when a colored man rushed into the room and breathlessly informed me that he feared the police were at the front door, and I had better get out quickly by the back way, and take a cab to a place where my young Sandusky friend awaited me.

I yielded automatically, and after a half-hour's drive in the up-town portion of the city, my cabby pulled up and handed me my small hand valise and said I was to wait at this spot until he went for Mr. Hawley, whom he had instructions to drive back and join me at this particular place.

I hadn't even the presence of mind to take the number of that cab, my mind was in such a disturbed state; so I patiently waited for Hawley, who never turned up, although the shades of evening were approaching and the lamplighters were beginning to illuminate the district.

I suppose it must have been that Yellow Label business which so obfuscated my intellectual faculties. It was quite dark and I was beginning to attract the attention of the passers-by before it fully dawned upon me that I had been cruelly swindled. Seeing a colored lamp in the distance which told me I was in the vicinity of a police precinct, I instantly rushed toward it to state my grievances.

I have a very great respect for the police force, but with all due regard for that highly intelligent body, the officer in charge only smiled at me when I recounted my adventure, and, as he seemed to throw some doubts upon my sanity and jocularly remarked that, in his opinion, a good square sleep might take down the swelling in my head, I produced the only evidence of the swindle in my possession—a numbered ticket.

This seemed to have little effect, as this very incompetent officer only folded his arms on the desk, and smiled at me more and more.

"Go home, boss," said he, "and when you next take a trip here from Sandusky, learn that it isn't safe to stop and chin in the streets with every one who says he knows you, and, above all things, keep a safe distance between yourself and the bunco steerer."—*N. Y. Cor. Louisville Courier Journal.*

LATE FASHIONS.

Information Which Every Woman Will be Glad to Get.

More and more fashionable grows tinsel braid.

None but brides wear white kid gloves nowadays.

Dinners are fashionable entertainments this month.

Woolen lace is used even for trimming underskirts.

Undressed Suede gloves remain the favorites for dressy occasions.

Wool canvas or sail cloth is the newest fabric for seaside dresses.

Seaside and country dresses are now in the hands of dressmakers.

New silk and lisle thread gloves come in all the fashionable kid colors.

Woolen lace of the color of the garment trims many mantles and costumes.

Small girls' dresses are made shorter, and they define the form more closely in the back.

Flat turbans and conical-crowned, narrow-brimmed hats are equally fashionable for little girls.

Superimposed waistcoat fronts of pleatings of moire, Surah, or lace are seen on imported Paris wraps.

Bead embroidery on the collars, cuffs, and waistcoats of dressy jackets are among other decorative fancies.

Plaid jackets of fine Gilbert flannel are made with belts and a hood lined with bright or sober brown Surah.

Red silk jerseys are prettily worn over skirts of printed sateen or percale figured with red for house dresses.

Full jabot ruffles of black lace are placed down the fronts, around the bottom, the neck, and sleeves of dressy black silk street jackets.

All street and day house dresses are made with very high collars, fitting close in the throat, cut on the bias, and frequently braided or embroided.

Short mantles, jerseys, cloth and silk jackets, long newmarkets, raglans, and dolman visites of medium length are all fashionably worn as street wraps.

Bengaline is popularly worn as a skirt under draperies or polonaises of Chuddah cloth, brocade or embroidered French cashmere, camel's hair, and wool etamine.

Bustles of stuffed hair attached to the waistband of each separate dress are more in favor than steel bustles, and 'tis pity, but 'tis true, that bustles grow larger.

All laces are fashionable. Even the old black Llama lace is revived, and silk lace both in the piece and wide edgings come in all the new shades of brown, tan, steel blue, gray, wine color, olive, moss, and reseda greens, as well as black and cream.

—Notwithstanding Ireland possesses a source of inexhaustible wealth in the fisheries along its entire coast, the people are indifferent and negligent in its development, although there are plenty of natural harbors and England offers an excellent market. The Irish do not seem to take to the water, in this respect differing much from the English and Scotch races. Only about 5,000 boats are engaged in the Irish fishing industry, while Scotland, with a much smaller coast line, has 15,294 boats, which give employment to 53,489 fishermen, curers and coopers, and to 47,522 others.

—"I see," said a passenger from down East, "that the Central American insurgents have burned Colon. That is the end of the trouble." "How do you know it is." "Why, they wouldn't wipe out the Colon, would they, if there was more to follow?" Here the train ran off the track and prevented further discussion.—*Chicago Herald.*

—Guilford, Conn., has been shipping clams to Texas. The clams are packed in moss and sent by express. They cost their purchasers $1.70 per dozen when delivered in Texas.

HERAT.

Opinions of an Acknowledged English Authority on Russia.

Mr. Charles Marvin, the acknowledged English authority on Russia, has recently published a work upon the position of the two in reference to Central Asia and especially Herat. It will be of special interest just now.

His youth was passed in Russia, and he is thoroughly familiar with its people, language and literature. He has for years made a study of the Central Asia question. His Russian intimacies have enabled him to see and understand their view of it. His acquaintance with Russian officers, engineers and diplomats has made him familiar with the movements and the country on the Russian side of Afghanistan.

His acquaintance with Anglo-Indian officers has done the same for him on the Indian side of the disputed territory. Having access to both Russian and English official records, he is believed to know more of both sides of the question than any other writer of the day.

The object of the Russian advance upon India is not the conquest of India, but the crippling of England. Russia is poor, and under a constant commercial pressure. It believes that its only relief lies in the occupation of Armenia and Constantinople, thus largely increasing its internal resources and widening its possibilities for foreign commerce. By taking a position on the Indian frontier that will be a constant menace to England, it believes that England will be at last forced to acquiesce in the Russian occupation of Constantinople, which in reality means the conquest of Asia Minor.

With this object in view Russia has been steadily moving forward to Herat. All that it has thus far accomplished has been done by fraud and the violation of express engagements. The pretexts that the tribes of Central Asia are unruly and must be subdued have no foundation. As a rule they are feeble, poverty-stricken and peaceful. At all events Russia has pushed on until her armies stand in striking distance of Herat.

He holds with many Anglo-Indian officers that the surrender of Penjdeh, which is clearly in Afghan territory, is to surrender Herat; and to give up Herat is to open the way to the invasion of India. Between Penjdeh and Herat the mountains are by no means impassable, nor on the other side is there any barrier between Herat and Quetta, now the outpost of British military operations.

Herat is therefore highly valued by both governments, not solely on account of the city itself, but because of the resources of the district around it. Its corn and beef would feed an army of 100,000 men, and sustain them during an advance on India. There is no such other camping ground between the Caspian Sea and India.

The supposed impenetrable ranges lying between Afghanistan and India are discovered to be not such obstacles to an advance as they have been supposed. In the Suleiman range 289 passes for camels have been found and sixty more in the Behuchistan Mountains.

Herat in Russian hands would not only intimidate the Afghans, but, in the opinion of many English experts, make the English hold upon India very insecure. General Skofeloff in 1882 predicted that were an enemy to occupy Herat, "the English army without having fired a shot would find itself beaten."

Mr. Marvin thinks the Russian means for an advance to Herat or India much greater than the English means of defense. In addition to the railways the Volga and its tributaries are covered with steamers and huge barges for the conveyance of troops; while fifty large steamers are available on the Caspian Sea. He estimates that in ninety days the Russians could mass 100,000 troops in front of Herat. "Russia," he says, "could surpass any efforts of ours on the Quetta side of India." He declares that bad roads, fierce tribes, fearful mountains and horrible deserts exist in Afghanistan, but they are all off the direct route which the Russians are taking to the Indian frontier.

These positive and startling statements from an authority which is regarded as second to none, will throw interesting light upon the attitudes of the two governments.—*Philadelphia Press.*

THE VOICE FUNCTION.

In What Part of the Human Anatomy It Is Located.

Aphasia is a disturbance of the power of speech. It appears in two distinct forms, viz., amnesic and ataxic aphasia. The person suffering from amnesic aphasia forgets *substantives* and *names*, other parts of speech being properly used; or he forgets a language which he once knew, or he misapplies terms, "using pamphlet for camphor, horse for man," etc. In ataxic aphasia the power of *articulation* is completely lost. The person understands fully the word to be used, and makes vigorous effort to use it, but is unable to do so. Sometimes articulation is half destroyed, so that the first part of the word can be spoken, but not the other. Sometimes automatic phrases can be uttered, such as yes and no, while it is perfectly clear that these exclamations do not satisfy the person. Another form of this general trouble is agraphia, or the inability to express ideas in writing; this is frequently complete, and all attempts at writing end in a scrawl. It is noticeable that aphasia is sometimes, though seldom, unaccompanied by insanity. As early as 1861 Broca, in Paris, expressed the opinion that aphasia was connected with disease in the third frontal convolution. While a large number of cases have been cited for and against this conclusion, many pathologists are disposed to regard it as substantially correct. It would seem just, then, to connect these central functions which are concerned in speech with the peculiarly developed region of the human brain that lies on the anterior and lower limit of the Sylvian fissure.—*Prof. W. R. Benedict, in Popular Science Monthly.*

—Next to a true-hearted, able comrade in any good cause, the very best ally is a true-hearted, able opponent.—*Unity.*

TINY MITES AT TABLE.

Midgets who Bankrupt Unsuspecting Restaurant-Keepers.

"Do you know," said a professor of a dime museum, "that Baron Magri, the brother of Count Magri, who wedded Mrs. General Tom Thumb, is also married? The baron is quite as tall as the count, but his wife, a very attractive lady, is six feet one inch high. He has five children who all take after their mother, for some of them are twice as big as he is.

"His eldest son, a lad of eleven years, used to jokingly pretend that he was his father's grandfather. He was so much bigger than his father that the latter was unable to correct him for his mischievous pranks, and had to send him home to Italy to be spanked.

"It would amaze you to know how bright and intelligent these miniature people are. Countess Magri is competent to be a professor at Vassar College, and I warrant you that she could hold her own with Susan B. Anthony and Lillie Devereaux Blake in a debate at a woman-suffrage convention. All the miniature people are very sensitive about being thought small. For instance, General Mite feels as tall as a grenadier in the Queen's Guard, and some of the little ladies pride themselves on being slender and willowy like Kentucky girls.

"All little people are very dignified, and are much hurt at being compared with children and babies. Lucia Zarate, a Mexican miniature woman, becomes quite angry when she is likened to a baby. She is twenty-one years old, a foot and two inches high, and weighs only four pounds and a half, being less than half the size and weight of a baby.

"It is wonderful what good appetites the miniature people have. Tom Thumb ate more than Chang, the Chinese giant. Any of the little folk will eat as much dinner as a man six feet high. Giants, as a rule, have small appetites. When we boarded Chang at one of the large hotels here they thought he would eat a great deal, and so they charged him as much as if he were three men. Instead of going through the bill of fare from beginning to end and then repeating, he ate no more than the average boarder. 'Hungry Joe' could eat more at a cold lunch than Chang could in a whole week. It took three beds, however, to make one bed for him to sleep in, and so we did not complain at paying nine dollars a day for his board.

"I knew a very grotesque-looking South American dwarf, who used to be exhibited as a wild man without language who fed on raw meat, and who was incapable of understanding even signs. Well, after the exhibition was through every night that dwarf used to go over to a restaurant and order all the French dishes on the bill of fare, read a Spanish newspaper, talk French to the waiters, and ask questions of Americans in fluent English. He had an enormous appetite. He didn't weigh much, but he ate like an elephant. He used to polish off three apple-dumplings for desert.

"Some of the miniature men have been jolly good fellows. I have known some of them who could have put a whole company under the table drinking beer. They have a tolerably easy life of it. A very small dwarf will get $500 a week, or twice as much as a leading man at a New York theater. I have known $800 to be paid for one week's engagement to a phenomenally small dwarf. Of course the dwarf who gets $100 a day may draw $200 a day to the museum.

"Miniature folk sleep about like other people. Some, however, go to bed with the owl and get up with the lark, and are always spry and lively. I find most all minature people intelligent, genial, and good-natured, pleasant people to know.—*N. Y. Morning Journal.*

A QUEER PIT IN A PLAIN.

What Puzzles the Folks of Ash Fork, Where Water is Half a Dollar a Barrel.

In some sections of the northern portion of Arizona the question of water supply, even for domestic purposes, is a very serious one. This is particularly the case at Ash Fork, a station on the Atlantic and Pacific Railroad. A series of very lovely and fertile valleys surround the place, and plenty of grass grows for the support of large herds of cattle, but no water can be had except from an occasional "tank" during the winter season. At Ash Fork the railroad company attempted to sink an artesian well, but after reaching a depth of nine hundred feet the drill became fastened and could not be removed. Many futile attempts were made to extract it, but at last it was abandoned in despair. All water now used at that station and by the residents of the town is brought by rail from Peach Springs, sixty-five miles to the westward, and is sold at fifty cents per barrel.

A short time ago a prospector, stimulated by the inquiry for water, reported that he had discovered a huge well, about eight miles from Ash Fork, sunk in a level plain. Parties at once repaired thither with ropes and other paraphernalia to explore the wondrous discovery. They found the locality, but to this day they do not know the exact nature of the curious cavern that met their gaze. It is located on a level plain and can not be seen until it is approached very near. There is no evidence of earth or rock having been removed from the pit, which was found to be 150 feet in diameter and 320 feet deep, with perpendicular walls. No one in the party was brave enough to descend and explore the "well" when the rope had been lowered, and the explorers returned to Ash Fork scarcely wiser than they were before their trip.

It is certainly a great curiosity, and there possibly exists a supply of water somewhere in its depths or in the numerous caverns or tunnels that apparently emerge into the dark earth below from this curious threshold of sunlight. *Tucson (Ari.) Citizen.*

—That pegged shoes and boots are still quite extensively used might be inferred from the fact that a peg-manufacturing company at Bartlett, N. H., is turning out the little wooden articles at the rate of 1,800 bushels a day, and has orders on hand that will require several months to fill.

FOR OUR YOUNG FOLKS.

IN THE STORM.

Destroyed by a Cyclone—What Annie Had Left to Be Thankful for.

"You'll lose your kites, boys, if you don't pull them in."

"Why, Rob?" asked the two small boys in a breath. "There isn't a speck of wind here."

"But there's plenty up there. Do you see those clouds flying? There's a storm not far off, or I'm mistaken."

The kites were flying so beautifully and they had set them so high that they could not make up their minds to bring them down at once, although ominous jerks at the long strings ought to have warned them that Rob was right.

Presently Harry's string was suddenly pulled to its utmost tention, and then with a snap the kite was gone, sailing quickly out of sight in the cloudy sky. The same gust turned Jack's over, darting about in a very crazy manner, finally landing it in a far-away tree.

"Too bad!" whimpered the boys.

"Don't stop to fret over kites," said Rob. "I don't like the look of those clouds; they are getting darker, and I'm afraid we're going to have a blow. Jack, you'd better run to the house and help mother get things fixed up tight. Harry, come with me and we'll see about the stock and the stables with father."

The blow came in good earnest, tearing down fences, twisting huge branches off trees and leveling the standing grain. For an anxious twenty minutes all waited in fear of still more serious mischief, but then the wind swept on.

"I'm afraid we've only had the outside edge of something worse," said father, as he looked around out of doors and saw a few fragments of boards which looked as if they might be from a build ng a long distance away. And so it proved. Before night, chance passers-by brought sad news of ruin and desolation wrought by the cyclone, the center of whose terrible track had been a number of miles to the south of them, and whose chief force seemed to have been spent on a little prairie village about thirty miles distant.

"It's where Cousin Annie lives," said the boys.

Cousin Annie had lived with them as a sister, and even Harry could remember when she had left them to go to a snug little home of her own in Roseville.

Father had enough to do to look after fences, but early the next morning Bob and Jack set out in the spring wagon to drive over and see how Cousin Annie had fared in the storm. They had not gone many miles before its traces lay thick about as they drove, and Rob's anxiety grew to grave fear as he saw more and more of its fearful effect.

"The bridge is gone," cried Jack as they approached a stream which they must cross.

Rob saw it with dismay. In ordinary summer weather they could have forded, but the stream was so swollen by the rain which had accompanied the storm that this was now impossible, and, much discouraged, they turned to take a long round which would bring them to another bridge.

As they entered the real storm track, their way became very difficult. Fallen trees were entangled in the brushwood, and in many places the roadway was partially filled with broken branches and the wreck of far-off ruined homes. Turning from it to drive across the prairie, they tried to pass through a bit of timber, but found it almost impossible to go on.

"We can never get to Roseville!" said Jack, in despair, "and if we do everything will be blown away."

"We must go on," said Rob. "Hark! What was that?"

A loud wailing cry came to them, and they held their breath to listen.

"I do believe it's a wildcat!" said Jack, turning pale. "Old Jim says he's seen wildcats in the timber."

"Nonsense—listen!" Again the cry came, and Rob got out of the wagon and made his way among the bushes in the direction from which the sound came, calling as he went. Jack followed at a safe distance, but hurried up as he heard Rob say:

"Oh, you poor little thing!"

He was pulling apart a tangle of bushes, under which, looking up at them with wistful eyes and pitiful little sobs, was a pretty boy two or three years old.

In great excitement Rob raised him in his arm, greatly touched at seeing how the little fellow clung to him. His clothing was almost torn off, and he seemed badly scratched and bruised.

"Brought here by the storm!" said Rob. "Whose can he be, and how can we find his parents?"

They gave him something to eat, pleased at seeing how eagerly he drank some milk mother had put into a bottle for their lunch. And then he sank contentedly to sleep on Jack's arm, while Rob tried his best to get free of the obstructions which surrounded him; and at last, as twilight was falling, made his way to what was left of the pretty village he had visited the previous summer.

What a sad scene of devastation it was! Very few houses were left standing, and a few of the people were wandering aimlessly about.

"We must find Cousin Annie," said Rob. "She can take care of this poor little chap till we find his mother."

"She's over there," said a man, pointing to a house, in answer to their inquiries, "but she's in dreadful trouble."

"No wonder," said Jack, "when her pretty house is all blown away."

"Yes, but she's lost her baby, too."

"Dear me! Poor little Archie dead!" Bob felt quite overcome with the sorrow all around him as he went over to find his cousin. "Hold the boy, Jack, while I go and speak to her."

She was seated in a shaded room. Rob went and spoke gently to her.

"Oh, my dear boy! The hand of the Lord is heavy upon us." She began telling him how her husband was out with others, searching for some who had been lost.

Meantime Jack had come near the window of the room, rather tired of holding the restless little boy, who at the sound of voices within had struggled to get away from him, and at length with a loud cry of "Mamma—mamma!" was toddling towards the door. Cousin Annie sprang from her seat, and in a moment the poor little storm-waif was in her arms.

"Is he yours?" cried Rob and Jack.

"And you didn't know him?" said Cousin Annie, laughing and crying all at once. "Of course you didn't—he is so changed since last summer."

The two went home with the boys the next day to stay until some kind of a house could be got ready for them. As they passed the broken bridge Jack said:

"Cousin Annie, if that bridge hadn't been gone we shouldn't have gone round where we found Archie, and he might have been there yet."

And Cousin Annie, hugging the darling close, thought she had plenty to be thankful for, although all they had had been swept away by the angry wind.—*Sidney Dayre, in S. S. Gem.*

LITTLE NELL.

Her Shopping Expedition to the City, and How She Was Lost.

Nell went to town on the nine o'clock train, but she didn't go alone. Nell was only four years old. Her mamma was going shopping—going to buy a hat for her, and cambric for dresses, gingham for aprons, buttons, ribbons, stockings—almost everything was to be for that little girl. No wonder she was delighted to go and help.

"Now listen, my dear," said mamma, as the train was moving into the station; "whatever I am doing, wherever we go, you must keep close to me."

"Course I will," said Nell, stoutly, and she surely meant to do it. But this is what happened.

First of all they went to the milliner's on State street. The big shop was crowded with ladies and children, for the warm, bright days of spring had come, and everybody and everybody's little girl must have a new hat. There were piles of hats, and glass cases full of lovely flowers and feathers and birds and ribbons.

All the clerks were very busy. By and by one came to wait upon them, and Nell's hat was bought and wrapped in a brown paper with pictures on it. Then mamma rose:

"Oh, I want to select some ribbons," she said.

"Just step this way, if you please," said the clerk.

Mamma glanced at Nell. She was watching two little girls who were buying their own hats; so she stepped across to the ribbon counter. One moment later she looked around. Nell was not there! She hurried from one end of the shop to the other—no! She looked behind the counters, ran to the door and gazed up and down the street—no such child was in sight.

"She must have gone into the trimming-room," said the clerk, and with fast-beating heart mamma hastened back again. Everybody looked sorry when they heard that a little girl was lost. But she was truly gone!

Now where do you suppose Nell was?

Just as her mamma turned away, another lady, who wore a black silk dress and long cloak, just like her mamma's, started towards the door. Nell saw the dress going, and didn't look up to see what woman was wearing it. So, with her eyes still lingering on those wonderful little girls, she followed a stranger out of the shop. She walked pretty fast, and Nell thought: "Mamma has to hurry; she have so much things to buy for me! Wonder when she'll buy the candy!"

And all the while she kept close to that black dress and cloak, but her eyes were on show-windows, or the lame boy, or the fruit-stand on the first corner round which they turned. By and by, tired of the silence and the speed, she pulled the cloak with one little hand, and looking up, and said:

"Mamma, don't go so fast —— oh! where is my mamma?"

Poor little Nell! How frightened she was!

The strange woman looked down at her and said: "What do you want, child?" She didn't look the least bit like the dear mamma. She looked cross, and her voice was harsh.

"I los' my mamma. I thought you's my mamma!" cried Nell.

"Was she at the milliner's? Go back and you'll find her. That's the store, around the corner"—and off went that unkind woman leaving the little country child all alone on the sidewalk.

Nell was quite bewildered. When she was with mamma, she had not noticed the noise, but now all at once strange men and horses and carts seemed rushing after her from every direction. Tears came into her eyes, and when she bravely brushed them away she could not tell which was the corner where mamma was. All the corners looked just alike. So the lost child started just the wrong way.

Soon she came to a crossing and stopped again. Suddenly a gentleman, who was hurrying past, bent over her, and said kindly:

"Little girl, where are you going? Aren't you lost?"

"I want my mamma," sobbed Nell: and sure enough, there she came behind them, running, yes, running through the city street, and when the gentleman heard Nell's cry of joy, and saw her mamma's face, he smiled, lifted his hat and went on.

Oh! how tightly those little arms clung around her neck! Mamma carried her back to the milliner's, and into the quiet back room where the trimmers were at work, but still Nell could not speak one word. She only cried and cried and clasped her mamma's neck.

Then what do you think they did? Why! they got into the 'bus and rode back to the station, and took the first train home.

They left all the rest of the shopping, and the promised lunch in the Vienna Bakery.

But they had bought the hat.

If you ask Nell how she likes to go shopping, she will say:

"It's no fun, but I know my mamma is the beautifullest lady in Chicago!"—*Ellen Soule Carhart, in Youth's Companion.*

—Never plant willows at all near underdrains as the roots of these trees will surely enter the drains and block them.—*N. E. Farmer.*

MISCELLANEOUS.

—Few towns in England under 20,000 inhabitants can boast of a daily newspaper.

—A Connecticut cow swallowed 200 hair-pins the other day without injury. What became of the young lady is not stated.—*Philadelphia Call.*

—Mr. Bonner, of the New York *Ledger*, who has studied advertising and effect, never uses posters or circulars, but confines himself to advertising in the leading papers.—*Boston Journal.*

—Volumes have been written giving diagrams and specifications as to how children should be trained up, and yet as soon as a man becomes a daddy he throws his judgment overboard, shuts his eyes to reason, and lets the squaller rule the roost.—*Chicago Ledger.*

—While Americans have little reverence for their great men while in the tumult and excitement of politics they attack them with slander and abuse, they really love them, and the greatness of their love shines forth refulgent in the blackness of death.—*Seattle (W T.) Post-Intelligencer.*

—One of the leading articles which the Polynesian Islands send to this country is copra, which is simply the dried meat of cocoanuts. The natives break the nuts into small pieaes, which, after exposure to the tropical sun, turn to a dark brown color. Copra is used in the manufacture of candles to a large extent. Besides pomades and cocoanut oil, copra furnishes a volatile oil, which is used in the manufacture of perfumery. The importation of copra into the United States is yearly increasing.—*Philadelphia Press.*

—A writer in a juvenile magazine recently gathered a number of dictionary words as defined by certain small people, of which the following seems to be genuine: Dust—Mud with juice squeezed out. Fan—A thing to brush warm off with. Ice—Water that stayed out in the cold and went to sleep. Monkey—A small boy with a tail. Pig—A hog's little boy. Salt—What makes your potatoes taste bad when you do not put it on. Snoring—Letting off sleep. Wakefulness—Eyes all the time coming unbuttoned.—*N. Y. Star.*

—A writer in the *Nineteenth Century* urges inventors to develop the practicabilities of the phonograph. He desires to be able to go about his ordinary business with an apparatus in his hat which shall, according to his inclination, recite the latest novel or other book in which he may be interested. He wishes the phonograph to do for the spoken word what the printing press has done for the written word. Time was when such a proposition would be laughed at, but the world is now slow to ridicule inventors; and as Mr. Edison has already invented the phonograph and its development is only urged, no one will say the proposition is wholly absurd.—*Chicago Current.*

—The following persons can not marry in Georgia: First, a white person to a person of color; second, males under seventeen, females under fourteen; third, persons more nearly related than first cousin. Females under eighteen must get consent of parents or guardians. A man can marry his deceased wife's sister. The ordinary licenses all marriages. The grounds of divorce are consanguinity, force or fraud in obtaining marriage, mental or physical impediments, adultery, three years' desertion, of conviction of a crime for which the punishment is two years or more in prison. Cruel treatment and habitual intoxication furnish discretionary grounds. The verdict of two concurrent juries is necessary to divorce.

INSANITY AMONG WOMEN.

The Tendency of the Present System of Education to Induce Mental Disease.

The reading of a recent article by Rev. E. E. Hale has touched a chord of recollection of a certain visit paid to an insane asylum some years ago. I was amazed to see so many familiar faces of persons whom I had missed from the streets and other public places, and had supposed were dead; and in one sense they were. Many, and indeed I should say the majority, of these were teachers and overwrought scholars preparing to be teachers. One who accompanied me, and who had been at one time a patient here and knew most of the histories of these patients, told me much that was sadly interesting. So many bright women! So many fine scholars! Is this the promised end for which they toiled and studied? One especially I can never forget. "Which was the most dreadful of all whom you saw?" asked my friend; and I described her. She was a babbling idiot, full of grimaces, of ceaseless talk and painful laughter.

"And did you not recognize her?"

Recognize her! How was it possible? Then I was told that she was once the brilliant and accomplished teacher who taught in ——'s school, formerly one of the most fashionable in Boston. I had known her well. I had admired her beautiful, serious face and her serene and stately manner.

I desired to look again. I begged permission to walk once more through the gloomy gallery. And now, "as through a glass darkly," I could trace somewhat the changed features. The large, dark, serene eyes were there, but the soul had fled; the features were as if cast of plaster, the face was the same, but it was like a face inverted, reversed, distorted; 'twas *the face of an idiot.*

Now, when I hear of "vacations over" during the hot days of September, and reflect how little in the whole year is the out-of-door life in New England, and how long a time we must be kept to the houses and schoolrooms, a picture arises before me, a scene peopled with human beings who were once scholars and teachers in this same Boston, overworked, over-studied, overpushed, one brain doing the work of three, till the goal is reached and the Bastile over the river is gained.

When I hear parents and guardians of youth speaking of their children's work in the school, the examinations and the emulations and the "prostrations" that follow, I sometimes feel inclined to ask, To what insane asylum do you propose to send your daughter when she is finished?—*Cor. Boston Transcript.*

VERY CONSIDERATE.

Patient—"O-u-c-h!! Hold on a minute, doctor, you are pulling out my jawbone."

Dentist—"Oh! never mind that; I won't charge you anything extra."

To the Last Car.

Roll on, thou car, roll on!
O'er leagues of iron track
Roll on!
What though I can not hire a hack?
What though I'm "busted" except five cents?
What though to suburb resi-dence—
Ning miles—I'll have to walk me hence?
Never *you* mind!
Roll on!

Roll on, thou car, roll on!
At swift 2:40 gait
Roll on!
It matters not if I am late;
If I bawl "stop!" 'till I am hoarse,
It matters not to *you*, of course—
So keep right on, thou last resource!
Never mind *me!*
Roll on!

Roll on, thou car, roll on!
Through winter's freezing air
Roll on!
It's true I've no top-coat to wear;
It's true the "L" don't run my way;
It's true to trudge home won't be gay—
But don't let that disturb you, pray!
Never *you* mind!
Roll on! —*Judge.*

It Was the Trimmings.

"Blessed shade of Saint Cœsus!" howled Old Hyson, when Mrs. H.'s millinery bill came in. "Bank of the Universe! sixty-eight dollars for a bonnet!"

"Yes, dear," she said, so sweetly, "these are the days of Jeffersonian simplicity. The bonnet only cost one dollar and fifty cents; the rest is for the trimmings."

And the old man grinned and paid the bill without a murmur.—*Brooklyn Eagle.*

APPEARANCES ARE DECEITFUL.

Stray Woman—"Please give me a few cents to help me get to my home in the East. I was connected with a burlesque troupe that was bankrupted yesterday, and I have not enough money to buy a railroad ticket."

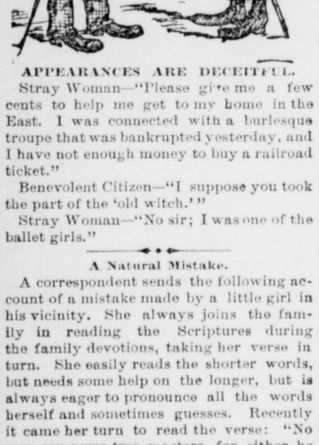
Benevolent Citizen—"I suppose you took the part of the 'old witch.'"

Stray Woman—"No sir; I was one of the ballet girls."

A Natural Mistake.

A correspondent sends the following account of a mistake made by a little girl in his vicinity. She always joins the family in reading the Scriptures during the family devotions, taking her verse in turn. She easily reads the shorter words, but needs some help on the longer, but is always eager to pronounce all the words herself and sometimes guesses. Recently it came her turn to read the verse: "No man can serve two masters, for either he will hate the one and love the other, or else he will hold to the one and despise the other. Ye can not serve God and Mammon." She made a slight variation at the end and finished the verse: "Ye can not serve God and women."—*Chicago Tribune.*

THE PEASANT AND THE DOG.—A Peasant who was Awakened at midnight by the Barking of a Dog under his Window threw up the Sash and called out: "How, now—what is the danger?" "There is none." "Then why do you Bark and Disturb my Slumbers?" "For the same Reason that you play the Fiddle and keep me Awake—for Self-Amusement." Moral: When the Piano next door become Unbearable buy your boy a Drum.—*Detroit Free Press.*



THE DAY AFTER.

"Great Scott! What a glorious time I must have had last night!"; 10

STRANGE FANCIES.

Garfield's Belief that a Certain Course of Conduct Would Lead Him to the White House—Secretary Chandler Counts White Horses—Thad Stevens Picked Up Pins.

The whims, superstitions, freaks, or whatever they may be called, of many men of good, hard, common sense, who have become conspicuous in public or business life, are more potent forces than would be supposed. The experience of such alienists as Dr. Hammond or the late Dr. George M. Beard would, if published, make a most curious and interesting story. For these physicians there is no surprise when a shrewd and wealthy financier or successful politician hesitatingly confesses that he is controlled by some fancy that seems childish, but is none the less potent. They meet so many such cases that they are inclined to think that if almost all men would make confession they would admit that some kind of fancy or belief had possession of them.

Dr. Beard once said to the writer that one of the most successful financiers of Wall Street had confessed to him he was convinced that if he walked on the right hand Broadway block, between Houston and Prince Streets, he would meet some terrible calamity, either in business or personally. This banker was accustomed to walk down Broadway for exercise, on the right hand side, and when he reached Houston Street he crossed over, walking the block to Prince on the left hand. Then he would cross back again perfectly content. Satisfied that the seeming conviction was a mere whim, he once, by force of will, went on a few steps on the block, but he suffered such agony of fear that he gave it up and crossed the street.

Another of Dr. Beard's patients, a well-known lawyer, who lived in Brooklyn, would never cross the ferry unless he could get to a certain spot on the rear deck, so that he could stand with one foot on the big iron clamp. He believed that if he failed to do so he would meet with misfortune of some kind.

That men susceptible to sentiment should be dominated by these hallucinations, as Dr. Beard called them, is more easily explainable than the cases of men of practical hard sense with no nonsense about them. Yet Dr. Beard asserted that in his practice he did not see that one class was less liable to notions than the other. President Garfield, for instance, who was of a keenly susceptible temperament, had a profound conviction that the figure nineteen would be associated strikingly with the events of his career. He was born on the 19th of the month, and died on the 19th. It was known by Garfield's friends that he was firmly convinced that he would one day become President. Some incident that happened while he was in the army fixed the conviction in his mind that he would become President, provided he never strayed from the path the omen pointed out. His friends, not knowing just what the omen was, were satisfied that in obeying its dictates Garfield's otherwise inexplicable course in some things of comparatively petty consequence found explanation.

Speaker Carlisle is as practical and unsentimental in temperament as Garfield was the opposite; yet Mr. Carlisle is dominated by one notion, if not by more. He will begin no new thing on Friday. When he came to Washington to manage his canvass for the Speakership, a year and a half ago, he arrived one day later than than expected, much to the disappointment of some of his friends. It appears that he had made all his arrangements to leave Covington Friday night; but on the evening of that day, just as he was about to start, he remembered that it was Friday, and he at once deferred his departure. He couldn't have been induced to start that night.

It is believed in Wall Street that the cool, impertubable Jim Keene suffers torture from the fear that poison somehow or other has got into anything of a liquid form that he drinks, not intentionally put there, but there by accident, and he would not dare drink a glass of water, wine, or coffee without going through some secret performance that wards off the danger.

Mr. Blaine, with all his common sense, will never turn back to enter his house after he has quitted it, in case he has forgotten something, not, at least, until he has walked a few paces on the sidewalk, and he is not free from a few other hallucinations, if that is the name for these mental phenomena.

Who would think that ex-Secretary Chandler would permit himself to be bothered by such visionary influences as counting white horses for luck? He counts every one that he sees until he reaches thirty-nine, and then he begins over again. Speaking of this once, he said he had often wondered why he did so, for his reason told him that it was nonsense; yet he felt uncomfortable unless he did. When President Arthur went to Florida with Mr. Chandler the party arrived at Jacksonville in the evening. The President entered a carriage drawn by four horses and in a moment the booming of a cannon frightened them and started them on a run. Mr. Chandler stood up in his carriage, well frightened. He saw that one of the horses attached to the President's carriage was white, and counted it, making the thirty-ninth, all by an instantaneous process of the mind. In a moment the horses were quieted down. Mr. Chandler said that his judgment told him that there could be no possible connection between his counting of the horse, which he had failed to do when he first saw it, and the prevention of a runaway with the President, and yet somehow he trembled when he thought of what might have happened.

Such a hard-headed old statesman as Thaddeus Stevens cherished the hallucination that there was luck in picking up pins. He never passed one, if he saw it, without picking it up, getting the point before him. It has been said of Mr. W. W. Corcoran that he will not sit down upon a chair until he has first raised it up.

The alienists say there is no special care for these mental phenomena, and as a general thing there is no need for any, as they are harmless, and by no means indicate mental disease. The work of the alienists lies in the recognition of the tendency of the hallucinations to increase or become predominant, as is the case in some forms of incipient insanity.—*N. Y. Sun.*

RED STAR TRADE MARK. COUGH CURE

Absolutely Free from Opiates, Emetics and Poisons.

PROMPT, SAFE, SURE

Cure for Coughs, Colds and other Throat and Lung Affections.

FIFTY CENTS A BOTTLE. AT DRUGGISTS AND DEALERS.

THE CHARLES A. VOGELER CO., Baltimore, Maryland, U.S.A.

ST JACOBS OIL TRADE MARK

THE GREAT GERMAN REMEDY

For Pain Cures Rheumatism, Neuralgia, Backache, Headache, Toothache, Sprains, Bruises and other Pains and Aches.

Fifty Cents. At Druggists and Dealers.

THE CHARLES A. VOGELER CO., Baltimore, Maryland, U.S.A.

Statue of "Liberty Enlightening the World."

The Committee in charge of the construction of the base and pedestal for the reception of this great work, **in order to raise funds for its completion,** have prepared a miniature Statue *six inches in height*—the Statue Bronzed; Pedestal, Nickel-silvered—which they are now delivering to subscribers throughout the United States at **One Dollar Each.**

This attractive souvenir and Mantel or Desk ornament is a *perfect fac-simile* of the model furnished by the artist.

The Statuette in same metal, *twelve inches high*, at **Five Dollars Each,** delivered.

The designs of Statue and Pedestal are protected by U. S. Patents, and the models can *only* be furnished by *this Committee.* Address, with remittance,

RICHARD BUTLER, Secretary,
(American Committee of the Statue of Liberty),
33 Mercer Street, New York.

Caution! Some dealers recommend inferior goods in order to make a larger profit. This is the **original** Shoe. Beware of imitations which acknowledge their own inferiority by attempting to build upon the reputation of the original. **You can not** be sure of getting the **genuine** article unless you are careful to examine and see that this stamp appears plainly on the soles:

JAMES MEANS $3 SHOE.

This Shoe for gentlemen is made of finest Tannery Calf-Skin, stitched with large Silk Machine Twist, and is unequaled in Durability, Comfort and Appearance. It is made in various widths to fit any foot. It is made with either broad or narrow toes. Made in style shown in cut, also in Congress and Lace. The quality of this Shoe has won for it so high a place in public estimation that it stands to-day **absolutely without a rival.** Wherever you live, this Shoe is within your reach; ask your dealer for it, and if he can not supply you with a good fit, send your address on postal card to JAMES MEANS & CO., 21 Lincoln St., Boston, Mass.

UNIMPEACHABLE TESTIMONY!

DR. J. BRADFIELD—I have taken several bottles of your Female Regulator for falling of the womb and other diseases combined, of 16 years' standing, and I *really believe I am cured entirely*, for which please accept my heartfelt thanks. I know your medicine saved my life, so you see I can not speak too highly in its favor. Respectfully,
MRS. W. E. STEARNS, Ridge, Ga.

DR. J. BRADFORD—I have, as you know, been selling your Female Regulator for years, and have had a steadily increasing demand for it; it gives the very best satisfaction. I frequently sell it to physicians who use it in their practice with the most satisfactory results. R. THOMAS, M. D., Druggist.
Valdosta, Ga., June 28, 1883.
Send for Treatise on Woman. Mailed free.
BRADFIELD REGULATOR CO., Atlanta, Ga.

LE PAGE'S LIQUID GLUE.

UNEQUALLED FOR CEMENTING WOOD, GLASS, CHINA, PAPER, LEATHER, &c. AWARDED GOLD MEDAL, LONDON, 1883. Used by Mason & Hamlin Organ & Piano Co., Pullman Palace Car Co., &c. Mfd. only by the RUSSIA CEMENT CO., GLOUCESTER, MASS. SOLD EVERYWHERE. Sample Tin Can sent by Mail, 25c.

WANTED RELIABLE SALESMEN

To introduce and sell the trade the well-known and celebrated Cigars of the NEW YORK & HAVANA CIGAR COMPANY. Liberal arrangements. Salary or Commission paid to the right man. For further particulars and terms address, at once,
THE NEW YORK & HAVANA CIGAR CO.
57 Broadway, New York.

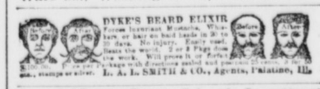
CONSUMPTION.

I have a positive remedy for the above disease; by its use thousands of cases of the worst kind and of long standing have been cured. Indeed, so strong is my faith in its efficacy, that I will send TWO BOTTLES FREE, together with a VALUABLE TREATISE on this disease to any sufferer. Give express and P. O. address.
DR. T. A. SLOCUM, 181 Pearl St., New York.

I CURE FITS!

When I say cure I do not mean merely to stop them for a time and then have them return again, I mean a radical cure. I have made the disease of FITS, EPILEPSY or FALLING SICKNESS a life-long study. I warrant my remedy to cure the worst cases. Because others have failed is no reason for not now receiving a cure. Send at once for a treatise and a Free Bottle of my Infallible remedy. Give Express and Post Office. It costs you nothing for a trial, and I will cure you.
Address DR. H. G. ROOT, 183 Pearl St., New York.

$75 A MONTH and expenses paid any active person to sell our goods. No capital required. Salary paid monthly. Expenses in advance. Full particulars FREE. We mean what we say. Standard Silver Ware Co., Washington St., Boston, Mass.



DYKE'S BEARD ELIXIR Forces luxuriant Mustache, Whiskers, or hair on bald spots in 30 to 90 days. No injury. Enjoy rapid growth the world. 2 or 3 Pkgs. does the work. Will prove it or forfeit $500. Sent sealed with directions and testimonials, stamps or silver. L. A. L. SMITH & CO., Agents, Palatine, Ill.

8 and 10 per Cent. Colorado Investment Securities. GURLEY BROS., Investment Brokers, Denver, Col., deal in County, City and Cattle Bonds and Registered Warrants. Send for pamphlet.

CANCER Treated and cured without the knife. Book on treatment sent free. Address F. L. POND, M. D., Aurora, Kane Co., Ill.

$10 Buys New Silver-plated Singer Sewing Machine, warranted 5 years. For particulars, address C. G. AKAM, Chicago, Ill.

SATURDAY, MAY 16, 1885.

The Fence Law of Garrett County.

We have been requested by several of our subscribers to publish an extract from the fence law of Garrett county, in order that they may know what is required of them with reference to stock running at large. We published this law with all other local laws in the spring or summer of 1878, and if any of our readers have kept a file of THE REPUBLICAN by refering to it they will find the law in full.

Under the old law every man was required to keep his stock enclosed. No man was required to fence against his neighbor's stock. This has been changed by the local law and now every man must fence against his neighbor's stock.

The law is as follows:

SECTION 30. All fields and other grounds kept for enclosure in Garrett county shall be fenced with post and rail or plank or worm fences made of good and substantial rails at least four feet high from the ground to the top of the upper rail, worm fences, not staked and ridered, to be five feet high.

SEC. 35. In all cases of trespass or legal process of any kind to be sued out or commenced to recover damages for trespass upon lands in said county by any kind or description of live-stock, the defendant may plead the general issue and give the special matter in evidence under this act, and the plaintiff shall be non suited and mulcted in costs unless the land on which the trespass was committed be enclosed according to this act.

SEC. 36. It shall not be lawful for any person in Garrett county to impound any stock unless the same be found trespassing *within* an enclosure surrounded by a good and substantial fence at least four feet high.

The Grand Old Party.

Never in its history has the Republican party shown up so grandly as it does under the investigation of the Democrats. Where now are all the Democratic campaign cries of many years of incapacity and dishonesty? In the light of every development the Democracy, now in complete power, can make, they sink away in respectful and admiring silence. No rascals, no dishonesty, no incapacity, no idleness, no robbery, no enormous surplus of $400,000,000 howled from every stump in the country, and the great count of the funds in the Treasury ends in a discovery of two cents missing through Republican dishonesty and $3 missing through Democratic carelessness. That is about the regular proportion. The Republicans turn up missing with two cents after twenty-five years' administration of affairs and the Democrats lose $3 in a couple of days' count of the Republican money.—*Cincinnati Commercial.*

This is indeed a triumphant vindication of the Republican administration. The most honest, economical and incorruptible government that ever held power, it affords a striking contrast to the administration of Buchanan, which, in Democratic circles, is avowedly the most venal in the country's history. Twenty-five years ago, when the Democrats went out of power and the Republicans came in, the deficiency in the account, instead of two cents in the aggregate was six dollars in every thousand dollars. That was honest Democratic government! As between Republican dishonesty and Democratic honesty, the difference was as between two cents on the one hand and almost a million dollars on the other. And it is just this difference that must, in the public mind, fix the estimate of honesty so far as the two parties are concerned.

The story is not told, however. Again the Democrats are in power, and in the course of time, when popular clamor demands a change, and they, too, go out to give place to another party—Republican, Independent, or whatsoever it may be called—then it will be the hour to judge the wisdom of the choice that expelled Republicanism from its high place and installed in the seat a party whose past history must subject it to suspicion.—*Baltimore Herald.*

The Baltimore *Herald's* Washington correspondent says:

Applications for appointment as postmasters at the county seats in Maryland are on file at the Postoffice Department as follows; Belair applicants, Mrs. Mary H. Smith, Thos. Melvin and R. J. Stone; Cambridge, Thomas W. Anderson; Chesterville, E. A. Carey; Catonsville, James Millen; Centreville, Mrs. S. R. Carrie; Frederick, J. A. Ritters and S. C. Cookey; Leonardtown, Harry Spalding; Oakland, Owen Hart, A. J. Harne, R. T. Browning and E. J Fringer; Princess Anne, Samuel F. Smith; Reisterstown, J. E. Matthews and W. L. Shriver; Westminster, Mrs. Ettie Taylor. No applications have been filed for the offices at Elkton, Ellicott City, Cumberland, Cockeysville and Hagerstown.

The count of the cash in the Treasury has vindicated the Republican management of that important branch of the Government and silenced the cavil and Democratic cry of fraud that has so often heard during the last campaign. The two cent discrepancy in a five dollar package of pennies is a triumph of honesty in itself, but when the money was hastily examined by one of the most expert clerks and the deficit was discovered he daid the "two cents" out of his pocket rather, than go over it again.

The "Rascals must go," but as yet no valid reason has been given for the exile, in spite of digging and delving of Democratic partisans for a hook on which to hang an indictment of dishonesty. The Republican party welcomes this investigation, and if any fraud is discovered it will be the individual act of same dishonest official—men without principal, and who are found in every party. The party of the Union, the party of the People, the party of Protection requires no microscope to discern its motives. Its record stands, and as a monument towers above that erected to the memory of the Father of his Country. Its history is written, and thete is not an intelligent adult that is not familiar with its achievements.

First in war, first in financiering, and first in everything that goes to unite a divided brotherhood, the principles of the Republican party are as a plate of hammered brass—more beautiful for the pounding received.—*Wheeling Intelligencer.*

The *American's* Washington correspondent writes to his paper of Sunday as follows: United States Senator Wilson shares the opinion that the Democrats must be very careful in the matter of appointments. It is his belief that officials who are appointed for stated terms will not be disturbed before the expiration of their commissions, except for cause, Any violation of this rule, he thinks, will be contested by the Republicans in the Senate. Senator Wilson deprecates any antagonism between the Senate and the President, and expresses the hope that there will not be any occasion for a quarrel between the two branches of the government. For that reason he considers it wise for the Democrats to wait until the commissions of the incumbents expire before filling their places. He thinks that the Republicans will object to the confirmation of nominations made to offices where a Republican was removed without cause before the expiration of his term. In this event, no more appointments will be made to important offices in this State, with the possible exception of that of collector of internal revenue. But there is a disposition not to make any further changes in a hurry. In regard to the collectorship of internal revenue, Senator Wilson states that Mr. Sellman has served only two years, and there is a disposition in certain quarters not to disturb an officer who has served less than four years when no good cause can be assigned for his removal. The term of the United States attorney for this district does not expire until January, and the other important offices some time thereafter. This would indicate that there is a dreary prospect for those who have been waiting so long for the official plums.

The Democratic families of the land have taken the hint and in the administration of household affairs have followed the example now before the country at Washington.

"Wife," ejaculated the Democratic head at the table, "the coffee is weak this morning, and the cakes are cold."

"I know it. It oughtn't to be so; but Higgins is to blame."

"Higgins! Who's Higgins?"

"The new kitchen 'appointment clerk' you engaged at the intelligence office."

"Discharge Higgins at once."

"Not if I know it. She's the handiest scapegoat we've ever had."—*Hartford Post.*

A statement prepared at the pension office shows that the business of the office during the month just ended has exceeded that of any previous month. From this statement it appears that 5,370 "original" pension certificates have been issued during the month of April, 1885, against 3,634 during the same month last year, and that the total number of pension certificates issued was 8,199 being 1,866 in excess of the number for April, 1880.

State of Trade.

NEW YORK, May 9.—The movement of general merchandise during the past week has been less than during the preceding seven days, as reported to *Bradstreet's* by special telegrams. The dissolution of the east-bound pool and freight rate war in the Northwest have failed thus far to stimulate the distribution of goods. In the West the activity of farming operations has contributed to depress business with country merchants. This is particularly the case in the Northwest, where special efforts have been made to increase the acreage of spring wheat. To such an extent has planting been carried that it is now reported that the outlook is for nearly if not quite the acreage of wheat in Minnesota and Dakota this year as last. The general business situation throughout the country is not satisfrctory. Even at St. Paul and Minneapolis the movement is below previous expectations. At Chicago it is barely maintained, while at St. Louis, owing to favorable weather, there has been some improvement. There is no gain announced from Cincinnati, from Detroit, from Baltimore or Philadelphia. At the east there is no more favorable report. The distribution from New York and Boston has been of moderate proportions in leading lines. Neither dry goods nor hardware have any stimulus in the demand from the interior. The wool market has witnessed some little renewed activity, but prices have not improved. The price of breadstuffs have declined 2a3c. net this week, Since Wednesday there has been some recovery, owing to the emphasis added by the reports of a short crop of wheat.

On the New York market all notion of war between Russia and Great Britain has disappeared, and any strength in wheat must be derived from crop reports. The bull party at present is in the ascendent. They outline the situation as pointing to at least $1.25 per bushel for wheat. Depending wholly on recollection and using round numbers, they recall that in 1880, with a crop of 499,000,000 bushels, wheat sold at $1.10. In 1881, with a crop of 380,000,000 bushels, wheat sold from $1.10 up to $1.50 and to $1.60. In 1882, with a crop of 502,000,000 bushels, wheat sold from $1.33 down to $1.20; while in 1883, with a crop of 420,000,000 bushels, it sold from $1.25 down to $1.00 per bnshel. In 1884, with 513,000,000 bushels it went off to 78½c.; and this year, "with 400,000,000 bushels," the expectation that the price will go from $1 to $1.25.

Grocery staples move uniatisfactorily. Coffee is lower and weak. Dairy products are in buyers' favor and dull. There were 197 failures in the United States during the past week, as compared with 167 in the preceding week, and with 132, 149 and 119 respectively in the corresponding weeks of 1884, 1883 and 1882. About 86 percent were those of small traders whose capital was less than $5,000. Canada had 36, an increase of three.

There has been no gain in pig iron and no sales of importance are noted. There has been some pressure to sell Southern irons. Receipts of Scotch pig iron are somewhat heavier, but prices are no different. Bar iron is dull and unchanged. Steel rails are dull and unchanged, and prices do not show any disposition to get above $26 per ton at the works. "The tendency however is toward improvement as the spring advances."

BOSTON, May 9.—The *Advertiser* in its review of the wool market says: The market has been quiet, but business continues to be larger than a year ago and the sales since January foot up nearly 14,000,000 pounds more than the corresponding time last year or an average increase per week of over 700,000 pounds. The business in April was particularly brisk, wools being pressed by holders for sale in order to close out old wool, and manufacturers have on their side bought as if they thought the prices of new wool could never be lower than those now ruling. Indeed, many leading authorities consider that wool is a purchase at the price now ruling here, and they have stocked up ahead of their wants. Manufacturers have also taken orders for goods which require them to secure wool. Recent large sales have made the market to be as bare as usual at this season, although the new clips are about three weeks late. The inquiry has been quite active from hosiery manufacturers the past week, who have bought more wool than for several weeks past. They are now upon their fall goods, and are likely to be more in the market. Stocks of wool with other manufacturers are, however, generally larger than a year ago.

A friend should be one in whose understanding and virtue we can equally confide, and whose opinion we can value at once for its justness and sincerity.

[Special Cor. Baltimore American.]

The Hungry Hordes.

WASHINGTON, May 11.—Another week opens at Washington with the announcement of the appointment of a few more government officers and with rumors of more to come, and still the Democrats do not seem to be happy. The trouble seems to be that the new appointees are not of a caliber of Democracy that carries conviction to the heart of the party that it is to be taken care of. By far the most aggravated case of annoyance in this connection has been the appointment of ex-Assistant Treasurer Graves to be chief of the Bureau of Engraving and Printing. To be sure, Mr. Graves, just after it became known that Mr. Blaine was defeated, came out in a card to the effect that he had voted for Mr. Cleveland; but there is no official record of the vote, of course, and everybody may not take his word for it. However, he has the place, and it is well known that he is not nor has he been a dyed-in-the-wool Democrat, and there's the rub. Another sore point is that Graves' new place is one of the very best under the government, as far as the distribution of patronage is concerned. There are in the Bureau of Engraving and Printing about 1,200 positions that are not protected by the civil service rules, and that are subject to partisan changes in the discretion of its chief. Graves, therefore, virtually controls all the patronage there is under the Treasury Department. This fact was well known to Democrats throughout the country and the list of applicants for the place included a great many names of Democrats with national reputations bearing endorsements of all the party leaders, and of whole delegations from Democratic states. All these were passed by, and a mugwump was given the place. It is perhaps no wonder that the Democrats don't like it. This, however, is a case of spilt milk, but it arouses a fear of what is yet to come. There are several good places to be filled during the next few days, and there is anxiety to know who will get them. It seems to be pretty well understood that E. A. Apgar, of Ithaca, N. Y., can have the place of register of the treasury if he cares to succeed Blanche K. Bruce. Apgar's appointment would not be particularly offensive to anybody, and yet, his Democracy is not of the kind that Beck and Watterson delight in. Another good place to be filled is that vacated by Mr. Graves. It is thought that Treasurer Jordan has the right to select his assistant, and it is expected that he will choose a New Yorker, since nearly every Treasury appointee thus far, except Mr. Higgins, has been from the Empire State. There is room also for another New Yorker at the head of the customs division, made vacant by the acceptance of Mr. James' resignation today. This is a very important post, and there are lots of Democrats who are longing for it. The present week, therefore, may or may not be productive of considerable balm for the wounded spirits of the Democracy. If not, there will be some tall kicking. It is a fact, however, that some Democrats pretend to be well satisfied, and, indeed, it is really refreshing, in this time of almost universal growling, to find occasionally a man who looks with unselfish and philosophical eyes upon the political situation and finds that the administration is doing as well as could be expected under all the circumstances. Such an one is the Hon. Frank Hurd, of Ohio. "The only wonder to me is," he said, talking to *The American* correspondent, "that the administration has done as well as it has. The fact is that it is very difficult to find the right sort of men in our party who can afford to take office. We have been out of power so long that our people have created offices for themselves, business positions in private life in which they are successful, and permanently occupied. The result is that they don't want public places. They have in most cases permanent private business that is more valuable to them than anything the government can offer; and so they are not asking, and not willing to take office. Of course there are plenty of people who would take positions, but they are not the sort of men who ought to represent the party in the management of national affairs. They are the sort of men, in most cases, who are always out of employment—the-never-to-do wells of the party and of society. They are not the sort of men who ought to hold public trusts, or who ought to be brought forward as the representatives of the great party that has returned to the management of the affairs of the nation."

"Then you think this is the explanation of the delay in appointments?" asked the correspondent.

"Very largely. The administration sees the necessity of very careful work, and proposes to be very careful, no matter how much pressure is brought to bear. I know it to be difficult to find the right sort of men who can afford to give up their business and take office. They see that office under the government means nothing more than a living, and the ablest men have, in a majority of cases, business connections that are of more importance than this to them. I know this from personal experience. I have had an office at my disposal for some weeks which pays $5 per day, and have been trying to find the right sort of a man who would accept it. I have not found him yet. There are several to whom I have offered it, but they say their private duties will not permit them to take public offices. Of course, there are plenty of men who would take it, but they are not the men whom I could recommend for the place, or with whom I would be willing to entrust my private or the country's public business."

"You do not agree with those, then, who think the administration is moving too slowly and cautiously?" was suggested. "No. I admire its good, cool judgement and pluck in resisting all pressure until it is satisfied of what ought to be done, and then do it, no matter who may be personally displeased." This from an eminent free trader, who has not been supposed to be perfectly satisfied with the course of the administration, is news indeed, and what he says is not likely to make him more popular in his old district than when he was defeated last fall; and yet it is refreshing to find a Democrat now and then who is a philosopher in any sense of the word.

Our Washington Letter.

From Our Regular Correspondent.

WASHINGTON, D. C., May 11.

In Mr. Henry Watterson's recent screed he says that the Democratic party is now on trial, and must stand or fall by Mr. Cleveland's administration. If this be so, it must be admitted that Democracy is pretty nearly on its last legs, for never in the history of the thirty-three years of Democratic rule has an administration been the subject of such bitter invective and angry comment from its own adherents, not alone for sins of omission and commission, but for a treacherous disregard of the entreaties of the Democratic leaders to give to the country a Democratic administration. The first sign that Mr. Cleveland has yet given in this direction is the removal of Postmaster Palmer at Chicago, to strengthen the backbone of those Democrats in the Illinois Legislature who cannot consistently vote for Bill Morrison. I don't know whether this dodge will work or not, because news has come that the Republicans have elected their legislative candidate to take the place of Shaw, whose vote had been with Morrison from the first. Besides this, those Democrats who refused to vote for Morrison on account of his tariff views, when their votes could have elected him, will not be likely to undergo a sincere conversion because such a Democratic fatility as Judd has got the Chicago Postoffice.

The new Pension Office building is nearly completed. Four rooms on the ground floor, southeast corner, are already occupied by wagon loads of documents and stationery, as the work of moving has begun. This building is 400 feet long by 200 feet wide, and four stories high. It has an immense area or court yard, large enough for several circusses to exhibit on. Four great brick pillars, about 12 feet in diameter, run from near each end of the court yard to a height of nearly 100 feet, as supports to the iron and glass roof. Balconies extend around the inside of the edifice so that clerks can pass from room to room outside, and so that thousands of visitors can look down into the court yard. It is the largest brick building in the world. Thirty-six millions of bricks have been used in its construction. Eighteen hundred clerks will be employed here in the pension department alone, and each will have plenty of light and air. Not another public building in the United States compares with it for comfort and solidity. It is built of brick, and iron girders and bands, so that it is virtually knitted together. The foundations are planted more than 30 feet below the surface. More than 100 workmen are now engaged here putting the plastering and flooring to a finish. It is to be ready for occupancy, the lower floor, this month, the others early in the summer. General Meigs, though a stalwart Democrat, has held his position by the grace of four or five Republican administrations, is architect. General Black, the present Commissioner of Pensions, accompanied by his wife, visited the new building a few days since and were greatly pleased with it. The watchman, a North Carolina man, who has been here from the first, showed them about. Watchmen are here employed day and night to see that the building is not entered and lumber, iron and other material are not stolen away, for there are persons even here in Washington who seek to acquire wealth without labor or paying for the same. Wonder where they come from?

JUNIUS.

Four Great Generals.

From the Montreal Gazette.

The four greatest generals produced by the great civil war on the national side were Grant, McPherson, Sherman and Sheridan. One of the most pleasant memories of American history is, and will forever be, the fact that between these four great commaders there was never the shadow of jealousy or envy. It is the highest honor that Grant ever received from men's judgment or admiration that these three able captains all willingly and always looked up to him as their superior. McPherson fell in battle before the splendor of his abilities could attract the world's attention, but in his death Grant, as he declared, lost one of the greatest—perhaps the very greatest—of his lieutenants. Sheridan, as in right of his Irish blood, had the fiercest spirit in battle; Sherman, the greatest invention in council, while McPherson could fight with the one and plan with the other, but they all admitted, because they knew and felt that "the silent gray eyed man" was greater than they.

"Why," I asked Gen. Sherman once, "did you and Sheridan always acknowledge Grant to be your leader?" "Because," he responded, in his quick, idiomatic manner, "while I could map out a dozen plans for a campaign, every one of which Sheridan would swear he could fight out to victory, neither he nor I could tell which of the plans was the best one; but Grant, who simply sat and listened and smoked while we had been talking over the maps, would at the end of our talking tell us which was the best plan, and in a dozen or two words the reason of his decision, and then it would be all so clear to us that he was right that Sheridan and I would look at each other and wonder why we hadn't seen the advantage of it ourselves."

"I tell you," he continued after a moment's pause, "Grant is not appreciated yet. The critics of Europe are too ignorant of American geography to appreciate the conditions of his campaigns. What is it to march an army from Berlin to Paris? Look at the shortness of the distance. Look at the multitude of roads. Look at the facilities of transportation. Consider how many times the same ground has been fought over by successive commanders. Is not every point of vantage known? What commander can blunder where all the conditions lie open to his eye? But I have seen Grant plan campaigns for half a million of troops along a front line 2,500 miles in length, and send them marching to their objective points through sections where the surveyor's chain was never drawn, and where the commissariat necessities alone would have broken down any transportation system of Europe; and three months later I have seen those armies standing where he said they should be what he planned and accomplished. And I give it as my military opinion that General Grant is the greatest commander of modern times, and with him only three others can stand—Napoleon, Wellington and Moltke."

The third trial of the Snyder dynamite projectile took place Saturday on the Potomac above Georgetown. The object of the trial was mainly to demonstrate the safety of the system of firing, so that no particular attempt was made to exhibit the effect of the shell itself. The target was a ledge of rock near the one used as a target at the preceding trial in March, and the effect was much the same as that described in the published report of that trial. Capt. Skrydloff, of the Strolok, was present, with two other Russian officers, especially directed by their government to report the trial. Also Capt. Sternberg, of the German artillery; Capt. Chere, of the French navy, together with representatives of nearly all of the various legations. Lieutenants Cowden and Wadhams, of the naval ordnance bureau, were also present. Captains Skrydloff, Chere and Sternberg expressed satisfaction with the results of the trial, and concurred in the opinion that the safety of the system of firing was assured.

At a Murphy meeting a man in his cups said he couldn't sign the pledge until he had had another drink. "Sign it now" exhorted Murphy. "Not until I've had just one more." "Well, said Murphy, "if you won't sign otherwise go and get it." Then finding that the man hadn't the money to buy a drink Murphy gave him ten cents. He got the drink, came back and signed the pledge.

Francis Murphy is a practical man. He takes men as he finds them, falls in with them in the hope of leading them his way. He is a big souled man, who loves his kind, and so draws men to him. Many men who sign his pledge don't keep it. He can't expect that all will stand firm, though he bids them turn to God for help. Murphy is doing a great work in Pittsburg, as he does wherever he goes.—*Wheeling Intelligencer.*

LOCAL NEWS.

LODGE MEETINGS.

OAKLAND LODGE, I. O. G. T., meets in Sturgiss' Hall every Tuesday night.

LOCAL BRANCH, No. 85, of the Iron Hall, meets in same Hall 1st and 3d Saturday nights of each month.

SHEALTIEL LODGE, No. 122, I. O. O. F., meets in Lenge's Hall every Monday night.

ALTA LODGE, No. 574, K. of H., meets in same Hall 2d and 4th Thursday nights of each month.

PATMOS COUNCIL, No. 386, A. L. of H., meets in same Hall 2d and 4th Friday ntghts of each month.

—If you want a good cigar go to Newman's.

—Died Tuesday, May 12, 1885, at Galliopolis, Ohio, Frank Kepner, son of Mr. E. Kepner, of Oakland, aged about 30 years.

—Go to Newman's for oranges, lemons and bananas.

—Take your wagons, harrows, buggies and plows that need repairing to Naylor & Richardson. All work guaranteed.

—Go and see Naylor & Richardson's hand made wagons.

—Mr. John Helbig, who went to California last fall in company with Mr. John O. Michael, returned to Oakland last Saturday.

—Groceries and flour at Newman's. 5 9 4t.

—Mrs. E. C. Tasker, who spent the winter with her family in Anne Arundel county, this State, returned to Oakland Wednesday.

—Only behold the fine lot of toys at Newman's, sold so cheap that you can't help but buy them.

—The monthly meeting of the Band of Hope will be held in the M. E. Church Thursday evening, May 21st. Rev. Dr. Holmes, of Allegany College, Meadville, will be present and deliver a lecture on "Higher Education."

—Miss Emma Brooke returned Saturday from Baltimore, where she has been attending a School of Photography, from which institute she received a Diploma. We understand that Miss Emma and her brother propose in the near future to open a photograph gallery in Oakland.

—The Oakland Athletic Club was organized Tuesday evening with the following officers: President, Wm. H. Tower; Vice President, E. H. Sincell; Recording Secretary, James M. Litzinger; Corresponding Secretary, Arthur Townshend; Treasurer, A. G. Sturgiss. A meeting will be held in the *Democrat* office Saturday night at 8 o'clock.

Church Services--Sunday.

M. E. Church—Preaching at 10½ A. M. and 7½ P. M. by Rev. M. W. Rider.

Stone Church—Preaching at 11 A. M. by Rev. John S. Foulk.

Lutheran Church—Preaching at 10½ A. M. and 7½ P. M. by Rev. C. W. Sechrist.

Preaching at Deer Park, by Rev. C. W. Sechrist, at 2½ P. M.

St. Peter's, Catholic—Preaching every Sunday at 10½ o'clock A. M., except the second Sunday of each month.

Church Dedication.

The dedicatory services of Spiker Church House, (U. B.) Arden Chapel, near McHenry, will take place on Sunday, June 28th, next. Rev. J. W. Hicks, P. E., will officiate. Services in the morning at 10 o'clock, afternoon at 3 o'clock. Rev. J. M. Rodrick and other ministers are expected to take part in the services. Also First Quarterly meeting will convene at said Church House on Saturday, June 27th, at 2 o'clock P. M. Preaching at night by Presiding Elder.

The Best is the Cheapest!

That's what we mean when we say Newman keeps the finest candies in town. Call and see his stock.

Chance for Investment.

For sale or rent, two cottages, furnished, with use of horses and carriages.

MRS. E. A. KILBOURN,
4 11 Oakland, Md.

H. A. RASCHE.
Oakland, Md.

New Mill in Oakland.

The Oakland Flour Mill will be taken down about the middle of June, and a new mill erected on the same site. Customers are requested to bring immediately any grain they may wish ground before that time. The rebuilding will not interfere with the grinding of corn or chop, which will be continued as usual.

An Old Lady Injured.

Mrs. Brant, widow of the late Peter Brant and mother of John B. Brant, Esq., was in Oakland Friday of last week, and left for her home near town in a spring wagon, accompanied by Mrs. Thomas Casteel to the road leading to her (Mrs. Casteel's) home, when Mrs. Brant proceeded alone. On account of a fainting fit, or from some other cause Mrs. B. fell from the wagon in the lane leading from the main road to her residence and broke her collar bone and sustained other injuries. When discovered Mrs. B. was approaching her home from another direction, having wandered past the house. She was taken in, a physician summoned and her injuries attended to. She is now out of danger. Mrs. Brant is 72 years of age.

New Buildings and Additions.

Mr. Andrew Nelson is erecting a large residence in the east end of town, which he proposes to occupy with his family when completed. He has also made large additions to his store room on Oak street, and has put up an ice box capable of holding the carcasses of nine beeves, a week's supply for his market during the summer season.

Mr. E. D. Kepner has erected several neat and substancial out buildings on his lot, corner Alder and Fourth street, and now has a force of workmen remodeling his residence, to which he has added a two story addition. When completed he will have one of the most valuable properties in Oakland.

Mr. James Leathers is building an addition to his residence on Second street.

Dr. Manown is having the Kepner property, on Alder street remodeled and put in thorough repair.

The Pritchard and Sincell business houses are rapidly approaching completion.

Grand Jury Report.

To the Honorable, the Judges of the Circuit Court for Garrett county.

The Grand Jury for the May Term 1885, beg leave to report to your Honors, that it has carefully and faithfully endeavored to discharge its duties for the term in the strict examination into all matters involving a breach of the law which have been brought to its notice, and scrutinizing carefully and questioning thoroughly the witnesses in their testimony coming before it for examination; finding presentments whenever and wherever presentments seemed to be required for the vindication of the law and the preservation of public order, ignoring all light and trival matters so far as possible to ascertain in which the element of malice has been predominant. It is with pleasure the Grand Jury adds that it has been greatly aided in the discharge of its labors by the faithful and efficient services so constantly rendered by the State's Attorney, Mr. Veitch. The Grand Jury further report to your Honors that it has visited and examined the County buildings in accordance with law; that it has found the Jail in commendable order, clean and apparently healthy; the prisoners carefully attended to and amply provided for, and the Court House in as good condition as it has been for years. The Grand Jury recommend that the County Commissioners shall order further and better closets or out-buildings in connection with the Court House with additional improvements for the public health and convenience. The Grand Jury beg leave to say in explanation of its seemingly protracted session that it has had an unusually large number of witnesses for examination with many vexatious cases increasing its labors and detaining it beyond the ordinary time and its own inclinations.

Having thus performed its labors the Grand Jury most respectfully ask to be discharged.

C. M. MILLER, Foreman.

True copy—Test:

W. H. TOWER, Clerk.

Court Proceedings.

We give below the proceedings of court to the time of going to press, (Thursday morning) when the case of Fletcher Wilmore was on trial.

The Grand Jury was discharged Saturday.

Judge Hoffman came up Friday of last week, and will remain until court adjourns. Judge Syester left for Hagerstown Tuesday. Court will probably adjourn this week.

APPEALS.

No. 1. H. H. VanMeter vs E. J. Fringer. Judgment in favor of Fringer for $5.

John E. Wood vs John R. Kerfoot. Refered to counsel.

CRIMINAL TRIALS.

No. 1. State vs Lochiel Company. Dismissed.

2. State vs Sebastian Hinebaugh. Plea guilty. Fined $20 and costs.

3. State vs same. Same entry.

4. State vs James Tuhill. Recognized in $300 for appearance at Sept. Court.

5. State vs same. Same entry.

6. State vs R. W. McWilliams. Stett.

7. State vs James Tuhill. Recognized as above.

CRIMINAL APPEARANCES.

No. 2. State vs William Broadwater. Giving away whiskey on election day. Jury trial. Not guilty.

3. State vs Wm. S. Broadwater. Larceny. Jury trial. Not guilty.

8. State vs John Bell. Assault and battery. Guilty. Fined $10 and costs and 30 days in jail.

9. State vs Joseph Helbig. Non prossed.

10. State vs Albert Bolden. Not guilty.

17. State vs James H. Simmons. Selling liquor without license. Jury trial. Not guilty.

29. State vs Flitcher Wilmore. Burglarly. Demurer being entered to the indictment was ruled good as to the 2d count, but bad as to the 1st count.

TRIALS.

A great many trials were continued, non prossed, &c. The following embrace those fully disposed of by the court.

Hannah Ashby vs Charles F. Glotfelty. Judgment for plaintiff, and damages assessed at $5.00.

O. W. Heiskell & Co. vs Thos. U. Cross. Judgment by confession in favor of plaintiff for $55, each party to pay their own costs.

J. B. Merryman, use H. G. Davis & Bro., vs Daniel O'Connell. Judgment extended in favor of plaintiff for $62.50 with stay until September 15th, 1885.

Elijah Friend vs William H. H. Friend. Judgment for defendant by consent, on exceptions to ruling of court.

Robert Simpson vs Joseph Shillingburg. Judgment extended in favor of plaintiff for $260.40.

Louis A. Kritchman, et al, vs John B. and Noam Harman. Judgment extended in favor of plaintiffs for $100. Judgment satisfied per order filed.

Elijah M. Friend vs George A. Fearer. Judgment extended for plaintiff against defendant for $182.71

State use Sylvester Ryland vs Wm. Ryland and Jacob Friend. Agreement to enter judgment for plaintiff for $215, with stay for 12 months.

George R. Coffroth & Co vs Joseph Shillingburg. Judgment extended in favor of plaintiffs for $297.71.

Newhoff & Sons vs J. H. Rafter & Co. Judgment extended in favor of plaintiff for $141.10.

Heidleberger, Eiserman & Co. vs Joseph Shillingburg. Judgment under rule plea for plaintiff for $130.77.

Stevenson & Slingluff vs Joseph Shillingburg. Judgment under rule plea for plaintiff for $172.47.

Stevenson & Slingluff vs John W. Shillingburg. Judgment in favor of plaintiff under rule plea for $172.47, to be released on payment of judgment in No. 50 trial.

Stevenson & Slingluff vs Adam S. Sell. Judgment for plaintiffs for $110.

Joseph Spiker vs Henry Myers, et al. Judgment extended in favor of plaintiff $121.26.

Michael Reilly vs John Thrasher. Judgment for plaintiff for $10.

Daniel E. Offutt vs John G. C. Riley. Judgment extended in favor of plaintiff for $135.55, with summons to lie.

Deer Park.

May has turned a cold shoulder to us since she made her appearance, even sending us a little snow on Sunday last, and spring is as yet a misnomer.

Mr. D. F. Graham was in Baltimore last week for spring and summer goods.

Rev. J. W. Bedford is absent for a visit of a month to his old home in Pennsylvania.

Mr. John White, of Piedmont, was in Deer Park last Saturday, on business connected with the establishing a Lodge of Good Templars in our town.

Mr. J. H. Simmons has converted his saloon into a restaurant and fancy grocery store.

The Band of Hope met on Saturday, May 2nd, and elected officers for the ensuing quarter as follow: President, W. D. Hoye; Vice-President, J. W. Laughlin; Treasurer, Mrs. J. C. Rodeheaver; Secretary, W. S. Lantz; Committee on Programme, Mrs. J. W. Laughlin, Mrs. C. H. Tillson, Mrs. L. H. Schoolfield and Miss Joe Hoye. The next regular meeting will be held the 1st Saturday in June.

Mrs. Mary McClain has opened a millinery room in Mr. E. F. Droege's house, and will remain a short time to supply customers.

We are hoping to have a favorable decision in regard to the appointing of the Normal School at Deer Park.

Mr. Sell, of McHenry, was in town Monday with produce, his first trip this season.

A few cases of measles are still heard of in our vicinity, but otherwise our town is very free from any sickness at present.

The work on the B. & O. R. R. cottages are progressing rapidly. Painters are employed on the Hotel, the Garrett cottages, and also on the summer residences of Senator Davis, Hon. S. B. Elkins and Mrs. W. R. Davis.

Mr. J. W. Williams' cottage will be commenced very soon. E. J. Fredlock & Co., of Piedmont, have the contract.

Vice-President Spencer, of B. & O. R. R., is building a new house on his farm, in place of the one which was burned down two weeks ago.

Mrs. W. R. Davis was at Wing-and-Wing one day last week. She will bring her family up here about the 1st of June.

Registered at Wing-and-Wing:

Baltimore, Md.—W. E. Chisholm, J. A. Wheeler.

Manington, W. Va.—J. H. Hellem

Belpre, Ohio—Henry Sharah.

New Interest, W. Va.—D. A. Denton.

Long Run, W. Va.—O. W. Ford.

West Union, W. Va.—W. T. Ford.

Boston, Mass.—J. W. Thomas, T. J. Sprague. **

Mountain Lake Park,

Improvements go steadily on.

Mr. G. A. Shirer, of Oakland, is making preparations to build.

Mr. Gilbert, of Piedmont, has just had a carriage house built.

Mr. P. T. Garthright has enclosed another lot adjoining his residence on H street and is also fencing in his lot and cottage on F street.

Mr. A. Howell is arranging to have a handsome ice cream parlor in connection with Miss Jennie Smith's cottage. Her brothers are handsomely grading and ornamenting her lot. Miss Jennie and Miss Sherman have left again on a two weeks trip.

Dr. VanMeter was here last week looking after the interests of the Park.

Rev. N. L. Baumgardner is here this week fixing up his cottage for the summer,

Mr. M. Z. Dawson and J. A. Enlow have moved to their homes on Oakland Avenue. Mr. Bud. Wardwell, of Rowlesburg, has moved into the Mehone cottage.

If more of the Oakland people want to use the pasture enclosed here, they had better make it known to Mr. Davis before the first of June, as persons from the country want to put in young cattle. The herding on the grounds not enclosed will be stopped, as it is not only a nuisance but a tresspass.

We are again occupying Davis' Hall with our meetings and Sunday School. Preaching next Sabbath at 3 o'clock.

The advertising sheet of the W. C. T. U. Conference assures us of a more successful time than ever. It begins July 1.

Prof. J. White, of the W. Va. University was here this week, and rented the Baumgardner cottage for the season.

J. A. E.

A few days ago the President appointed James Blackburn, a brother of Senator Blackburn, of Kentucky, to be collector of internal revenue for a Kentucky district. Afterward the following letter, written by the appointee away back in 1861, was unearthed from the War Department Confederate archives, and on reading it the President immediately cancelled the appointment.

ABINGDON, VA., Oct. 2, 1861.—My Dear Wife: I have left you and our children in the land of the despot, but God grant that I may soon be able to made the Union men of Kentucky feel the edge of my knife. From this day I hold every Union traitor as my enemy, and from him I scorn to receive quarter, and to him I will never grant my soul in death; for they are cowards and villians enough. Brother Henry and I arrived here without hindrance. I have had chills all the way, but I hope to live to kill forty Yankees for every chill that I ever had. I learn that Hardee is still in the Arkansas lines, inactive, and if this proves true I will tender my resignation and go immediately to Kentucky. I hope that I will do my duty as a rebel and free man. Since I have the Union men of Kentucky, I intend to begin the work of murder in earnest, and if I ever spare one of them may hell be my portion. I want to see Union blood now deep enough for my horse to swim in. Your husband,

JAMES BLACKBURN.

All impatience of monotony, all weariness of best things even, are but signs of the eternity of our nature.

What a Deed Conveys.

Judge Bennett, of Massachusetts, before the State Board of Agriculture, said, in substance, that a deed conveys the fence standing on a farm, the fencing stuff, posts, rails, etc., which had once been used in the fence, but had been taken down and piled up for future use in the same place. But new fence material, just bought and never attached to the soil; will not pass. Standing trees pass as a part of the land; so do trees blown or cut down and still left in the woods where they fell, but not if cut and corded up for sale; the wood has then become personal property. Manure in the barn-yard, or in a compact heap ready for immediate use, the buyer ordinarily takes as belonging to the farm; though it might not be so if the owner had previously sold it to some other party and had collected it in a heap by itself. Growing crops pass by the deed of a farm, unless they are expressly reserved, and when it is intended to reserve those it should be so stated in the deed itself; a mere oral agreement would not be valid in law. Another mode is to stipulate that possession is not to be given until some future day, in which case the crops or manure may be removed before that time, As to the buildings on a farm, though generally mentioned in the deed, it is not absolutely necessary they should be. A deed of land ordinarily carries all the buildings on it belonging to the grantor, whether mentioned or not; and this rule includes the lumber and timber of any old building which has been taken or blown down and packed away for future use on the farm. But if there be any buildings on the farm built by some third person, with the farmer's leave, the deed would not convey these, since the buildings are personal property and do not belong to the land-owner to convey. The real owners thereof might move them off, although the purchaser of the farm supposed he was buying and paying for all the buildings on it. His only remedy in such a case would be against the party selling the premises.

As a part of the buildings conveyed, the window-blinds are included, even if they be at the time taken off and carried to the painter's shop to be painted. It would be otherwise if they had been newly purchased and brought into the house but not yet attached or fitted to it. Lightning-rods go with the house. A furnace in the cellar, brick or portable, is considered a part of the house, but an ordinary stove with a loose pipe running into the chimney is not, while a range set in brickwork is. Mantlepieces, so attached to the chimney as not to be removed without marring the plastering, go with the house, but if merely resting on brackets they may be taken away. Pumps, sinks, etc., fastened to the building are a part of it in law, and so are the water-pipes connected therewith bringing water from a distant spring. If the farmer had iron kettles set in brickwork near his barn for cooking food for his stock, or similar uses, the deed of his farm covers them as likewise the bell attached to his barn to call his men to dinner. If he indulges in any ornamental statutes, vases, etc., resting on the ground by their own weight, and sells his estate without reservation, these things go with the land.

I Parker Veazey, Esq., of Baltimore, was nominated by the President last week for Postmaster at Baltimore. Mr. Veazey is a lawyer by profession and is about thirty-five years of age. It is said Mr. Veazey has not been connected with the factional fights in his party, and therefore his appointment appears to be generally acceptable. The bond of the postmaster is $400,000, the largest required, of any federal official in Maryland.

General Bragg, of Wisconsin, an eminent Democrat who did good service in the Union army and who fought gallantly for Cleveland at Chicago has been expressing an opinion. Casting his eye over some recent appointments of the unreconstructed, and bearing in mind the honor paid to the late Jacob Thompson, of Mississippi, General Bragg said he guessed he would have to get his political disabilities removed. If the President can enjoy a good joke he can't help having a hearty laugh over this.

NEW ADVERTISEMENTS.

TOO FRESH.

I loved a pretty German girl
Fresh from the Rhine;
I wished with all my heart and soul
That she were mine.
I asked had she a heart to give,
And she said "nine."

I begged my little German girl
So fair, so fine,
To come along with me some day
Abroad to dine.
"You'll sure accept *one* treat from me–"
And she said "nine."

I did not urge her then to take
That treat of mine;
I simply said: "You're beautiful,
All but divine;
But if another you should love–"
And she said "nine."

"O, what a cruel, fickle heart
Must then be thine;
And yet you can not wed but one;
Your choice assign;
Will you not choose a husband, dear?"
And she said "nine."

I grew impatient with that girl
Fresh from the Rhine;
I said: "You think such jokes as these
Are very fine,
Perhaps you have a husband now,"
And she said "nine."

"O, tell me plainly, lady fair,
Fresh from the Rhine,
Why do you always answer me
With, 'nine, nine, nine?'"
"Ich kann nicht English!" All she meant
Was simply: "*nein*."
—*G. H. Jessop, in Judge.*

POISONS AND ANTIDOTES.

How Life May Often be Saved by Prompt Action.

"Poison may be defined as any substance which when introduced into the system or applied externally injures health or destroys life irrespective of mechanical means or direct thermal changes." Such is the concise and apt definition of poison laid down in Dr. Quain's *Medical Dictionary*. The action of poisons is twofold, being either local or remote, or both. The local action is generally one of a corrosive or inflammatory nature, or is characterized by its effects upon the nerves and sensations. Although it is impossible to deal with so vast a subject in detail, yet nevertheless it can not be denied that a general knowledge of some of the most virulent posions and their antidotes is not only a subject of great interest to the public, but at times a matter of life and death. By a fair insight into poisons and their antidotes, life indeed may often be saved, when the delay caused by seeking for medical advice would probably be fatal. The purpose of this paper, therefore, will be to deal as clearly as possible with the most general poisons and their symptoms, and to point out such antidotes as in cases of emergency may be most readily employed.

An acquaintance with the leading symptoms produced by certain poisons is an important factor, for thereby we may hope more rapidly to recognize the especial destructive agency at work, and thus to arrest its further progress. Great, care, however, is requisite never to draw a hasty conclusion from one symptom alone, but to bear in mind other signs upon which a correct diagnosis can alone be based. Many attempts have from time to time been made with a view to classify poisons; but the most rational classification is obviously that which is in accordance with their special action. They may therefore be divided generally under the following heads—(1) Corrosives; (2) Irritants, and (3) Neurotics.

Under the head of corrosives, corrosive sublimate stands foremost in importance, being the most typical of this class. The effects are rapid in their development, being well marked by a burning sensation felt in the mouth and throat, followed by agonizing pain in the stomach. The tongue and throat have a white appearance, and excessive tenderness and swelling of the abdomen is noticeable. All authorities agree in recommending albumen in the form of raw eggs—both yelk and white—switched up with a little water, as the best antidote in cases of acute po'oning from corrosive sublimate. The albumen combines with the corrosive sublimate to form an insoluble and comparatively inert compound. Should eggs not be immediately obtainable, gluten obtained from flour, or wheat flour alone mixed with milk or water, may be given until the more reliable antidote is ready. The chief of the corrosive poisons are the mineral acids, sulphuric, nitric and hydrochloric; the vegetable acids, oxalic, binoxalate of potash (commonly called salt of lemon and salt of sorrel), and occasionally in large doses tartaric acid; the alkalies, potash, soda, and ammonia, with certain of their salts, such as pearl-ash (commonly called salt of tartar), carbonate of soda (commonly called washing-soda) and carbonate of ammonia; also various metallic compounds, including salts of zinc, tin, silver and antimony, etc. Poisoning by oxalic acid is a very common method chosen by would-be suicides, probably owing to the fact that it is a substance much used in household operations, and therefore readily obtainable by any one bent on committing suicide. In speaking of the action of this poison, that renowned authority, the late Sir Robert Christison, observes in his splendid work on Toxicology: "If a person immediately after swallowing a solution of a crystalline salt which tasted purely and strongly acid, is attacked with burning in the throat, then with burning in the stomach, vomiting, particularly of bloody matter, imperceptible pulse and excessive languor, and dies in half an hour or twenty minutes, or still more in ten or fifteen minutes, I do not know any fallacy which can interfere with the conclusion that oxalic acid was the cause of death."

It is obvious in such cases that the chances of success in applying antidotes depend very much upon their immediate employment. For the mineral acids, alkaline bicarbonates, such as bicarbonates of potash or soda (baking soda), chalk or magnesia should at once be given, followed by milk; whilst oxalic acid is best treated by the administration of chalk, or magnesia either plain or in the form of carbonate, whereby the insoluble and almost inert oxalates of lime and magnesia are formed.

When poisoning is occasioned by the alkalies potash, soda, or ammonia, or their carbonates, carbonate of potash (also known as pearl-ash or salt of tartar), carbonate of soda (washing-soda), and carbonate of ammonia, a strong burning sensation is experienced in swallowing, followed by severe pain and great tenderness at the pit of the stomach, increased by pressure. There are frequent vomits of a brownish matter, swelling of the stomach and hoarseness of the voice. When seeking to counteract the disastrous effects resulting from this variety of poisons, the great object aimed at is to neutralize caustic alkalies. This may be best accomplished by means of well-diluted acid drinks copiously imbibed, as advised by Stevenson, who, further, is of opinion that the prompt use of an emetic is never inadmissible. Vinegar and water, lemon-juice with water, also oil, are recommended by Dr. Russell under such circumstances. The oil forms a saponaceous compound with the alkali, whilst acid drinks neutralize the alkaline action.

Irritant poisons are divisible under two heads—(1) Metallic irritants; (2) Vegetables and animal irritants, the latter two being grouped together. It would, however, appear that none of them act purely as irritants, as the irritant symptoms to which they give rise are likewise usually accompanied by well-marked action upon the nervous system. The most serious poison of this class is undoubtedly arsenic. Salts of antimony, zinc and other metals constitute a variety of other metallic irritants. Of the vegetable irritant poisons, elaterium, various essential oils such as savin, and gamboge, afford examples. Poisoning by arsenic may be either acute or chronic, the acute form being by far most common, following criminal attempts on life. Its effect on the economy is twofold, the most usual being by inducing inflammation of the gastro-intestinal mucous membrane, or by lowering the heart's action. Its effects in some instances may be purely narcotic. The first symptoms of arsenical poisoning, according to Orfila, are sickness and faintness, which arise about fifteen minutes after being taken. An intense burning pain is also felt in the stomach, quickly followed by vomiting, increased on attempting to swallow.

Poisoning by arsenic is distinguished from an ordinary bilious attack by the fact that pain and sickness are *not* relieved by vomiting, which usually happens in biliary derangements. A feeble and irregular pulse, accompanied by thirst, with clammy hands, are prominent symptoms of arsenical poisoning. The immediate employment of emetics—except tartar emetic—diluents and demulcents, has been suggested as perhaps the most serviceable antidotes; but no confidence should be placed in the so-called antidotes, ferric hydrate and magnesia, unless a solution of arsenic has been taken. In chronic arsenical poisoning, most frequently engendered accidentally, by inhalation of arsenical vapor in factories, or by arsenical dust, loss of muscular power, failure of appetite are amongst the most prominent symptoms manifest. Under such circumstances, the cause—which is usually some occupation connected with the manipulation of arsenic—should be promptly sought for and removed—quinine, iron and change of air being recommended.

Neurotic poisons may be divided into a large category; but in one and all the symptoms produced from their administration chiefly attack the nervous system. Under this head are embraced pure narcotics, such as morphia, chloral hydrate, strychnia, hyoscyamus, etc. Prussic acid occupies a prominent position, as its effects and termination are very rapid in progress, being one of the most powerful of all poisons. Difficulty of breathing, speedily followed by convulsions, the commencement of which is announced by a loud shriek occassionally, are manifest; subsequently, loss of consciousness and muscular power. Fifteen minutes is the longest time known to elapse between taking this poison and its effects. In some works it is stated that the best mode of treating prussic-acid poisoning is by the application of cold effusions before or after the convulsive stage has commenced, and the inhalation of diluted ammonia or chlorine. Stevenson advises an emetic to be administered also. Friction and artificial respiration have been recommended by other authorities.

Opium and its preparations deserve especial notice, as the greater number of poisoning cases are due to their action. Although the symptoms of opium-poison greatly vary, yet they are mostly ushered in by giddiness, listlessness and drowsiness, followed by stupor, lapsing slowly into complete insensibility. Opium-poisoning is unfortunately often occasioned by the indiscriminate use of "sleeping-draughts" and quack nostrums. In cases of opium-poisoning, the immediate use of an emetic (a tablespoonful of mustard mixed with tepid water) has been advocated. The head and face should be dashed with cold water until the stupor is partially removed. The patient should *not* be permitted to sleep, but should be kept in continual motion. A cup of strong hot coffee ought to be given to him on his recovery.

Our space will not permit of a more minute inquiry into other varieties of neurotic poisons; suffice it to say that in most instances arising from the administration of any preparation of opium, the antidotes above mentioned are considered the most serviceable.

We must not omit to notice poisoning by copper, which at times has arisen by the employment of copper vessels for cooking purposes, which never should be employed in any household. The first indications of copper-poisoning are sudden attacks of griping pains, aggravated by pressure, often accompanied by sickness and a peculiar sallow aspect of countenance. According to Ryan, the white of egg is the best antidote for poisonous preparations of copper. Lead-poisoning is usually owing either to drinking water which has remained for some time in leaden pipes, or by certain avocations in which some preparation of lead is used. Goulard water taken by mistake causes lead-poisoning. Lead-colic is one of its leading symptoms, which is relieved by pressure. Paralysis of the limbs is another well-marked indication. Sulphate of magnesia has been recommended as an antidote. A dram of sulphate of magnesia, five drops of dilute sulphuric acid and twenty drops of tincture of hyosyamus in two tablespoonfuls of camphor-water every two hours till the bowels are relieved, and then thrice daily for five days, is the treatment which some consider most appropriate under these circumstances.

In drawing this article to a close, we desire to impress upon our readers the vital importance, in all cases of poisoning, of being able immediately to administer the antidotes, while the medical man is being summoned. Many a valuable life would undoubtedly be saved, were the precautions before mentioned adopted without a moment's delay.—*Chambers' Journal.*

MOUNTAIN WORSHIPERS.

Description of a Tennessee Mountain Meeting-House.

The little log meeting-house at the Notch stood high on a rugged spur of the Great Smoky. Dense forests encompassed it on every hand, obscuring that familiar picture of mountain and cloud and cove. From its rude, glassless windows one could look out on no distant vista, save perhaps in the visionary glories of heaven or the climatic discomforts of hell, according to the state of the conscience, or perchance the liver. The sky was aloof and limited. The laurel tangled the aisles of the woods. Sometime from the hard benches a weary tow-head brat might rejoice to mark in the monotony the frisking of a squirrel on a bough hard by, or a woodpecker solemnly tapping. The acorns would rattle on the roof, if the wind stirred, as if in punctuation of the discourse. The pines, mustering strong among the oaks, joined their mystic threnody to the sad-voiced quiring within. The firs stretched down long, pendulous, darkling boughs and filled the air with their balsamic fragrance. Within the house the dull light fell over a few rude benches and a platform with a chair and table, which was used as pulpit. Shadows of many deep, rich tones of brown lurked among the rafters. Here and there a cobweb, woven to the consistence of a fabric, swung in the air. The drone of a blue-bottle, fluttering in and out of the window in a slant of sunshine, might invade the reverent silence, as Brother Jake Tobin turned the leaves to read the chapter. Sometimes there would sound, too, a commotion among the horses without, unharnessed from the wagons and hitched to the trees; then in more than one of the solemn faces might be descried an anxious perturbation—not fear because of equine perversities, but because of the idiosyncrasies of callow human nature in the urchins left in charge of the teams. No one ventured to investigate, however, and, with that worldly discomfort contending with the spiritual exaltations they sought to foster, the rows of religionists swayed backward and forward in rhythm to the reader's voice, rising and falling in long, billowy sweeps of sound like the ground swell of ocean waves.

It was strange, looking upon their faces, and with a knowledge of the limited phases of their existence, their similarity of experience here, where a hundred years might come and go, working no change save that, like the leaves, they fluttered a while in the outer air with the spurious animation called life, and fell in death, and made way for new bourgeonings like unto themselves—strange to mark how they differed. Here was a man of a stern, darkly religious conviction, who might either have writhed at the stake or stooped to kindle the flames; and here was an accountant soul that knew only those keen mercantile motives—the hope of reward and the fear of hell; and here was an enthusiast's eye, touched by the love of God; and here was an unfinished, hardly humanized face, that it seemed as presumptous to claim as the expotent of a soul as the faces of the stupid oxen out-of-doors. All were earnest; many wore an expression of excited interest, as the details of the chapter waxed to a climax, like the tense stillness of a metropolitan audience before an unimagined coup de theatre. The men all sat on one side, chewing their quids; the women on the other, almost masked by their limp sun-bonnets. The ubiquitous baby—several of him—was there, and more than once babbled aloud and cried out peevishly. Only one, becoming uproarious, was made a public example; being quietly borne out and deposited in the ox-wagon, at the mercy of the urchins who presided over the teams, while his mother creaked in again on the tips of deprecating, anxious toes, to hear the Word.—*Atlantic Monthly.*

A Change of Policy.

China is devoting what time it can spare from the discussion of its struggle with France to the consideration of a decree which has been issued by the Empress to the effect that, whenever the time serves, railways will be permitted in China. This announcement has created no little excitement, and has excited a lively spirit of opposition on the part of several sections of Chinese society. The literati, the walkers in old ways, the respecters of the past, are dead against the innovation. Confucius made no allusion to railways in his writings, and as, had he approved of them, he would doubtless have said so, this is in their eyes final. The class who objects to the introduction of European ways and customs are even more averse to the change, but the chief and by far the most serious opposition will come from the very numerous class who obtain their living by the navigation of the rivers and canals which form the thoroughfares of China. These regard the introduction of railways as a direct attack upon their means of getting a livelihood.—*N. Y. Post.*

—The 10,000 landlords in Great Britain, without toil, receive from the soil more than twice as much as the total wages paid to 850,000 laborers for working twelve hours through the seven days in every week.

SCHOOL AND CHURCH.

—At the recent conference of the Jewish ministers in New York City, it was reported that the Jewish synagogues are increasing every year.

—Rhode Island occupies only one thousand square miles of territory, but it has about nine hundred schools, with about eighty per cent. of the children of school age in them.

—Fifty-six new Baptist Sunday-schools were organized in North Carolina during the year 1884, many of them in communities where no other religious services whatsoever are held.—*N. Y. Examiner.*

—A clergyman in Boston—a man well versed in the Bible, devout, earnest, a good worker and a fair preacher—is a settled pastor over a church which pays him only $12 a week, and that is his whole salary.—*Boston Traveller.*

—Mortimer F. Reynolds, of Rochester, N. Y., has given $25,000 to the University of Rochester for a chemical laboratory, as a memorial of his brother, William A. Reynolds, who was a member of the Board of Trustees.

—The University of Virginia recently dedicated an observatory and telescope presented by Leander J. McCormick, of Chicago, at a cost of $75,000. The observatory has an endowment of $50,000, one-half of which was given by W. H. Vanderbilt.—*Chicago Times.*

—A few weeks ago Solemn High Mass was celebrated in Copenhagen for the first time since the Reformation. The occasion was the twenty-fifth anniversary of the priesthood of Rev. John Euch, Apostolic Prefect in Copenhagen. Complete religious toleration now exists in Denmark.

—Dr. Moorehouse, Bishop of Melbourne, has refuses to order prayers for rain in his diocese. His lordship gives as his reason that, before complaining, people should do something themselves towards storing up the superfluity in the wet season against the drouth.

—The Japanese Commissioner at the World's Exposition in New Orleans reports that there are now in his country seventy-eight normal schools, 29,254 grammar, intermediate and high schools with an attendance of 3,017,088 pupils. Chinese, Japanese and English are taught. In order to increase the dignity of teachers in the eyes of the people, the Government has conferred upon them titles and official positions.

—There is a religious life in most English families. It is a matter taken for granted. Family worship is observed in the vast majority of the families. Among the upper classes domestic religious observance is looked upon as a part of the well ordering of the household. It is not a subject of which children fight shy in any way. The children are asked to say grace at the table—boys and girls alike—except when guests are present. Children are taken to church at a very early age, and grow up accustomed to church attendance. The institutions and ordinances of religion are held in profound respect. The clergy are honored and hold a distinct place in the regard and even affections of the family.—*Robert Laird Collier.*

PUNGENT PARAGRAPHS.

—A young man sent twelve stamps to an advertiser to learn "how to make money fast," and was advised in reply to glue a five-dollar bill to the bottom of his trunk.—*Troy Times.*

—You may have seen a young man on one side of a gate and a maiden on the other side. Why they talk so long is because a great deal can be said on both sides.

—A Boston tailor stamps his billheads with a picture of the forget-me-not. He should substitute the golden rod, the significance of which is "Down with the dust."—*N. Y. Journal.*

—A woman who has taken in sewing for a couple of years to support a lazy and drunken husband says it is surprising that the Board of Health has not had her indicted for "maintaining a nuisance."—*Norristown Herald.*

—"Diamonds found in a dream" is the head-line in a cotemporary. If this story can be authenticated its author can realize a handsome sum by disclosing what he ate before he went to bed.—*N. Y. Graphic.*

—It is stated that out of one hundred men who parade in a brass band at least forty are dummies and only pretend to play. It will be seen that bands are more considerate than is generally supposed.—*Philadelphia Call.*

—A new York circus is advertising for the second year a sacred white elephant. An animal that can keep the company of circus men for a year and remain sacred must certainly be a curiosity worth stealing under the tent to see.—*Yonkers Statesman.*

—An Illinois doctor thinks he has found a sure cure for rheumatism in geranium leaves. Perhaps he argues on the principle that like cures like; for spooning over geraniums in the garden after dark during the summer is a favorite way of catching the disease with many susceptible young persons.—*Lowell Citizen.*

—I neber wastes my time in wushin dat I wuz like de man whut am greater an er way up yander. I doan kere how high de buzzard fly—way up 'mong de clouds—he's got ter come down arter er while an' be jis ez low ez a bird whut couldn' fly ha'f so high.—*Arkansaw Traveler.*

Ancient Trees.

Trees have been found in Africa which were computed to be 5,150 years old, and a cypress in Mexico is said to have reached a still greater age. The oldest individual specimen of any species—in fact the oldest living thing upon the globe—is probably the cypress of Santa Maria del Tule, in the Mexican State of Oaxaca. If estimates of tree ages are to be relied upon, the life of this venerable forest monarch may have spanned the whole period of written history. At last accounts it was still growing, and in 1851, when Humboldt saw it, it measured forty-two feet in diameter, 146 in circumference, and 382 feet between the extremities of two opposite branches.—*Exchange.*

TEMPERANCE READING.

STIMULANTS.

Does the Continued Moderate Use of Alcoholic Stimulants or Tobacco Shorten Human Life?

While this question seems to be one of easy solution, as it is evidently one of incalculable interest to mankind, yet from the fact that diametrically opposite answers are given, it would indicate that it is not yet very well understood by the masses, at least. To get at the philosophy of the question we must know how the life processes are carried on, and then how the stimulants named affect the life processes when used as indicated.

The human organism is made up of little cells, so small that a single one can not be seen by unaided vision; yet each one of these little bodies has a life and a mission of its own; and its development, fulfillment of mission and death are governed by organic law. That it may fulfill its purpose in life its law of life requires that certain conditions must be supplied to it; and whenever these conditions are fully provided, the little cell will never fail to fill its mission perfectly and completely. But the question may be asked where are these little cells made and endowed with the life principle? Of the origin of the first living cells we do not know, but we do know that vegetables have the power of converting certain mineral substances as carbonic acid, ammonia, etc., into these little living organisms and stowing them away in their various structures, and then animals and man can partake of these vegetable products, and by the process of digestion and assimilation they can make them over into animal and human tissues. It is true that the little cells made by different families of vegetables differ in composition, size, etc., and that some classes of vegetables make cells that if taken into the human body will destroy its life at once, while other classes of vegetables make just such cells as will build up and sustain the life of man. This difference of cell formation runs through the human organism also, its various tissues being made up a different kinds of cells, but they were all first elaborated in the vegetable. The human organism has no power of changing the character of the little cells that enter into the formation of its various tissues, it can only build such as are suited into their proper places. The bony tissue requires cells rich in phosphate of lime, magnesia and potash. The muscles, cells of albumen, the brain and nerves, fatty albuminoid cells, rich in phosphate, and so on through the whole tissue formation; they must all be made up of cells specially adapted to the special purpose, and these cells are always made by vegetable growth, and if such are always properly used and all other essential conditions supplied, the human organism will be built up and kept in good working order, and a large amount of reserve force will be stored up in it for future use. But as every functional action of the body consumes a portion of the organic structure, the food regularly eaten must make good the tissue thus consumed, or there must be a draft upon the reserve tissue which will be lowered to that extent.

Now, the question occurs, how does the use of stimulants effect the normal working of the human organism?

All persons are now agreed that the effect of a stimulant is to increase the rate of functional action; and as every functional action consumes a portion of the tissue producing the action, it is evident the stimulant reduces the powers of the organism to that extent, and to make good the loss the rate of functional action must be reduced after the effect of the stimulant has passed off, that the organism may regain what it has thus lost. Hence, we find depression of the vital force following the use of all stimulants. This depression the go-ahead American citizen can not submit to, and therefore the stimulant must be frequently repeated to keep up the increased ratio of action. To make this plain let us again appeal to physiological teaching.

The normal rate of the heart's action in the healthy adult engaged in vigorous labor is seventy-five beats per minute, and the force of such action for twenty-four hours is sufficient to lift 500,000 pounds one foot high. This may seem incredible to many readers, but is nevertheless a verified fact, and is the result of healthy action without stimulants; and the judicious use of proper foods will sustain the organism at this rate without any loss of power, if a proper amount of rest is taken to enable the food to be built up into the tissue destroyed. But now suppose the individual takes a moderate amount of stimulant with the same amount of food and performs the same amount of labor, and what will be the results? To test this matter Drs. Parkes and Wollowitz, two eminent observers, tried some experiments on healthy young men by giving them varying amounts of alcohol for six days in succession, beginning with two ounces the first day and increasing to eight ounces on the last. On this last day they found the heart beat 25,488 times more during the twenty-four hours than was its average on a simple water beverage, and for the six days the increased work of the heart would have lifted 65,000 pounds one foot high. Now, as the alcohol did not add any power to the organism, but only increased the expenditure of the power already in it, it is evident there was an actual loss of force to that extent, and this must be taken from the reserve force already stored in the body. The question then occurs, what becomes of the increased force brought out by the alcohol, as it was not used in any regular work?

We have found that the alcohol could not be built into the tissue of the body, for it does not contain the normal cell formation; nor can it be burned in the body for the evolution of heat and force, for it is the product of a previous combustion; it is therefore dead matter which the organism endeavors to get rid of as soon as possible, and the increase of the heart's work is expended for that object. It is therefore evident that much vital force was wasted, and to keep up the organism to its standard of vigor, one of two things must take place: either more nutritious food must be consumed and assimilated, or less of the organism must be consumed by useful labor. As the digestive organs were already taxed to their normal power, if more food be eaten it can not be assimilated, and must therefore be got rid of unused, and this takes an additional amount of reserve force, and destroys that much more of the reserve force already in the body. If the individual then who uses alcohol is to live out all his days he must perform less labor than he could if he let alcohol alone; but it he reduces the amount of labor to the extent of the vital force consumed in ridding his system of the alcohol he *may* live out all his days; *provided* the alcohol does not injure the organic structure, and this accounts for the fact of some persons living to old age who were habitual alcohol consumers. But this reduction of useful labor does not suit every one, and many of our people take stimulants of some sort purposely to increase the rate of the life forces in order that they may be able to do more work, never reflecting for a moment that by so doing they are drawing upon the reserve of vital force, and that when that is exhausted they must haul off for repairs or die prematurely. And if any unusual effort is thrown upon them, or their digestion fails, the fund of reserve force being used up, they go down at once and there is no help for them.

Tobacco, as well as alcohol, will increase the rate of functional action without adding to functional power. With the majority of people the use of tobacco, either by chewing or smoking, will very materially increase the frequency of the heart beats, and, consequently, the rate of functional action. While it does not produce the amount of mental disturbance that alcohol does, it produces greater disturbance to the nervous system, or organic life, and, therefore, exhausts the reserve force of the nervous system more rapidly than the former. But because it does not craze the mental powers, but rather soothes them, the tobacco user vainly imagines that he is benefited rather than injured by such indulgence. But as tobacco can not be built into the organism to add to its stock of reserve force, nor can it be burned in the body for the evolution of heat, it must therefore be cast out of the system, and this will consume a considerable amount of reserve force already in the organism and which should be husbanded for the future exigencies of life. More than this, it contains poisonous principles that directly lower the life forces, especially in persons of nervous temperament. This poisonous effect on the nervous system is so great in some instances as to produce instantaneous stoppage of the heart's action and consequent sudden death. With almost every person the beginning of the habit is attended with extraordinary sickness and suffering, and why so many young men persist in its use until the habit is fully formed is a mystery it is hard to explain. It is true that after a person has outlived the repugnance of the organism to the introduction of the poison and continues in its use, he gets a soothing and exhilarating feeling that is very agreeable to most persons; and were there no bad effects to follow, this might be some compensation for the suffering endured at the beginning. But bad effects never fail to follow its use, and although it does not craze the mind, it evidently lowers and debases its action. The tobacco habitue can not have the extent of mental power he would have if he avoided its use and lived true to the laws of his being. This effect is probably produced by its injury to cell formation of the frontal brain. It certainly acts injuriously on the blood cells, as has been revealed by the microscope.

Some of the injurious effects of smoking the weed might be avoided by properly arranged cigar-holders or long stem pipes, if kept well cleaned. And the smoker who lives a quiet and orderly life may reach extreme old age, although any great sudden shock or excitement subjects him to risk of premature death. A perfectly healthy organism with large amount of reserve force is capable of resisting almost all approaches of diseased action, let it come from what source it may; while an organism deranged by bad habits, exhausted of its reserve of vital force, is ready to fall a prey to any great disturbance of the life forces. This fact is strongly verified by the report of Lieutenant Greely, of the ill-fated Arctic expedition. Of the nineteen of his men who succumbed to the intense cold and short rations, all of them were tobacco users but one, and he was the last one that died; while not one of the six who survived and were rescued used the weed at all. And this is a complete verification of scientific teaching. The increased work imposed upon the organism by the use of tobacco, together with its directly lowering effect, exhausted the reserve force of the organism of these men, and they had no capital of vital force to draw on when their daily rations were cut short, and the intense cold they were subject to and which required active exercise to keep up the temperature of the body befell them, they inevitably died; while those who did not use it had sufficient reserve force to keep up the internal fires of life until relief came. And almost every day there are reports of men suddenly dropping out of existence from this lack or reserve force, which should have been carefully conserved for the trying ordeals which are liable to come to us all. While it is true, then, that persons may indulge in the use of either or both alcoholics or tobacco all their days, and under favorable circumstances live to extreme old age, yet they are subject to great risk of premature death, and their lives have not been brought up to that standard of excellence it was possible for them to reach, and to which they should have aspired. That the use of these substances hinders the growth of the nobler faculties of man is a generally conceded fact; and that such indulgence by the great mass of the people of this country is the most prolific cause of the increasing demoralization of our people is equally true. Then let every young man in the Nation, who aspires to reach a nobler manhood, never indulge in these debasing habits.—*Illinois Agriculturist.*

THE League has driven the rum-sellers out of business in Camden, Me.

WOOLEN GARMENTS.

The Relation These Bear to Health and Bodily Comfort.

Besides to a certain extent checking the loss of heat from the body, the skin has another important function, the performance of which is influenced by dress. It is a great excretory organ—that is to say, it is one of the structures whose duty it is to carry away waste matter from the body.

The skin is composed of two layers—the outer, or scarf skin (otherwise called the cuticle or epidermis) and the inner so-called true skin, cutis or dermis.

The outer layer varies much in thickness at different parts of the body, being thickest where there is most pressure, as on the palms of the hands and the soles of the feet; it is dead material, containing neither nerve fibres nor blood vessels, and is in the form of layers of fine, flat cells or scales laid one over another like tiles of a roof.

These scales are constantly being given off from the surface as more or less fine scurf, and as constantly being formed in the deeper parts which are contiguous to the dermis or true skin. The true skin is highly sensitive, being supplied with countless nerve fibres and endings.

It is also highly vascular, being supplied by innumerable tiny blood vessels, called capillaries, though they are far finer than any hair, and it contains the perspiratory glands, the setacery or fat excreting glands and the roots of the hair.

There are many ways of proving that the skin is continually removing matters from the blood.

For instance, if a man or even only one of his limbs is carefully inclosed in a gutta percha bag full of air it is found that changes take place in the air similar to those which happen in respired air. The air loses oxygen and gains carbonic acid, and it also receives a quantity of watery vapor, which condenses on the side of the bag and may be drawn off if desired.

Ordinarily such moisture does not appear on the surface of the skin, but it is given off, nevertheless, and is then called insensible perspiration; but when the external temperature is very high or under certain circumstances of mental emotion or violent bodily activity it appears in the form of isolated drops irregularly distributed on the skin, and thus becomes sensible perspiration.

The quantity of sweat, or perspiration, whether sensible or insensible, varies immensely, according to conditions of the external air, and to states of the blood and nervous system.

A daily bath all over is one of the most important preservers of health, and soap is a necessary adjunct to the bath, as without it the excretion of the sebaceous glands cannot be removed, for oil will not mix with water, but does mix with, and is removed by soap.

The elimination of excessive fat and water, together with the other waste matters contained in perspiration, is a function of the greatest importance and one which should be promoted, while everything calculated to check it must positively be avoided.

Here, then, it becomes apparent that special care is required in the selection of clothes, and here, again, wool provides for our necessities.

Wool allows that free transpiration which is one of the vital conditions of health, permitting the foul exhalations of the skin to pass freely away through it and absorbing any excess of moisture.

Vegetable fibre, however, absorbs until it is wet, and then leaves much unabsorbed moisture on the surface, chilling it and checking the further action of the glands, whereas flannel will, even after a violent perspiration, rest on a skin it has nearly dried and be only damp itself.

Thus, after violent exercise, a cotton or linen garment next the skin hangs against it damp and clammy, and is a frequent source of colds; so that for such violent exercise as cricket, boating or tennis flannel next the skin has been wisely adopted by the male sex.

Silk worn next the skin is warmer and slightly more absorbent than vegetable fibre; but that it does not allow the noxious exhalations to pass freely is proved by the unpleasant smell it soon acquires.

But, besides wearing woolen during athletic sports, must men wear woolen vests, drawers and socks—at any rate, during the winter; yet our young girls, who are infinitely more in need of every advantage that clothes can offer, for the most part are allowed, even in the coldest weather, to wear cambric or cotton underclothing, in spite of the fact that most medical men are agreed that woolen underclothing is necessary in this climate.

Woolen should be worn not only in winter, but in summer also, the only difference being in the thickness of the make and number of the garments.

Woolen garments, if themselves kept clean, preserve the skin in a clean and healthy condition, keeping it warm in winter and preventing chill in summer.

That irritation which sometimes follows the unaccustomed wearing of woolen next the skin is generally caused by the material being of recent manufacture or coarse quality, and in all but the rarest cases it passes off within a few days, if the practice is preserved in.

There is a very prevalent idea that woolen clothing is weakening, but this is only a misapprehension of the fact that it is weakening to allow the body to be constantly overheated. Although woolen is worn, the body need not be overheated, even in summer, care being taken that the quality and quantity of the clothes are suitable to the external temperature.

Nature points to wool as the proper clothing of man as of the lower animals, and, as is only to be expected under the circumstances, it fulfills all the conditions necessary for the preservation of health, as far as dress is concerned. It retains more warmth while weighing less than any other material, and it allows the skin to perform those functions of transpiration, interference with which is the certain precursor of disease.—*N. Y. Herald.*

—According to one estimate, the number of tramps in Germany last year amounted to 200,000, and the expense they caused to the community £300,000.

FARM AND FIRESIDE.

—Good care, together with good feed, will produce you handsome results.

—Good Cookies: One cupful butter, two cupfuls white sugar, one cupful sweet milk, one teaspoonful baking powder, two eggs, flour to roll nicely.—*Toledo Blade.*

—Cottage Pudding: One cup sugar, one cup milk, one egg, one teaspoonful soda dissolved in the milk, two teaspoons cream tartar in the flour. Flour to make stiff as pound cake, about one and one-half cups. Bake forty-five minutes. The same can be made with two ounces of butter and two eggs.—*The Household.*

—The pastures are greatly damaged in the spring, and their whole summer's growth retarded, by having the stock turned on them too early. The pastures should be allowed a good start, to get well rooted and the ground be thoroughly settled before any stock is allowed to range on them.—*Prairie Farmer.*

—Hair Tonic: To prevent the hair from falling out after sickness, bathe the scalp each day with a tonic prepared as follows: Pour over three ounces of sulphur one pint of alcohol. Shake well and add one-half pint of castor oil. If, after setting some time, it should become too thick for use, add alcohol and oil in the same proportions; if too thin, add sulphur.—*Exchange.*

—Lemon Jelly: Dissolve one ounce of good gelatine in about half a pint of water; let it stand two or three hours then place it in a saucepan with one pint more water, the juice of three lemons, the rind of two (cut very thin), and rather more than one quarter pound of loaf sugar. Let it boil five minutes, strain through a sieve, and place in a mold for the next day.—*N. Y. Mail.*

—Chinese Charm Cake: Three eggs, one cupful sugar, one and one-half cupfuls flour, one-fourth cupful butter, scant one-half cupful sweet milk, two teaspoonfuls baking powder. Beat the sugar and butter together, then add the milk; beat well, then break in one egg, beat all together, then add another egg, beat well, then add the other egg; beat well, then stir in the flour and bake. This is a good cake and easily made.—*N. Y. Post.*

—A useful article to hang in a bedroom or closet is a case made of linen, in which umbrellas and canes can be kept. The case should be cut in the form of a closed umbrella—that is, it should slope from the top to the bottom gradually. There should be a division, so that the canes will not be in the same pocket with the umbrellas; bind this all around with brown ribbon or a heavy braid, and with brown crewel embroider on the front the outlines of an umbrella and a cane.

—Young colts can be easily broke if the right method is pursued. The one we prefer is the following: When the proper period arrives to do so, place the saddle on its back and let it stand for a day or two at a time. The bridle, etc., should follow the same course; then harness into the wagon and let stand for a day or so; also, do the same out of doors. Food and drink should be given at the proper times in the stall then try leading it with the harness on then with the carriage attached, and finally try to drive it. Use it carefully and patience will succeed.—*Home and Farm.*

—Dr. J. R. Irwin says that one of the best and most pleasant things that can be used to relieve toothache is chewing cinnamon bark. It destroys the sensibility of the nerves, and suspends the pain immediately, if the bark is of good quality. After repeated trials, and in different cases, he is convinced that it is generally as efficacious as any of the other remedies suggested for odontalgia, and not attended with the unpleasant consequences of creosote, carbolic acid, etc., which relieve the pain, but leave the mouth as sore and painful as the tooth was previously; though these results are usually due to carelessness in using.—*Boston Journal of Chemistry.*

SEED GRAIN.

Important that Seed Should be of the First Quality if Best Results be Desired.

Good breeders never cease to warn people not to breed from grade sires. This is quite right, but some of these forget the same principle when they come to select seed to be sown for their farm crops. Breeding for improvement requires weeding out the defective individuals, so, likewise, and more emphatically, must the poor seed grain be separated from the good, and not used in seeding. Our American farmers are often most remarkably careless in this matter of seed grain; yet if they examine the question critically, they will see that it is just as important in principle that each seed of grain should be as perfect in organization and vitality as the sire at the head of the herd. Some may consider this an extreme illustration, but it is strictly true, and a very large class of farmers need forcible illustrations on this question of seed.

On driving past a remarkably even field of oats with a friend, he remarked that the field on which they grew must be of exceedingly even quality. The writer replied that that might be true, but the evenness of that field of oats was the result of the even quality of the seed. However even the quality of the land, the crop will not be even unless the seed has been graded, or is of even quality. A seed of deficient vitality can not produce as vigorous a plant as a plump, heavy, vigorous seed, and these defective plants will not make the same growth as the vigorous ones, however good and even the land may be. Good land will produce a better crop from poor seed than poor land, but the grain from the good seed will be six to ten inches higher, and more vigorous at harvest. None but the most even and vigorous seed should be sown, and this can always be accomplished by grading even a poor sample of seed. If only one-third of the sample is good, this can be separated from the poor, so that it is only the small matter of labor involved. When the best seed is sown for a few years, there will be no further trouble of uneven grain. The improved mills will separate all the poor seed, and this poor seed is worth more to feed than to sow.—*National Live Stock Journal.*

POISONED WATER.

Precautions that Should be Taken to Secure Good Water for Drinking Purposes.

Throughout a large portion of the country there has been so small an amount of rain for several months that the decaying animal and vegetable matter which accumulates to a greater or less amount on the surface of the earth, has not been washed away by each successive shower every few days in autumn, and frequently in winter. When the first general thaw occurs, with heavy spring rains, this decaying matter in great abundance will be washed down through numerous crevices in the soil, into springs and wells, and will poison the water used for drinking and for household purposes. Using this contaminated water will greatly increase the danger of sickness. A large portion of the cases of typhoid fever are caused by drinking bad water. The danger of cholera will be greatly increased if great caution is not exercised to avoid this poison. Every well which has been dry through the winter should be cleaned out at least twice after being filled with the spring flood, so as to remove all the old impurities, and to bring in a pure, fresh supply. If this can not be done, then filtered rain-water only should be used. In addition to this care, all vaults should be kept perfectly dry and inodorous by a daily use of sifted coal ashes, enough to absorb all the moisture. This will prevent the poison from soaking horizontally through crevices in the subsoil or rocks into wells—a most fruitful source of disease. Eminent physicians estimate that four-fifths of all the cases of typhoid fever come directly from drinking impure water and breathing poisoned air.

We have often endeavored to impress these truths on others, and while they are readily admitted, the listeners go right on in the same old way, "the same," as Dr. Franklin remarked, "as if they were merely listening to a common sermon." All the arrangements for using absorbents in vaults might be made with half an hour's labor, and the daily care not require half a minute; yet intelligent persons will continue to neglect them until fatal disease enters their families, when the affliction is wholly accounted for as "a mysterious dispensation of Providence!"

In towns and villages this care, in the face of threatened pestilence next summer, is of the utmost importance; at the same time it should not be forgotten that some of the fatal instances of sickness in the open country have been directly traced to gross neglect in preventing the use of impure water and in breathing fœtid air. These matters are not trifles; and it is immeasurably easier to prevent the multitudes of cases of disease than to incur the toil and intense anxiety of watching and nursing, and to suffer the grief of what is almost sure to be a fatal termination of a part of these cases.—*Prairie Farmer.*

—An excellent material for models, lately discovered, consists of powdered cork mixed with starch and water, and the mass thoroughly kneaded and mixed at boiling heat, then poured into moulds and dried at a high heat. It comes out in whatever ornamental shape the artist desires.—*Chicago Herald.*

—A house at Los Angeles, Cal., was supposed to be haunted, but an investigation showed that an immense swarm of bees had made their home in one of the walls and had stored it with a large quantity of the finest honey.

WALLA WALLA people read the Walla Walla *Watchman*, Walla Walla, Walla Walla County, Washington Territory.—*N. Y. Independent.*

"FROZEN FACTS" is a purely American expression, and one, too, of recent origin. It has the merit of attracting attention, and also seems to bear conviction of truthfulness on its face. We make room in our issue of to-day, for a fact of this character. A correspondent, Henry Whiting, Esq., of Boston, Mass., says: "Dr. R. V. Pierce's 'Golden Medical Discovery' has cured my son of a fever-sore of two years' standing. Please accept our gratitude." We believe it to be a fact, whether "frozen" or otherwise, that America needs more men like Mr. Whiting; men who act, men who investigate truths, and seize opportunities.

SHAKESPEARE wasn't a broker at all, but do you know of any man who has furnished so many stock quotations?—*Boston Times.*

THE letters of the word "poetry" make the words "rot, yep." "Yep" is a Northern word, meaning "yes."—*Chicago News.*

"I SAY, Charlie, who was that I saw you talking to this morning?" "Aw, he was a man who had made me a slight advance on a note." "Have you known him long?" "Yes; he used to shave my father." "Barber?" "No, broker."—*Merchant Traveler.*

THEY are going to dinner. He: "May I sit on your right hand?" She: "O, better take a chair." He takes one.

WAVES of trouble roll from the owe-shun of debt.—*Washington Hatchet.*

A TRAMP thinks air is a humbug. You can't live without it, and yet you can starve to death on it, if you have nothing else.

AN exchange says there is a considerable amount of bad coin afloat. Coin that can float must be of exceedingly light weight.

"I AM a belle ringer now," remarked a Bedford avenue young man as he put an engagement-ring on the finger of his dulcinea.—*Norristown Herald.*

"WILL the coming women talk?" inquires Estelle. Will the coming duck swim?—*St. Paul Herald.*

"WHAT shall I get for moths?" We should not get anything; but if the correspondent is fond of moths, a very acceptable present would be a sealskin jacket.—*Chicago Inter Ocean.*

"PAT, what time is it:" "Oi don't know, Mike, but let's guess at it and then, begorra, the man as comes furthest off can go out to the kitchen and look."—*Life.*

Tall Oaks from Little Acorns Grow.

Great and good results often spring from small deeds and so fatal diseases come of a seemingly trifling neglect. Colds neglected often lead to serious catarrhal troubles. If this is your case lose no time in becoming acquainted with Dr. Sage's Catarrh Remedy. Its healing virtues will surprise you. It is simple, efficacious, speedy, sure. Dull, heavy headache, obstruction of the nasal passages, discharges from the nose into the throat are symptoms of this horrible complaint.

LADIES, when you go to the sewing society, be temperate in all things and practice sewbriety.—*Whitehall Times.*

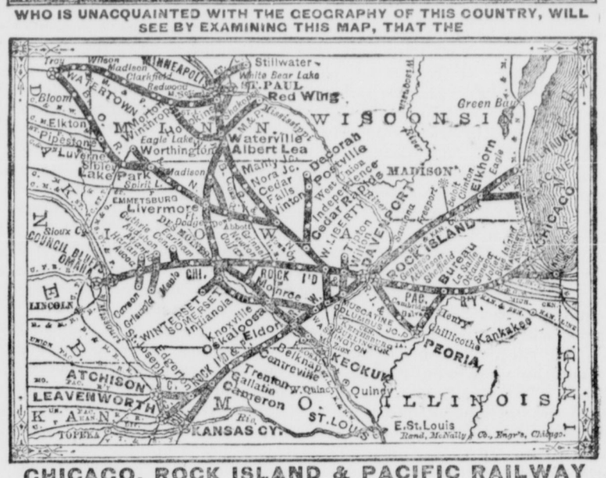
A MAN
WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE



CHICAGO, ROCK ISLAND & PACIFIC RAILWAY
By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.
The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.
THE GREAT ROCK ISLAND ROUTE
Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.
The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.
THE FAMOUS ALBERT LEA ROUTE
Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.
Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.
For detailed information see Maps and Folders, obtainable, as well as Tickets, at all principal Ticket Offices in the United States and Canada; or by addressing
R. R. CABLE, President and General Manager, Chicago.
E. ST. JOHN, General Ticket and Passenger Agent, Chicago.

PARSONS' PURGATIVE PILLS
MAKE NEW RICH BLOOD
Positively cure SICK-HEADACHE, Biliousness, and all LIVER and BOWEL Complaints, MALARIA, BLOOD POISON, and Skin Diseases (ONE PILL A DOSE). For Female Complaints these Pills have no equal. "I find them a valuable Cathartic and Liver Pill.—Dr. T. M. Palmer, Monticello, Fla." "In my practice I use no other.—J. Dennison, M.D., DeWitt, Iowa." Sold everywhere, or sent by mail for 25 cts. in stamps. Valuable information FREE. I. S. JOHNSON & CO., BOSTON, MASS.

A Man's Thanks.
A well-known business man of Wilmington, N. C., writes to express his thanks for the benefit which his wife has derived from the use of Mrs. Pinkham's Vegetable Compound. "It is with pleasure," he says, "that I write to express to you my gratitude for the relief and benefit your Vegetable Compound has been to my wife, who has been troubled with ulceration and a tumor weighing 2½ lbs., so the doctor said. She has been under the treatment of the doctor for six years. Finally he said he could do nothing more for her, that she would die in 24 hours. Then I commenced using your Compound, as soon as she commenced to take it she commenced getting better and now she can attend to her domestic affairs as well as she ever could."

SELF-PRESERVATION THE FIRST LAW OF NATURE.
In these degenerate days when ennui or a morbid craving for excitement alternately depresses or enlivens the animal pulse of unfortunate humanity, a word, a blow, a pistol shot, too often ends the chapter of life and darkens with gloom and sorrowing regret a murderer's future. Truly "self-preservation is the first law of nature," but this in its fullest and grandest sense should include a preservation of one's equanimity of temper, a preservation of a happy consciousness of living and doing rightly, a preservation of that disposition which shows a regard for the lives and feelings of others, all of which makes life endurable to our associates and enjoyable to ourselves. Again, a knowledge of that which promotes and that which impairs the harmonious action of natural bodily functions is essential to the best preservation of all there is in life worth living. To this end a judicious selection of remedial agents should unerringly be made when the wheels of perfect health begin to run slow, when the stomach grows weak, when the liver feels sore, when the kidneys give pain, when natural functions cause distress, and gloomy forebodings become constant companions. The wisest selection of a medicine for counteracting such evidences of ill health and restoring robust strength to all parts of the body is DR. GUYSOTT'S YELLOW DOCK AND SARSAPARILLA. Remember this and do not let your druggists sell you in its place anything of a different name, for the writer, who was himself an invalid for years, knows this remedy to excel as a health restorative all other preparations.

Thrilling Words.

J. J. Talbot, dying from the effects of a drunken debauch in Elkhart, Indiana, recently, said:

"But now the struggle is over, I can survey the field and measure the losses. I had a position, high and holy. The demon tore from around me the robes of my sacred office and sent me out churchless and Godless, a very hissing and by-word among men. Afterwards I had business, large and lucrative, and my voice was heard in large courts pleading for justice, mercy and right. But the dust gathered on my books, and no footfall crossed the threshold of the drunkard's office. I had money ample for all necessities, but it took wings and went to feed the coffers of the devils which possessed me. I had a home adorned with all that wealth and the most exquisite taste could do. The devil crossed its threshold and the light faded from its chambers; the fire went out from the holiest of altars, and leading me from its portals, despair walked forth with me and sorrow and anguish lingered within. I had children, beautiful—to me, at least—as a dream of the morning, and they had so entwined themselves around their father's heart that, no matter where it might wander, ever it came back to him on the wings of a father's undying love. The destroyer took their hands in his and led them away.

I had a wife, whose charms of mind and person were such that to see her was to remember her, and to know her was to love her. For thirteen years we walked the rugged path of life together, rejoicing in its sunshine and sorrowing in its shade. The eternal monster would not spare me even this. I had a mother, who for long years had not left her chair, a victim of suffering and disease, and her choicest delight was in reflecting that the lesson taught at her knee had taken root in the heart of her youngest born, and that he was useful to his fellows, and an honor to her who bore him. But the thunderbolt even reached there, and there it did its most cruel work. Other days may cure all but this. Ah, me! never a word of reproach from her lips; only a tender caress, only a shadow of a great unspoken grief gathering over her dear old face; only a trembling hand laid more lovingly upon my head, only a piteous appeal to Heaven if her cup was at last not full. And while her boy raged in his wild delirium two thousand miles away, the pitying angles pushed the golden gates ajar, and the mother of the drunkard entered into rest. And thus I stand, a clergyman without a church, a barrister without brief or business, a father without a wife, a son without a parent, a man without a friend, a soul without hope—all swallowed up in the maelstrom of drink.

Five Thousand Dollars a Pound.

In his last letter to *The Atlanta Constitution* Bill Arp says:

As a general thing the girls show too much anxiety to marry. They are too sweet on the boys. They ought to stand off and look reserved and precious and put on Jerusalem airs and say, "young man you don't know who you are fooling with. I'm a treasure, I am. I weigh 115 younds and am worth $1,000 a pound." Well they are. A good, nice, healthy girl, who can make her own dress and get up a good supper for company and is not ashamed to wait on the table while they are eating, is just worth about $1,000 a pound. But that is nothing compared to what they will be worth. Why, Mrs. Arp has cut out and make up at least 2,000 garments of one sort and another. She has sewed 500,000 stitches and patched and darned and washed faces and feet and combed hair innumerable. She has tied up 500 sore toes and cut fingers and burns and bruises and kissed away a thousand tears. She has watched 'em by night and day, and keeps on watching; and right now, while I am writing on my piazza, she is looking away up the big road, and says: "I'm afraid something will happen to them boys; they are too little to go on by themselves." They are two little nephews here just out of school, and they and Carl have all got a horse or colt apiece, and have gone off on a "scursion." and I call 'em the infantry cavalry and tell Mrs. Arp it is all right, but she sits here sewing with her specks on and ever and anon she looks up the road and says: "Those children have overstayed their time. I'm afraid something has happened." If they don't come back soon I know that I will have to start after them for that is always the way. Mrs. Arp is worth at least $5,000 a pound and she weighs right smart and keeps a getting heavier. I am rich, I am. I feel wealthy when I look at her.

No other preparation meets the wants of the debilitated system as does Ayer's Sarsaparilla.

More than Half Way.

With spring fairly here at last and Nature in a smiling mood, the inclination to look about for ways and means to better surroundings is strong. With many last summer's action of the B. & O. in issuing circular No. 7, with a view of promoting settlement and the establishment of manufacturing and other industries along its line, came possibly rather late for benefiting by its liberal inducements during 1884. But now, with everything ripe for advancement and improvement, the openings are most advantageous. The B. & O. offers freight transportation at half rates on household effects and building material for dwellings or structures intended exclusively for manufacturing purposes; half passenger rates for workmen employed on such improvements, and free transportation for families and domestics, first occupants of the dwellings constructed as above, on the way to them, and thereafter low commutation rates. More than this, free care and transmittal on passenger trains is tendered for marketing and household supplies of reasonable bulk and belonging to holders of commutation tickets. These concessions apply to suburban and other country settlements, and those at all interested should communicate with the proper officials and secure full data—those east of the Ohio to Vice-President Spencer, Baltimore; Pittsburg Division and tributaries, to General Superintendent, Pittsburg, and west of the Ohio, to General Superintendent Foreacre, Newark.

Special inducements beyond such as have been indicated may be given to manufacturing corporations, land and building associations, and individuals contemplating the expenditure of considerable sums in construction. In short, the B. & O. management will be found right up abreast of the times, quick to discern the benefits to accrue from energy and enterprise, and alert in affording the fullest and heartiest co-operation.

Infidel Consistency.

A humble missionary was traveling through the Canadian back woods. He lost his way, but presently was rejoiced at the sight of a glimmering light. Upon reaching it, to his surprise he found a large congregation of settlers gathered around a fire listening to an able discourse. To the horror of the missionary he found the man was trying to prove that there was no God, no heaven, no hell, no eternity. A murmur of applause went through the audience as the orator ceased. The missionary stood up and said: "My friends, I am not going to make a long speech to you, for I am tired and weary, but I will tell you a little story. A few weeks ago I was walking on the banks of a river not far from here. I heard a cry of distress, and to my horror I saw a canoe drifting down the stream and nearing the rapids. There was a single man in the boat. In a short time he would near the waterfall and be gone. He saw his danger and I heard him cry for mercy to God. I heard him scream: "O, God, if I must lose my life, have mercy on my soul!" I plunged into the water and reached the canoe. I dragged it to land, and saved him. That man whom I heard, when he thought no one was near, praying to God to have mercy on his soul, is the very man who has just addressed you, and has told you that he believes there is neither God, nor heaven, nor hell." —*The Bishop of Saskatchewan.*

Wise Words.

The root of all benevolent actions is filial piety and fraternal love.

That which causes us to lose most of our time is the repugnance which we naturally have to labor.

A law may be reasonable in itself, although a man does not allow it, or does not know the reason of the lawgiver.

Nobody talks much that doesn't say unwise things, things he did not mean to say; as no person plays much without striking a false note somewhere.—*Holmes.*

Irresolution on the schemes of life which offers themselves to our choice, and inconstancy in pursuing them, are the greatest causes of all our unhappiness.

Beauty in a modest woman is like fire or a sharp sword at a distance; neither doth the one burn nor the other wound those that come too near them.

There are sweet unspoken thanks before a fair scene of nature; at a sun setting below a glorious sea; or a moon and a host of stars shining over it; or a bunch of children playing in the street, or a group of flowers by the hedge side, or a bird singing there.

Nothing increases the love of life so much as living well.

Few persons have sufficient wisdom to prefer censure, which is useful to them, to praise which deceives them.

NEW ADVERTISEMENTS.

A Mother's Love—A Practical Illustration of Its Power.

A mother's love! What a potent thing it is! It will melt the heart of the most hardened criminal, when no other influence would be effectual. No one but a mother knows its full meaning, but every one can appreciate it if they will. It is known, though, that it means sleepless nights, care, inconvenience, and, if necessary, want, hardship and death. But the subject has been too eloquently treated by the sweetest poets and the ablest writers to furnish an essay for these columns. Too many practical illustrations occur in every day life for it to be dwelt upon, so that it is unnecessary to speak of the subject further in order to make the reader understand the full meaning of what is to follow.

Mrs. Henry Schualen, of Ashland, Ky., writes that her daughter has been cured of deafness which resulted from chronic catarrh. She tells how she had lost all hope of her daughter (her ideal) being cured, and how overjoyed she is at the result. After trying many remedies, she says PERUNA brought a cure, and that the daughter's hearing is restored. She concludes, by speaking in the most flattering terms of PERUNA, and then describes in the most lovely manner the happiness it has brought her, and reviews the distress she experienced while her daughter was afflicted.

Dr. A. R. Ong, Martins Ferry, O., writes: "I have a large trade on your PERUNA. Think it is a grand remedy."

Mr. Robert C. Hannah, Tolesborough, Lewis county, Ky., writes: "I write to inform you of the great benefit I received by the use of your medicines, PERUNA and MANALIN. I had been low spirited and very sick for about six months with a bad cough, and my friends thought I had consumption; tried a number of patent medicines, and most of the doctors in the vicinity (and we have some as good as you can find in the country), but they did me no good whatever. Our merchant, Mr. Gillespie, insisted upon me trying your remedies. I did so, but must say, I had little faith in them at first; before I had consumed my first bottle, I noticed a change for the better, and to-day I am entirely well, and as sound a man as there is in the vicinity. I credit my cure to your valuable remedies, PERUNA and MANALIN, and recommend them to all of my friends."

Order of Publication.

Benjamin F. Harvey, Plaintiff, vs. Samuel W. Arenhalt, Administrator of Amos W. Arenhalt, deceased, and others.

No. 27 Equity. In the Orphans' Court for Garrett county.

The object of this Suit is to procure a decree for the sale of the real estate of Amos W. Arenhalt, late of Grant county, West Virginia, deceased, for the payment of the claims of his creditors.

The bill states that the said Amos W. Arenhalt was, in his lifetime, seized and possessed of valuable real estate in Garrett county.

That being so seized and possessed of said real estate, the same being less than $2000 in value, and having some personal property, he sometime in the month of January 1885, departed this life, intestate, and unmarried, leaving surviving him as his only heirs at law, the following brothers and sisters, viz: Samuel W. Arenhalt, Mary M. Arenhalt, who is intermarried with a certain David Moreland, David Arenhalt and Keziah F. Arenhalt, who resides in Grant county, West Virginia, Martha Ann Arenhalt, who is intermarried with a certain Thomas Crow, both of whom reside in Garrett county, Maryland; Job W. Arenhalt, Jacob L. Arenhalt, Rebecca V. Arenhalt, Isaac T. Arenhalt and Flora Arenhalt, who are infants under the age of twenty-one years, and reside in Grant county, West Virginia.

That the said Amos W. Arenhalt was in his lifetime indebted unto the plaintiff in the sum of five hundred dollars, and also to divers other persons in various amounts.

That Administration of the personal estate has been granted by the Orphans' Court for Garrett county, to Samuel W. Arenhalt.

That the said personal estate is insufficient to discharge all the just debts due and owing by said Amos W. Arenhalt at time of his death.

That the plaintiff and the other creditors are entitled to have the balance due on their claims paid out of the real estate.

The bill contains a prayer for a decree for the sale of said real estate and for Order of Publication, against the non-resident defendants.

It is therefore this 13th day of April, 1885, ordered by the Orphans' Court for Garrett county, in Equity, that the plaintiff, by causing a copy of this order to be inserted in some newspaper published in said Garrett county, once in each of four successive weeks before the 16th day of May next, give notice to the said absent defendants, Samuel W. Arenhalt, Mary M. Moreland, David Moreland, her husband, David Arenhalt, Keziah F. Arenhalt, Job W. Arenhalt, Jacob L. Arenhalt, Rebecca V. Arenhalt, Isaac T. Arenhalt and Flora Arenhalt, of the object and substance of this bill, warning them to appear in this Court in person or by solicitor, on or before the 15th day of October next, to show cause if any they have, why a decree ought not to be passed as prayed.

NEW ADVERTISEMENTS.

TRUSTEE'S SALE!

Under and by virtue of a deed of trust from Thomas Coddington and Cecilia J. Coddington, his wife, executed to me and recorded in the office of the Clerk of the Circuit Court of Garrett county, for the benefit of the creditors of the said Thomas Coddington, I will

ON TUESDAY, THE 2D DAY OF JUNE, A. D. 1885,

at ten o'clock A. M., at Coddington's Hotel, Oakland, Md., offer at public auction to the highest bidder without reserve the following described property, to-wit: All the right title and interest of the said Thomas Coddington and wife in and to the real estate which was conveyed to the said Thomas Coddington by William P. Totten, executor of Ezekiel Totten, by deed bearing date April the first, A. D. 1881, and recorded in Liber W. H. T. No. 8, folio 502, it being the

HOTEL PROPERTY

where the said Thomas Coddington now resides. The interest of the said Thomas Coddington in said real estate being the Equity of redemption, and the said real estate will be sold subject to two mortgages, the first in favor of M. A. R. F. Carr for seven hundred dollars and payable on the first of April, A. D. 1887. The second in favor of Ida M. Crow for one thousand dollars, and payable on the twenty ninth day of July, A. D. 1887. Said Hotel Property is more particularly described as Lots Numbers ten and twelve on the plat of Totten's Sub-Division to the town of Oakland, Maryland. Said Lots are improved by a large two-story frame Hotel building, also large stable, ice-house and necessary outbuildings. This is one of the best locations for a Hotel or boarding house in the town of Oakland.

Immediately after offering the above described real estate I will offer in like manner all the

HOUSEHOLD AND KITCHEN FURNITURE

formerly used by the said Thomas Coddington in running said Hotel, consisting of six heating stoves, two cooking stoves and utensils, twelve bedsteads, beds and bedding, large number of chairs, washstands, bureaus, carpets, lamps, hat racks, tables, stands, &c., &c. Table ware, consisting of knives, forks, plates, dishes, &c. One sofa one marble top center table, also barroom fixtures, including one large bar mirror, one elegant bar counter, stock of whiskey, brandy, wines, gin, cigars, tobacco, bar bottles and decanters, &c; also one buggy, one set of harness, four sheets and many small articles too tedious to enumerate.

TERMS OF SALE:—On the real estate one-half cash on the day of sale, and one-half in sixty days from the day of sale. On the personal property, all sums of twenty dollars and under cash, all sums over twenty dollars a credit of sixty days. On all deferred payments the purchasers to give their single bill, with security to be approved by the trustee. If the sale is not completed on the said Second day of June, it will be continued from day to day until finished. No property will be delivered until terms of sale are complied with.

JOHN B. BRANT, Auctioneer.

FRED. A. THAYER,
5 9 4t. Trustee.

MOTHER SHUCK'S SALVE!

THE TRIED and TRUE REMEDY FOR

CROUP, BURNS, CUTS, Bruises, Sores, Boils.

FOR SALE BY ALL DRUGGISTS.

A HOME DRUGGIST TESTIFIES.

Popularity at home is not always the best test of merit, but we point proudly to the fact that no other medicine has won for itself such universal approbation in its own city, state, and country, and among all people, as

Ayer's Sarsaparilla.

The following letter from one of our best-known Massachusetts Druggists should be of interest to every sufferer:—

RHEUMATISM. "Eight years ago I had an attack of Rheumatism, so severe that I could not move from the bed, or dress, without help. I tried several remedies without much if any relief, until I took AYER'S SARSAPARILLA, by the use of two bottles of which I was completely cured. Have sold large quantities of your SARSAPARILLA, and it still retains its wonderful popularity. The many notable cures it has effected in this vicinity convince me that it is the best blood medicine ever offered to the public. E. F. HARRIS."
River St., Buckland, Mass., May 13, 1882.

SALT RHEUM. GEORGE ANDREWS, overseer in the Lowell Carpet Corporation, was for over twenty years before his removal to Lowell afflicted with Salt Rheum in its worst form. Its ulcerations actually covered more than half the surface of his body and limbs. He was entirely cured by AYER'S SARSAPARILLA. See certificate in Ayer's Almanac for 1883.

PREPARED BY
Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists; $1, six bottles for $5.

SPEER'S
PORTUGAL GRAPE WINE,

—Also—

UNFERMENTED GRAPE JUICE.

Used in the principal Churches for Communion. Excellent for Females, Weakly Persons and the aged.

ADOPTED IN HOSPITALS AS THE BEST

SPEER'S PORT GRAPE WINE!

FOUR YEARS OLD.

THIS CELEBRATED WINE is the pure juice of the dead ripe Oporto Grape, raised in Speer's vineyards. Its valuable,

TONIC AND STRENGTHENING PROPERTIES

are unsurpassed by any other Wine. Being produced under Mr. Speer's own personal supervision, its purity and genuiness, are guaranteed by the principal Hospitals and Boards of Health who have examined it. The youngest child may partake of it, and the weakest invalid use it to advantage. It is particularly beneficial to the aged and debilitated, and suited to the various ailments that affect the weaker sex. It is in every respect A WINE TO BE RELIED ON.

Speer's Unfermented Grape Juice,

Is the juice of the Oporto Grapes, preserved in its natural, fresh, sweet state as it runs from the press by suspending animation, thereby destroying the exciter of fermentation. It is perfectly pure, free from spirits and will keep in any climate.

Speer's Burgundy,

It is a dark rich medium Dry Wine used by the wealthy classes as a Table or Dinner Wine, and by physicians in cases where a dry wine instead of a sweet port is desired.

Speer's (Socialite) Claret.

Is held in high estimation for its richness as a Dry Table Wine especially suited for dinner use.

Speer's P. J. Sherry.

Is a wine of Superior Character and partakes of the rich qualities of the grape from which it is made.

Speer's P. J. Brandy.

IS A PURE distillation from the grape, and stands unrivalled in this Country for medicinal purposes.

It has a peculiar flavor, similar to that of the grapes from which it is distilled.

See that the signature of ALFRED SPEER, Passaic, N. J. is over the cork of each bottle.

Sold by A. G. STURGISS, and by druggists everywhere. Feb. 16'84 1y.

A Rare Chance to Secure a Home.

FOR SALE,

Several Tracts of Land on the Hooppole Road, 3 miles from Deer Park and 6 miles from Oakland, Md.

These lands are of excellent quality, each tract has a stream of water running through for cattle, and springs of excellent water, and a quantity of valuable timber. The Hooppole road passes through the lands and the Deer Park road quite near them. They adjoin the farms of John L. Browning, Frank R. Nethkin, Wm. Schooley, Joseph Spiker, Ralph Browning, Jacob Sell, W. M. Rhodeheaver and others.

These lands will be sold CHEAP and on the MOST FAVORABLE TERMS: One fourth cash and the balance in three or four equal yearly payments, with interest and security to the satisfaction of the owner.

NEW ADVERTISEMENTS.

IT LEADS ALL.

No other blood-purifying medicine is made, or has ever been prepared, which so completely meets the wants of physicians and the general public as

Ayer's Sarsaparilla.

It leads the list as a truly scientific preparation for all blood diseases. If there is a lurking taint of Scrofula about you, **SCROFULA** AYER'S SARSAPARILLA will dislodge it and expel it from your system.

For constitutional or scrofulous Catarrh, **CATARRH** AYER'S SARSAPARILLA is the only true remedy. It has cured numberless cases. It will stop the nauseous catarrhal discharges, and remove the sickening odor of the breath, which are indications of scrofulous origin.

ULCEROUS SORES "Hutto, Tex., Sept. 28, 1882. "At the age of two years one of my children was terribly afflicted with ulcerous running sores on its face and neck. At the same time its eyes were swollen, much inflamed, and very sore. Physicians told us that a powerful alterative medicine must be employed. They united in recommending AYER'S SARSAPARILLA. A few doses produced a perceptible improvement, which, by an adherence to your directions, was continued to a complete and permanent cure. No evidence has since appeared of the existence of any scrofulous tendencies; and no treatment of any disorder was ever attended by more prompt or effectual results.

Yours truly, B. F. JOHNSON."

SORE EYES

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists; $1, six bottles for $5.

DR. JOHN BULL'S
Smith's Tonic Syrup

FOR THE CURE OF

FEVER and AGUE
Or CHILLS and FEVER,

AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure, that its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.

BULL'S SARSAPARILLA is the old and reliable remedy for impurities of the blood and Scrofulous affections.

AUNT JANE'S EAR TRUMPET.

The noise of wheels was heard in the street, it being the stage coach with its load of passengers just returned from the railroad station, and the vehicle paused before the gate of a rather pretentious house on the main street of the village.

Mrs. Graves looked out of the window, and an expression of dismay crept over her face.

"I declare," she exclaimed, "if it isn't Aunt Jane Breed come to make us a visit!"

"Oh, dear," chimed in Arabella, a young lady of 18 years, "what a pity. Just as we are going to have a party, too. Couldn't we tell her it is inconvenient for us to have her, and send her to Uncle Merriam's?"

"No, Arabella, that would never do. You must consider that your Aunt Jane has twenty thousand dollars which she can dispose of as she pleases."

She had no time to say more, for the bell rang.

Mrs Graves went to the door herself. By the time she had opened it her face was compressed into an expression of joy.

"Why, Aunt Jane, how do you do? What a pleasant surprise. Arabella and I were speaking of you only this morning."

"Wait a minute, Eleanor," said the old lady, and, fumbling in her pocket, she produced an ear-trumpet which she adjusted to her ear.

"There," she said, "now we can talk."

"I had no idea you were deaf," said Mrs. Graves through the trumpet.

"Age has its infirmities," said Aunt Jane. "How is Arabella?"

"Very well, thank you. Here she is to speak for herself."

Mrs. Graves turned toward her daughter and spoke in her natural voice.

"Aunt Jane is as deaf as an adder," she remarked. "You see she has to use an ear trumpet."

"I'm glad of it," said Arabella; "for now we can just say what we please, without her overhearing us. Is she going to stay very long?"

"I don't know, I'll ask her," and, turning to the aunt she said, with her mouth in the ear-trumpet, "I hear you are going to favor us with a long visit."

"I can't spare you but a month," said Aunt Jane; "that is if it is entirely convenient for you to have me with you so long as that."

"We shall be delighted, said Mrs. Graves, finishing the sentence for her daughter's benefit, "to have you go. That's the truth, isn't it Belle?"

"How shall we ever live through the month?" asked Arabella, dismally, without venturing to express the feeling on her countenance.

A peculiar expression flitted over the old lady's face, but this was not observed by mother or daughter.

Three days passed. The old lady had become quite domesticated at the house of her neice.

It happened that Arabella had a beau, a young man of very much the same calibre as herself, who was employed as a clerk in one of the village stores. He called one evening when Aunt Jane had indulged herself in sitting up a little later than usual.

"I suppose I must introduce you to my aunt," said Arabella. "She will not be in our way, for she is as deaf as a post. Aunt Janet," she said, through the ear-trumpet, "this is Mr. Storrs."

"I am glad to see him," said Aunt Jane, extending her hand.

"There, we needn't say anything more to her," said Belle, cordially. "I believe you never saw her before."

"No," said he.

"Ain't she a beauty," laughed Belle.

"Are you not afraid she will hear?"

"Oh, no, she is entirely dependent upon her trumpet."

"That's lucky for us. If she could hear she might not be gratified by what she heard. Ha, ha!" laughed Storrs.

"It is a great trial to us to have her here, but you know when one has a rich aunt she cannot be very well put off."

"So your aunt is rich," said the young man, with increased interest.

"Yes, she is worth twenty thousand dollars."

"That is a large sum," said Storrs, thinking how large a portion would likely fall to Belle, whom he already looked upon as his own.

"Yes, it is worth some sacrifice; so we tolerate the old lady, in spite of her fumily dress and odd ways."

"I was going to observe," said Storrs, banteringly, "what a strong resemblance there is between you and your aunt."

"Take that for your impertinence, sir," said the young lady, playfully tapping him with her fan. "I must be charming if that were the case."

Now Aunt Jane was in reality a very good-looking old lady; not, of course, as attractive as when young. The conversation thus ran on entirely regardless of Aunt Jane, who sat placidly in a rocking chair at the window, knitting a stocking. She appeared to take little notice of them, but occasionally an amused look flitted over her face. Probably she was thinking of something.

Aunt Jane had been a fortnight at the house of Mrs. Graves, when one morning she said at the breakfast table: "I should like to go over to Merriam's to spend the day."

"Very well," said Belle, with alacrity, "we can carry you down there immediately after breakfast. What a relief," said she, turning to her mother, "to be rid of her a single day!"

"Yes," said Mrs. Graves, who, being older, was a little more prudent, "but you must consider that he is as nearly related as I am, and we must not let her stay there too long."

"Yes, I suppose so," said Bell, with a sigh.

"You had better tell her that you hope she will not stay longer than one day."

"Well," said Belle, "if I must I must. Aunt Jane, you must be sure and not stay longer than a day or two," said the young lady through the trumpet.

"You are very kind," said the old lady. "I didn't know but I was getting troublesome."

"Oh, no, we are delighted to have you here," said Mrs. Graves. "We hope you will stay a long time."

"How could you say that, mother?" protested Belle.

"Because, my dear, your aunt is too old to last very long, and we ought to feel willing to submit to some inconvenience for the sake of being remembered in her will. If we work our cards right she may leave the whole. That would be worth having; twenty thousand don't grow on every bush."

"As likely as not she'll live to be a hundred," muttered Belle.

After breakfast Aunt Jane was carried to the house of James Merriam, her nephew, the only son of her sister. Mr. Merriam was a poor man. He had met with reverses, and now lived in a much less expensive way than Mrs. Graves, his cousin, who, despite the relationship, looked upon him as her social inferior. He was a very worthy man, however, and far from being as worldly as Mr. Graves. He had three children, all at home. His wife was an excellent housekeeper and far more amiable than Mrs. Graves, though her pretensions were much less.

"I'm glad to see you, Aunt Jane, said Mr. Merriam hospitably, as he came to help her from the carriage. We have been hoping to see you ever since we heard of your arrival in town. Clara will be delighted to welcome you."

The old lady drew out her trumpet. Mr. Merriam looked concerned.

"I am sorry that you have lost your hearing," he said.

"Old people can't expect to hear as well as young folks," said Aunt Jane.

"You must make us a good long visit," said Mrs. Merriam, who now appeared.

"I will see," said Aunt Jane.

"I always liked Aunt Jane," said Mrs. Merriam to her husband, "she is always so gentle and kind, it seems very pleasant to have her in the house."

"So it does," said Mr. Merriam. "The only thing I think of is that we have a small house and can't make her as comfortable as at your cousin's."

"Well, we will make up in the warmth of our welcome."

Aunt Jane seemed unusually happy that day. As night approached she seemed thoughtful, and finally consented to stay longer.

"I must write a note to my niece to explain it," she said.

An hour later the note was placed in the hands of Mrs. Graves.

NIECE ELEANOR: I have concluded to stop where I am during the rest of my visit. As you remarked to Belle when I came that you should be delighted to have me go, this information will doubtless be pleasing to you. As for Belle, she will be easily consoled for the departure of her grumpy old aunt, who must have annoyed her with her odd ways.

AUNT JANE.

P. S.—My hearing has been wonderfully restored, so that I can now dispense with my trumpet.

This letter filled Mrs. Graves and Belle with dismay. They had sinned deeply against the old lady that they felt that no apologies would be adequate. To add to Belle's misfortune, when the young clerk learned what had occured between herself and her aunt he unceremoniously deserted her for another.

Aunt Jane bequeathed the bulk of her property to her nephew. The will contained the following provision:

I bequeath to my niece, Eleanor, my ear trumpet, which I found on one occasion of excellent service.

A View from the Moon.

From Prof. Lanhley's article on "The Planets and the Moon," in his series on "The New Astronomy," in the March *Century*, we quote the following: "The truth is, however, that, looking at the earth from the moon, the largest moving animal, the whale or the elephant, would be utterly beyond our ken; and it is questionable whether the largest ship on the ocean would be visible, for the popular idea as to the magnifying power of great telescopes is exaggerated. It is probable that under any but extraordinary circumstances our lunar observer with our best telescopes could not bring the earth within less than an apparent distance of five hundred miles; and the reader may judge how large a moving object must be to be seen, much less recognized, by the naked eye at such a distance.

"Of course, a chief interest of the supposition we are making lies in the fact that it will give us a measure of our own ability to discover evidences of life in the moon, if there are any such as exist here; and in this point of view it is worth while to repeat that scarcely any temporary phenomenon due to human action could be visible from the moon under the most favoring circumstances. An army such as Napoleon led to Russia might conceivably be visible if it moved in a dark solid column across the snow. It is barely possible that such a vessel as one of the largest ocean steamships might be seen, under very favorable circumstances, as a moving dot; and it is even quite probable that such a conflagration as the great fire of Chicago would be visible in the lunar telescope, as something like a reddish star on the night side of our planet; but this is all in this sort that could be discerned.

"By making minute maps, or, still better, photographs, and comparing one year with another, much however, might have been done by our lunar observer during this century. In its beginning, in comparison to the vast forests which then covered the North American continent, the cultivated fields along its eastern seaboard would have looked to him like a golden fringe bordering a broad mantle of green; but now he would see that the golden fringe has pushed aside the green farther back than the Mississippi, and would gather his best evidence from the fact (surely a noteworthy one) that man, as represented by the people of the United States, has changed one of the features of his world during the present century to a degree visible in another planet!"

A Walking Skeleton.

Mr. E. Springer, of Mechanicsburg, Pa., writes: "I was afflicted with lung fever and abscess on lungs, and reduced to *a walking skeleton*. Got a free trial bottle of Dr. King's New Discovery for Consumption, which did me so much good that I bought a dollar bottle. After using three bottles, found myself once more a man, completely restored to health, with a hearty appetite, and a gain in flesh of 48 lbs." Call at Nydegger's Drug Store and get a free trial bottle of this certain cure for all Lung Diseases. Large bottles 50c and $1.00.

Joy is a prize unbought, and is freeist, purest in its flow when it comes unsought. No getting into heaven as a place will compass it. You must carry it with you else it is not there. You must have it in you as the music of a well-ordered soul, the fire of a holy purpose, the welling up, out of the central depths, of eternal springs that hide their waters there.

Cleanse the scalp from scurf and dandruff, and keep the hair pliable, by the use of Hall's Vegetable Sicilian Hair Renewer.

AT THE RINK.

Mr. Jonathan Flynn and his sweetheart, Kate,
Went up to the Roller Rink to skate.
"I'll show you, my darling," said he, "how it feels
To be buzzing around on eight little wheels."
So the boy, with a grin,
Strapped the skates on to Flynn.

The people were there, and the big brass band,
And the young men had their girls by the hand;
They could polka, and waltz, and cut figure eights,
And do wonderful things on their strange roller-skates.
"O, I wish *I* could skate,"
Whispered envious Kate.

The near-sighted man put on two pairs of glasses,
And gazed with delight on the graceful young lasses,
And the bald-headed gentlemen watched in amaze,
For they didn't have rollers in "Grandfather's days."
And all said: "O, my!"
With a satisfied sigh.

Miss Kittie O'Hara had just won a prize,
And all the folks watched her with curious eyes;
She could "promenade" backwards, and slide at her ease,
Just as if she'd been born on a flying trapeze,
And the boys said: "Gee whiz!
What a skater *she* is."

Then Jonathan Flynn thought 'twas time to begin,
So he got on his feet and prepared to "sail in."
Feeling sure of success, he determined to try it
While the band had stopped playing and all was so quiet,
And he thought he would do
Something "striking" and new.

Ambitious and hopeful, he made a bold start,
But, just at the outset, his legs went apart,
And poor Jonathan found, to his utter dismay,
His refractory legs were both *running away*,
And down on his back
Came Flynn with a whack!

And one pretty girl, with a head like a mop,
Said: "I thought it was spring, for I saw a *dude-drop*."
And another one answered: "O, no! not at all;
It couldn't be *spring*, it was certainly *fall*."
And then they both giggled,
While Flynn lay and wriggled.

At last the "Professors" took Flynn from the floor,
And arranged him with care on the side of a door,
And, kind-hearted readers, now what do you think?
As they carried poor Flynn through the door of the Rink
Kate whirled on her toes
And turned up her nose!

—*Judge.*

LOVE AND LIGHTNING.

How the Danger to the Express Train Was Averted.

Letty Brooks put aside the white muslin curtain and looked out of the little window of the telegraph office at Smyrna station as the afternoon accommodation puffed and rattled up to its stopping-place.

"Who's come, sis?" spoke a very young boy, whose likeness proclaimed near kinship to the girl, and whose manner readily determined him as that most unpleasant variety of the genus, a privileged brother.

"Nobody you know, Sammy," replied the sister, vainly imagining that she had thus satisfied an inquiry born of only too shrewd interpretation of the expectant glance with which her face had greeted the incoming train. "Run out and get the paper."

"O, no! Billy Johnson ain't running, and of course there ain't nobody there," retorted the boy, and with this crudely humorous allusion to the supposed favor with which Letty regarded a certain young engine-driver, he uncurled himself from the table and tumbled out the door to do her bidding.

For all topographical purposes, Smyrna station is but a small dot on the railway map, and its function in the great economy of traffic and transportation is that of a depot of wood and water for the refreshment of the motive power of freight trains. The iron bond of a long single track unites in wedlock two cities who quarrel like husband and wife for supremacy as the commercial metropolis, while similarly joined in indissoluble interests; and the little village, too far distant from either to share in contingent greatness, and even lacking the independent importance of a half-way station, quietly sleeps between its hills, with its river trailing off at one side, awakened twice daily by the shriek of the fast express, and occasionally contributing a passenger to the leisurely accommodation train. In winter there really seems no reason for its existence, and it hibernates, its sub-tropical name being mocked by the reigning desolation. In summer there is a certain awakening of agriculture and a reappearance of natives in cotton shirts and pantaloons. At this season, too, there is the advent of the city scions of two of the formerly great families of the neighboring country, who keep green the memories of their bucolic ancestors by occupying the homesteads, stately in an old-fashioned way, with two-storied columns across their broad fronts, that stand on the heights at the other end of the town.

Summer it is, and the very heat of it, when Miss Florence Van Amden shakes the creases and the cinders from her pongee traveling suit, after alighting from the train, with a weary look on her veiled face and a begrimed novel in her gloved hand; and Letty, from behind her curtain, knows that this solitary passenger is Miss Florence Van Amden as well as do Tom Porter and his sister, who have come to meet the traveler with the family carriage. For although this lady is unaccompanied, she has by no means come unheralded. Care is necessary in the consignment of such precious goods; and this is the reason that Letty, peering out from the window of the telegraph office, wears a face on which realized anticipation rather than surprise appears, as the travel-dusted figure sweeps across the platform! For Letty is the repository of all the secrets that flash from town to town along the humming wires. She has but to turn the switch of the little instrument resting on her desk, and there pour forth prices current and political nominations, orders for arrest on their way to outstrip the criminal in his flight, and kindly messages of friendly appointment, brief tales of death and congratulations on the coming of the first-born, all ticked out in the unsympathetic monotone whose dots and dashes and silences speak words to her trained ear.

It is the railroad that has given Smyrna its telegraph; and Letty's occupation is so generally confined to the business of the road—to receiving orders from the train dispatcher to "hold No. 7," to "keep the track clear for down special," or that "No. 4 has the right of way to Flaxborough," which it is her duty to copy in triplicate and deliver to the station-master—that a purely social message, coming direct to Smyrna and stopping there, instead of careering on to the end of the line, makes an impression on her memory. There have been at least a score of these unusual messages, all relating to Miss Van Amden's visit, which Letty has sent to Squire Porter's great house, until she at last beholds the subject of so much dispatching descend from the train.

Socially considered, Miss Van Amden is a more important subject of description than the telegraph operator at Smyrna station. Especially would she be so were she at this moment attired in some one of the toilettes hidden in the mountainous trunk before which the station-master of this unsophisticated village stands aghast. But all that Letty sees, as the traveler lifts her veil to kiss Tom's sister, and extends a hand to Tom himself, is a handsome dark face surmounting a graceful figure, whose good points have not suffered obscuration at the hands of any unskillful modiste. Then they all vanish with the rattle of laughter and carriage wheels.

Letty settles herself back in her chair with a little sigh, and plies a palm-leaf fan, as if to blow away a bit of a cloud that seems to have sprung up from nothing, as clouds do, on her pretty face. It might be supposed that she is jealous, were her prettiness sufficient to justify such indulgence in the luxury of feeling. And if her pink cheeks and yellow curls have been really the attraction that has kept Tom Porter dangling with compliments about her path to and from the station all the season, it is only natural that she should feel a certain anxiety on the introduction of black eyes and brunette beauty on the scene. Tom's attentions have already plunged the station-master into a savage gloom, whose outward manifestations take the form of a strange hostility to the baggage of innocent passengers; and if Squire Porter had known what terrible thoughts racked the soul of Billy Johnson, the engine-driver, he would never have risked the safety of his family on the rails behind that one of Letty's lovers, who, to tell the truth, was the most favored.

As the case stood, however, Letty's heart had expanded toward Tom Porter, under the light attentions of that young man, just enough to permit her to owe him a grudge should he transfer his fancy; and this, with an intuition not surprising under the circumstances, she foresaw would be the result.

To say that Letty turned with gratitude and satisfaction to the assured affection of her engine-driving admirer would be to do injustice to her capacity for ambition which the Squire's son had aroused: and as she fluttered her fan she blew up a little flame of animosity against all of them together. Nor was she far wrong in her estimate of the situation. The house of Porter and Amden were in no way averse to an alliance that seemed the most natural thing in the world, and a match whose possibility had been foreshadowed in the winter gayeties of the city would receive impulse in the rural festivities of the summer to the gratification of all concerned.

The gossips of Smyrna soon had this business, as well as much more pertaining to equally private affairs of the neighborhood, high and low, satisfactorily arranged. It was not determined by this authority whether the wedding was to take place before the close of the season or early in the winter. Preference was generally given to the later date; and this was the news which Sammy one day brought his sister, the development of the talent of gossip-bearing having a commencement in early youth among the Smyrniotes.

Sammy was, indeed, a precocious child, and would perhaps have been a more valuable member of society than one ought to be at his age had it not been for the compensating circumstance that his precocity was wholly unreliable. He was at once useful and dangerous, amusing and exasperating; and never did these qualities expand and glorify themselves as among the events with which he managed to connect himself this summer. The mysteries of telegraphy were never too deep for his probing, as the arcana of love was not too sacred for his investigation and mastery. He not only had, for a small boy, a wonderfully accurate comprehension of his sister Letty's romantic tendencies, but he also developed a practical usefulness as the Ariel to speed with her messages, and the Caliban to scrub the corroded metal elements of her battery.

While the summer days passed quietly and hotly enough at the station, the augmented household at Squire Porter's spread itself over the country round about in daily junketing of the most hilarious sort. Such a genius for picnics, such a talent for fishing, such an endurance in mountaineering as Miss Van Amden showed herself to possess would have captivated the great Pan himself, and Tom Porter, who was a worshiper of the woodland deity, found his devotion turning more and yet more strongly toward this handsome priestess. Talk of the glamour of gas-light and hot-house flowers, of the infatuation of the dance in crowded ball-rooms, of all the fascinations of stereotyped fame! why, a young woman of good parts can work more havoc in a fortnight of rural pleasuring than in a whole season of artificial campaigning.

If Tom Porter did not confess to this fact in so many words, it was none the less true that Miss Van Amden conquered him within a week after her arrival at Smyrna, and dragged him a willing captive over hill and valley, attuning his soul to what he imagined to be concord with nature, but what was in reality the romance of his own heart. It was on their return from a mountain party, filled but not surfeited with picturesque views, that the two found themselves in advance of the rest, walking alone.

"There are the carriages just ahead of us," said Tom. "Suppose we sit down here and wait for Milly and the others?"

"What a pity we left them so far behind!" suggested Miss Van Amden, affecting to adjust her jaunty hat at a more sedate angle.

"Not a bit of it; I had almost forgotten they were anywhere in the world," replied the young man, eagerly and unsuspectingly accepting the suggestion his companion had so delicately hinted. "Let's imagine we have quite stepped out of it ourselves for a few minutes longer. They will come soon enough, and then we go home to dinner and civilization again."

"Do I look very uncivilized now?" asked the girl, glancing up in Tom's face as she sank on an old tree trunk by the side of the road.

"No, I can't say that you do," replied Tom, with a glow of genuine admiration. "It is something altogether better than that."

"Sit down here by me, and I'll spare you telling me what it is. You were never very bright in analyzing your impressions."

"But there are some feelings that I can analyze well enough, Florence," said the young man, seating himself, not by her side, but on the moss at her feet. "If at first I couldn't tell myself what made our trip so pleasant up this mountain two weeks ago, I believe I know it now."

"Do you?" she said softly, as as if unconscious that Tom's hand had sought hers, and displaced a frond of sweet-fern in order to possess her fingers.

"Yes; I know it only too surely, Florence. May I tell it to you?"

Florence's firm brunette face, with its lightly disarranged hair, in which was stuck a fiery cardinal flower, seemed more beautiful than ever as it was half turned from Tom. Her eyes, rather than her lips, gave the desired permission. Tom had now both her hands in his, and was gazing with a lover's admiration at the lovely cheek whose curve rounded against the dark hair so softly. He was no epicure in sentiment, and was very much in earnest just then; but he delayed one instant from pure ecstacy at the sensation. His heart was thumping furiously, and in another moment he would have become eloquent, at least to Florence's ears, had not a sudden splash, accompanied by the shriek of a childish voice, broken in upon the silence and the sentiment of the occasion.

Perhaps there was no necessity of a formal completion of Tom's remarks; certainly there was no opportunity. For the cries continued, and the young man was speedily dashing down the hillside, through the bushes, toward the stream that flowed a few rods from where the lovers had seated themselves.

It was the work of an instant for Tom's long arms to drag out a kicking and struggling boy from what might have been a watery grave had the brook been deeper, but which was earthy enough in fact, to judge by the amount of clayey soil clinging to the wet garments of the involuntary bather.

"There you are, Sammy!" said Tom, as he put the dripping boy on his legs for drainage purposes. "What in the world have you been doing here?"

"Fishin'."

"Do you chase the fish into the water?"

"No; I scoop 'em up. There's my hat now," and the young fisherman pointed out that article, escaped from employment as a net, floating down the stream, gyrating through eddies and around rocks, and slowly filling with water.

"Take off your jacket and wring it out," said Tom, chasing the vagrant hat with his mountain staff, and rescuing it just as it became water-logged. Then, seizing the soaked garment in the boy's hands, and giving it a twist that would have done credit to the Squire's laundry-woman, he exclaimed:

"Why didn't you take the things out of your pockets? What's this?"

It was only a yellow envelope well soaked.

"O, that's the dispatch Letty gave me to carry up to your house," said the boy. "I was a-goin' there."

"By the way of the brook? Sammy! Sammy! what if the fish had eaten you!"

"What is it, Tom?" called Florence's voice from the bank above them.

"A dispatch for father. He has left on the train two hours ago," said Tom, looking at his watch. "And here"—carefully spreading out the wet copy on his knee—"they want him at the other end of the line. Well, I can attend to this business as well as he could, but I must get to the station in thirty minutes. Will you forgive me if I leave you to the care of the other folks? Here they come now. Tumble in, Sammy; I'll take you home;" and while speaking Tom had unfastened one of the teams. "Good-bye, and God bless you Florence. Meet me at the station with the carriage when the down express comes in to-morrow. I wouldn't go a step now unless I knew it ought to be done for father."

Miss Van Amden's hand was still tingling with Tom's fervent grasp when Tom himself and his small companion had clattered out of sight along the road toward the station.

The evening at Squire Porter's mansion was a dull one for this young lady, and she arose the next morning under the possession of that indefinable unpleasantness of general sensation which we know by the name of a presentiment. Not even the memory of that scene in the woods the day before offset the disagreeable and persistent impression that something was about to happen. She had Dorothy, the girls' quiet horse, harnessed up more than two hours before the express was due, and drove off to make the circuit of the Blue Hill before meeting Tom at the station.

Down by the railroad it was seasonably hot. The reflection from the long line of rails stretching into the distance quivered in the heated air that rose from the yellow sand embankments. The vast stores of pine-wood piled beside the track sent out balsamic odors as it baked under the rays of the sun. The crane-like spout that fed the locomotives from the tank at the end of the freight-house stood erect and parched as the throat of Tantalus. Letty plied her palm-leaf fan, and sighed for the thunder-showers which the telegraphic friend at her elbow—only a hundred and fifty miles distant—had just announced as clearing the air in that more favored locality.

The accommodation had passed. The up express had stopped for water and gone its way. Two freight trains had lumbered by. The afternoon was well advanced, when "thunder-caps" began to pile up from behind the hills, and Letty imagined that she sniffed moisture and freshness in the air.

"It'll be a ripper when we do get it," remarked the station-master, looking in at Letty's window. "There's a tremendous black streak round at the west."

From that quarter there was rising a dark screen with ragged edges, pushed up from below, and steadily cutting away the bright sky. The spruces on the high hillsides caught the voice of the messenger winds sent in advance of the tempest, and whispered it to the valleys below. A whiff of the breeze reached the station just as the edge of the storm-cloud gashed the disk of the sun. It was followed by another, whirling little eddies of dust from the repose in which they had been left beside the track by the last passing train. Then the wind began to blow more steadily, and Letty shut down her window with prudent precaution, calling to Sammy as she did so.

Sammy did not respond; but at the moment of closing the window the sound of a carriage rapidly driven and drawing up hastily at the station fell upon her ear. No train was due at this hour, and it must be some one seeking shelter under the carriage shed from the approaching storm.

Suddenly the door of her little office was swung violently open, and on the threshold stood the young lady whose arrival she had watched from behind her curtain little more than two weeks before. She was pale now and agitated.

"Where is the man—the station-master—the one in charge here?" asked Miss Van Amden, hurriedly, breaking in before Letty had time to formulate the haughty little salutation that was rising to her lips.

"He has gone home for a few minutes, but will return before the express arrives. Do you wish a ticket?"

"No! no! no!" cried Florence, with as near an approach to wringing her hands as women of this day know. "I want to save lives! There is a great land-slide on the track. I saw it as I came around Blue Hill, and drove on as fast as I could to get help. What must we do? Quick! quick!" and the excited girl grasped Letty's arm and almost shook her.

Letty's experience in the business of running a railroad by telegraph stood her in good stead at this crisis, and her sense of superiority to the situation was evident in the calmly frigid air which she opposed to her companion's eager anxiety. She even indulged in a sort of self-complacent contempt for the frightened helplessness of Miss Van Amden, while conscious of her own power to stay all disaster with a single movement of her hand.

"There is no hurry," she replied, with such dignity as her little figure and bird-like voice were capable of expressing. "The express is not due at Flaxborough for fifteen minutes yet, and I shall telegraph to hold it there until the track is cleared. There is no other train on this section except the up accommodation, which stops here. If you expect any friends on either, you needn't be alarmed."

She seated herself at the table, and touched the telegraph key with that graceful motion which displays a shapely hand more effectively than any other employment except violin-playing. She "called" the station at Flaxborough. But as her fingers rattled off the familiar dots and dashes her practiced ear detected the fact that no message followed along the wire in consequence. She examined the switch, and quickly tightened a screw. Again no life came at her manipulation. The spirit of the telegraph had fled.

Quickly rising, Letty went to the closet in which the local battery was kept, and if the empty cells had not been enough to explain the situation, the appearance of Sammy at the door, with an approbative expression on his face and two neatly cleansed copper cups in his hand, would have left no doubt as to the cause of the impotence of her instrument. Zealous to atone for his short-comings of the day before, the useful boy had taken this occasion to perform for his sister the somewhat dirty service of scouring out the battery.

"O, Sammy, what have you done?" cried Letty, now as pale as Miss Van Amden.

"Cleaned 'em up," answered the boy; "that's all."

"O dear! oh dear! you meddlesome, wicked child. I put the last drop of acid in this morning, and now you have poured it all away."

"Get some more," suggested Sammy.

"Don't talk to me," retorted Letty. "They were to send me some by the express this afternoon, and until I get it the wires are useless."

"Wait till it comes, then," was Sammy's rejoinder.

"You don't know what you are talking about. Run just as fast as you can to Mr. Jones', and tell him there's an accident on the road, and he must hurry here. Run along!" and she pushed him out at the door.

The station-master came in haste, heralded by a clap of thunder and accompanied by the loud pattering of the first rain-drops.

"What is it, Miss Brooks?" he asked, as he burst into the room.

"This lady has just come around the Blue Hill, and says there is a land slide across the track. The wires won't work, and the down express is due at half past."

"Where is the slide?"

"Just beyond the covered bridge, answered Miss Van Amden.

"Four miles off, and in a bad place." The station-master looked at his watch. The express is due at Flaxborough in five minutes, and here in twenty-five. We can't get there with a signal in time. Try the wires again, Miss Brooks."

Letty tried again, with the same result: the telegraph was mute.

"I'll take your team, and do my best," said the station-master to Miss Van Amden, snatching up a red signal-flag and rushing from the room.

The sound of the increasing storm hid the noise of his departure as he whipped the astonished Dorothy into a speed of which that peaceful animal had never dreamed. It was a hopeless race against time, as one at least of the two girls knew who were crouched on the narrow settee in the waiting room.

"You didn't have any friends on the express, did you?" at last asked Letty.

"I came to meet Mr. Porter," answered her companion.

"Mr. Porter?—Tom Porter? Is he on that train?" almost shrieked Letty. The girl hardly knew how she ought to feel in view of the evident anguish of the one whom she had now and then regarded in some fashion as a successful rival. Florence's eyes were filled with tears, and it was with very complicated emotions that Letty continued: "Well, I don't mind telling you that Billy Johnson, who runs the express, is a friend of mine, too, and that he will see that slide in time if any man can."

Within two minutes a great darkness had come over the land. The room was in a lurid twilight, except when fierce flashes of lightning illumined the two scared faces and blinded the girls' eyes for the moment. Between two appalling claps of thunder, Florence asked, nestling up to Letty:

"Is there hope that he will get there in time?"

Letty hesitated to give hope, and as she paused in her answer she heard the three dots that formed the "call" signal for the Smyrna station sharply clicked out on the sounder of her instrument, "S," "S," "S," was repeated in the telegraphic language with rapidity, the signals then running off into a meaningless medley as if the ghost of some crazy operator was manipulating the key. Letty started to her feet. The chattering ceased; then went on again more wildly than before. The elements themselves were operating her instrument, fantastically choosing for their first experiment the signal of her own station, whose peculiar sound had at once attracted her attention.

"Thank God!" ejaculated Letty.

Here was indeed relief literally from above. The power of which Sammy had ignorantly deprived the wires was supplied by the lightning flashing through the stormy air.

Letty hastily joined the circuit and called Flaxborough. The lightning did its work, and the answer came. By the clock at Smyrna station, the train driven by Letty's lover and carrying the lover of Florence must at that moment have drawn up by the platform at Flaxborough.

"Hold the express!" were the words that Letty's trembling fingers sent humming on the very wings of the storm. They were repeated back by the operator at Flaxborough.

"Landslide near——" thus the girl was continuing the message on which so many lives depended, when, just, as safety was assured, the elements asserted their power as master in the place of servant. A swiftly moving fiery mass seemed to glide along the wire leading to Letty's instrument, noiselessly fused the points of the key under her very hand, and stretched her in a limp heap on the floor.

Florence Van Amden, who, though dazed by the phenomenon and trembling, sprang to the girl's side, dragged her unconscious body out, as well as she might, to the larger room, and opened on it, the door which let in the cool, damp torrent of air, comprehended it only as an accident. She understood nothing of the terrible nature of the power which Letty had for a brief moment compelled to her service, and much less did she realize that the little blonde fragile telegraph operator had settled herself at the instrument with a full knowledge of the risk she ran in tampering with the wild elemental force.

So quickly had it all passed, and without explanation, that even then she did not know that her lover, and probably many lives besides his, were saved by the quick wit and the unhesitating heroism of Letty Brooks.

This all came to her later. Letty lay as if dead for long hours. Tom Porter was seated with Florence by his side when she awoke at last to a bewildered consciousness. If that gay young gentleman had at any time indulged in a complacent suspicion that his fascinations had touched the village girl's heart, he was undeceived by her first words.

"Where is he? where have they taken him? O! oh!"

"Hush, my dear; he is safe," answered the doctor, at a venture, with professional readiness.

"If you mean Billy Johnson,' spoke up Sammy, who seemed to read his sister's thoughts with the wonderful perspicacity of youth, "he's with his engine at Flaxborough, where you stopped him. So you'd better be patient, sis."

"Ah!" sighed Letty, feebly, while two tears showed themselves on a happy face. She had recovered her memory with her life.

When the newspapers from the large towns at either end of the line reached Smyrna the next day there was no thrilling account of an escape from a great accident on the road. These things are managed better. There was in each a brief mention of the detention of the express for a few hours in consequence of an obstruction on the track, which was promptly removed, the admirable system of train-dispatching having enabled the efficient superintendent to prevent any great delay to travel.

But even this unpretentious item of news was probably read by a greater number than the announcements—which appeared in the usual form just two months later—of the marriage of Thomas Porter and Florence Van Amden, and William Johnson and Letitia Brooks, both of which events, it appears, took place upon the same day, with an interchange of kindly wishes and wedding gifts, of which the public, judging only from the differences in station of the two couples, could of course, have no knowledge.—*Frederick Tryon, in Harper's Weekly.*

The Bible in Olden Times.

In 1274 a Bible sold for 50 marks—£33 6s. and 8d. The price of wheat was 3s. and 4d. a quarter, a laborer's wage 3 halfpence a day, and a harvestman's 2d. So that the value of the Bible sold for 50 marks was equal to the value of 200 quarters of wheat or the pay of 4,000 harvesters for one day. In 1429 a copy of Wycliffe's New Testament was 4 marks and 40 d.—£2 16s. and 8d. In 1433 the sum of £66 13s. was paid for transcribing a copy of the works of Nicholas de Lyra, which was chained in the library of the Gray Friars. The price of wheat at that time was 5s. and 4d. the quarter, the wages of a ploughman a penny a day, and of a stonecutter 4d.—*N. Y. Post.*

WASHINGTON'S TOMB.

Extortionate Charge for Visiting the Place—Investigation Invited.

A large majority of the visitors to the Capital make a pilgrimage to Mount Vernon and the tomb of Washington. Mount Vernon is a delightful spot. Not only is it rich in historic association, but there is not a more beautiful place in this part of the country. But comparatively few visitors realize that the Mount Vernon estate was purchased by popular subscription, the price paid being $250,000. Perhaps their ignorance is justified when the arrogant position of the Mount Vernon Association is taken into consideration. If there ever was a monopoly this association has one. There seems to be no good reason why the association should use the bones of the "father of his country" as a capital to make money out of the general public, especially when the public is the owner of the estate. Under a contract which has been entered into between the association and a steamboat, the owners of the latter are permitted to have the exclusive right to land passengers at the little tumble-down old wharf at Mount Vernon. Hundreds of thousands of dollars have been taken from the public in this manner. To the people of Washington this extortion is no new thing, and, as it does not especially affect them, they have allowed the abuse to exist without protest. Strangers protest loudest, and it is but right that a hearing should be granted to their side of the question.

Mount Vernon is only fifteen miles from Washington. The charge for the round trip and admission to the grounds is one dollar, of which sum the steamboat proprietors take sixty-five cents and the Mount Vernon Association thirty-five cents. It is not quite plain why the association should exact thirty-five cents a head from the public for admission to an estate which that public owns. Naturally the questions arise, "Where does the money go?" and "Who are the beneficiaries of this extortion?" The property is governed by a board of regents, and this board is ruled by a vice regent. It is the closest kind of a corporation. When a vacancy occurs in the board the vice regent makes an appointment to fill the position, and it is understood that his power in this respect is absolute. The board holds a picnic at the estate every summer, and counts the winnings of the previous season. When any inquiries are made of the board, it wraps itself in impenetrable mystery. It deigns to allow the public to enter its grounds at an extortionate price, and that is enough.

The excuse given for the excessive charge is that it is necessary to have a large sum of money on hand to guard the remains of Washington and to keep the estate and house in proper repair. As a matter of fact there is not the slightest danger that any one will disturb Washington's bones. They are as well protected as they can be without the large guard which it is said is always ready to defend them. It is perhaps worthy of remark that the visitors see only about half a dozen persons about the place, and yet an impression is always given them that a small army is in waiting to pounce upon the scoundrels who would desecrate the tomb. Your correspondent has visited Mount Vernon a dozen times, and has never yet seen a guard that could not be overpowered by five resolute men. The army of protectors of the tomb of Washington is a myth, pure and simple. No extraordinary expenses are incurred on this account, and this excuse for extortion is therefore groundless.

The only reason given for this extortion is "the care of the house and grounds." There are employed on the grounds two guides, one of whom runs the restaurant and four or five colored servants. These are under a superintendent. No expense whatever is incurred in keeping the house in repair. Under the existing order of things each of the original thirteen States agrees to keep some designated room in repair, and to see that its relics are preserved. New York has the State dining room. Recently the old ceiling in this room fell to the floor. The State had it replaced. There is absolutely no expense to the association for the care of the house, save for the necessary scrubbing after the presence of a large number of visitors. The care of the ground is confined to a green-house, at which flowers are sold in sufficient quantity to pay its expenses. The outlay for all these and other incidental expenses, outside the salaries of the employes, can not be more than $100 a year, and yet it is estimated that the income of the association is not less than $30 a day. The money goes somewhere. Its exact destination is not known, but evidently the funds do not get beyond the clique who are now running affairs at the "home of Washington." It is an old saw that says "everybody's business is nobody's business." On account of a lack of concerted action this monopoly is permitted to go on year after year, with only now and then a strong protest against its extortionate policy. As far as your correspondent can learn, no accounts are rendered to anyone outside of the board, no reports of its financial standing are given to the public, but, on the contrary, the utmost secrecy and care are preserved to prevent the people from knowing how their property is being managed. It seems that the time has arrived when some action should be taken to force these people to disgorge, or at least "to give an account of their stewardship."—*Cor. N. Y. Telegram.*

—Charlotte Cushman "had a foot of her own" in size, and generally wore fours, but could crowd into a three-and-a-half on "a tight squeeze." One night, soon after recovering from a severe attack of inflammatory rheumatism, she was wearing a pair of slippers much too small for her. Darting behind the wings between the scenes, she snatched them off and threw them as far as she could, exclaiming: "Ye gods! Somebody lend me a pair of slippers or I'll go in my stockings!" "What number do you wear?" asked a young actor, ready to help her in the emergency. "O, never mind the number; anything from five to twenty!" she replied.—*Every Other Saturday.*

THE ART OF THE BAKER.

An Improvement in the Methods of Making Cakes—The Latest Novelties.

Fine cake-making is not a secret, but it is manifestly an art. The regulation old-time pound-cake, and jumbles are still to be seen, but they no longer hold the palm. Even the delicious sponge cake, so delightful in childhood's memory, now takes a modest back seat before the appearance of the multitude of other light, feathery loaves and layer cakes.

"We sell on an average about $600 worth of cake each month," said a young lady behind the small counter of a place where genuine domestic compounds in the way of bread, cake, preserves, etc., are offered for sale. "The demand is about equal for delicate loaf cakes and layer cakes. We have some call for old-fashioned fruit cake, but there are several fruit cakes made now much lighter and less indigestible that really taste nicer, too, and they seem to be preferred. We keep that old-time stand-by, pound cake, on hand always, too. Layer cakes are filled with everything—jellies, chocolate, nuts, creams, and fruit. A favorite cake is the one made with English walnuts. A new cake is called 'walnut cream,' the flavor being in the filling. Another new cake is 'pineapple.' The canned fruit is used, being chopped fine and mixed with frosting for the filling. 'Pinafore' cake is made with alternate layers of pink and white icing, the pink being given its tint by using a few drops of the fruit coloring that can be bought at any grocer's. 'Dolly Varden' cake is the same thing except that instead of pure white icing chocolate is mixed with it. The lighter and more delicate cake can be made the better it is liked. Consequently the greasy loaves, heavy with good butter, which our mothers were taught to consider the proper temptation to place before company, no longer have an existence. The cake made now is mostly harmless to the most delicately organized stomachs, but it's awfully expensive to make.

"But few ornamented cakes are used by Americans except on some pronounced festal occasion like a wedding, and not always then. The Germans make the most use of ornamental cakes, but the cake is very light. Some of the ornaments designed to make the tops of cakes glorious are indeed of fearful and wonderful construction. I saw a lot the other day—four or five hundred. There were those not more than an inch high, and some queer constructions at least three feet tall. One had the form of the trunk of a palm tree given it, with an immense, bushy head composed of trailing rose vines, with silver leaves and orange buds. Beneath it stood a winged figure arrayed in a cloak—a la Hamlet—and engaged in the act of hurling forth a crown of thorns. It was a touching matrimonial symbol. Then there were hands clasping hands, some tinted flesh color, with the most miraculous cuffs and frills about the wrists. Of course there were marriage-bells and horse-shoes without number and of considerable price. There were brides whose candy heads and sugar features were shaded by little veils. Think of a bride standing on a cake! But more effective than the bride alone were the representatives of the bride and bridegroom; he was clothed in the prescribed full dress black suit, with gloves, and shirt-front as immaculate as the confectioner's art could manufacture for him from sweet stuffs.

"The German people sometimes use colored flowers on cakes for special occasions, but not for weddings. Many Americans, however, consider cakes ornamented in any way suggestive of being a thing to gaze upon and not to eat, in very bad taste, and seldom use them. It is generally understood, even by the buyers of these decorated loaves, that being for ornamentation they are of inferior quality. Chicago people buy a large quantity of nice cake, and we could sell far more than we do if we had stores in different sections of the city. It is a field of enterprise open to any woman who knows how to bake skillfully, and I'm sure I don't know why more do not venture upon it."—*Chicago News.*

Pigeon Catching in the Soudan.

Miss Sartorius, in her book on the Soudan and Egypt, says: "Every village has its pigeon houses, looking like great mud coves, and in the evening the owners go out and call them in. But when a man wants to get hold of extra pigeons, instead of calling them he frightens the pigeons away. They do not understand this, keep circling above, and swoop down now and then toward their houses. Other pigeons, seeing this commotion, join them, and as soon as the man sees there are enough he hides. The whole of the birds, old and new, then go into the house, and the man returning shuts them in. This would be a fine business if it were not that all of them do the same thing, and, therefore, each gets caught in his turn. They know this perfectly well, but no Egyptian fellah could resist the temptation of cheating his neighbor."

A Remarkable Case.

A writer says: "Talking the other day of General Grant, and the expectancy some people had that he would die on the anniversary of Appomattox, Senator Palmer, of Michigan, said to me: 'I knew of a remarkable case of holding on to life in Michigan a year or two ago. There was a clergyman at Detroit named Barnes. I was over at Grand Rapids on the cars, when he came rushing in just as the train was starting. I noticed that he was flushed and excited. He said to me that he had just received a telegraphic message that his wife was suddenly ill and dying; he had answered: "I'm coming, Mary; hold on till I get home." All the way over to Detroit the clergyman sat in silence by himself. I think he was praying. His wife got the dispatch and her attendants said it revived her. She held out till her husband arrived and died shortly afterward in his arms.'"

—After the death of a man at Biddeford, Me., over $10,000 in cash and bonds were found concealed in his bed.

FOR OUR YOUNG FOLKS.

A DAINTY BOY.

What do you think befell
A little lad whom I knew right well,
In the merry spring-time of eighty-one?
A rollicking chap, and as full of fun
As any fellow beneath the sun.

As full of fun, I mean,
When he played with boys on the village green;
For the moment he stood on the dining-room mat,
'Twas "I can not eat this, and I can not eat that;
This meat is too lean; that piece is too fat."

The soup had been boiled too long;
And *entrée* and dessert alike were wrong.
He ate with a most disagreeable pout,
And grumbled, and ordered the servants about;
Rejecting with scorn e'en his favorite trout.

So his parents engaged a cook
Who had published a wonderful household book.
She tried the recipes at their kitchen fire
With sugar and spice to her heart's desire,
Quite sure of her *menu* that none could tire.

But he only the thinner grew,
And said he hated those dishes new;
So they sent for another of practiced skill,
Though it cost his father a pretty bill;
But the dainty boy is complaining still.

And he's grown so poor meanwhile
That I scarce know whether you'd weep or smile
Should you meet some day on the busy street,
As he totters along on his slender feet,
And sways and bends like a stalk of wheat.

And all who see him fear—
Since he grows more dainty, they say, each year—
That the sorrowful lad, who was erst so gay,
Will change to a shadow, and fade away,
As the sunlight dies at the close of day.

Now, boys, be warned in time.
Don't scorn the moral conveyed in rhyme;
But take your food with a pleasant face,
Nor strive for the epicurean's place;
For 'tis costly winning in such a race.
—*N. Y. Independent.*

A LAZY BOY.

He Wishes That Work Would Do Itself—The Unhappiness Which Followed the Granting of His Wish, and How He Became Industrious and Therefore Happy.

Once upon a time there was a very lazy little boy. He never did any work that he could avoid, and any task that he was obliged to perform he did unwillingly, and with a sad long face. At school he seldom knew his lessons, because he would not spend the time necessary to learn them; and when his teacher "kept him in" after school hours, the punishment had little effect on him, because he had only to sit still.

One day his parents went off on a visit to be gone several days. Before leaving, they told him to cut some branches of trees that were lying around the place, and to put them in the wood-bin in the cellar.

After they had gone, the lazy little boy sat down beside the wood, and moaned, and drew his jacket sleeve across his face to remove the tears of discontent that coursed down his cheeks.

"I wish this wood would break itself up and take itself into the house, and that all my work would do itself. Then I should have nothing to do but play. But of course I can't be in such a fairy-land as that would be."

"Yes, you can," said a bumble-bee that had alighted on a rose near by. "I have just signaled a number of my fellow-bees and some ants. They are all hard workers, and from them I am going to select a jury to decide whether you are guilty or not."

The lazy little boy did not like the idea of being talked to in this way by a bee, and he felt disposed to make some rude reply, but refrained in consideration of the bee's sting, and his ability to use it.

"Suppose you decide that I am guilty?" asked the lazy little boy, "what then?"

"Then," replied the bee in a tone of authority, "you shall not take the slightest trouble about anything. Your work shall do itself, and you shall be in the kind of fairy land you just spoke of. That wood will break itself and go into the house, and your other duties will perform themselves."

"Good! good!" said the lazy little boy. "I shall be happy now." And he smiled kindly upon the bee.

The bee then plucked a number of rose leaves, and on each of twelve of them there was a dew drop.

"The leaves without dew drops are the blanks," remarked the bee, "and those with dew drops on them mean that the bees and ants drawing them must serve on the jury."

Then the bee took these leaves and dropped them into a great new-blown lily; and as she did this she summoned a bat to come down and do the drawing, because the bat was blind, and could not tell which leaves were gemmed and which were not.

And the bat drew a leaf when a name was called, and the jury was soon selected. It consisted of about equal numbers of bees and ants, and they sat side by side in two rows upon one of the limbs that the lazy little boy had been ordered to cut.

The bee that was to be the judge sat opposite just under a large red rose, and looked very severe. A few humming birds and butterflies lingered around to hear the trial, and an indolent old spider stretched himself in his web and blinked lazily at the proceedings.

After the bee had related the story of the lazy little boy's complaint on being asked to do an easy and reasonable piece of work, he asked the jury what they thought about it, and the jury looked very much concerned, as though it had a solemn case to decide, and wished to decide it conscientiously.

So just as soon as the judge bee had concluded his story, the jury retired. The six ants got on the backs of the six bees and they flew away into a crimson hollyhock that was so high from the ground that no one could hear what they were talking about. After they had been in the hollyhock about a minute they agreed on a verdict, and when they had returned to their seats they pronounced the lazy little boy guilty, and the bee sentenced him to become subject of his own wish.

After judge and jury had departed, the lazy little boy sat looking at the limbs he had been ordered to chop. Much to his surprise they began to bend themselves backward and forward until they broke themselves into pieces small enough to fit an ordinary fire place. When the limbs were broken the straight pieces rolled across the yard, and down the cellar steps, and over to the wood-bin; The pieces that ended in forks and had twigs on them joined twigs as people join hands, and scampering gayly down the cellar steps, occasionally dancing a cotillion or playing leap frog on the way. In a short time the wood had got itself into the bin, and ceased its antics. The lazy little boy then attempted to close the cellar door, but before he could take hold of it, it slammed itself shut, as though by an angry gust of wind.

The lazy little boy was frightened, but as he was being relieved of unpleasant labor, he thought it was, on the whole, a good thing. What an advantage he would enjoy over his companions, and how they would envy him while watching him play from morning until night!

When he went up to bed, his shoe-strings which were in hard knots, untied themselves, and after his night-gown had jumped over his head and fastened itself around his neck, the bed clothes turned down, and then over him up to his ears, and he was soon asleep.

In the morning his clothes put themselves on, and his shoes tied themselves, and the comb and brush danced all over his hair. Then he had to go down and build the fire—a duty that he disliked very much.

When he went into the kitchen, the lids lifted themselves off the range, the tongs ran across the room, got into the range, and jumped right out of the ashes into the scuttle with a cinder between its teeth. The poker commenced poking, and the shovel cleaning the ashes out. This being done a newspaper rolled itself into a ball, and bounced into the range; and when the lazy little boy opened the cellar door to go down for an armful of wood, he was met by a whole army of twigs and forks swarming up the steps. They climbed up the coal-scuttle, and jumped into the range, and lay down on the paper. Then a match sprang down off the mantel-piece, and stood on its head on the hearth-stone, and whirled around until it lighted, when it flew up like a little sky-rocket, and descended through the twigs upon the paper ball, and started the fire. By this time the old black pot had hobbled back from the faucet on its three short legs, and was waiting patiently to boil.

"This seems as real as a pantomime," said the lazy little boy. And then the stovepipes nudged each other with their elbows, and thought it capital fun.

While the lazy little boy was thinking about his good fortune, he sat down in the rocking chair and tried to rock it; but the chair began rocking itself so violently that he almost became sick. Away went the old chair rocking all over the room as hard as it could, and the lazy little boy felt like calling for help, and having some one catch the chair and hold it until he could get out. Finally he made up his mind to jump out, but no sooner had he conceived the idea than the chair hurled him against the wall, and made him ache all over.

Later in the day he saw an idle dog skulking about the place, and when he went to pick up a nice smooth stone lying near to throw at him, the stone flew off the ground like a bird, and frightened the dog into hasty flight.

Then the lazy little boy walked over to the piazza to get his wagon, but as soon as he got near this favorite toy, it started down the walk so fast that he could not overtake it. It then struck him if he got on his stilts he might catch the wagon, as he would be able to take such long strides; so he ran for his stilts, that he might get them before the wagon was out of sight, but just as he was about to take hold of them they ran down the path and through the gate, just as the wagon had done. They took longer strides than ever, and he could no more catch them than he could the wind.

Then he thought he would go out and take a swing, because he knew the swing was tied up, and could not fly from him, as the wagon and stilts had done. So he went into the swing, and it sent him flying back and forth so swiftly that the branches of the trees looked like one great cobweb. He became greatly alarmed for fear the swing might change its motions, and instead of flying backward and forward, keep going in one direction, until it should finally wind itself up around the cross-beam, and leave him on it to get down as best he could.

He therefore made up his mind to jump out of the swing. Just as he formed this resolution the swing shot him into the air, just as the rocking chair had done, and he fell into a large rose-bush, and his hands and face and clothing were torn by the briers.

"I wish I could get a chance to do something myself occasionally," moaned the lazy little boy.

"Oh, you do, do you?" buzzed the bumble-bee, who overheard his remark. "Not long ago you wished everything would do itself for you."

"But when I don't do my own work, everything goes wrong."

"You will generally find it that way in this world," remarked the bee. "Perhaps you begin to realize that work was put into the world for us to do, and not for us to shirk."

"I do."

"Do you wish to go on having things done for you, or will you take them just as they are?"

The little boy said he would take them as they were.

"Then do you wish to be released from your own wish?" asked the bee.

"If you please," said the boy.

"You know you will have to work?" said the bee.

"I think I *want* to work," said the little boy, timidly.

The bee gave a loud buzz, and disappeared.

And when the little boy found that he could rub his own eyes and scratch his own head in wonderment, and that things did not do themselves any longer, he became the happiest as well as the most industrious little boy in all that great country.—*R. K. Munkittrick, in Harper's Young People.*

—"Dear me!" said a lady on Fifth avenue the other evening. "How the china craze is growing! Here's a New York club that is paying $3,000 for a pitcher."—*N. Y. Sun.*

—On a farm at East Aurora, N. Y., was discovered recently a belt of solid salt sixty-five feet thick.—*N. Y. Times.*

MISCELLANEOUS.

—Four skeletons, thought to be those of Revolutionary soldiers, were found recently under an oak tree in Evona, N. J.

—It is estimated that not less than a thousand men will make a regular business of playing baseball professionally this summer.

—Brick houses are a long-felt want in Texas, according to the San Antonio *Times*, which chronicles with joy the fact that preparations are being made at Columbus to erect such buildings.

—A modern novel has the following passage: "With one hand he held the beautiful golden head above the chilling wave, and with the other called loudly for assistance."—*St. Paul Times.*

—In a paper by Dr. Varick, read before a County Medical Association, the use of simple hot water as a dressing for wounds is strongly recommended. During an experience in its use of six years in cases of acute surgery, such as railroad accidents, etc., he has had no death from speticæmia or primary or secondary shock.—*Cleveland Leader.*

—Since this Government has been organized there have been only thirty-four people named in resolutions of thanks by Congress. With three exceptions this honor has only been paid to officers of great gallantry in action during a war. The three exceptions were those of Captain Ingraham, Captain Ringgold and Captain Dahlgren.—*Chicago Times.*

—A few years ago, says the London *Standard*, the young people of England became imbued with the roller skating craze, and rinks were built all over the country. The fever, however, was as brief as any other vagaries of fashion: the enthusiasm died away, the rinks were deserted, the investors lost their money, and roller skates disappeared in the land.

—Major Follett, a Brooklyn mechanic, has invented a wonderful sewing machine, which, it is claimed, will do eighty per cent. more work than any machine now in the market. An experiment with steam power moved it with a speed of 2,200 stitches a minute, and was started and stopped instantly. It is simple in construction, is easily operated, and sews all kinds of fabrics, from leather to fine linen.—*Brooklyn Eagle.*

—Another illustration of what the bad sanitary condition of a house will entail was afforded at Milford, Mass., within a week or two, where four children died from diphtheria, while the life of the fifth and last child was saved by being removed to another tenement. The sanitary arrangements of the children's home were afterward found to be bad in the extreme.—*Boston Journal.*

—The following tough alligator story comes from Newbern, S. C. While out in a skiff the other day paddling along the shore, Sol Burgess caught an alligator, which, after struggling vainly to get free, astounded him by indulging in a loud and prolonged whistle. In a few minutes alligators, to the number of 401, assembled around him from all directions, and he had the greatest difficulty in escaping from him.

—People who want to get ready for Russian dispatches are advised by the Terre Haute *Express* to practice on the following stanza:

Milarodevitch and Jaladovitch
And Katschevitch,
And all the others that end in itch;
Schamscheff, Touchsaneff,
And Schepaleff,
And all the others that end in eff.
Wasiftchikoff, Kostomaroff,
And Tchogziokoff,
And all the others that end in off.

—Sword-swallowing has always had great favor with the rustics, especially in Europe. It has gradually been discountenanced in this country as an inhuman exhibition. The death of a professional sword-swallower in an English hospital from hemorrhage has again brought attention to the dangers of his calling, which is popularly supposed to be harmless. Surgeons say that all such performers trifle with their lives and shorten their years.—*Chicago Tribune.*

—There is a very large colony of Russian Mennonites in Bon Homme, Dakota, and other counties in that section, and they retain most of their old country practices. One of these is their weekly fair. Every Thursday a thousand or more of them gather at Scotland, bringing whatever they may wish to sell or trade—horses, cattle, hogs, sheep, corn, dairy products, and everything, in fact. It seems to be a useful and popular arrangement.—*St. Paul Globe.*

—The most absent-minded man in Scranton is the one who carried his dinner to work one day last week, worked all day, and when he came to pick up his dinner pail to carry it home felt it quite heavy, and, thinking some of his fellow workmen had been trying to play a trick on him by putting something in his pail, opened it and there found his dinner just as it was when he left home. He had gone without his dinner and yet thought he had eaten it. *Lackawanna (Pa.) Democrat.*

What Men Fall in Love With.

Men fall in love, they say, with beauty, with goodness, with gentleness, with intellectual qualities, with a sweet voice, with a smile, with an agreeable manner, with a lovable disposition, with many ascertainable and measurable things, and yet we find them continually falling in love with women who are not beautiful, nor good, nor wise, nor gentle, nor possessing any ascertainable or measurable thing. You'll find a hundred reasons given for falling in love, or being in love, and rarely the right reason—which is commonly simply because a man can not help it. He is in love because a mysterious force in nature has touched him. The woman may be unbeautiful, heartless, selfish, cruel, untrue, coarse, frivolous, empty, but if the magic of nature—something of the magic, I suspect, that Puck used on the eyes of Titania—touches him he sees not one of these things in their true aspect. Yes, the Titanias that have fallen in love with men crowned with donkey heads, and the men that have fallen in love with serpents, thinking them doves, are many—and all because of a diabolism, or a mystic fury in nature that delights in bringing incongruous elements together for the sake of a dance of delirium.—*O. B. Bunce.*

I.

"Come here, honey, and look at all the pretty things in the window!"

Chestnuts.

How dear to the heart are the chestnuts of childhood—
The bald-headed jokes that our infancy knew,
The puns prehistoric we vented in mild mood,
And ancient conundrums so feeble and few!
What sweet recollections rise quickly and work us
High up to that pitch where the briny tears well,
When we hear from the lips of the clown at the circus,
The crutch ridden chestnuts we all love to tell!
The moss-covered chestnuts, the mildewed conundrums
And jokes that were aged before Adam fell.

—*N. Y. Journal.*

Wasted Explosions.

"It's queer doin's they're havin' over on the old sod, now, Casey," said Mr. Maloney yesterday talking to his neighbor over the fence. "The Prince av Wales has gone over to pacify the Irish with koind looks and swate spaches. Tins av thousands av people are crowding each other to get a shake av his hand, an' crying themselves hoarse with 'God save the Queen.' The Irish are too soft hearted, that's what they are." "Roight ye are, Maloney; what a pity, too, 'tis thrue. The splindid results av the lasht explosion are all busted now."—*Brooklyn Eagle.*

II.

"Well, I declar! What has become of that chile? Must have been sunstruck!"

Mistaken Enthusiasm

Pilkins is known to have an aching fondness for dipping into small transactions on the stock board. He met Brown, his confidential friend, on Griswold street the other day whom he greeted as follows:

"Great time on the board to-day, Brown; came pretty near making a fortune."

"Cæsar! Come, old feller, tell us all about it."

"Why you see we had a regular war market. Wheat jumped to eighty-five; I thought she was pointing for a hundred and jumped in for a 'fifty.' There was a drop of two and a half and I lost my margin; but if I'd gone in at the start and closed out at eighty-five I'd counted a cool ten thousand. How's that?"

"Immense! Glad to hear it, old feller; give me your hand. What are you going to do on your luck?" and Brown looked significantly at the nearest saloon.—*N. O. Times-Democrat.*

Bub—"Are you going to be my new papa?" "Accepted Suitor—"Yes, my dear child." "Have you got your wig yet?" "Wig? Why, no; I don't need a wig. Why do you ask?" "My other papa always said he was so thankful his hair wasn't fast to him."—*Philadelphia Call.*

Bridget—"Oi have a shurprise in shtore for yez, Patrick."

Patrick—"Have yez, an' phat is it?"

Bridget—"It's a patent shove-damper, me darlint. The agint tould me it wud save wan-half the expinse in coal. Think av that, Patrick, jist wan-half the expinse."

Patrick—"Faith, and did yez buy but wan av thim?"

Bridget—"That's all."

Patrick—"Shure an' ye are not schmart, Bridget. Why didn't yez buy two av thim, an' we would save the whole expinse?"

TEMPERANCE.

WEALTH AND WASTE.

An Annual Destruction in Alcoholic Drinks in the United States Equal to the Yearly Earnings of Over 3,000,000 of People.

The economic aspects of the drink traffic afford more subjects of wonder than any other branch of political economy whatever. While it may not be possible to state with any certainty the actual sum annually expended by the people of the United States for drink, we at least know the number of gallons of pure spirits which are consumed, and are thus able to form an approximate idea of what it costs the consumer. According to the report of the Commissioner of Internal Revenue for 1884, the number of gallons of distilled spirits withdrawn for consumption in that fiscal year was 78,342,474, for which the consumer can hardly have paid less than $10 a gallon, or $783,424,740. The beer amounted to 17,573,722 barrels, costing the consumer at least $18 a barrel, or $305,211,088. Whatever discount from this estimate we might be called upon to make by reason of a part of the whisky being sold for less than $10 a gallon, will be more than compensated for by the addition of water and adulterated liquors, as well as native and imported wines, all of which are ignored in the reckoning.

The wastefulness of this enormous expenditure will appear more plainly if we compare it with another important loss, that of property by fire, which in 1884 reached $109,800,169. In order to come still nearer to an understanding of the evil significance of these vast totals, let us measure them in units of a man's work for a year. Taking all manufacturing establishments of the country through, according to the census of 1880, and dividing the total sum paid for wages by the average number of hands employed, we get $345 as the average earning of an operative by a year's work. Taking this unit at $350 for the sake of rounder figures, we find that the chief wastes of this country present the aspect shown in the following table:

NATURE OF WASTE.	Amount.	Equivalent in annual earnings.
Fire losses 1884 (according to Insurance Chronicle)	Dollars. $109,800,169	Men. 313,714
Spirits @ $10 per gallon to consumers	783,424,740	2,095,499
Beer @ $18 a barrel	516,325,996	995,819
Tobacco	292,275,885	835,016
	$1,501,876,770	4,148,648

Thus we discover that in drink alone there is an absolute destruction equal to the entire earnings of over three millions of people every year. The destruction is complete. The three millions and at least as many more dependent upon them to be fed and clothed at the expense of others while they pour their entire earnings into the bottomless pit of drink. The gravity of the destruction is in no way diminished by dividing it among a greater number. If six millions spend half their earnings for drink there is the same loss of property but more people share it, perhaps.

The first feeling upon being confronted by statistics like the above is that there must be a fallacy concealed in them. The evidence of our senses assures us that wealth is steadily increasing and the standard of comfortable and rational living steadily, though perhaps slowly, advancing. "It is impossible," is the involuntary conclusion. It is not impossible, we answer. On the contrary there is every reason to suppose it to be real. "But how can the Nation stand it?" asks the incredulous economist. This point also is worth looking into. The secret of the continual growth of wealth in spite of this tremendous waste is found in the profit which we derive from the use of machinery. A machine is an apparatus for enabling man to perform his work by the aid of the energy of nature. The farmer borrows from nature's store in the use of the soil and the sunlight, and the power of his animals. The manufacturer couples his machinery to the waterfall or to the power lying idle in the coal. Taking a horse-power as being equal to the work of three men, a purely arbitrary, but very low estimate, machinery adds to the wealth-producing power of this country a force equal to the work of more than ten millions of men. This is exclusive of the enormous advantage which all share in the much greater expenditure of borrowed force in transportation of material and merchandise upon the railways.

Without this beneficent addition of machinery to our resources the drink waste would reduce this free land to abject poverty within less than a single decade. This any one can see who will observe that the total number engaged in gainful occupations in 1880 was only about eighteen millions. The annual waste, therefore, is more than one-sixth the human resources of the country. The bearing of this fact upon hard times is too large a subject for present undertaking.—*Union Signal.*

A Thin Disguise.

A "strictly first-class drug store" in a neighboring city, which sells "liquor only for medicinal or mechanical purposes," takes pains to send a letter to every family in the adjoining towns, addressed to the lady of the house, stating that they will sell pure wines and liquors at "marked down" prices. People must be hard to please who can not be satisfied with the following varieties: "Fine old French brandy, best old rye whisky, best old Bourbon whisky, pure Holland gin, Lawrence's best Medford rum, New England rum, sherry wine, port wine, elderberry wine, Guinness' porter and Bass' pale ale." It is a disgrace to our State that drug stores should be permitted thus, under the thin guise of medicine, to entice families to ruin. It is an accursed traffic, and never more deadly than when it cloaks itself under the form of medicine. We can not blame drug stores for keeping, while doctors persist in ordering their patients to take liquors, but we do condemn any drug store which will take the method above noted of calling the attention of families indiscriminately to what it offers. A drug store becomes a groggery when it sells liquors otherwise than by reason of a physician's prescription. There ought to be legislation against sending out liquor advertisements into families.—*Golden Rule.*

WOMEN'S POWER.

Miss Cleveland's Appeal to Young Girls in 1882.

The National Temperance Society and Publication House has a copy of the *Youth's Temperance Banner* for February 11, 1882, in which is the following article for young girls, by Elizabeth Cleveland, sister of President Cleveland:

J. G. Holland wrote in Mrs. Hayes' album these words: "Women only can make wine-drinking unfashionable and heal the Nation of this curse."

What did Dr. Holland mean by "women only?" Is it true that only women can make wine-drinking unfashionable and heal the Nation of this curse? You and I need to know this first; because if only we women can do this thing, why it is an awful responsibility upon us, each one of us. And if somebody elese can do it, we, like all the others, would like to give that somebody else the job. Five years ago, at Washington, Mrs. Hayes became mistress of the White House, and it was for her, and no one else, to say what the social atmosphere should be which surrounded her guests, and how they should be entertained at her house. Well, she did an unheard-of thing. She banished wine from all her entertainments, with just one exception. Secretary Evarts made a fuss. He was mortified. He could not endure to have Lord and Lady English, Count and Countess French, Baron and Baroness German come to the White House dinners and have nothing fit for them to drink—not a drop of poison! It was too utterly queer! So Mrs. Hayes made one exception in favor of those great foreign highnesses and allowed wine upon her table in their presence. But only for once. Her conscience—high-souled woman that she is—smote her for that one little cowardly compromise with wrong. She could better endure to have Secretary Evarts and the Smiths ashamed of her than to be ashamed of herself. So she quietly and forever after prohibited wine from her table and cheerfully endured the lifted eyebrows and shrugged shoulders of the diplomatics—British, French, Russian—all, and the little, short lived hiss of "fashionable" society, until that hiss turned to a cheer, and fashionable society turned round, like the spaniel it is, and trotted on behind its mistress. It became unfashionable to serve wine and to offer wine in fashionable society while Mrs. Hayes was in the White House.

What Mrs. Hayes did in the White House every woman can do in her own home, if she will. If the girls who read these words will each of them, altogether, use their influence on the side of Temperance, they can make Temperance fashionable where they are. Will you do it?

General Grant does a manly thing in refusing to drink wine everywhere and in all society. It is only a strong man who can keep his wineglass upside down—in this case right side up, too!—while all the grand people around him are sipping champagne and toasting each other in sparkling drinks. No one can tell how "far this little candle sheds its light." But no one can do for a fashion in society what a woman can. It is women only, as Dr. Holland said.

I wish some strong, bright angel stood before you, just now, while you read, girls, to flash before you, as no words of mine can, the power you possess to help or to hinder the cause of Temperance; to make you feel your responsibility, because you are girls, in this matter; to shudder at its weight, and to never cease trying to fulfil it! Doubtless you have heard a great deal about the value of your smiles; but do you know the value of your frowns? I wish I could make you feel the value of your frowns and the importance of knowing just what to frown upon. What a man must do by a blow a woman can do by a frown. When the time comes that the young man who now shares his time in your society and in the saloon, who jokes about Temperance in your presence, and takes a glass, socially, now and then, is made to feel that these things can not be if you are to be his companion at party, ride or church; that good society can not tolerate these things in its members; in short, that this kind of a man is unfashionable and unpopular, then alcohol will tremble on its throne, and the liquor traffic will hide its cancerous face.

Woe to the Drunkard-Maker.

Not only the words of the prophet, "Woe unto him that giveth his neighbor drink," but the words of Christ when he said: "Whoso shall offend (cause to commit offense) one of these little ones, that believe in me, it were better for him that a mill stone were hanged about his neck, and that he were drowned in the depths of the sea." To entice youth from every home is one of the supreme efforts of the liquor vender of our day. It is true of the so-called respectable dealers, that they are sinners, even above the drunkards. They are the men who know better. They are the men who sin against the whole light of plain duty, especially if he be an intelligent American citizen trained in the church; such a man takes pains not to know or think what ruin he is bringing on souls, on society. Let Christian society reward him as worthy only of reprobation.—*Rev. Dr. Barrows, Chicago.*

General Carey, in a recent speech in Chickering Hall, N. Y., claimed that "the intoxicating beverages of different nations partake of the character of their people. The Americans, who are made up of people from many countries, will take anything and get drunk on anything."

A pleasant item to note is the establishment of a Temperance magazine for the blind, printed in raised characters for finger reading. It is formed by a prosperous society of the Young Abstainers' Union at Stoke-Newington, Eng.

Retrenchment and Reform.

For a long time Democrats and Democratic journals have been earnestly endeavoring to make the people believe the Republican party had been reckless and extravagant in the expenditure of public money, and that the welfare and safety of the country demanded retrenchment and reform. We believe there are a great many people who think retrenchment is a good thing, *especially* for the other follow, and there are many Democrats of the *old simon-pure-dyed-in-the wool* persuasion, who regard retrenchment as a first class thing for Republicans, but "nary" retrenchment for the Democracy. Oh! no; that would never do. The Democracy have as great a variety of styles of inaugurating reforms and practicting economy as the ladies have in spring hats. Very novel, too, are some of these modes of enforcing retrenchment. The Democrats of Oakland are a wide-awake set of fellows; always looking out for the main chance; ever ready to take advantage of favorable wind and fair weather; always eager to occupy a position which will add strength to the party. Yes, sir, all for the party.

Our Democratic brethren of Oakland have just occupied an advanced position on the question of reform, one, in fact, which may cause Republicans hereabouts to shed many bitter tears. Look at the past, fellow Republicans, and think of the many favorable opportunities for the exercise of economy and reform which you have allowed to slip through your fingers unimproved. This is bad enough, but it would not have been so bad if the Democrats had not taken advantage of the first opportunity which presented itself. The opportunity came when the town council met on Monday night last to appoint a town bailiff. There were several applicants. All good and true Democrats. The bids were from $15 to $40 per month. Our Burgess and Commissioners also tried and true Democrats, looking out for the main chance, aiming to strengthen the party, and guarding faithfully the interests of the people, concluded to employ a bailiff at forty dollars per month, the highest figure named. Very little money for the streets, not enough to keep the town lighted on dark nights, but lots of collateral for a high priced bailiff. 'Twas a master stroke in favor of retrenchment, with a very large R. If our economical Burgess and Commissioners will conduct all the business of the corporation upon the same principles which seemed to govern them in the appointment of Bailiff they will doubtless *accomplish something* for their party and cause *the people to remember them* long after they have lain aside their official robes.

What an Oakland Democrat don't know about retrenchment and reform would fill several columns in this valuable journal.

The Supreme Lodge of the Knights of Honor, at their meeting in St. Louis on the 14th inst., discussed the question of paying benefits in case of suicide. The lodge favors the paying of insurance in cases where the suicide is clearly insane, but not otherwise.

H. H. Terry, who shot and killed T. A. Jeter at Liberty, Va., last Saturday, was early Monday morning taken out of jail by a masked party and lynched.

An impression prevails in Washington that the President is on the verge of gratifying the office-seekers by numerous appointments.

Prof. C. V. Riley, the entomologist of the Agricultural department, Washington, says that the country will soon be visited by two great broods of locusts, of the seventeen and thirteen year varieties, and that this will be the first time in 221 years that they have appeared in conjunction. They will not prove greatly destructive, and the injury they will inflict will probably be confined to fruit trees. The visitation will be prolonged until late in July.

Logan Re-Elected.

SPRINGFIELD, ILL., May 19.—General John A. Logan, was to-day elected to succeed himself as United States Senator from Illinois. There was intense excitement, the galleries and lobbies of the House being packed to suffocation.

Fifty-one Senators and one hundred and fifty three Representatives were present. When the vote was taken a dead silence prevailed. The Democrats refused to vote. The Republican Senators all voted for Logan, giving him twenty-six votes. Rogers' vote was received with cheers. When Sittig was called, in a long speech explaining his position he voted for Logan under protest, and the announcement was received with the wildest cheers. This gave the vote as 103 for Logan. On the call of the absentees the Democrats voted and solidly for Judge Lambert Tree. After the roll-call, Baker, McNary, McAbney, Caldwell, Quinnard and Crafts changed their votes to Charles B. Farwell. Barry (Dem.) changed his vote to John A. Logan and the wildest confusion prevailed.

The announcement of Logan's election was not made immediately, the Democrats changing to Farwell and trying to drive all their men in, but no Republican showed any inclination to leave Logan. No Republican support having gone to Farwell, Speaker Haines finally announced the vote, declaring Logan elected.

WASHINGTON, May 20.—At one o'clock this morning the people of this city were roused from their sleep by the reports of cannon fired from the White lot. There was some excitement and considerable anxiety to learn what it meant. Among those disturbed in their slumbers was President Cleveland, who, like everybody else, was puzzled at the demonstration, and made eager inquiry of the White House watchman as to the cause of the extraordinary proceeding. It was ascertained that the firing was in honor of Gen. Logan's re-election. The committee in charge secured very quietly, late in the afternoon, a permit for a salute of one hundred guns, and selected one o'clock in the morning as the hour to honor Gen. Logan. It had the effect of bringing a large number of persons out on the streets, and some of them—particularly the Democrats—did not seem to relish the idea of having their sleep broken after they found out what it all meant.

State of Trade.

NEW YORK, May 16.—*Bradstreet's Journal* in its commercial summary says: "The general tenor of the special telegrans received by *Bradstreet's* yesterday corroborated the view taken last week. The volume of merchandise being distributed is below late averages. At no permanent distributing center is the movement of goods equal to previous anticipations, and at most the situation is one characterized by no special activity in any line. This is true at such cities as Chicago, St. Louis, Cincinnati, Cleveland, Detroit, St. Paul, Minneapolis and Kansas City. In the East, Boston, New York, Philadelphia, Baltimore and Pittsburg make a similar report.

The opening of lake and canal navigation finds rates on wheat from Chicago to New York 8¼c. per bushel, against 7c. last year, and on corn 7½c. against 5½c. per bushel at the opening last year. This is encouraging, though within a few days from the opening last year rates fell 2c. per bushel. Rates by rail are no higher at the opening of navigation this year than lost.

Special investigation by *Bradstreet's* fails to show any reasonable ground for belief that the available supply of wheat July 1 will be less than 470,000 000 bushels as compared with 480,000,000 July 1, 1884. Exports continue checked and ocean freights low.

The effect of the great dry goods sale on the cotton market was not appreciable. Among the cotton goods trade the auction sale is regarded as fairly satisfactory. Some of the goods sold low, but others went at jobbers' current prices. The New England view of it is that there is less likelihood than one month ago of a wholesale stoppage of Eastern mills during the coming summer.

Coal and iron are as dull as ever.

BOSTON, May 16.—The *Advertiser* in its weekly review of the wool market says: The market has been much less active, which is shown in reduced sales, and the inquiry has been without animation and spiritless.

Our Washington Letter.

From Our Regular Correspondent.

WASHINGTON, D. C., May 18.

About the smallest piece of political thimble-rigging that a dignified Cabinet officer has ever been guilty of, is the circular letter issued by Postmaster General Vilas to the expectant spoils-gatherers of Ohio, Indiana and Virginia. This circular purports to be a confidential one, and thereby has gained more than the usual publicity. In it Mr. Vilas proposes to leave the selection of offensive partisan postmasters for removal to those to whom the circular is sent, who shall report in detail the particular things that constitute the offense and make the said postmaster obnoxious. Then these statements are to be backed by affidavits when required, after which they will be acted upon so as to eliminate at least one-fourth of the Republican "rascals" in the offices in each of the States named in the next two months. By this process, the P. M. G. gravely announces, "great good may be accomplished." If anything that Mr. Bayard has been guilty of doing in the way of perpetrating blunders has called down upon him the execration of politicians of all sorts, what must the generality of people think of this Vilastic piece of idiocy? If Mr. Vilas desires relief from the importunity of office-beggars, why should he seek to shirk the responsibility of unceremoniously bouncing the ins, and giving their places to those who are aching to get in? Jackson, with the help of old Bill Marcy, rotated five thousand postmasters in a single month, horse, foot and dragoons. Here, a half a century later, with a whole army of clerks to do his bidding, Mr. Vilas wants two months in which to get rid of the postmasters in these States, and demands affidavits to warrant his action besides.

It is evident that the President has concluded to disabuse the mind of those Mugwumps who think that the administration is to be run distinctively in their interest. That Mr. Cleveland knows what he is about, is as patent as anything in the line of political manifestation can be known. It was expected that he would perform some acts of condescension as a token of Mugwumpian recognition, but he never meant them as an indication that he intended to submit himself humbly to the guidance of the few Independents who have arrogated to themselves the whole credit of securing Democratic ascendency in the Government. Having, as I have said, concluded to keep himself and his administration perfectly untrammeled by any presumed obligation to this small coterie of smaller politicians, we may reasonably expect to see the columns of the New York *Times* and *Harper's Weekly* and other disgruntled journals pouring out their vials of wrath upon the administration because of its attitude of independence. There has been, and still is, a bitter feeling among many Democrats because the work of decapitating Republicans in office has been slow.

JUNIUS.

Boyton's Torpedo Exploit.

HALIFAX, May 17.—Much excitement prevails in naval circles here over a court martial now in progress against the Lieutenant of her Majesty's ship *Garnet*, who was in charge of the watch when Boyton's boat was caught alongside the *Garnet*, in New York harbor, for letting its occupants go free, instead of holding them prisoners until he had communicated with his superiors. Admiral Sir John Commerell was much exasperated by Capt. Boyton's exploit in affixing the torpedo to the *Garnet*, and on the day the ship arrived in Halifax the Lieutenant on watch was placed under arrest. Sir John then ordered the organization of a court of inquiry to investigate Capt. Hand's management of the *Garnet* from the time she left Norfolk until her arrival in Halifax, with special instructions to ascertain all the facts of Boyton's midnight torpedo expedition. The court has been sitting for two days. The result will be summitted to naval headquarters in London, with the probability that Capt. Hand and the officers on watch that night will be court martialed for endangering the safety of the vessel by neglecting to take necessary precautions against torpedoes, etc., from Fenian dynamiters or other hostile sources. The court is composed of Captains of the war ships *Northampton*, *Tenedos*, and *Fantome*, with Admiral Commerell presiding. As soon as the investigation is concluded the small gunboats will depart for the Newfoundland fishery protection service.

The statement is made that "if the sentinel on the deck of the *Garnet* had not been the stupidest man on the boat, Boyton would have been shot as soon as discovered."

To Mothers and Daughters.

There is a lack of industrial training among girls, seen quite as often in families of moderate means as among the wealthy. It is a great mistake that so many girls are taught nothing about the 'practical duties and serious cares of life.' 'All women,' says one, 'should have a practical knowledge of manual labor. To know how to cook, sew, care for the sick, etc., should form a part of every thorough education. To attain a symmetrically developed womanhood, there must be industry, thoroughness in study and work, and self-reliance in thought and act.' Mothers, take a little time from the work and worry, or the fashionable idleness of your daily life, and examine the training your daughters are receiving at your hands. Remember you are stamping upon their white souls impressions which will but increase their beauty, or leave a stain which neither time nor eternity can efface. Girls, if the experience of early womanhood has shown you grave defects in your childhood's training, earnest, persistent efforts will do much to remedy the evil. Be strong in thought and deed; dare to follow right and your own good sense, whether fashion thus decrees or not.—*Philadelphia Call.*

Tact in Advertising.

Fraudulent advertising is, of course, as unjustifiable as other forms of iniquity, yet, says an exchange, a regard for truth is not incompatible with a due consideration of certain human characteristics. All men are and all persons, women especially, yield to the blandishments of a supposed extraordinary bargain. The human mind, it is true, is capricious, like the weather. It has its seasons of cold and warmth, its days of sunshine and of cloud, but as in spite of the fluctuations we live on, in the conviction that harvest will follow seed-time and winter give place to spring, so the careful observer of motives and persistent watcher of tastes and fashions will profit by his vigilance. The wise farmer takes into account the normal succession of the seasons, and he is also prepared for unseasonable visitations and set backs. The clear headed man of business can hardly fail of being successful if he acts like the agriculturist. Making sure to sell what the people want, he should let the greatest possible number of them know the fact, and should make them acquainted with it in the most direct, pesistent and impressive manner. George Robbins, the famous London auctioneer, once sold a country house by a timely mention of an ancient hanging-wood in its vicinity. The hanging-wood turned out to be an old gallows, and though George was decidedly wrong in playing upon words to deceive the purchaser, he was as decidedly right in supposing that customers would multiply by rousing their æsthetic sensibilities. It is easy to imitate his shrewdness without going beyond bounds, yet the profits of advertising, like those of business in general, must be gained by thoughtfulness and tact.

Census of Occupation.

The census of 1880 gives the number of persons engaged in gainful occupations as 17,392,060, or 47.31 per cent. of total persons over ten years old. These were engaged in the four chief lines of occupation as follows: Agriculture, 7,670,000; professional and personal services, 4,074,000; trade and transportation, 1,810,000; manufacturing, mechanical and mining industries, 3,837,000. In 1870 the number engaged in occupations was 12,505,000. Of these in 1880, 2,647,000 are women. The number of persons over ten years of age is 35,761,000 leaving 19,379,000 unaccounted for. the latter number is about equal to the number attending school or physically incapable of labor. The census shows an increase over 1870 of about thirty per cent. in population, but an increase of thirty-nine per cent. in the number engaged in occupations. This increase in number in occupations over the gain in population is accounted for by the growth of the factory system.—*Scientific American.*

A notable little woman from Texas is now in New York preparing for a European trip. She is the owner of several cotton plantations, and bears the reputation of being the richest woman in Texas. She was left an orphan at twelve, and had to look after the plantation left her by her father. At thirteen she was married and became a widow four years later, her wealth increasing by her husband's property. She has traveled extensively, mostly on horseback, in the Southwestern States, and has been in Europe twice. She established an art gallery in Houston, where young students in art can paint, copy the pictures, and exhibit their efforts when intended for sale. She is herself an amateur artist, and studied with the idea of falling back upon the profession in case poverty should overtake her. She usually carries a revolver, presented to her by a male friend whose life she saved by interfering when a pistol was leveled at him by a ruffian named Wooliffe, in a street fight in Houston. She is a creole, with the large, lustrous eyes, and piquant countenance, indicating her French and Spanish parentage.

Cunningham and Burton, the dynamiters, were found guilty Monday in London, and sentenced to penal servitude for life.

Staking All on a Personal Christ.

TO THE EDITOR OF THE NEW YORK SUN—*Sir:* The Congress of Churches at Hartford has just closed with an earnest call upon all Christians of whatsoever sect to rally around the historical Christ. The Rev. James Freeman Clarke, Unitarian, opened the discussion on the last day by saying: "Around this divinely human character, Son of God and Son of man, Christians must one day unite." President Robinson, of Brown University, Baptist, said: "I will stake all on the personal Christ." And President Porter, of Yale College, Congregational, exultantly said: "We come nearer the historical life of Christ in these days then has been possible at any time since the first century."

The key note of this trumpet call is the same as that sounded by the Rev. Augustus Blauvelt of Kingston ten years ago in the *Independent*. To save the belief in the leading spiritual features of Christianity he said it was necessary to abandon the dogma of Biblical inspiration as "an egregious orthodox absurdity," and defend Christianity as "a purely historical question." And in taking this position Dr. Blauvelt showed that he was supported by some of the ablest Christian authorities.

But what followed that bold attempt to induce a change of base? Two years later Dr. Blauvelt was suspended by the Classis of Kingston for heterodoxy, and upon appeal to the General Synod the decision of the Classis was affirmed.

It may be that the Hartford Congress has been cautious to avoid saying anything about inspiration; but in "staking all on the personal Christ" is not inspiration practically abandoned?

Dr. Blauvelt's sad experience ought to qualify him to give some sage advice to his brethern who still retain their pulpits and other high places.

W. H. B.

Self Reliance.

There is nothing more likely to result in the successful career of a young man than confident self-reliance. It is astonishing how much more a youth will accomplish who relies upon himself, than one who depends upon others for assistance. Having first ascertained the direction in, and the means by which his objects are to be reached, let him put his whole energies to work, and, with unflagging industry, press forward. The young man who, instead of raising at five, sleeps till seven or eight, and who spends his evenings on the corners, or in the companionship of those who are wanting in laudable ambition, rarely ever wins a position of honor or achieves a reputation above that enjoyed by the common sensos.

In a country like ours, where the avenues to honor and wealth are open alike to all, there is no reasonable excuse that can be offered for a man's failure to achieve one or the other or both. Ill health, or extraordinary misfortune, may keep him down, but these are exceptions that establish the rule. Few men know of how much they are capable until they have first thoroughly tested their abilities. The amount of labor, literary or mechanical, which a person in vigorous health can perform, is almost without limit if a systematic method is adopted, and the proper spirit incited to the effort. An hour of each evening spent with some branch of useful science will, in the course of a few years, give to a young man who thus devotes this small portion of his time an amount of information (literary or scientific) which cannot fail to fit him for positions to which he could never properly aspire without this attention to study.

Why He Swore.

A farmer in Victoria county, Texas, had all his corn and cotton cut down by the late frost. The morning after the frost he went out and took a look at his field. Then he used profane language for about half an hour, until a clergyman happened to ride by and hear the torrent of profanity. The clergyman remonstrated with the nauseated granger, and asked him if he did not know where he would land if he kept that up. "That's just why I swear," responded the farmer; "I want to have a dead sure thing of getting to a place where there are no late frosts."—*Texas Siftings.*

Commodore Garrison is dead but his early feats seem to live after him. It is reported that in his early, burly youth when he was a mere common-every-day captain he threw a barrel of flour with a man sitting on it into the lake at Chicago. Another story told of him is that he rescued a friend from twelve Mexicans in a saloon on the Texan border. He is reputed to have broken the necks of two men on this occasion and to have fractured the skull of another with a blow of his fist. Still he was a great-hearted man and was always willing to help a friend.

Perseverance.

Man is a mysterious combination of mind and matter; mind is that which thinks, wills, loves, fears, and hates; matter is that which has form and weight; yet, what avails this wonderful combination if it is not endowed with a power that will cause it to push forward and accomplish something?

The great Creator has given to nearly every one of us the ability to undergo severe labor. But who knows best what this power can achieve? Is it the drone, who is too lazy to gather his own honey, and who subsists on the fruits of another's labor, or is it the busy bee

"That wanders all day long
The field, the woodland, and the garden o'er
To gather in his fragrant stores."

Two things are necessary for success in life. First, there *must* be a definite aim kept in view; and second, one must press with unfaltering steps towards the chosen goal.

Perseverance is that trait of character which one must have in order to succeed. It is the main-spring that compels one to go forward and break down every barrier that debars him from success.

Gen. Grant Not Stylish.

Berlin Letter to Boston Herald.

I remember (said the Crown Prince) quite a military scandal that occurred while he (Grant) was here. The officers and men on duty at the different places had strict orders to treat him with all possible honors, in the way of salutes, turning out the guards, etc. But the sentries got it into their heads that the ex-President of the United States would go about in great style, in an open coach like a sovereign, whereas he was almost always on foot, and seldom accompanied by more than one or two persons. Well, the day he first came to see me he sauntered along Unter den Linden in a nonchalant way, and was past the sentries at the palace door before they saw him. Even then they did not know him, and, perhaps, would not have saluted him at all had it not been for the sudden opening of the door by the valets who had been watching for his coming. Then the two soldiers came to a present. Gen. Grant threw away his cigar, lifted his hat to them and passed indoors. The poor captain of the guard, when he heard of this incident, was wild with rage and chagrin. He went so far as to punish one of the sentries, and for this was reprimanded in general orders.

Be Honorable.

Boys and young men sometimes start out in life with the idea that one's success depends on sharpness and chicanery. They imagine if a man is always able to "get the best of a bargain," no matter by what deceit and meanness he carries his point, that his prosperity is assured. That is a great mistake. Enduring prosperity cannot be founded on cunning and dishonesty. The tricky and deceitful man is sure to fall a victim, sooner or later, to the influences which are forever working against him. His house is built upon the sand, and its foundation will be certain to give way. Young people cannot give these truths too much weight. The future of that young man is safe who eschews every shape of double-dealing, and lays the foundation of his career in the enduring principles of everlasting truth.

The Philadelphia coal operators discredit the report from Pittsburg to the effect that the Pratt mines, located near Birmingham, Ala., were shipping coal into Northern markets. "They may have sent some samples of superior coal, perhaps gas coal, into the Pittsburg market from Alabama," said Mr. White, of the firm of Berwind, White & Co., "but their soft coals cannot come into competition with those of the Cumberland and Clearfield districts. They couldn't make a mill a ton per mile if they sent it by rail. I don't know anything about the Pratt mines, and never heard of them; but no reasonable person would suppose that they could fill contracts in competition with the regions most remote at the present prices. Of course, they couldn't make any money in this market." Other operators who were consulsed spoke to the same effect.

That was a clever trick by which the Republicans of the third district of Illinois outwitted their Democratic opponents at the special election last week. The district is overwhelmingly Democratic. The Republicans pretended it was not worth while to make a contest and they would leave the election go by default. The result was the Democrats were thrown off their guard, took things easy, and did not turn out in their strength to vote. The Republicans at the last moment put W. A. Weaver on the track, turned out in their strength and before their opponents could recover their senses had polled enough votes to elect their man. The result gives the Republicans a majority on joint ballot, and will secure the election of a Republican United States Senator.

LOCAL NEWS.

LODGE MEETINGS.

OAKLAND LODGE, I. O. G. T., meets in Sturgiss' Hall every Tuesday night.

LOCAL BRANCH, No. 85, of the Iron Hall, meets in same Hall 1st and 3d Saturday nights of each month.

SHEALTIEL LODGE, No. 122, I. O. O. F., meets in Lenge's Hall every Monday night.

ALTA LODGE, No. 574, K. of H., meets in same Hall 2d and 4th Thursday nights of each month.

PATMOS COUNCIL, No. 386, A. L. of H., meets in same Hall 2d and 4th Friday ntghts of each month.

—Flowers at Weber's.

—Go to Newman's for oranges, lemons and bananas.

—A jewelry store has been opened in the room formerly occupied by Mr. R. S. Jamison.

—Groceries and flour at Newman's. 5 9 1t.

—Weber has a full assortment of flowers on hand and for sale now.

—If you want a good cigar go to Newman's.

—Dr. E. H. Bartlett has been absent several days attending the sessions of the Supreme Lodge Knights of Honor, of which body he is a member.

—The Athletic Base Ball Club will meet in the basement of Mr. John Sincell's new building on Railroad street Saturday, May 23d, at 8 P. M.

—Confirmation services were held in the Catholic Church, Oakland, Sunday afternoon when 70 persons were confirmed by Archbishop Gibbons.

—Mr. John Sincell will on the first of June, have a stock of groceries, notions, confectionery, &c., in the new building just erected on Railroad street.

—Only behold the fine lot of toys at Newman's, sold so cheap that you can't help but buy them.

—Dr. J. Lee McComas was appointed a delegate to the West Virginia medical convention by the Medical and Chirurgical Faculty of Maryland at their meeting in Baltimore last week.

—Court adjourned Saturday afternoon. The case of the State vs. Fletcher Wilmore, charged with burglary, which was on trial at the time of going to press last week was given to the jury Friday evening, and a verdict of not guilty was rendered in about three minutes. No other business of general interest was transacted.

—The municipal election took place in Cumberland Monday, and resulted in the Republicans electing three councilmen and the Democrats three. The Republicans elected George Eyerman in the second, Dennis Graves in the fourth and Thomas Dorris in the fifth wards. The Democrats elected John W. Sanders in the first, John Craddock in the sixth and James M. Smith in the third wards. The council now stands seven Republicans to four Democrats. There was very little interest taken in the election and it passed off quietly.

—We desire to call attention to the dangerous practice of throwing and catching ball in the streets. Sometimes a badly aimed ball passes by the catcher with force enough to knock a man senseless if it should happen to strike him. A few evenings ago while several young men were practicing near Coddington's Hotel, a young lady who happened to be passing at the time barely escaped a severe blow. It would be well for those who engage in this practice to go where they would not endanger the lives or limbs of persons attending to their legitimate business. The practice ought to be prohibited by law.

Church Services--Sunday.

M. E. Church—Preaching at 7½ P. M. by Rev. M. W. Rider.

Stone Church—Preaching at 11 A. M. by Rev. John S. Foulk.

St. Peter's, Catholic— Preaching every Sunday at 10½ o'clock A. M., except the second Sunday of each month.

For Sale Cheap.

A second hand Smutt Machine in good running order, will clean from 15 to 20 bushels per hour. Call on, or address,

H. A. RASCHE.
Oakland, Md.

Chance for Investment.

For sale or rent, two cottages, furnished, with use of horses and carriages.

MRS. E. A. KILBOURN,
4 11 Oakland, Md.

Bucklen's Arnica Salve.

The best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by W. D. Nydegger, Druggist, Oakland, Md.

Notice!

All persons knowing themselves indebted to me will please call and settle by cash or note. All claims not settled by the 1st of June next will be given out for collection.

H. A. RASCHE.

The Best is the Cheapest!

That's what we mean when we say Newman keeps the finest candies in town. Call and see his stock

Festival.

A strawberry and ice cream festival will be held under the auspices of the ladies of the Ev. Lutheran Church, on Thursday and Friday evenings, May 28th and 29th, at the Brook's building, on Railroad street, Oakland. Proceeds for the benefit of the church.

The Sang Run Store.

Mr. S. M. Friend desires to inform the citizens of the Sang Run neighborhood, that he has lately enlarged his stock of general merchandise, and is now enabled to sell as low as any merchant in the county. He will pay the highest market prices for good produce. Call and see him.

Lutheran Conference.

The Maryland and West Virginia Joint Conference of the Evangelical Lutheran Church, will be held at Swanton, this county, May 26-28, 1885. Papers will be read on "The Missions of the Church," "Moral Currents," "The Church in the Village," "The Village in the Church" and "God's Claim on Young Men."

May Court Expenses.

Mr. W. H. Tower, Clerk of the Circuit Court, kindly furnishes the following detailed account of the expenses of the May Term of our Circuit Court:

Witness to Grand Jury, -	$372 88
Grand Jury and Bailiff, - -	407 68
Talis Jurors, - - - - - -	42 50
Crier, - - - - - - - -	36 00
Court Bailiff, - - - - - -	24 00
Petit Jury and Bailiff, - -	834 87
State Witnesses, - - - -	176 92
Total, - - - - - - -	$1,894 85

Council Organization.

The first regular meeting of the Town Council of Oakland, since the election, was held Monday night. The newly elected commissioners, Messrs. D. M. Mason, King Delawder and John Compton, were qualified and entered upon the duties of their office. Mr. John Hart was elected Clerk and Mr. P. A. Chisholm was elected Bailiff. The contest for Bailiff was between Mr. Chisholm and Mr. Thomas R. White, the latter gentleman agreeing to perform the duties of the office for $15 per month, whilst the former demanded $40 per month. Mr. Chisholm's election was strongly opposed by the Burgess and Commissioners Hamill and Helbig, who claimed that the financial condition of the corporation would not justify so large a salary. Commissioners Jamison, Mason, Delawder and Compton voted for Mr. Chisholm

Military Notes.

Henry J. Johnson was unanimously elected Lieut. Colonel of the Second Battalion, M. N. G., at an election held last week. The colonel has not yet signified his acceptance of the honor.

[From the Cumb. News.]

Capt. R. H. Gordon, of Company C., Second Battalion, M. N. G., has handed his resignation to Adjutant Sloan and it will be forwarded to Lieut.-Col. Wardwell, commanding the Battalion, for approval or disapproval. The reason given by Capt. Gordon is that he cannot devote sufficient time to the duties of the position to do justice either to himself or his company. Col. Wardwell is disinclined to accept Capt. Gordon's resignation, as he would like to have him remain with his company.

Second Lieut. Jason L. Towles, of Company D., has also resigned, simply stating that he considers it best for himself and the company that he sever his connection therewith. The resignation has been forwarded to Col. Wardwell, who will no doubt approve and transmit to the adjutant-general. Both resignations were filed before the late election of lieutenant colonel.

Deaths.

SATURDAY, May 23, 1885.

We are very sorry to chronicle this week the death of the Credit Ledger at Harne & Lawton's. The business will be carried on at the old stand by the proprietors on a strictly cash system, which is pay for what you can and what you can't do without until you can pay for it, and you will save money. The man who buys on credit is always poor, and always will be as long as he does business that way. A man who pays cash is always independent and can buy where he pleases, but the credit man has to buy where he can get on credit and has to pay more for his goods than the man who buys for cash.

Letter from Ohio.

NATIONAL NORMAL UNIVERSITY.
LEBANON, OHIO, May 11, 1885.

Wishing to contribute something to THE REPUBLICAN, I will attempt to inform my school-mates and fellow-teachers in Garrett that I am delighted with this institution. I had read much about the advantages and practical training given at this school, but thought probably it might not be true, but upon actual trial I feel safe in commending the methods of instruction given here, to be equal, if not superior to many other similar institution in the country, and especially in the department of Telegraphy, of which department I am a member.

There are 800 students in attendance at present, and the number is expected to be increased to 1,000 during the Summer Institute Session, which begins June 9, and continues 8 weeks. Messrs. J. F. Broadwater, of Grantsville, and D. M. Dixon, of Mountain Lake Park have been in attendance here for some time. The last named gentleman has completed the Commercial course, and is now taking a drill in penmanship. Mr. Dixon will take charge of the books in Garthright's store at Mountain Lake Park, June 1st.

D. K. HARRING.

Miners Refused their Request.

The conference between the miners and operators took place at Queen City Hotel, Cumberland, Saturday last, resulting in the refusal of the companies to accede to the request of their employes. The operators present were Messrs. S. S. Lee, Charles F. Mayer, Hon. Lloyd Lowndes and Andrew Spier. There were twenty-six miners present, including the diggers and drivers. S. S. Lee, chairman of the operators' committee, opened the meeting. Hector Cochrane, secretary and spokesman of the miners, said: "In past years difficulties have arisen, and the impression prevailed that the companies were trying to oppress the men. We are glad, therefore, to meet face to face. We have laid before you propositions which would be of benefit to the employes of your companies.

"First, advance from forty to fifty cents per ton. There has been trouble and turmoil over this, and the employes have been trying to prevent further trouble. The miners acquiesced in December with the manifesto of the companies. Some, perhaps, grumbled, but many thought it best to go to work without resistance and accepted the companies proposition. What we desire is to receive a living, and forty cents does not provide this. I hope it will be looked upon calmly and considerately, and that the meeting will adjourn in the same good faith as commenced. No doubt, competition of regions will be urged as argument. We thought it wise to ask the conference to see if the matter could not be adjusted. We do not want you to understand that a strike is threatened, for such is not the case. We wish the past to be lost sight of, and for capital and labor to go hand in hand together. We want a fair remuneration if you can give it." Cochrane then discussed the ten hours per day, the reduction in smithing from one cent to one half cent per ton, and closed by referring to the semi-monthly payments. Quite a number of the delegates discussed each proposition as it came up. Joseph Thomas said: "The price of the coal in market does not bring us here to-day, but the poverty among ourselves. Our wages will not average thirty-five or forty dollars per month. We are compelled to work too long."

Charles F. Mayer replied on the part of the operators, and said: "We have listened with a great deal of interest to everything that has been said. We agree fully with Mr. Cochran that it is desirable the men and the companies come face to face to discuss matters of interest to them. I don't propose to discuss the advance at any length, because I have too much respect for the good sense and intelligence of the majority of our men to suppose for a moment they believe it is possible for us to make it, nor do I believe they expect it. They cannot fail to be informed as to the present extreme depressed condition of our trade in common with almost every other industry in the country. They know well the severe competition we have had with the Clearfield region for some years past, and that while we are now paying the same rates of wages as they do in Clearfield, the Clearfield operator has from several causes a lower cost of production than we have." They cannot fail to know that in addition to this old competition we have this year two new and active competitors, viz: Beach Creek coals, in Pennsylvania, and the Pocahontas coals, of Virginia, and that they have taken from our region already some very valuable trade, notably the contract of the New York Central Railroad, which, for twenty odd years, has taken from one hundred thousand to one hundred and twenty thousand tons per annum of Cumberland coal. Our people cannot fail to know that with this new competition added to the old, it is all we can do to maintain our proper position in the market. In the majority of cases, at the bare cost of production. Under these circumstances, their own judgment, without any discussion with us, tells them an advance is out of the question. He discussed the other propositions in regard to ten hours, the reduction in smithing, and semi-weekly payments and closed by saying: "I believe, sir, these are all the points the men had made in their circular. It would be a much pleasanter task for us to say to them that one, or more, of their requests could be granted, but in the present situation of affairs, it is impossible for us to do this." I am satisfied the sober second thought of the large majority of our men will make them realize the necessity of this decision. The meeting adjourned, all expressing feelings of good will, and pleased that the conference had taken place.

Accident.

Rev. Haman, the new Lutheran minister in charge of the German Church here and the Cove, is preaching very acceptably.

Mrs. Miller who was buried here on Tuesday, 12th inst., was over 87 years old.

Mr. Ephraim Lee paid Accident friends a visit recently.

Mr. Edward Boyer is at Mount Union College, in Ohio.

Mr. John E. Gnagey lately purchased in Baltimore, over seventeen hundred dollars worth of goods, including almost 100 suits of made up clothing for young and old from 3 years and up. They were bought at bottom prices and will be sold at a bargain.

Feed of all kinds was never known to be so scarce.

Mrs. Henry Beitzell living in the glades, ately fell from a haymow and fractured a rib, besides receiving quite serious internal injuries.

Besides several heads of families who talk of going to Florida, there are several who have quite serious ideas of going West.

Ross and Frank Spiker and James Hinebaugh are now in Kansas, and send back good reports of the West.

There has been considerable sickness in this part of Garrett this spring.

Spring work is pretty well done considering the late spring and very cold rough weather in April.

Mr. Brenneman has recovered the two valuable horses stolen from him. It is now reported that the thief has been arrested in Washington City with a stolen horse or two in his possession. It may be of some interest to know that the horses were recovered by a strange combination of circumstances. Some 70 or 80 miles from here in an almost inaccessible region in West Virginia, a gentleman was riding rather rapidly towards a watering place near a grist mill. Fortunately he was behind the thieves whose guilty conscience at once jumped to the conclusion that it was some one pursuing them. The horses were abandoned and the thieves took to the woods. This single circumstance led to the recovery of both horses. Mr. Brenneman is out of pocket over $100 in cash and much valuable time lost. Mr. Brenneman is highly esteemed in this community, and the probabilities are that free justice would be meted out to the thieves were they to be tried in Garrett county. Besides stealing horses quite a number of small articles were taken from different parties.

We have been requested by Western friends and subscribers of THE REPUBLICAN to exercise a little more regularity in the notes from Accident.

E. H. G.

"Funny what things you can find in an old well," remarked a passenger from Western Massachusetts. "Last fall we cleaned out our well, and what do you s'pose we found in it? Here's a list of the articles as I noted them down on the spot: Forty-seven tumblers, 3 jack knives, 3 cream pails, 5 old buckets, 2 silver teaspoons, 2 silver tablespoons."

"That's nothing," added a passenger from Michigan, "we cleaned out our well last fall, too, and what d'ye s'pose we found? The skeleton of one heifer, four lambs, an old pig trough, a swill bucket, and a dog with a can tied to his tail. We had noticed a peculiar taste to the water, but thought it was a mineral spring. People acutually bottled that water last summer and carried it away to drink."—*Chicago Herald.*

Not only the houses of the Mexicans, but whatever you admire is yours. If you express a sentiment of approbration of anything, the owner at once says: "Senor, it is yours;" but he simply intends something flattering, and you are therefore not expected to accept anything that is offered to you. An amusing story is told of Sir Spencer St. John, the English embassador, which illustrates how this national courtesy often provokes embarrassment. Sir Spencer, who is a gallant old bachelor, was promenading with some ladies in the park when he met a nurse girl with a bright-eyed baby. The ladies stopped to admire the little one, and Sir Spencer asked whose child it was. "Senor, it is your own," replied the nurse with a courtesy. Sir Spencer has never inquired as to the parentage of a pretty child since.

Baltimore Live Stock Market.

[From Baltimore American.]
MONDAY, May 18, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5½@5 4-5c, that generally rated first quality 4¾@5¼ cts; medium or good fair quality 4@4¾ cts; ordinary thin steers, oxen and cows 3@4 cts; extreme range of prices 3@5 4-5 cts; most of the sales were from 4¾@5¼.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 1,046 head, against 1,469 last week and 1,465 head the corresponding week of last year, and the sales were 883 head, against 909 last week, and 752 head the corresponding week of last year.

All dealers report the market as dead on the Hill to-day, and, with meager exceptions, that prices were 15 or 20c. per 100 lbs. lower than they were last week, considering the quality, which in some respects was better even than the very good offerings of last week. Prices ranged from 3 to 5 4-5c., with very few at either extreme, most sales ranging from 4¾ to 5¼c.

THE SWINE MARKET.

There is a slight increase over the receipts of last week, and the quality of the offerings is fully as good as it was then. There is a moderate demand, the supply being about equal to the demand. We quote rough Hogs at 5@6c., and the better grades at 6¼@6½, with but few at latter prices—most sales 6¼. Same time last year Hogs sold at 7@7¼c., and extra at 8.

THE SHEEP MARKET.

The number of the offerings is less than it was last week by some 450 head, and their general quality was not as good as it was then. Trade is exceedingly slow, common stock not being wanted at our lowest quotations, 2¼@3c., and sales of better grades were made up to 4¼, with but few extra at latter price. Lambs are quoted at 5@9c., with most sales 7¼@8. Same time last year sheep sold at 3@6c., and lambs at 6¼@8¼.

NEW ADVERTISEMENTS.

NOTICE TO TRESPASSERS.

All persons are hereby warned not to trespass on my land for the purpose of hunting or fishing, or otherwise they will be dealt with according to law.

THE BLUEBIRD'S SONG.

The bluebird sings. His trill of hope
Comes ringing down yon snowy slope
To say: "Cheer up; cheer up; 'tis spring.
I bear her greeting on my wing."

Good-bye to winter, stern and cold;
Good-bye to sorrows, new and old;
Welcome to hope and warmth and cheer,
The bluebird sings and spring is here.

How soon each frost-bound field and wood
Will hear his prophecy of good.
Now buds may swell, now sap may flow,
And happy brooks may seaward go.

A thousand thousand sleeping things
Waken when first the bluebird sings,
And 'neath the sheltering turf begin
With joy their rainbow-robes to spin.

What hear I in this clear refrain?
The gladdening sound of April rain,
The flow of waves, the hum of bees,
The gossip of the woodland trees.

I shut my eyes and listen. Lo!
Sunshine above and bloom below.
No winds to vex, no rime to wrong—
A world of beauty and of song.

A prophet's voice, so sweet, so strong.
Though wait the glad fulfillment long,
Hope, ever trustful, trusts anew
And holds the blessed promise true.

The sun is hid. The clouds hang low
With sullen threats of drifting snow,
And in the leafless boughs I hear
The North Wind sound his bugle clear.

But since I've heard the bluebird sing,
No matter what the days may bring;
The wintry winds may wake or sleep,
My heart with Spring her tryst will keep.
—*Luella Clark, in Chicago Current.*

REAL LIVE COWBOYS.

On the Drive, in the Camp and at the Round-Up.

Men Who Daily Risk Life and Limb in the Performance of Duty—Cowboys Graduates of Colleges—Some Mistakes Corrected.

"Do I know the cowboys? Young man, I think I do. When you have worked with them, camped with them, and been among them for years on the drive, on the plains, and on and off duty, you might say you know them."

The speaker was Henry Exall, a Texas cattleman, who has been spending several days in the city at the Seventh Avenue Hotel.

"The Texas cowboy," he continued, "is the most thoroughly misunderstood man, outside of the localities where he is known, on the face of the earth. I know him in all his alleged terrors, and as a class there are no nobler-hearted or honorable men in the world. Brave to rashness and generous to a fault, if you should be thrown among them you would find them ever ready to share their last crust with you, or lie down at night with you on the same blanket.

"Why, young man, see here," and the Texas man twitched his chair around until he could put his foot upon a window sill. "Say that I have 10,000 cattle which I am about to send overland from Texas into Montana to fatten for the market. Those cattle will be on the drive from the 1st of April until the middle of September. They are divided into three herds, with a dozen or sixteen men with each herd. I entrust those cattle in the hands of a gang of cowboys. For six months I know absolutely nothing of my stock. I trust their honesty to the extent of many thousands of dollars without a contract, without a bond, with no earthly hold upon them legally or morally beyond the fact that I am paying them $35 or $40 a month to protect my interests. And these are the men pictured in the East as outcasts of civilization. I trust absolutely to their judgment in getting those cattle through a wild and unbroken country without loss or injury. I trust as absolutely to their bravery and endurance in the face of danger."

"Danger?"

"Danger! Yes, indeed. A man to be a cowboy must be a brave man. For instance, we are on a drive. These slab-sided, long-horned Texas cattle are as wild as deers naturally, and, being in an unknown country, are as nervous and as timid as sheep. The slightest noise may startle them into a stampede. We have been on the drive all day and night is coming on. It is cold and raining. We have reached the point where we intend to round up for the night. The men commence to ride around the drove, singing, shouting, and whistling to encourage the animals by the sounds they are familiar with, and to drown any noise of an unusual character which might provoke a stampede. Round and round the cattle they ride until the whole drove is traveling in a circle. Slowly the cowboys close in on them, still shouting and singing, until finally the cattle become quiet, and after a time lie down and commence chewing their cuds with apparent contentment. A stampede of cattle is a terrible thing to the cowboys, and may be brought on by the most trivial cause. The slightest noise of an unusual nature, the barking of a coyote, the snap of a pistol, the crackling of a twig will bring some wild-eyed steer to his feet in terror. Another instant and the whole drove are panting and bellowing in the wildest fear. They are ready to follow the lead of any animal that makes a break. Then the coolness and self-possession of the cowboy is called into play. They still continue their wild gallop around the frightened drove, endeavoring to reassure them, and quiet them once more. May be they will succeed after an hour or two, and the animals will again be at rest. But the chances are that they can not be quieted so easily. A creak is made in some direction. Here comes the heroism of the cowboy. These cattle are as blind and unreasoning in their fright as a pair of runaway horses. They know no danger but from behind, and if they did they could not stop for the surging sea of maddened animals in the rear. A rocky gorge or a deep-cut canon may cause the loss of half their number. Those in the rear can not see the danger, and the leaders can not stop for those behind, and are pushed on to their death. A precipice may lie in their way over which they plunge to destruction. It matters not to the cowboy. If the stampede is made, the Captain of the drove and his men ride until they head it, and then endeavor to turn the animals into a circuit once more.

"A hole in the ground, which catches a horse's foot, a stumble and the hoofs of three thousand cattle have trampled the semblance of humanity from him. He knows this. A gulch or gorge lies in their path. There is no escaping it. There is no turning to the right or left, and in an instant horse and rider are at the bottom, buried under a thousand cattle. But what of it? It is only a cowboy, and they come cheap. But history records no instance of more unquestioning performance of duty in the presence of danger than these men undergo on every drive. Should the stampede be stopped there is no rest for the drivers that night, but the utmost vigilance is required to prevent a recurrence of the break from the frightened cattle. This may happen hundreds of times on a single drive.

"I remmember one instance, which, from the friendship in which I held the victim, has made a lasting impression on me. Two brothers were together on the drive. Both men had been educated in an Eastern college, but for some reason had drifted to the cattle plains of Texas and had become cowboys. The elder was the captain of the drive. Sitting about the camp-fire one night, the younger was disheartened about something and finally said: 'Charlie, let's throw up this drive. I don't want to go. I feel that one or the other of us will never go back. I am ashamed of this, but I can not shake it off.' His brother was impressed by his seriousness, but could only say, 'George, here are 3,000 cattle in my charge. I could not leave them if I knew that I would be killed to-morrow.' 'A stampede!' cried one of the men. In an instant they were all at their animals, saddles were adjusted and away they went. The Captain gained the head of the drive and had succeeded in turning them a little when his horse stumbled. In another instant horse and rider could hardly have been distinguished from one another. So you see there is some responsibility upon the men.

"These wild cattle away from home are as variable as the wind, and when frightened are as irresistible as an avalanche. The slightest thing stampedes them. For instance: We have rounded up the drive and the cattle are lying down. I am one of the men detailed to ride around them. Finding them all quiet I get off my horse to light my pipe. Relieved of my burden, the horse rests himself at a stake. The whole drove is on their feet in an instant listening to discover from what quarter the noise came. No one can foresee which way they will make the break, and only the utmost self-possession and good judgment on the part of the men on duty will prevent a general stampede. That is the class of men cowboys are made of, and I never knew of many instances where they failed to do their duty."

The enthusiastic Texan had now warmed up to this subject, and when asked: "Where are the cowboys recruited from?" replied:

"From all parts of the world. Some from the plains, where their toys in infancy are the miniature lariat and a shotgun. Some from Mexico, with many of their half Indian characteristics, and many from the East. I know a dozen college graduates who cowboys, and have become so infatuated with the life that I suppose they will never leave it until the final grand round-up.

There is another interesting period in the life of a cowboy," continued Mr. Exall, "and that is in the spring round-up. In the fall the cattle stray away, and in working away from the storms they sometimes get away 100 miles or so. Each cattle owner has his own particular brand on his cattle. Well, the ranchmen in some natural division of the country will organize a grand round-up in the spring. The cowboys will drive the cattle all in together in one big drove. Then the Captain of the round-up will direct the owner of Ranch A to 'cut' out his cattle. One of A's most experienced men will then ride into the drove until he sights an animal with A's brand on. Deftly he will drive the animal to the outer edge of the herd, and then with a quick dash runs the beast out away from the drove and it is taken in charge of by others of A's ranchmen, while the cutter goes back after another. After some fifteen or twenty minutes A's cutter will be taken off and B's given a chance. This will be continued until each ranch has its cattle cut out. If any cattle are found without a brand they are killed for the use of the men on the round-up. This 'cutting' is a work requiring great skill and experience, and frequently requires the use of the lariat. Often cattle with a strange brand are found. If anyone recognizes the brand, ranchmen living nearest the owner take charge of it and notify the owner. If no one recognizes the brand the Captain of the round-up advertises it, and if no owner is found, it is sold at auction for the benefit of the Cattlemen's Association.

"These things will go to show the responsibilities resting upon these men. They have to be men of integrity and reliability, and their labors are such that you can readily see they can not be very dissipated. I will tell you how they get the reputation for recklessness. We will suppose these men have been on a drive for six months, and have finished and been paid off. Then they are just like any other body of men, they go in for some fun, and on their lark ride yelling through the streets of some little town, shoot a few lamps out or get into a saloon row. It is no more than a band of college boys at Harvard, or Cornell, or Princeton might do, and frequently do, but some imaginative correspondent immediately sends it to some Eastern paper, where it comes out headed "Another Cowboy Outrage," and giving a wholly fictitious account of the battle between the outlaws and the citizens. Now, I know hundreds of cowboys who never carry a revolver, and if you should go among them today your life and your pocketbook would be as safe as it is in the city. They have strict ideas of honor and they stand upon their honor. You won't find any of them who would be safe to impose upon, nor will you find any of them who will attempt to impose on you. They are off duty, a lot of big-hearted, rough boys, as ready for a lark as any other boys, but they are not outlaws or outcasts. They are not the class of men who rob trains or hold up people crossing the plains, and I believe that, taken for all in all, the American cowboy will compare favorably in morals and manliness with any similar number of citizens, taken as a class.—*Pittsburgh Dispatch.*

GRANT'S LOVE FOR HORSES.

His Skill as a Bareback Rider While a Boy Still Remembered.

Grant's love for horses is a matter of history. He was a fine horseback rider as a boy at his little country home in Georgetown, O., through which he loved to ride standing on his bare feet on a sheepskin tied to the back of his horse. The only thing he really excelled in at West Point was his riding. He was the most daring rider of the school, and in jumping the bar the officers who were accustomed to hold the bar over which the horses were to go as low as their waists for the others, put it up even with and above their heads when it was Grant's turn to jump. He saved his life in Mexico by his riding abilities by throwing himself at the side instead of staying on the back of his horse, and when he was in the White House his horses were the wonder of Washington.

Grant's Arabian horses are, I think, on General Beal's farm, near Washington. They were given him by the Sultan while he was in Turkey, in 1878. The Sultan had taken him over his palaces and grounds, and finished up with his stables. He had his attendants show off his finest horses, and asked Grant to pick out the finest for himself, telling him he would make him a present of it. Grant at first was reluctant to accept so valuable a present, but one of the Sultan's officers interposed, telling him he would offend His Majesty by a refusal. He then selected a dapple-gray Arabian steed, and the Sultan formally presented it to him. The Sultan afterward sent it to him at New York, adding to his present another Arabian as black as jet, and as magnificent in form as the one Grant had chosen. The two horses arrived in New York in the latter part of the following year, and sporting men admired them greatly. They were taken to a blacksmith shop to be shod, and many persons came to see them, trying to buy their old shoes, or even the nails, as mementoes. When the horses were taken from the boat to the stable, one of them kicked a spoke from a carriage which they passed, and cost Grant twelve dollars to pay damages. "*Carp,*" *in Cleveland Leader.*

AN ATLANTIC OASIS.

The Orange Groves of St. Michael's in the Charming Azores.

Out in the Atlantic, over 1,200 miles from Land's End and about 600 miles due west from Lisbon, lies the beautiful island of St. Michael's, the largest of nine islands forming the Archipelago of the Azores. It is beautiful in its variety of mountain, lake and valley scenery, in the rich verdure of its cultivated lands, its equable, mild climate and in its wonderful thermal spring. The principal commerce of St. Michael's is the orange crop. The mode of picking and packing remains unaltered since early days. The city, Ponta Delgada, the capital of the island is set in the midst of orange gardens, and the air in the early mornings or late in the evenings comes laden to you with the fragrance of the orange blossoms.

Either in the town or suburbs you see the gates of many orange gardens invitingly open, and you will be politely invited to walk in and help yourself to flowers and fruit. If you are a stranger the "cabeca" or head man of the garden will bring you a bunch of lovely camellias and a branch on which hang clusters of ripe oranges, and invite you to be seated on a garden bench, for though it is the month of February, you can enjoy sitting out of doors. There you can watch the juvenile toilers sorting the fruit and dried leaves of the Indian corn. The picker can eat as many oranges as he pleases, and take away every evening a bag or basket full of fruit that has fallen from the trees, which he sells at thirty or forty for a penny.—*Leisure Hours.*

SPIT UPON.

A Central African Custom Which is Not Considered an Indignity.

Most people consider it one of the worst of indignities to be spit upon, and yet, according to Mr. Thomson, spitting has a very different signification with the Masai of Central Africa from that which is given to it elsewhere. With the Masai it expresses the greatest goodwill and the best of wishes.

"It takes the place of the compliments of the season, and you had better spit upon a damsel than kiss her. You spit when you meet, and you do the same on leaving. You seal your bargain in a similar manner. As I was a lybon (medicine man) of the first water, the Masai flocked to me as devotees would do to springs of healing virtue, and with the aid of occasional draughts of water I was equal to the demand.

"The more copiously I spat upon them, the greater was their delight; and with pride they would relate to their friends how the white medicine-man honored them, and would point with the greatest satisfaction to the ocular proof of the agreeable fact. It was certainly rather drying work for me when I had a large number to operate upon, and I required the aid of bullets and stones in my mouth to stimulate the production of the precious fluid.

"However, their simple faith in the efficacy of it made me suppress my feelings, and give them pleasure. How could I, for instance, resist the upturned face of a Masai maid; and what better reward could I have than her delighted and grateful glance when I expectorated upon the little snub nose so eagerly presented?"—*Youth's Companion.*

—A cow attached to the Gubernatorial mansion at Jefferson City, Mo., having been milked for five years by convicts, now refuses to allow anybody in citizens dress to approach her.—*St. Louis Post.*

—English officers are killed off so quickly that they seldom have time to grow to be Generals. — *Minneapolis Tribune.*

A WOMAN'S BEST FACULTY.

Provided by an All-Wise Providence with Eyes that See Enough to Keep Her Tongue Continually Busy.

As a rapid and exhaustive observer woman outshines man more than the beauty and glory of day at high twelve surpasses the flicker of a brimstone match. With one little bat of her eye a woman can see things to which man, with all his boasted discernment, remains forever blind. The focusing machinery in the visionary department of her mechanism is always in gear, and operates with lightning precision without hitch or friction. Put her in a cannon and shoot her through a millinery store, and if she survives the shock to her nerves, she can tell you with a precision that seems phenomenal the exact shade of every ribbon and the net amount of torture to non-possessors represented by every specimen of male distraction in the entire concern. Send her aloft in a balloon when the wind is careering over the city with the speed of a young man running through an hereditary fortune, and she can tell you the contents of every clothes-line in town, without stopping to catch her breath. Put her in a sleigh behind a runaway team, if you are obliged to know the color of every man's eyes both sides of the street, and have to know it quick. If you are to have a fashion report in fifteen minutes that would take you three weeks to prepare, send the dear creature to church. If you want to know anything that can be seen, shut your eyes and tell your wife to look. With one corner of her eye she will see more in the fragment of an instant than you could discern in two weeks with a field-glass. For breadth, scope and accuracy, the amount of observation she can grasp with a single wink makes a Government survey seem contracted and deficient. Prof. Proctor himself owns up that his daughter can see and salt down more in the butt end of a second without specks on, than he can behold with a telescope in a good long astronomical spell, and he always wants her handy during an eclipse or transit to nail such phenomena as may happen to get away from him.

A Chicago man went to Washington to witness the inauguration and give the new administration the benefit of his experience in tight corners, and by some unaccountable freak of conduct he took his wife along with him. He is a man of reasonable veracity, and whenever he swears to a thing you can put it down as coming sufficiently nea the truth to answer all ordinary purposes. On returning home, with considerable more experience and a good deal less money, he appeared before somebody and deposed that out of all the vast ocean of female paraphernalia, military grandeur, and so on, gathered in the Capital on that brilliant occasion, not one thing escaped the clinching gaze of that blue-eyed little woman, and that a minute description of everything with ribbons and ruffles is snugly pigeon-holed between her ears somewhere, for he overheard her telling another woman or two all about them after the return, with a cogency and conciseness that made him feel as though he had been blind from birth. He avows that he kept his eyes at full cock during their entire stay, and did his best to obtain at least a moderately retentive squint of everything in sight, while his wife just stood around and growled about her tight shoes, her headache, encroaching corset, and other female peculiarities, without seeming to care a button-hook for anything or anybody, or even appearing to notice so much as the season of the year. Time and again, he affirms, did he lift up his voice in most vehement entreaty as follows, namely, to wit:

"Keep your eyes peeled, my dear, and try to notice something that will make you remember the place. You may never have another chance to come here, and you ought to try and see all you can while you are about it."

But she gazed not with the rapture for which he famished, and he proceeded with more strenuous intonation:

"I'll declare it looks like a waste of money to take you traveling. Why don't you look around and notice things while you've got a chance? Do you think I went to all this expense for the sake of having a cigar sign along with me? Hold up your head and look around. There's things in sight that will be petrified in history. Shake yourself up and look at 'em while you can, or else blindfold yourself and be done with it?"

But all the solace the enthusiastic man could get in return was:

"O, my headache!" or "Plague take them shoes!" while the apparent eyeless woman at his elbow stood around on one foot, and seemed to be getting about as much benefit from the animated scenes around her as a mole would pick up at an art display. But for all that nothing escaped the busy eye of the undemonstrative little woman. Everything went to the right place under her bonnet, and what she saw would fill every volume of the *Congressional Globe* ever issued, and leave enough over to keep the Government printers busy for years to come, while her husband was tickled nearly to death at the music, and threw up his hat and stood on his head when the elephant went by, he returned home firmly believing he had seen the whole circus.—*E. P. Brown, in Chicago Ledger*

What Consols Are.

In speaking of consols, most people think they include the entire National debt of England. This is a mistake, for there is only a little more than half a debt, strictly speaking, included under that head. The name consols is, as nearly every one is aware, merely a contraction or term that has got into use in the brief way of speaking used on the Stock Exchange. The full official title of the portion of the public debt called consols is "The consolidated three per cent. reduced annuities," and they have grown to their present enormous proportions, some £330,000,000 sterling, as indeed the whole debt has, from comparatively small beginnings, by fits and starts, and through gradual processes of incurring floating debts to meet emergencies and the subsequent funding of the same in permanent shape at low rates of interest.—*St. Louis Globe-Democrat.*

FALSE ECONOMY.

Some Pertinent Reflections by an Old Writer from the Pacific Slope Who Knows What He is Writing About.

Seek the poorest for economy's sake
Live on the cheapest. Dress cheaply.
Get yourself cheap lodgings where
grime and squalor prevail.

By so doing you will put on the atmosphere of poverty as you do your overcoat and carry it with you as one of the signs revealing the very condition you want and need to conceal. Poverty will drive most people from you. They are afraid of you. They feel in your presence the possible request of "Lend me a dollar for a few days."

This ought not to be so. But it is so. This is not a homily on fancies but one on facts.

There is quite as much reckless saving in this world as reckless spending. As when a man walks three or four miles to save a fare, and thereby walks the strength out of mind and body, that he needed for some important purpose. That's one of the ways of keeping poor. Take care of your pence in taking good care of yourself and keeping body and mind in the best condition, and not in ramming every nickel your fist closes over down a rat hole, while you suffer and weaken for what it could buy

I think real poverty means starving one's self of the good things of this world or being starved for lack of them, as you please. There's a law for cultivating this sort of poverty as fixed in its working as the law which carries the errth around the sun. Make up your mind that you won't abide this sort of poverty and so act as opportunities present themselves, and see if elements and agencies do not come to you to help you enjoy life as you live. Only there is presumed on your part sufficient sense to know such elements and agencies and also to know how to use them.

Who are the rich? A man with a million may live feeling as "poor as poverty;" scared half to death every time he takes out his pocketbook for a necessary outlay; distressing himself by the hour with the thought that his last purchase of a dollar's worth at one shop might have been secured for ninety cents at another; starving his stomach with indigestible ten-cent lunches and studying what he calls "economy" until economy has turned into miserliness.

Another man buys what he needs, treats himself to the best he can find and afford, treats his body to decent food and clothing and gets lots of good out of them as he goes along.

Which is the richer of the two?

What do you want? To feel miserably poor all your days on earth that you may so die "poor as poverty," though worth the million you have scraped together through starving your body, starving your tastes, scrimping, cheese-paring and living in such dread of poverty that you have become a money hoarding monomaniac, distressed by the money gripes every time you open your purse for a car fare.

Go unshaven to-day to save the barber's fee, and you feel unshaven and unpresentable. That is the very day you will meet the man on whom you desire to make a favorable impression, and who may "take stock" of your stubby beard and judge you thereby. Buy the cheaper shoes or the cheaper coat or hat to save a few dollars, and you buy so many cheap signs which will let you out and keep you out of the class who might be most useful to you, as you might in turn also be to them.

A man bred to miserly morality and stuffed full in his youth of Ben Franklin's maxims provocative of economical starvation, went to a strange place in search of business, having in his pocket $100. For economy's sake he put up at a third-class hotel, where grease and rancidity made him half-sick and sallow. For economy's sake he kept on wearing a suit of clothes verging on seediness, when an expenditure of $40 on apparel would have made him outwardly a far more presentable person. Week after week he grew outwardly more seedy and inwardly more sick, and further from the situation he sought, for his clothes and his third rate bearing and address, coming of stopping at a third-rate hotel, enveloped him with a third-rate atmosphere and created for him with others a third-rate impression. So his hundred dollars dwindled and dwindled away on this basis of economy until he could not purchase a new suit of clothes, while those he wore became daily less and less presentable. As he became less presentable he had less and less face to present himself to the kind of people most necessary for him to seek.

The second man coming to the same place on a similar errand chose better though more expensive lodgings and thereby got himself among and was seen of men among a more respectable class of people. He, also, had but $100 in the world, but when he saw in his clothing signs of wear and tear and more coming, he said to himself: "If I buy me a fifty dollar suit of clothing, though I get nothing to do, I shall have the apparel, anyway, and that's a better business basis to stand on than a seedy suit."

Ask any man of the world which of the two was most likely to "get along" and make his way.

"Take care of the pence and the pounds will take care of themselves," says your careful old man of money. True! But are you taking care of the pence when for economy's sake you dose yourself with the dirt and rancidity of a slop-dish restaurant? Are you taking care of yourself? Won't poor living make you poorer? There is a pretty straight path for many between poor feeding and poor whisky. Are not pence very profitably expended in taking good care of yourself?—*Prentice Mulford, in N. Y. Graphic.*

—In a Missouri court some time ago an illiterate person was sentenced to jail till he could learn to write, and another was sentenced till he could teach the former the art. In a little over three weeks the prisoner reappeared, able to write a fair letter at dictation, and both men were discharged.—*St. Louis Post.*

—A wealthy and well-known manufacturer of Paterson, N. J., was arrested in New York City the other evening on a charge of drunkenness. He offered to pay any amount of fine or to give $100,000 security, but he was locked up for the night.—*N. Y. Sun.*

SCHOOL AND CHURCH.

—It is pleasant to see that the sanitary condition of the school-rooms is so frequently a matter of discussion now. And it is to be hoped that the discussion will result in some practical reforms.—*N. Y. Tribune.*

—An application for the position of teacher in a school at Lawrence, Kan., could not explain the difference between horizontal and perpendicular and declared that "circular" meant a fur-lined cloak.—*Chicago Herald.*

—The Roman Catholic churches of the diocese of Massachusetts, under the direction of the Bishop, will hereafter sell seats at every mass. Free seats will be given to those too poor to pay, and ushers will protect those who do pay.—*Boston Post.*

—A lad in the Cambrian deaf and dumb institute, on being asked a question he could not answer, thought for a moment and then wrote on his slate: "Short of information on the subject." Such candor is worthy of imitation.—*Chicago Times.*

—Dr. Philip Schaff states that, while the change of text in the revised edition of the old Testament will be found more numerous than in that of the New Testament, they are less important. He thinks a long time will elapse before another revision is made, and that it will take about a generation for the new revision to crowd out the old Bible.

—A new Christian church is about to be built in Jerusalem. The Germans have obtained possession of the site of the ancient hospital of the Knights of St. John, and arrangements have been made for the erection of a German Protestant church. In this cradle center of Christianity are to be found Greeks, Romanists and Protestants; and Jerusalem presents in miniature divided Christendom.

—The colored people of Philadelphia have undertaken to raise funds for the establishment of an industrial training school. They claim that while there is no lack of opportunity for the colored youth to study Latin, Greek, astronomy, theology, etc., no provision is made whereby he can learn to make a boot or perfect himself in any industrial avocation. It is high time that something should be done to give colored youth these advantages, and it is especially gratifying to observe that the colored people are taking the matter into their own hands.—*Current.*

—The eagerness of the Japanese for the Scriptures the past year, writes Dr. Nathan Brown, from Yokohama, has been astonishing. Four thousand Gospels were disposed of and over 10,000 smaller portions and tracts. Dr. Brown's principal colporteur has sold and distributed over 12,000 books and tracts with his own hands. He is, beside, an exhorter, and never goes among the people without giving them an explanation of his work and what is the object of selling the books. All Japanese Christians, Rev. E. H. Jones writes, own Bibles and read them, always turning to the passages referred to by the preacher in his sermon—not a bad habit for Christians of every race.

PUNGENT PARAGRAPHS.

—Buzzard's Roost, Ga., was a post-office. Postmaster General Vilas has changed it to Westlake.

—The sea-serpent has been seen at San Francisco. His head was "crowned with two huge horns." If you will notice it, there is always an intimate relation between horns and the sea-serpent.—*Boston Post.*

—"Are you any relation to my sister?" asked little Johnnie. He blushed and stammered, until the young lady, taking pity on him, solved the matter by saying: "No, but you'd like to be—wouldn't you, Alfred?"—*Detroit Post.*

—The humorous market is dull. We quote coachmen jokes prime, at five to six cents per million; ice-cream jokes, no demand; bank cashier jokes, weak at one to one-and-a-half cents per ton; choice plumber jokes in demand at one dollar to two dollars per ton.—*Lincoln (N. M.) Golden Era.*

—An English lady recently gave a whole ounce of tobacco to every soldier of a regiment about to start for the Soudan. Here is a chance for the men who are always trying to borrow tobacco. Go to England and volunteer for service in Egypt.—*Boston Courier.*

—"Are you enjoying your dinner?" asked Bobby of the new minister, who was taking a Sunday dinner with the family. "Yes, Bobby," responded the minister pleasantly. "Mamma said this morning that she thought you would, as she didn't suppose that with your small salary and big family you got much to eat from one week's end to another."—*N. Y. Times.*

—A negro brought suit in a Mitchell County Justice's court for possession of two shoats and a sow and pigs, and gained it. His lawyer, as soon as the case was decided, settled the fees for himself, Squire A., the lawyer on the other side, and the court. "Well, Joe, Squire A. will take one of the shoats, I'll take the other one, the Judge will take the sow and pigs, and you've gained the case."—*Macon (Ga.) Telegraph.*

—"Do you know," said a bashful swain to his sweetheart, "that doctors say there is danger of contracting diseases by kissing?" "Is that so?" she said, with an air of interest. "So they say," he murmured, "do you believe it?" "Well, I haven't much faith in doctors," she replied, blushing furiously; "besides, I've been vaccinated." If that young man ever contracts the heart disease it won't be his fault."—*N. Y. Journal.*

Spring and Summer Bonnets.

Small bonnets remain in favor, but are slightly larger than those of last year. The only changes in shape are the narrow and short crowns used when the hair is dressed high, and the more fully trimmed fronts, which now have a puff of lace or velvet, or else a small inside trimming of lace, bows, or flowers. There are also round and longer crowns for those who wear the low Catogan braid, but the general preference is for the high slender crown that may be cut off square across the top, and is usually curved at the end to show the hair turned upward from the nape of the neck and fringed like a bang, or else with three or four small "scolding locks" curling below.—*Harper's Bazar.*

FARM AND FIRESIDE.

—Cream cake, so dear to the heart of the children, can be made by splitting patty-pancakes, taking out a portion of the center and filling the space with thick custard. There need be no waste, as the piece cut out may be used in the foundation for a nice pudding.—*Toledo Blade.*

—It is said that a horse may be cured of holding the head high when the bridle is to be put on, by a lump of sugar in the hand. Give him a taste, and he will hold down. Rub it on the bit, and he will soon become fixed in the habit of lowering his head for the bridle.—*Turf, Field and Farm.*

—For the filling for an orange short-cake, take two large oranges, peel them, chop them fine, remove the seeds, add half of a peeled lemon and one cup of sugar. Spread between the layers of short-cake while it is hot. This may be used for layer-cake filling, but in that case add the well-beaten white of one egg.—*N. Y. Mail.*

—There is profit in farming good land, but none on any other. Do not forget this in buying and renting land. You can well afford to pay double the rent for a rich piece of ground than you can for poor. If you own poor fields make them rich, as the first object in your whole system of farming.—*San Francisco Chronicle.*

—In relation to purifying beeswax a bee-keeper writes: "The best plan that **I know of is to melt ten pounds of wax** in a vessel, after having first put in the same one pint of strong vinegar, together with one quart of water. After all is melted, set the vessel from the fire and wrap it in several thicknesses of blanket or old carpet, so it will cool slowly. By this plan the wax is in agitation while liquid and all impurities worked to the top or bottom. If strained before putting through this process there will be nothing but dross at the bottom, with nothing on top."—*Albany Journal.*

—A delicate white pudding is made by soaking one teacupful of gelatine in one pint of cold water; let it stand for an hour, then add one pint of boiling water, the juice of two lemons and two cups of sugar. Strain this and add the whites of five eggs beaten to a perfectly stiff froth. Let this become quite cold before serving. The sauce for this pudding is made of one quart of boiling milk; beat the yelk of five eggs with half a cup of sugar, and stir into the milk. When this cools flavor to your taste. The quantity here given will be sufficient for nine good-sized dishes, or, with less generosity, a tenth may be distributed.—*Boston Budget.*

—Rhubarb Jam: Take the desired quantity of rhubarb, wipe it thoroughly dry, and cut the stalks into small pieces. For every pound and a quarter of the rhubarb allow one pound of sugar, the rind of half a lemon cut very thin and minced. Put all into a stew-pan and simmer gently until the sugar is thoroughly dissolved, stirring constantly to prevent burning. After the sugar is dissolved remove the pan to a hotter part of the fire and boil for one hour. The jam may then be put into jars, covered tightly to exclude the air, and stored away in a cool, dry place. As rhubarb jam does not keep as well as that made from fruit, it should be utilized quickly.—*Boston Globe.*

HATS AND BONNETS.

Feminine Adornments Which are Eccentric and Dressy.

From present indications it is safe to infer that hats are going to be worn by misses and even youthful matrons in preference to bonnets. One of the novelties in black straw is bound about its brim with puffing of black velvet. It is trimmed very full in front, of high crown with gold net tissue, covered over with black lace and a large cluster of buds and roses, intermingled with straw lilies of the valley and gilded grasses and wild oats, creating a very dressy effect.

One of the eccentric hats has one side in shape of crescent, while the other side is formed like a bent full moon, the extra half standing high above the crescent side, which is filled in with high ornament of a peculiar bird's head and wings and tufts of ostrich feathers. These irregular sides are faced with velvet and the moon portion is decorated with gold gauze ribbon, with velvet stripes, put on in loops and knots.

Ostrich plumes are not often used, still they are sometimes seen on stylish hats, as in one of brown and gold straw, with high crown and brim turned down on one side and up on the other, faced and trimmed with velvet and showing in front a cluster of five tips with one long plume passing over the side of the crown and reaching down to the brim in the back.

Another hat, with rather lower crown and rolling brim, corded at edge of brim with gold, has band of velvet about crown and is trimmed in front with a profusion of variegated velvet leaves, a chenille basket holding humming birds in illuminated hues, one of the charming birds resting upon the handle of the chenille basket.

A charming little bonnet in toque shape is covered with cloth of gold put on full over a frame covered with garnet or red silk, so that the shades are most effective. The brim is puffed and the trimming consists of gauze leaves embroidered in colors and veined with gold, small scarlet flowers, with gold and green leaves and a branch of gilded wild oats standing over the flowers.

For visiting, a becoming bonnet has the front of Alicante velvet in large puff. The crown is formed of net, covered with a lace appliqued, with velvet circles embroidered with gold thread. A large rosette of ostrich tips, flecked with gold and gold aigrette in its center, finishes this stylish bonnet.

Still another odd bonnet has front in V shape. The brim is formed of velvet, laid in folds on inside and outside, each fold being secured by an ornamental gold-headed pin, so the effect is as if the brim was finished with curiously carved gold beads. Inside a cluster of velvet leaves and flowers are arranged, filling the front. The crown is covered with a puff of lace and loops of embroidered ribbon, which also forms strings, are clustered in front and stand up above the crown.—*Philadelphia Times.*

GARDEN CULTURE.

Horse Cultivation Vastly Superior to Hand Culture.

An inquirer wishes to know what garden crops can be cultivated with a horse according to the plan which we recommended on a former occasion, and whether it will not be still necessary to perform much of the labor by hand. He supposes that corn and potatoes are about the only crops capable of horse culture.

In answer to his inquiry, we may state that there are very few crops which may not be cultivated with a horse; and if the garden is quite oblong, with a strip or area at each end ten feet wide for the horse to turn about on, the work may be done rapidly and efficiently, leaving a more mellow surface than can be made with hand culture. First, among the crops which may be thus treated, are all the small fruits. Strawberries in narrow rows, may have two feet space between them for the passage of a fine tooth narrow cultivator. Blackberries and raspberries, pinched down within two or three feet of the ground, and with the side shoots pinched within a foot or so of the main stems, will allow the free passage of the horse, and the operator not be caught by straggling branches or neglected bushes. Gooseberries and currants are of course easily managed.

Nearly all garden vegetables may be **planted in single or double rows, and** require but little hand labor in the rows to keep them clean, as they soon shade and smother all weeds in the rows. Beets and turnips, carrots and parsnips may be easily and cheaply raised in double rows; but when there is plenty of space, and land is cheaper than labor, they may be planted in single drills and require almost no hand labor. Plants with runners, like cucumbers and melons, may be cultivated in the same way through the early part of the season, and the treatment continued longer by drawing the running stems all in the direction of the rows until they become too large and numerous, and after that but little cultivation is needed. Even the smaller vegetables, as lettuce, radishes and onions, may be raised in double rows and cultivated with horse implements, and the frequent cultivation the soil will thus receive will give a finer and more luxuriant growth.

The chief trouble with the old and common mode of cultivating vegetable gardens by farmers is that they are too busy with farm work just at the time when the garden requires attention; the weeds are neglected a week too late, and the whole work is given up. Gardens are pronounced too expensive, and the family is deprived of those wholesome and delicious luxuries which would contribute so much to economy and health. But where the acre of garden is as easily kept clean as an acre of corn or potatoes in the field, there is nothing to prevent a weekly attention to it. The weeds should never show themselves, and the crops having entire possession of the clean, mellow soil, are furnished in abundance and delicious in quality.—*Country Gentleman.*

FASHIONABLE INTELLIGENCE.

Information Respecting Feminine Styles in Metropolitan Circles.

The rage for tinsel is on the increase.

Lapis lazuli is the newest shade of blue.

Parasols have canopy, round and mushroom tops.

Jersey corset covers bid fair to supersede all others.

The jacket is the street wrap for young ladies under twenty-five.

More and more popular grows the jersey jacket, waist and webbing.

The cleft brim bonnet grows slowly in favor with American women.

Upholstery crepes are handsome French novelties for furnishing purposes.

Entire polonaises of black lace are made to wear over black or colored dresses.

Wraps are not worn by little girls unless the weather is cool enough to make them necessary.

Beryl green comes with a bluish metallic lustre among the spring greens in millinery goods.

The short pelerine mantle, short and tight in the back, high on the shoulders and loose in front, is the leading spring wrap.

All tinsel shot, brocaded and threaded stuffs, trimmings and laces are popular, but gold is the leading metal in tinsel goods.

Bonnets and hats having been written about *ad nauseam* this spring, it is only necessary to say that they do not grow any prettier as the season advances.

Gold, silver and other tinsel gauzes are found among the tinsel laces at Ridley's, and are sold in enormous quantities for millinery and decorative purposes.

Velvet or velveteen, in contrasting color with the etamine, or cashmere, or wool stuff of the frock, is used to excess for the cuffs, belts, collars and capes, pockets and parements of children's garments.

One of the latest coiffures sent out from Paris is composed of a mass of short curls, so difficult to execute properly that most ladies who prefer this style of hair dressing buy a curled wig and have done with it. It costs less in the end.

Mushroom parasols are among novelties in this line. They are made of silk canvas, woven gauzes, black, white and colored, and covered with a shirred circle of piece lace, black, white or colored, with a ruffle at the edge to match, or sometimes with a deep flounce of lace, which does duty for both covering and border ruffle. The lace forms a *chou* (cabbage) or tuft at the top, made more decorative by the addition of a ribbon bow and loops and floating ends, the artistic handle being adorned.—*N. Y. Sun.*

—Garlic among the Greeks was held in such abhorrence that any persons who partook of it were regarded as profane. The Romans, on the contrary, gave it to their soldiers, with the idea that it excited their courage, and to laborers to strengthen them.

—It is said that the Spaniard hates trees, and that after an indiscriminate slaughter of them in all the lands he has ever occupied they decline to grow for him.

UNITED States Senator Blackburn says Red Star Cough Cure is safe and reliable.

IT is the feeblest mustache, as well as the sickliest child, that gets the most fondling.

G. M. D.

Walking down Broadway is very pleasant when you feel well, and T—— K—— never felt better than when his friend asked him how he got over that severe cough of his so speedily. "Ah, my boy," said T——, "G. M. D. did it!" And his friend wondered what G. M. D. meant. He knew it did not mean a Good Many Doctors, for T—— K—— had tried a dozen in vain. "I have it," said he, just hitting the nail on the head, "you mean Dr. Pierce's 'Golden Medical Discovery,' or Gold Medal Deserved as my friend J—— S—— always dubs it." Sold by druggists.

CANCER CURED

I have had a cancer on my face for many years. I have tried a great many remedies, but without relief. I almost gave up hope of ever being cured. Dr. Hardman, my son, recommended Swift's Specific, which I have taken with great results. My face is now well, and it is impossible for me to express my thanks in words for what this medicine has done for me. MRS. OLIVE HARDMAN.

Monroe, Ga., Sept. 2, 1884.

I have had a cancer in my right ear for three years. I tried every remedy the physicians practiced, to no permanent good. Swift's Specific has wrought wonders for me. It is the best blood purifier in the world. JOHN S. MORROW, Florence, Ala.

Swift's Specific is entirely vegetable, and seems to cure cancers by forcing out the impurities from the blood.

Treatise on Blood and Skin Diseases mailed free. THE SWIFT SPECIFIC CO., Drawer 3, Atlanta, Ga., or 159 W. 23d St., N. Y.

RIDGE'S FOOD

I ought to know about it." was the remark of a gentleman to his companion, in passing the exhibit of "Ridge's Food" at a recent fair. "I have reared five children on it." Such testimony as this, covering years of time, is better than all arguments. Ridge's Food still maintains the lead as best suited to all classes and conditions of child life.

A Great Benefactor of Women.

Lydia E. Pinkham, of Lynn, Mass., is often spoken of as the great benefactor of women and frequently receives letters like the one we quote from, written by a lady in San Francisco, she says: "I am taking your Vegetable Compound and find great benefit from it. *It has done me more good than all the Doctors.*" Mrs. T., of Vincennes, Ind., writes: "Having taken 11 bottles of your Vegetable Compound and cured by its use, I feel very anxious that every woman afflicted with Womb Disease should make use of it. Another lady in Birmingham, Mich., was suffering from weakness and displacement. She says: "I began taking your Compound and it helped me *so soon*, I feel like proclaiming to the World its great virtues as a healing agent for women."

The Exquisite Pleasure Afforded by Family Re-Unions.

In this broad land teeming with a wealth of natural resources and advantages, there is a lamentable tendency for families to become widely separated as its members arrive at maturity. It frequently occurs that a mother must travel a thousand miles or more in order to visit her several children and their families. The exquisite pleasure afforded by a family re-union is, alas! too seldom enjoyed. Not always is it convenient for sons and daughters to leave their homes and little ones to gather around the old hearthstone. Would that the custom could more frequently be indulged in. On many occasions illness in the family is a restraining cause. Too often the monster disease enters an otherwise happy home, despoiling a parent, afflicting a child. Our duty to ourselves and to our little ones demand that we make good health the one grand study and object of our lives. A terrible master is disease, insatiable and unrelenting. At first with deceptive, alluring ways he gains a foothold, while his victim murmurs "*it is nothing—only a little pain, only a feeling of weariness, only a slight disorder,*" until eventually disease assumes complete control. Fight the monster in the start! meet him at his first approach!! by using DR. GUYSOTT'S YELLOW DOCK AND SARSAPARILLA. It will make you feel fresh, the blood will be made pure and circulate with more vim. Sores and pimples will disappear, the urinary and digestive organs will gain strength and perform their functions without pain, while robust health, strength, freedom from aches, etc., and happy content be the result, and longevity your reward.

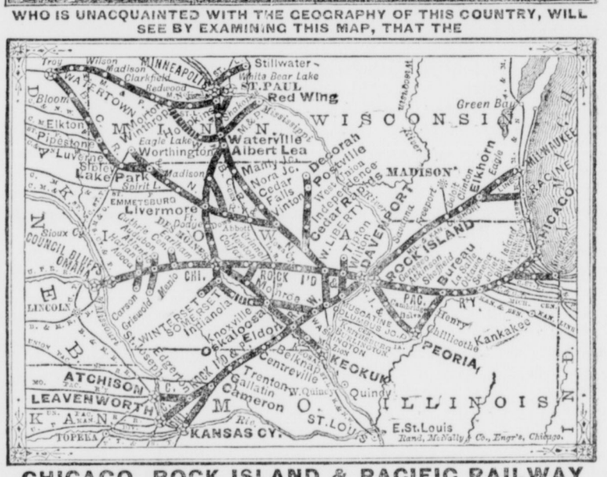
I CURE FITS!

When I say cure I do not mean merely to stop them for a time and then have them return again. I mean a radical cure. I have made the disease of FITS, EPILEPSY or FALLING SICKNESS a life-long study. I warrant my remedy to cure the worst cases. Because others have failed is no reason for not now receiving a cure. Send at once for a treatise and a Free Bottle of my Infallible remedy. Give Express and Post Office. It costs you nothing for a trial, and I will cure you. Address Dr. H. G. ROOT, 183 Pearl St., New York.

$75 a month to salary or commission to agents for THE WORLD'S WONDERS. Write for full particulars. Hist. Pub. Co., St. Louis, Mo.

A MAN

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE



CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.

The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.

THE GREAT ROCK ISLAND ROUTE

Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.

The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.

THE FAMOUS ALBERT LEA ROUTE

Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.

Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.

For detailed information see Maps and Folders, obtainable, as well as Tickets, at all principal Ticket Offices in the United States and Canada; or by addressing

R. R. CABLE, President and General Manager, Chicago.

E. ST. JOHN, General Ticket and Passenger Agent, Chicago.

It is a well-known fact that most of the Horse and Cattle Powder sold in this country is worthless; that Sheridan's Condition Powder is absolutely pure and very valuable. **Nothing on Earth will make hens lay like Sheridan's Condition Powder.** Dose, one teaspoonful to each pint of food. It will also **prevent and cure CHICKEN CHOLERA,** Hog Cholera, &c. Sold everywhere, or sent by mail for 25 cents in stamps. Also furnished in large cans, for breeders' use, price $1.00; by mail, $1.20. Circulars sent FREE. L. S. JOHNSON & CO., Boston, Mass.

Answer This if You Can.

Is there a person living who ever saw a case of ague, biliousness, nervousness or neuralgia, or any disease of the stomach, liver or kidneys that Hop Bitters will not cure?

"My mother says Hop Bitters is the only thing that will keep her from severe attacks of paralysis and headache.—Ed. *Oswego Sun.*

"My little sickly, puny baby, was changed into a great bouncing boy and I was raised from a sick bed by using Hop Bitters a" short time. A YOUNG MOTHER.

☞ "No use to worry about any Liver, Kidney or urinary trouble; especially" Bright's Disease or Diabetes, as Hop Bitters never fails of a cure where a cure is possible ! ! !

"I had severe attacks of gravel and Kidney trouble; was unable to get any medicine or doctor to cure me until I used Hop Bitters. They cured me in a short time. T. R. ATTY.

☞ Unhealthy or inactive kidneys cause "gravel, Bright's disease, rheumatism, and "a horde of other serious and fatal diseases, which can be prevented with Hop Bitters" if taken in time.

"Ludington, Mich., Feb. 2, 1879. I have sold Hop Bitters for four years, and there" is no medicine that surpasses them for bilious attacks, kidney complaints, and all diseases incident to this malarial climate. H. T. ALEXANDER.

"Monroe, Mich., Sept. 25th, 1875. SIRS: I have been taking Hop Bitters for inflammation of kidneys and bladder. It has "done for me what four physicians failed "to do—cured me. The effect of the Bitters seemed like magic to me." W. L. CARTER.

GENTS—Your Hop Bitters have been of great value to me. I was laid up with typhoid fever for over two months, and could get no relief until I tried your Hop Bitters. To those suffering from debility, or any one in feeble health, I cordially recommend them. J. C. STOETZEL, 628 Fulton St., Chicago, Ill.

—"Paralytic, nervous, tremulous old ladies are made perfectly quiet and sprightly by using Hop Bitters.

☞ None genuine without a bunch of green Hops on the white label. Shun all the vile, poisonous stuff with "Hop" or "Hops" in their name.

Bill Nye on El Mahdi.

This great heathen and full-blown prophet was once a poor boy, without a dollar in his pocket. Years ago when little Mahdi used to snare suckers along the White Nile, no one thought that to-day he would be the champion heavy weight prophet of the known world. It shows what can be done by a brave, courageous little boy even in a foreign land.

In appearance he is a brunette of about the style of the successful meerchaum pipe. He does not dress as we do, but wears a white turban that looks some like an Etruscan hen's nest. On chilly days he adds other articles of apparel to this turban, though during the summer months that is sufficient for evening dress. In the morning he puts on his turban, buckles a six-shooter around his waist and he is dressed. It dosen't take Mahdi long to make his toilet.

Years ago he decided that he would retire to a lonely island in the Nile and put himself in training for a prophet, so he crawled into a cave and lived there on whatever he could get hold of. While others were down at Khartoum, having a good time at the skating rink, Mahdi remained in his gloomy cave, setting up the pins to go into the prophet business and murder the king's English.

Some people began to hear of El Mahdi, and as he put a card in all the morning papers of the Soudan, he at once had all the prophesying he could do and had to hire an amanuensis or assistant prophet to help him out. During the holidays, when trade was brisk, the Mahdi had to sit up and prophesy till 10 or 11 o'clock at night.

His real name is Mohammed Achmed, and he was the son of a petty sheik, whose name I have forgotten. This man was an inferior person and a very ordinary sheik, I am told—just such a sheik as you could go in and find on the ten-cent counters of the Soudan anywhere.

Mohammed Achmed for a long time showed one of the prevailing characteristics of a tramp, and so they began to educate him as a fakir. A fakir is a man who has permission to ramble through the country, chiseling people out of money and groceries in the name of religion. He is a sort of Oriental gospel bum, whose business is to go around over the country weeping over the sins of people who are too busy to be hypocrites. These fakirs are always devout, hungry and sad. They yearn for a bright immortality, but they are in no great rush about acquiring it. They are perfectly willing to wait till the Egyptians pullets run out. I am glad that we have no fakirs in America.

By and by Mohammed Achmed got a call to rise up William Riley and gather the clans of the Soudan together. He went to them and told them in confidence that he was the only genuine, all wool prophet on the Nile, and if they wanted some fun, to get their double barrel shot guns and join the gang. They did so. None of them ever did anything at home to obtain a livelihood, so they could go away on the warpath all summer and their business wouldn't suffer at all.

They then proceeded to murder the king's English, who had come there to conquer and acquire their sand pile.

The Arabian style of warfare is peculiar. It consist largely in drinking alkali water on their part and in requiring their enemies to do the same for ninety days. So it becomes simply a question of who has the firmest and most durable Bessemer steel bowels.

No one but a Bedouin would have thought of such a style of warfare. It is not, therefore, a question of courage or everlasting justice, it is a question of who can drink concentrated lye all summer and take his alimentary canal home with him in the fall.

In the battle, the Arab charge is peculiar in the extreme. The Arab does not stand up in line of battle for an hour, while the commanding officer gallops up and down the line on a "heavy" horse and the enemy pours a galling fire into his ranks. He sails up toward the enemy, waves his Oriental night shirt in the Egyptian air, shoots some one and goes away. When the battle ground is examined on the following day, it is discovered that eight hundred brave and handsome English soldiers are killed and one old moth-eaten Arab has stepped on his Gothic shirt tail and sprained ankle.

El Mahdi is not a bad looking man at all, and the report that he has lost his teeth, so that when he gives his orders he has to gum Arabic, is not true.

BILL NYE.

The infliction of an undeserved punishment is not more distressing than to escape the pain and brave the rancour of conscious gilt.

A promise should be given with caution, and kept with care. It should be made with the heart, and remembered by the head.

Geo. Andrews, of Lowell, although salt rheum ulcers covered half his body, was cured by Ayer's Sarsaparilla.

Agricultural Notes.

To make a good water, air and rat proof floor first grade the floor and cover with a concrete of course gravel and hydrantic lime. Melt asphalt and saturate the concrete with it, leaving a thin coat of hot asphalt on the surface, then scatter hot sand over this and beat it firmly.

In building wire fences use more wire. Five strands are much safer than three, and the extra cost is money well spent. Ninety cases of injury in a hundred can be averted by this simple expedient. Put light scantling in place of the top strand to make the fence visible.

On good land, with the same culture as corn, artichokes will produce from 300 to 500 bushels per acre. It is asserted that they yield more hog food than any other crop, and that forty hops may be kept on an acre of artichokes without any other food.

A hill of raspberry plants after being trimmed in the spring should have only three or four canes, about three and a-half feet high, and nearly one inch in diameter at the base, each cane having a few side spurs about ten inches long.

The *American Agriculturist* has a description of a barrel barrow for carrying liquids. A barrel, open at the top, is fitted into the frame of an ordinary barrow with cleats, about one-third being below the top of the frame. It can be advantageously employed in carrying slops to hogs or cattle as well as water for plants.

If farmers would use pure and finely-ground bone at the time of seeding down land, they would be well repaid by the extra yield of grass in other years. Especially is this true on moist land. We have seen this tried and with excellent results Farmers are using bone to a much greater extent than formerly. There is no danger of exhausting the soil by this method.

Vegetable matter in the soil is absolutely essential to the growth of the higher order of vegetation. Where this is wanting commercial manures may be added in any quantity with no appreciable results in benefiting crops. But supply the needed organic matter and the growth and luxuriance of the crops will surprise you. The object of fertilization is to insure an abundance of elements going to form vegetation.

Where stones are in excess in any field, the cheapest mode of getting rid of them is generally to sink deeply out of the way of probable future cultivation. This applies to all sizes, from 10 pounds to a ton or more. But there are many places where good building stone is saleable, often near cities, sufficient to make it really profitable to collect them. Large parts of the west are deficient in stone for building purposes, and with cheap transportation they will pay for carrying a considerable distance.

Wise Words.

Give freely to him that deserveth well, and asking nothing; and that is a way of giving to thy-self.

We may make angels of our own tender and kind and loying thoughts and feelings by letting them fly to others.

Never fear to bring the sublimest motive to the smallest duty and the most infinite comfort to the smallest trouble.

So many women are now doing the work formerly done by men that the male sex is being driven into matrimony as means of support.

Those with whom we can apparently become well acquainted in a few moments are generally the most difficult to rightly know and understand.

Nothing is so great an instance of ill manners as flattery. If you flatter all the company you please none. If you flatter only one or two you affront the rest.

Good health is catching, and all are benefited by contact with healthy people. Ill health is also catching, and the most healthy person is depressed by contact with the sick.

Health Hints.

It is now given out that too much coffee dries up the heart.

Raw oysters are highly recommended as a cure for hoarseness.

For nose bleed, get plenty of powdered alum up into the nostrils.

Intelligence, and energy, and conscientiousness, all united, can never evolve true justice if sympathy be absent from the heart.

A simple remedy for neuralgia is to apply grated horseradish, prepared the same as for table use, to the temple when the face or head is affected, or to the wrist when the pain is in the arm or shoulder.

There is nothing better for a cut than powdered rosin. Pound it until fine, and put it in an empty, clean pepper-box with perforated top, then you can easily sift it out on the cut; put a soft cloth around the injured member, and wet it with cold water once in a while. It will prevent inflammation and soreness.

Garland Hates Doctors.

Washington Letter.

I was told of another of Attorney General Garland's peculiarities by a friend the other day. He hates doctors. Whenever he hears of a friend being sick he takes the trouble to warn him that the medical profession is a humbug, and the only way to be sure of recovery is to let it alone. He says he never had a doctor in his life, and consequently keeps well. But the other day he broke faith. He was taken with a peculiar ailment. At first he thought he was getting fat, but it was all confined to his face and he did not know what to make of it. Directly his jaws swelled out to an immense size and became very painful. He endured it a long time, but finally grabbed up his hat and went to see a doctor who has an office within a square. He said he thought he was poisoned, but had no idea who had done it. "I don't think you are poisoned," said the doctor, after examining his face very carefully. "You've got the mumps." The Attorney General left the office in a rage muttering "Mumps! mumps! I wonder if it isn't cholera infantum! Maybe it's a cancer!" and giving vent to other sarcastic expressions to show his contempt for the whole medical fraternity. But it was the mumps sure enough, and all he could do was to keep out of the way and say nothing about it.

NEW ADVERTISEMENTS.

Miss Nellie Kent,

Wellington, Lorain county, O, writes: "Dr. S. B. HARTMAN & Co., Columbus, O., Gentlemen: I have been a great sufferer from chronic catarrh, bronchitis and neuralgia of the face. I have been taking your PERUNA for one month. The neuralgia and catarrh is almost well, and the cough is much better. I like your PERUNA very much."

C. E. Dupler, aged thirty-four years, of Equality, Illinois, had been affected with a chronic catarrh which he first discovered six years ago. In succession he lost his smell, taste and hearing. The disease was so malignant that it not only attacked the softer parts, but destroyed the bony partition of the nose and seriously affected the external parts. He could only hear a watch ticking by holding it close to his ear. He suffered intense pain in the nose, from which green, dry clots of offensive odor fell. In this condition he presented himself to Dr. Hartman several months ago. He can now hear a watch eight inches from his right and six inches from his left ear. His taste and smell are again returning, and the external part of the nose is quite well. Few more grateful patients ever left a physician's office than Mr. Dupler. He said, "Why in the world was PERUNA not prescribed for me long ago?"

Cramps of the Stomach.

We have the privilege of reporting the following case. Those similarly affected can get the name and address of Dr. Hartman. The lady does not want her name in the papers. For a year, or years, (the writer does not remember the length of time,) this lady had cramps, the most fearful, of the stomach, every day and night, "which would be followed by that terrible weakness, which was something wonderful." The suffering and distress of this lady was indescribable and almost unendurable. After all the physicians and medicines had failed, and all hope had almost fled, Dr. Hartman was consulted, and from the first day of taking his PERUNA, the cramps and all bad feeling left her, and now for over a month has been entirely free from every symptom. A more thankful patient no doctor ever had.

Mr. Boggs, druggist, Charlestown, Kanawha Co., W. Va., writes: "PERUNA sells well here and gives good satisfaction. Customers speak well of it."

Dr. J. Anderson, Coshocton, Ohio, writes: "Your PERUNA sells well and gives good satisfaction. I consider it a splendid medicine."

NEW ADVERTISEMENTS.

TRUSTEE'S SALE!

Under and by virtue of a deed of trust from Thomas Coddington and Cecilia J. Coddington, his wife, executed to me and recorded in the office of the Clerk of the Circuit Court of Garrett county, for the benefit of the creditors of the said Thomas Coddington, I will

ON TUESDAY,

THE 2D DAY OF JUNE, A. D. 1885,

at ten o'clock A. M., at Coddington's Hotel, Oakland, Md., offer at public auction to the highest bidder without reserve the following described property, to-wit: All the right title and interest of the said Thomas Coddington and wife in and to the real estate which was conveyed to the said Thomas Coddington by William P. Totten, executor of Ezekiel Totten, by deed bearing date April the first, A. D. 1881, and recorded in Liber W. H. T. No. 8, folio 502, it being the

HOTEL PROPERTY

where the said Thomas Coddington now resides. The interest of the said Thomas Coddington in said real estate being the equity of redemption, and the said real estate will be sold subject to two mortgages, the first in favor of M. A. R. Carr for seven hundred dollars and payable on the first of April, A. D. 1887. The second in favor of Ida M. Crow for one thousand dollars, and payable on the twenty ninth day of July, A. D. 1887. Said Hotel Property is more particularly described as Lots Number One and Twelve on the plat of Totten's Sub-Division to the town of Oakland, Maryland. Said Lots are improved by a large two-story frame Hotel building, also large stable, ice-house and necessary outbuildings. This is one of the best locations for a Hotel or boarding house in the town of Oakland.

Immediately after offering the above described real estate I will offer in like manner all the

HOUSEHOLD AND KITCHEN FURNITURE

formerly used by the said Thomas Coddington in running said Hotel, consisting of six heating stoves, two cooking stoves and utensils, twelve bedsteads, beds and bedding, large number of chairs, washstands, bureaus, carpets, lamps, hat racks, tables, stands, &c., &c. Table ware, consisting of knives, forks, plates, dishes, &c. One sofa, one marble top center table, also bar-room fixtures, including one large four mirror, one elegant bar counter, stock of whiskey, brandy, wines, gin cigars tobacco, bar bottles and decanters, &c.; also one buggy, one set of harness, fur sheets and many small articles too tedious to enumerate.

TERMS OF SALE:—On the real estate one half cash on the day of sale, and one half in sixty days from the day of sale. On the personal property, all sums of twenty dollars and under cash, all sums over twenty dollars a credit of sixty days, on the deferred payments the purchasers to give their single bill, with security to be approved by the trustee. If the sale is not completed on the said Second day of June, it will be continued from day to day until finished. No property will be delivered until terms of sale are complied with.

JOHN B. BRANT, Auctioneer.

FRED. A. THAYER,
Trustee.

MOTHER SHUCK'S SALVE!

THE TRIED and TRUE REMEDY FOR CROUP, BURNS, CUTS, Bruises, Sores, Boils.

FOR SALE BY ALL DRUGGISTS

A HOME DRUGGIST

TESTIFIES.

Popularity at home is not always the best test of merit, but we point proudly to the fact that no other medicine has won for itself such universal approbation in its own city, state, and country, and among all people, as

Ayer's Sarsaparilla.

The following letter from one of our best-known Massachusetts Druggists should be of interest to every sufferer:—

RHEUMATISM. "Eight years ago I had an attack of Rheumatism, so severe that I could not move from the bed, or dress, without help. I tried several remedies without much if any relief, until I took AYER'S SARSAPARILLA, by the use of two bottles of which I was completely cured. Have sold large quantities of your SARSAPARILLA, and it still retains its wonderful popularity. The many notable cures it has effected in this vicinity convince me that it is the best blood medicine ever offered to the public. E. F. HARRIS."

River St., Buckland, Mass., May 13, 1882.

SALT RHEUM. GEORGE ANDREWS, overseer in the Lowell Carpet Corporation, was for over twenty years before his removal to Lowell afflicted with Salt Rheum in its worst form. Its ulcerations actually covered more than half the surface of his body and limbs. He was entirely cured by AYER'S SARSAPARILLA. See certificate in Ayer's Almanac for 1883.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists; $1, six bottles for $5.

THE REPUBLICAN.

VOLUME 9. OAKLAND, MD., SATURDAY, MAY 30, 1885. NUMBER 14.

NEW ADVERTISEMENTS.

SPEER'S

PORTUGAL GRAPE WINE,

—Also—

UNFERMENTED GRAPE JUICE.

Used in the principal Churches for Communion. Excellent for Females, Weakly Persons and the aged.

ADOPTED IN HOSPITALS AS THE BEST

SPEER'S PORT GRAPE WINE!

FOUR YEARS OLD.

THIS CELBRATED WINE is the pure jutce of the dead ripe Oporto Grape, raised in Speer's vineyards. Its valuable,

TONIC AND STRENGTHENING PROPERTIES

are unsurpassed by any other Wine. Being produced under Mr. Speer's own personal supervision, its purity and genuiness, are guaranteed by the principal Hospitals and Boards of Health who have examined it. The youngest child may partake of it, and the weakest invalid use it to advantage. It is particularly beneficial to the aged and debilitated, and suited to the various ailments that affect the weaker sex. It is in every respect A WINE TO BE RELIED ON.

Speer's Unfermented Grape Juice,

Is the juice of the Oporto Grapes, preserved in its natural, fresh, sweet state as it runs from the press by fumigation, thereby destroying the exciter of fermentation. It is perfectly pure, free from spirits and will keep in any climate.

Speer's Burgundy.

It is a dark rich medium Dry Wine used by the wealthy classes as a Table or Dinner Wine, and by physicians in cases where a dry wine instead of a sweet port is desired.

Speer's (Socialite) Claret.

Is held in high estimation for its richness as a Dry Table Wine especially suited for dinner use.

Speer's P. J. Sherry.

Is a wine of Superior Character and partakes of the rich qualities of the grape from which it is made.

Speer's P. J. Brandy.

IS A PURE distillation from the grape, and stands unrivalled in this Country for medicinal purposes.

It has a peculiar flavor, similar to that of the grapes from which it is distilled.

See that the signature of ALFRED SPEER, Passaic, N. J. is over the cork of each bottle.

Sold by A. G. STURGISS, and by druggists everywhere. Feb. 16'84 1y.

tf 24 DAVID LITTLE.

AYER'S Ague Cure

contains an antidote for all malarial disorders which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE

to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to refund the money.

Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists.

NEW ADVERTISEMENTR.

AYER'S Sarsaparilla

Is a highly concentrated extract of Sarsaparilla and other blood-purifying roots, combined with Iodide of Potassium and Iron, and is the safest, most reliable, and most economical blood-purifier that can be used. It invariably expels all blood poisons from the system, enriches and renews the blood, and restores its vitalizing power. It is the best known remedy for Scrofula and all Scrofulous Complaints, Erysipelas, Eczema, Ringworm, Blotches, Sores, Boils, Tumors, and Eruptions of the Skin, as also for all disorders caused by a thin and impoverished, or corrupted, condition of the blood, such as Rheumatism, Neuralgia, Rheumatic Gout, General Debility, and Scrofulous Catarrh.

Inflammatory Rheumatism Cured.

"AYER'S SARSAPARILLA has cured me of the Inflammatory Rheumatism, with which I have suffered for many years.
W. H. MOORE."

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists; $1, six bottles for $5.

DR. JOHN BULL'S

Smith's Tonic Syrup

FOR THE CURE OF

FEVER and AGUE

Or CHILLS and FEVER,

AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.

BULL'S SARSAPARILLA is the old and reliable remedy for impurities of the blood and Scrofulous affections.

THE STOLEN NOTE.

Except that he indulged too freely in the use of the intoxicating cup, John Wallace was an honest, high-minded and extraordinary man. His one great fault hung like a dark shadow over his many virtues. He meant well, and when he was sober he did well.

He was a hatter by trade, and by industry and thrift he had secured money enough to buy the house in which he lived. He had purchased it several years before for three thousand dollars, paying one thousand down and securing the balance by mortgage to the seller.

The mortgage was almost due at the time circumstance made me acquainted with the affairs of the family. But Wallace was ready for the day; he had saved up money; there seemed to be no possibility of an accident. I was well acquainted with Wallace, having done some little collecting and drawn up legal documents for him. One day his daughter Annie came to my office in great distress, declaring that her father was ruined, and that they should be turned out of the house in which they lived.

"Perhaps not, Miss Wallace," said I, trying to console her, and give the affair, whatever it was, a bright aspect. "What has happened?"

"My father," she replied, "had the money to pay the mortgage on the house in which we live, but it is all gone now"

"Has he lost it?"

"I don't know. I suppose so. Last week he drew two thousand dollars from the bank and lent it to Mr. Bryce for ten days."

"Who is Mr. Bryce?"

"He is a broker. My father got acquainted with him through George Chandler, who boards with us, and who is Mr. Bryce's clerk."

"Does Mr. Bryce refuse to pay it?"

"He says he has paid it."

"Indeed! But the note will prove that he has not paid it. Of course you have the note?"

"No. Mr. Bryce has it."

"Then, of course, he has paid it?"

"I suppose he has, or he could not have the note."

"What does your father say?"

"He is positive he never received the money. The mortgage, he says, must be paid to-morrow."

"Very singular! Was your father—"

I hesitated to use the unpleasant word which must have grated harshly on the ear of the devoted girl.

"Mr. Bryce says father was not quite right when he paid him, but not very bad."

"I will see your father."

"He is coming up here in a few moments; I thought I would see you first and tell you the facts before he came."

"I do not see how Bryce could have obtained the note unless he paid the money. Where did your father keep it?"

"He gave it to me, and I put it in the secretary."

"Who was in the room when you put it in the secretary?"

Mr. Bryce, George Chandler, my father and myself.

The conversation was here interrupted by the entrance of Wallace. He looked pale and haggard, as much from the effects of anxiety as from the debauch from which he was recovering.

"She told you about it, I suppose?" said he in a very low tone.

"She has."

I pitied him, poor fellow, for two thousand dollars was a large sum for him to accumulate in his little business. The loss of it would make the future look like a desert to him. It would be a misfortune which one must undergo to appreciate it.

"What passed between you on that day?"

Well, I merely stepped into his office—it was only the day before yesterday—to tell him not to forget to have the money ready for me by to-morrow. He took me back into his office, and as I sat there he said he would get the money ready the next day. He then left me and went into the front office, where I heard him send George out to bank, to draw a check for two thousand dollars; so I supposed he was going to pay me then."

"What does the clerk say about it?"

"He says Mr. Bryce remarked when he sent him, that he was going to pay me the money."

"Just so."

"And when George came in he went into the front office again and took the money. Then he came to me again and did not offer to pay me the money."

"Had you the note with you?"

"No, now I remember he said he supposed I had not the note with me or he would pay it. I told him to come in the next day and I would have it ready—that was yesterday. When I came to look for the note it could not be found. Annie and I have hunted the house all over."

"You told Bryce so?"

"I did. He laughed and showed me his note, with his signature crossed over with ink and a hole punched through it."

"It is plain, Mr. Wallace, that he paid you the money, as alleged, or has obtained fraudulent possession of the note, and intends to cheat you out of the amount."

"He never paid me," he replied firmly.

"Then he has fraudulently obtained possession of the note. What sort of a person is that Chandler, who boards with you?"

"A fine young man. Bless you, he would not do anything of that kind."

"I am sure he would not," repeated Annie, earnestly.

"How else could Bryce obtain the note but through him? What time does he come home at night?"

"Always at tea time. He never goes out in the evening."

"But, father, he did not come home till ten o'clock the night before you went to Bryce's. He had to stay in the office to post books or something of the kind."

"How did he get in?"

"He has a night key."

"I must see Chandler," said I.

"No harm in seeing him," added Mr. Wallace, "I will go for him."

In a few moments he returned with the young man Chandler, who, in the conversation I had with him, manifested a very lively interest in the solution of the mystery, and professed himself ready to do anything to forward my views.

"When did he return to the house on Thursday night?"

"About twelve."

"Twelve," said Annie, "it was not more than ten when I heard you."

"The clock struck twelve as I turned the corner of the street," replied Chandler, positively.

"I certainly heard some one in the front room at ten," said Annie, looking with astonishment at those around her.

"We're getting at something," said I. "How did you get in?"

The young man smiled as he glanced at Annie, and said:

"On arriving at the door I found I had lost my night key. At that moment a watchman happened along and I told him my situation. He knew me, and taking a ladder from an unfinished house opposite, placed it against one of the second story windows, I entered in that way."

"Good. Now, who was it that was heard in the parlor unless it was Bryce or one of his accomplices? He must have taken the key from your pocket, Chandler, and stolen the note from the secretaay, At any rate I will charge him with the crime, let what may happen. Perhaps he will confess when hard pushed."

Bryce came.

"Well sir, what have you to say against me?" he asked stiffly.

"A claim on the part of John Wallace for $2,000," I replied, poking over my papers and appearing perfectly indifferent.

"Paid it," he said short as a pie crust.

"Have you?" said I, looking him sharply in the eye.

The rascal quailed. I saw that he was a villain.

"Nevertheless, if within one hour you do not pay me $2,000, and $100 for the trouble and anxiety you have caused my client, at the end of the next hour you will be lodged in jail to answer a criminal charge."

"What do you mean, sir?"

"I mean what I say. Pay, or take the consequences."

It was a bold charge, and if he had looked like an honest man I should not have dared to make it.

"I have paid the money, I tell you," said he; "I have the note in my possession."

"Where did you get it?"

"I got it when I paid the—"

"When you feloniously entered the house of John Wallace on Thursday night at 10 o'clock, and took the said note from the secretary."

"You have no proof," said he grasping a chair for support.

"That is my lookout. I have no time to waste. Will you pay or go to jail?"

He saw the evidence I had was too strong for denial, and he drew his check on the spot for twenty-one hundred dollars, and after begging me not to mention the affair, he sneaked off.

I cashed the check and hastened to Wallace's house. The reader may judge with what satisfaction he received it, and how rejoiced was Annie and her lover. Wallace insisted that I should take $100 for my trouble; but I was magnanimous and kept only $20. Wallace signed the pledge, and was ever after a temperate man. He died a few years ago, leaving a handsome property to Chandler and his wife, the marriage between him and Annie having taken place shortly after the above narrated circumstances occurred.—*Truth.*

A Man as Strong as an Ox.

Louisville comes to the front again with the strongest man in the country. His name is John Bernhardt, but he resembles the divine Sarah in name only, though he is a native of Alsace, in the south of France. Bernhardt is a newcomer to Louisville, and is employed in the foundry department of a down town factory, where his feats of strength are daily exhibited to the astonishment of his fellow laborers. He is 27 years old, 6 feet 4½ inches high and weighs 257 pounds and with no surplus flesh. He is not fat, but is the finest specimen of muscular manhood seen here for a long time. A reporter called in to see him and had a short interview with the brawny Frenchman. He is of magnificent build, straight as an Indian. His chest is broad and deep and his chin and cheek bones indicate great strength; but his arms are wonderful, and around the biceps they measure 17 inches. His hands look like bacon hams. His skin is smooth and red, though he never drinks a drop of intoxicating liquor of any kind whatever and was never drunk in his life.

He gave the reporter a few exhibitions of his strength. Taking a piece of iron, which was afterward found to weigh 43 pounds, Bernhardt held it horizontally at arm's length for several minutes. He then raised a huge piece of block iron from the ground and placed it upon the scales. It pulled 864 pounds. Taking a piece of bar iron two inches wide and one inch thick and placing it against his knees he bent it double easily. He took hold of a 42 gallon barrel of water, and balancing himself against a post, he went through the motion of drinking out of the bunghole. He took a piece of seasoned oak about the size of a wagon spoke and broke it with his hands. He did various other wonderful things which demonstrated the possession of most extraordinary strength.

He professes to be able to fell an ox with his bare fist, and often killed hogs in that manner while employed in a Chicago pork-packing establishment. His hands are as hard as wood, and a stroke from one of them would not differ from a stroke of a mallet.—*Louisville Post.*

A BASHFUL BEAU.—"Your beau seems very bashful," said a Dayton avenue mamma to her daughter.

"Bashful!" echoed the daughter, "bashful's no name for it."

"Why don't you encourage him a little more? Some men have to be taught how to do their courting. He is a good catch."

"Encourage him!" said the daughter. "He can't take the most palpable hint. Why, only last night when I sat all alone on the sofa, and he, perched up in a chair as far away as he could get, I asked him if he didn't think it strange that a man's arm and a woman's waist seemed always to be the same length, and what do you think he did,"

"Why, just what any sensible man would have done—tried it."

"He asked me if I could find a piece of string so we could measure and see if it was so. Ain't he horrid?"—*St. Paul's Herald.*

A Remarkable Escape.

Mrs. Mary A. Dailey, of Tunkhannock, Pa., was afflicted for six years with Asthma and Bronchitis, during which time the best physicians could give no relief. Her life was despaired of, until in last October she procured a Bottle of Dr. King's New Discovery, when immediate relief was felt, and by continuing its use for a short time she was completely cured, gaining in flesh 50 lbs. in a few months. Free Trial Bottles of this certain cure of all Throat and Lung Diseases at Nydegger's Drug Store. Large Bottles 50c and $1.00.

A SONG OF LIFE.

Make life long by noble deeds,
Make it sweet by loving;
Walk in paths where duty leads,
Ever onward moving.

Life is short in point of years,
Bitter oft with sorrow;
Dim we look thro' mist of tears
T'ward the dread to-morrow.

It were naught if this be all:
Breathing, sleeping, waking;
Gleam of sunshine—then a pall—
Hearts with anguish breaking.

Were this all, oh! then at best
Life's a withered flower;
Sweeter far to be at rest
From its blighting power.

We may make it what we will,
Grand in strength and beauty;
And with sheaves our bosoms fill
Gleaned from fields of duty.

Make life long by noble deeds,
Make it sweet by loving;
And as day the night succeeds,
Onward we are moving.

—*G. W. Crofts, in Chicago Inter Ocean.*

A VACATION.

How Rev. Mr. Elderberry Employed His Season of Rest.

Reverend Jonas Elderberry had preached in Flintville twenty years, and had never had a vacation. Sickness and death had caused him to use a few Sundays now and then, and after much deliberation, not entirely free from acrimony, the church had decided on each of these occasions not to deduct anything from his salary, a concession which was thought very generous, as he received seven hundred a year, and the parsonage rent free. Still these brief respites from labor were not vacations. Though a quiet man, Mr. Elderberry was not without ambitions and dreams. He sometimes wrote short articles and poetry, which appeared in magazines and newspapers under the veil of "J. E.," and were pronounced by the editors "imaginative." So it was not strange that he often fancied himself and his little wife, Matilda, going on a real vacation, and looking upon the mountains and the sea. But these dreams were like others he had of owning a reliable gold watch instead of the ridiculous silver turnip that ticked away like a town-clock in his pocket, or of owning a home of which he could speak proudly as "my house." In his sober moments—and most of his life was very sober, indeed—he never expected to have any of these dreams realized.

The children that had come to the parsonage had all died in infancy, and perhaps that was the reason that there was almost always some one stopping there. All the cousins came, even to the fourth and fifth degrees, and cousins reduced to their lowest terms, so to speak; and this abundant hospitality cost something, in spite of the fact that Mrs. Elderberry was the maid of all work; and so, notwithstanding the seven hundred a year, and an occasional five dollars from some editor, Mr. Elderberry's only bank stock was a few hundreds in what was called, expressively, "back salary."

Flintville, though an old place, was little more than one long street, lined with white houses, well hidden from the road by honey-locusts and poplars. The Orthodox Meeting-house had received sundry coats of paint, but in other respects was just as it was the first time Mr. Elderberry entered it. The people were conservative, and the orthodox were the most conservative in the place; so they quietly ignored the smart little pine box called "The Church," which had sprung up on one side of them, and the squat brick building around the corner called the Hallelujah Chapel, and resisted innovations.

Rev. Julius Surplice, rector of "The Church," took a vacation in July; but as he was an unmarried man, it was supposed he spent the time with his parents. As for the Chapel, its ministers came and went too often to need a vacation; while in Flintville, as Mr. Elderberry read his sermons, it was known that he wrote them; but any male member of his flock, if asked his opinion of such labor, would have said: "It must be easy enough to sit in the house, and write things out of your head, if you have been to college." As for the women, while they considered sermon-writing too deep for the female mind, they yet considered it something of the nature of woman's work, not a definite business, but an occupation to be taken up at odd moments, as knitting, or patchwork, when nothing more important was going on.

"Nature can not endure everlasting drooping,"

and Mr. Elderberry had twice asked for a vacation without success, when Mr. Whitaker, of Chicago, after doing something very sharp in corn, sent his wife to Flintville to visit her father, Deacon Billings. "I never heard of a minister's preaching through August!" she exclaimed, lifting her bejeweled hands. And the next Sunday the long-desired vacation was granted, although 'Squire Pogg opposed it, saying, if he hired a man to hoe corn, he did not expect him to skip every other row.

"Where shall we go, Matilda?" said Mr. Elderberry, the next morning.

"We!" exclaimed Mrs. Elderberry, tremulously. "It's your vacation, Jonas. I—I don't see how I can leave. There's the hens, and the house, and the missionary bed-quilt; and Cousin Alzina liable to come any day."

"My dear," said Mr. Elderberry, with full eyes, "If I go anywhere you shall accompany me."

Thursday evening came; but Mr. Elderberry had not succeeded in obtaining a cent from the "back salary." He had been asked exactly fifty-two times where he was going and when he would start; and there was in his pocketbook fifteen dollars and seventy-five cents.

"Tilda," he said, coaxingly: "Let's go and see Sister Martha."

Though Mrs. Martha Tucker had been like a daughter in Mr. Elderberry's father's house, she was the child of his mother's sister. She had been married five years when he married Matilda, and had soon afterwards visited them at the parsonage. When she had invited them to come and see her, Mr. Elderberry had always intended to do so; but the Tucker farm was forty miles away across the hills, the stage fare was an item to be considered, and his wife always received his remarks on the subject in silence. Without much thought about the matter, he had concluded that Matilda was prejudiced against his adopted sister, and was secretly vexed; for Martha was the only one of his many relatives who had not demanded some favor of him.

"I don't want to go a-cousining," said Mrs. Elderberry, with unconscious sarcasm.

"You've never had a chance," said Mr. Elderberry, dryly. "But we've *got* to leave town before Sunday. We will only stay a few days, and I think Martha will be glad to see us."

Mr. Tucker's desire to accumulate money, with his wife's desire to be known as a perfect housekeeper, had never been checked by childish fingers, and Mrs. Tucker's naturally unsympathetic temper had hardened into something very frosty indeed. To unpin her nice beds, and have her chairs thrust into new places, above all to have extra cooking going on, and her orderly plans frustrated, irritated her. If she had known her cousins were coming, she would have schooled herself a little; but, as it was, she saw them descend from the stage with ill-concealed dismay, and greeted them with the exclamation: "I never did!" "I wish I had brought my sermon on the fulfillment of the law," said Mr. Elderberry that night to his wife. "Martha says that Zeland Vodecker preaches at East Gypsum. I remember him and I think he keeps up his Hebrew." But the next morning Mr. Tucker hitched up his colt, and with his wife started for the ost office three miles away. It was noon when they returned, so the absence of the sermon on the law was of no consequence. In the meantime, the maid of all work had gone out to visit the wife of the hired man, and, in her hurry, had left the kitchen door open. The hens took advantage of the opportunity, and hopped in quietly till the place was full of them. By some curious instinct, Mrs. Tucker divined their presence the moment she entered the house. "There's folks who wouldn't hear a whole menagerie in the next room!" she exclaimed, scornfully, after a vigorous use of the broom. It's precious few times *I've* ever been away from home; but when *I* have *I've* worked myself to skin and bones!"

At bottom Mrs. Elderberry was a very determined woman, and when she said that evening: "Jonas, I shall take the stage to-morrow for Flintville," her husband knew better than to oppose her. Two days afterward, when he had resolved to follow her, he received the following note from her:

"You must contrive, dear Jonas, to remain away from home the four Sundays. In the Orthodox organ for this week it says: 'Mr. Jonas Elderberry, the pastor of that bulwark of the faith, the Flintville Church, is spending his vacation trout fishing. All our pastors, can not, we know, enjoy this diversion; but let each one draw near to Nature's heart instead of hunting up some pulpit to supply while his church has generously given him time to rest.'

"In the Flintville *Clarion* is the following: 'We have understood from parties qualified, it would seem, to give information on the subject, that our highly esteemed townsman, Mr. Elderberry unless some unusual circumstance should expedite his return, will spend his vacation in the exercise of the piscatorial art.'"

After spending the night in painful consideration, Mr. Elderberry determined to go to East Gypsum, and find a cheap boarding-place, where, free from the distractions that beset the parsonage, he might write out some verses that were singing in his head, and thus pay expenses. He had weeded onions all day Monday, and stemmed currants all day Tuesday, and felt that in a sense he had paid his board. But he was conscious that Mr. Tucker and possibly Martha felt that he was, as they phrased it, "living on them," and to remain longer was impossible.

"I s'pose you'll have a vacation every year, now your church has got started," said Mr. Tucker when Mr. Elderberry announced his intended departure. "You'd better come out in the country again. You can board cheap, or work for your board, if you want to. I'd take ye. I sh'd think 'twould do ye good to git up an' stir 'round after takin' it easy a year."

Arrived at East Gypsum, Mr. Elderberry was directed to the house of Mrs. Mullein, who, it was said, desired one more boarder. He was met at the door by an elderly woman, who proved to be Mrs. Mullein, Senior.

"Board? Yes. Professional man? Yes,' said the old lady, in a high staccato voice, as she led the way up stairs. "We may suit, and we may not. Julia, my son's wife, gives lessons. P'r'aps you'll find out one these days what son's wives are. When she an't banging the piano, or the children ain't, the scholars are. The piano's just under this room."

She opened the door of a torrid chamber.

"There's two sets o' twins, and one odd, and they rampage all over the house. That's Julia's idea of government. The young man in the room back of this is learning the horn, an' when he's home—an' he alwas is evenings—he practices, or reads out loud for his elocution. Probably you want a cool room? Hem! Well! This room'd bake an egg after dinner; fronts west, and there's a tin roof. Another one of Julia's ideas. Our price is eight dollars. I think she wants to rent this room; but you'd better come in later and see her."

Mr. Elderberry did not return to Mrs. Mullein's, and, after long wandering, found a little room in a house owned by two quiet spinsters. But the lot was narrow, and on one side was a melodeon and on the other were four girls and a dulcimer. In vain did Mr. Elderberry attempt literary composition. The melodeon wheezed, while the dulcimer kept up a monotonous: "Pink-a-punk-a-pink! Pink-a-punk! A pink-a-punk! A pink!"

When a week had passed, having only a dollar and four cents left, Mr. Elderberry set out for home on foot. He had on his old clothes, but the ministerial cut was unmistakable, and the old farmer who overtook him, asked, dryly: "Hev a lift, Elder? I'm goin' your way."

"Hev the dumbdest kind o' work a-gittin' help!" he grumbled, when Mr. Elderberry had accepted his offer. "An' I've work for two men in the hop-yard, an' there's a sight o' cowcumbers spilin' to be picked 'fore they're too big for the pickle fact'ry."

"I wish you'd hire me to pick cucumbers," said Mr. Elderberry.

The old man laughed, incredulously; and then Mr. Elderberry told him his whole story, at which the old man laughed again, and engaged him on the spot for a dollar a day.

When Mr. Elderberry returned to Flintville his cheeks were brown and his step was brisk, and he received many congratulations on the good his fishing excursion had done him; but Squire Pogg spent Thanksgiving with friends near East Gypsum, and the next week a committee waited on the pastor.

"We consider you've brung disgrace on us an' the cause," said the Squire, severely, when he had detailed what he had heard. "The bes' thing you kin do is to resign."

When Mr. Elderberry had told the story of his vacation, and had explained that the money he had earned in the cucumber field had part of it gone to swell the church missionary accounts, the committee were mollified; but there was still a rankling feeling that he had disgraced the church. The winter passed, and spring was blossoming into summer, when Flintville was electrified by the news that Mr. Elderberry had a call to Gypsum Center, and was offered eighteen hundred dollars and a parsonage.

"It's all come of that old Scran he worked for on the Mile Strip, last summer," said Squire Pogg to Deacon Harp. "Scran's son 's deacon in the Gypsum Center Church. I seen the old feller last week, an' sez he, I never had a man on the place that put in the licks Elderberry did, sez he; an' when you want to drive your new preacher, Mr. Chubb, out o' town, sez he, send him up to me."

"M-yeh ah!" ejaculated Deacon Harp, with an expressive shake of his head. "If he can't go to his father's, or his father-in-law's, or—some'eres respectable, Mr. Chubb won't git no vacation."—*Elizabeth Cummings, in N. Y. Independent.*

INTRODUCTIONS.

The "Best People" at the Hub Setting Their Faces Against the Custom.

Our "best people" are setting the ban of their displeasure against the custom of introducing people to other people. The social lines, including guests who may be introduced to other guests, are very tightly drawn, and an invitation to people in good society to visit them does not by any means involve the probability of your becoming known to the other guests. This is not taken to mean that you are not at liberty to "scrape acquaintance" with any of the lordly guests if you choose to make the attempt, but simply that the hostess considers it no part of her duty to impose your acquaintanceship upon her other friends. There are some old families here, the bearers of pre-revolutionary names and pedigrees, who carry the absurd new notion to a ridiculous extreme. Many of these families are as poor as church mice, and have no little trouble to scrape along in their shabby gentility, but the way they hold up their social superiority is something truly agonizing. I heard a bright and cultivated young lady telling of her experience under one of these ancestral roof-trees the other evening, and as she is sensible enough to enjoy the absurdity of the whole pretentious custom, it gives her friends no little healthy amusement. At a private musicale a few evenings since one of the young lady guests, who is a social favorite, as well as a remarkably fine amateur pianist, was approached at the close of a brilliant performance by one of the grand and unapproachable dames, who condescended to say: "You play very well. You really must ask some one to introduce you to me!" Needless to say, the presentation has not yet been made. —*Boston Cor. Minneapolis Tribune.*

A FEATHERED BACCHANAL.

Singular Accomplishment of a Milwaukee Canary Bird.

A tiny yellow-feathered canary bird stopped eating hemp seed and began cocking its head on one side, then scratching its bill with one claw, the bird began to sing in flute-like tones, "We Won't go Home 'till Morning." Every note was as true and prompt as a French music box. Despite the animated appearance of the songster, it was so unnatural to hear the roystering song of the bacchanals chanted by a canary, that the bystander looked suspiciously around to find the music box which was playing the tune. The bird belongs to L. D. Stebbins, the watchmaker, on Wisconsin Street, and he explained the *modus operandi* by which the little songster acquired its surprising faculty.

He said that the bird had been bred by himself, being a common canary. The parent birds were chosen with reference to volume of voice and quality. "As soon as the bird was born," he said, "the education was begun. A mouth organ was the educator employed. Beginning thus early it was eight months before the education was completed. The bird can sing 'We Won't go Home 'till Morning,' faultlessly, but there its acquirements end. It has never heard any other song. That tune was played at the bird three times a day on an organ. It is a common canary, and is valuable on account of its superior education, insomuch that I was offered forty-five dollars for it a few days ago. Ignorant common canaries sell for four dollars, which proves conclusively that there is nothing lost by educating them."—*Milwaukee Wisconsin.*

—The difference between an imitation and a genuine amethyst can be easily distinguished. Just put them on your tongue alternately, and you will find that the spurious feels warm and the genuine icy to the touch. The stone which has had the greatest run of late is tiger-eye, which has a peculiar, dull fire. It is only a piece of petrified wood, turned, smoothed and polished. —*N. Y. Herald.*

—And now it is all the rage to paint flowers and landscapes on large, square crackers and render them useless, even for dog feed.

CORKS.

How They are Made and to What Uses the Refuse is Put.

"It's funny what prejudice will do," said Mr. C. M. Fay, the cork merchant. "We are compelled to import every year several thousand dollars' worth of hand-cut corks. These come chiefly from Germany. They are not so good as the machine-cut corks of our own country, as they vary in size and are but approximately round. A machine-cut cork will always fit the bottle it is made for. Yet some of our old German brewers, bottlers and druggists are so prejudiced in favor of the products of fatherland that they will buy hand-cut corks every time. Of course, price may have something to do with it, for it is a peculiar fact, and one showing how cheap labor can get, that those corks, cut one by one by hand in Germany and brought over here, twenty-five per cent. tariff paid at the Custom House, and then sold a little cheaper than our machine-cut corks. The cork business is growing very rapidly. This is a great country for bottled goods, and bottles must be corked with something. There are twenty-three cork factories in the country, but the one in Pittsburgh, of which we are the branch, works up a little more than one-half of all the bark imported every year. Cork, you know, is the bark, not the wood, of the cork oak. All our bark comes from Spain and Portugal. There they keep cork woods. It doesn't kill the tree to take its bark away, and it can be skinned every six or eight years. About $1,000,000 worth of the raw bark is brought to this country every year. There is no tariff on it, but a tariff of twenty-five per cent on the manufactured product. The importations of manufactured corks run about $130,000 a year. The cork has to be steamed up before it is cut. Corks are made in thousands of sizes and grades, from the size of a pin-head up to four meters in diameter. We keep 600 sizes and grades in stock. There's a little cork that sells at six cents a gross, and yet every cork has to be handled three times in the manufacture—once in cutting, once in tapering, and the last time in assorting one grade from the others.

"None of the bark that comes over in the ships goes to waste. We used to burn the refuse, but we know better now. Up between the joists, right under the roof of this building, we have packed fifteen inches of granulated cork. Last summer this upper floor was as cool as any floor in the building. The heat can't get through that cork protector. The palace car builders use the same stuff to pack under the floors of their cars to deaden the sound and under the roofs to keep the heat out. I sold fifty car loads of granulated bark to a certain gentleman to pack under the roofs of his refrigerator cars as a non-conductor of heat. He has saved thousands of dollars in ice by the use of that substance, and has hoped that none of his competitors would catch on to the scheme. But he hoped in vain. The finest of the refuse is used by picture-frame makers in decorations. They sprinkle it on their bronzed or japanned frames. See that picture? Well, this old castle along the Rhine, the rocks, hills, trees, vineyard, flowers and birds—an exquisite landscape, is it not?—are all made from cork, pressed like papier mache. It is a German novelty, and a neat one. Fruit and egg cases, ice houses and ice machines, are often packed with the granulated cork, which costs only two cents a pound."

"We beat the old world at cutting corks, but it is rather strange that America should import tons of straw. Yet we do every year buy immense quantities of straw in Germany in the form of bottle-covers. These covers cost eight dollars a thousand, and they are hand-made. They can not be made for one-fourth the sum in this country until somebody gets up a machine to do it with. We import something like 100,000 of these covers every month. All of these little tinfoil caps for wine and soda bottles come from Paris. A New York firm has tried to compete, but they can't do it. We have 380,000 at the depot, just arrived from Paris to-day. They are shipped in hermetically sealed cases. But this country leads in wooden ware. Perhaps you don't know it, but the best wooden ware maker in the United States, old man Bauerle, carried on business in Chicago for twenty-five years. He is now over in Michigan, in the timber country, making faucets, bungs, bung starters, wooden shovels, cork drivers and vinegar measures and funnels, each out of one piece of wood without joint or seam.

"As for bungs, Cincinnati might properly be called the bungtown of America, as there are made all the bungs used in this country. One factory there ships 200 barrels of bungs every day."—*Chicago Herald.*

The French Cholera Patients.

As one who saw cholera patients for the first time (in Paris), what struck me with most force was the great fear which seemed to lay hold of many of these patients, so unlike anything met with in the ordinary zymotics—such as small-pox, typhus, diphtheria, and the like; the sudden and extreme collapse, the comparative absence of real delirium, and as the later stages come on the shrunken features, the shrunken eyeballs, dark areola round orbit, and the shrivelled, inelastic condition of the skin, so that when pinched and raised up it showed scarcely any elasticity or tendency to retract itself in the normal manner. In one man at the Hospital Cochin this inelastic state was marked even in the convalescent stage. After seeing patients in the collapse of cholera it is easy to understand how it has been possible to mistake patients really alive for dead, so like is the condition to that of a corpse.—*London Lancet.*

—This the Firs Number of The Cast Plow goes to the world under many adverse circumstances it is our first effort at type setting, without a case and a second-hand outfit and not half enough of that, we are our own typo, editor, and "Devil," principally, the latter. When this edition goes to the world and all hands have a whack, at me I will be all "Chawed" and "Mangled" but that does not make any difference. I will have a whole montht to get over it in.—*Farmerville (La.) Cast Plow.*

A CAUSE FOR LAMENTATION.

The Succession of Misfortunes That Is Sure to Descend Upon the Head of a Hatless Citizen.

There is no sympathy for the man who has lost his hat. The most venerable looking man in town may lose his hat in a manner easily explained, but when he walks along bareheaded, even his most intimate friends regard him with suspicion. I have been frequently asked to state the cause of this ill arrangement, but anything like a satisfactory reply would involve so much study that I am afraid to undertake an enterprise placing me under the necessity of such mental strain. The man who has lost his hat always looked as though he had been drunk. He may take off his hat and carry it along, and bareheaded he may walk around in his yard, and he does not sow the seeds which sprout in mischief, take root in malignity and grow up to be weeds of great evil. Any one can at once see that he has not lost his hat. In one instance they see that he has it with him; in the other instance they suppose that he has left it in the house.

Several weeks ago, Rev. Mr. Pitchfield, as good a man and as upright a revivalist as ever lived, lost his hat while looking from the window of a railway train. Being a man of economy, he decided that he would not ride home after reaching the station, and that as he had another hat at home he would not weaken recent collections by unnecessary expenditure.

As he walked along the street people stared at him. "What's the matter with Mr. Pitchfield?" asked a business man, addressing an acquaintance.

"Been drunk."

"You don't tell me so?"

"Man down the street just now told me that the old fellow was rip-roaring. Said that he kicked his hat and then wore it out against a post."

"That's shameful. I didn't know that the old gentleman ever drank anything."

"I didn't, either, until just now. Fellow said that the old man had been a quiet drinker for years. Another man told me that he keeps a jug in his closet."

The morning paper, coming out the following day, contained this paragraph:

One of our most prominent ministers was seen walking along the street yesterday in a beastly state of intoxication. He filled his plug hat with fragments of stone, tied it to a dog's tail and yelled in idiotic delight. His many friends were shocked, and we, in making this chronicle, although we mention no name, are deeply grieved.

The church people became excited and began to make inquiries. Some of the most trustworthy men in town stated that they had seen Mr. Pitchfield going bare-headed through the streets. A committee selected from the unfortunate old gentleman's congregation summoned him. Astonished and indignant, he appeared.

"Brother Pitchfield," said the chairman, "we are greatly humiliated by the report that you were beastly intoxicated yesterday; that you tied your hat to a dog's tail, and that you behaved in a very scandalous manner."

"It is a lie," exclaimed the justly indignant preacher.

"Hold on, brother, hold on; the guilty always fly into a passion."

"I lost my hat from the window of a railway train, and came through the streets——"

"Mr. Clerk," said the chairman, "record the fact that Brother Pitchfield acknowledges his guilt."

"I am not guilty, and I acknowledge nothing but the truth," shouted the minister.

"Also add, Mr. Clerk, that when confronted he became violent and abusive."

"You are a set of scoundrels," exclaimed Mr. Pitchfield.

"Also add, Mr. Clerk, that he slandered the church. Now, sir, you may go. We want no more of your preaching."

No; the man who loses his hat and who goes bareheaded through the streets can make but a poor explanation. This is sad, in view of our freedom, our great institutions; it is just cause for lamentation.—*Opie P. Read, in N. Y. Mercury.*

SUNSET COX.

The Turkish Minister's Grief at the Death of His Mother.

I reached here in time to receive the conscious and precious blessing of my mother on her dying bed. "God unloosed her weary star" so peacefully that it seemed like the unrippled calm of a lake reflecting a serene and cloudless heaven. I could not have gone on my mission abroad with such a dear one in life at home. In one sense I may now go without "dragging each remove a lengthening chain of filial fear." This loss of my mother is the greatest affliction I ever knew. My mother was more to me than words can tell. She is one of the bonds which binds me to Maryland. Thus: My grandfather, my mother's father, was Judge Samuel Sullivan. He came to Ohio in 1804, from New Castle, Del. His grandfather came over with Lord Baltimore. I have heard my grandfather say that he remembered his grandmother counting her beads. These Quaker-Methodists of Northern Delaware and early Ohio, when they immigrated to Ohio, were three generations before devout Catholics. But the change of faith never swerved the ancestral integrity. My mother's father, Judge Sullivan—whose name I bear—was selected as the trustworthy Senator for the office of State Treasurer in 1818, when the treasury had been despoiled, and on his bond was every member of the Legislature. This is one of the incidents I love to recall; and as I lay my blessed mother away to-day I feel an honest pride in her honest ancestry which compensates for many poignancies.—*From Letter to a Baltimore Friend.*

—There are but few instances recorded of death from falling meteoric stones. It is stated that loss of life resulted from a large fall in Africa that about the year 1020 many persons and animals were killed; that 1511, about five o'clock one evening, a priest was struck and killed, and that still later, in 1650, a monk was killed.

IS THE BODY IN THE CRYPT?

Rev. Dr. Charles Hall Thinks Stewart's Remains Were Never Stolen.

Rev. Dr. Charles H. Hall, rector of the Church of the Holy Trinity, of Brooklyn, Sunday officiated at the Church of the Holy Incarnation at Garden City, the Stewart Memorial Cathedral. On his return home he was met by a *World* reporter. The reverend gentleman expressed the opinion that the body of A. T. Stewart is securely resting in the crypt of the magnificent edifice built with his money. Furthermore he advanced the marvelous theory that the body had never been stolen. Notwithstanding the fact that Judge Henry Hilton, the trustee of the Stewart estate, has paid tens if not hundreds of thousands of dollars to detectives for searching for the body, Dr. Hall believes there never was anything to find. The rector of Holy Trinity does not stand alone in the opinion that A. T. Stewart's body has found a last resting place. This conclusion, however, is generally based on entirely different grounds from the simple deduction of the clerical gentleman.

When it was first announced that Stewart's body had been stolen Mrs. Stewart was reported as having said that the Garden City Cathedral would not be built until her husband's remains were recovered. The edifice has not only been completed, but presented to a corporation and handsomely endowed. The Rev. Dr. Hall was chairman of the committee appointed by the Long Island Protestant Episcopal Diocese that reported favorably on accepting the munificent gift. It has also frequently been stated that Judge Hilton paid $50,000 to the grave robbers for restoring the body.

Dr. Hall believes that the whole story of the famous grave robbery was manufactured. It is in his opinion a piece of pure fiction. When asked what motive he thought could have actuated Judge Hilton or Mrs. Stewart to make such an announcement he said:

"There was every reason for its fabrication. Judge Hilton was constantly annoyed by the receipt of anonymous letters, informing him that the body was to be stolen. If such a crime was successfully consummated, the expected reward for the recovery of the body would be so great that the thieves would feel themselves justified in making any outcry to secure it. No guard could be placed upon the body that would not be bribed, and in order to defend the body the story of its having been stolen had to be fabricated. Look at all the reports in the papers at that time. You will find that the story is told with too much attention to details, while the question, How did the robbers make off with the body? is almost entirely lost sight of. No, sir, the supposed robbery was never committed, and some day, and at no distant one either, you will learn the whole story of the supposed robbery. I believe firmly that the body of A. T. Stewart is now in the crypt at the Cathedral of the Incarnation at Garden City."

"How do you account for the fact that the grave was found to have been disturbed and the discovery of the trail over which it was thought the body had been dragged?" asked the reporter.

"That is what I refer to when I say that 'the story is told with too much attention to details,'" said Dr. Hall. "It all had the appearance of having been planned. There is no doubt in my mind that the very fact that so nice and ingenious a story was told betrays its weakness, and places the stamp of falsity on it."

"But Judge Hilton expended $100,000 or $200,000 in searching for the body," suggested the reporter.

"Did he?" interrupted the clergyman. "Has it not also been denied that he ever paid such large sums for such an object? He may have expended a fortune, but that does not break down the theory. It might have been necessary to carry out the original plan and prevent robbery. If the body had been stolen why did not the detectives keep up the search? Why was there not a more sustained effort to find it and gain the reward?"

"Mrs. Stewart is said to have paid $50,000 for the return of the body."

"Is that anything but a rumor?' Judge Hilton and Mrs. Stewart have never acknowledged it. The report has never been substantiated so far as I have heard. No, I think it is all a myth. Some day you will learn that the body lies in the crypt in the Garden City Cathedral."

"Have you any positive information that it is there, Doctor?"

"No, sir," answered Dr. Hall, very frankly. "I know nothing about it, only from such information as I gained from the newspapers. I have talked with my friends about the theory, but never care to obtrude myself by giving publicity to those views. Still I am very positive in my belief. I do not know Mrs. Stewart or Judge Hilton, and I do not know anything about their plans."

"How did you arrive at such a conclusion as you have?"

"I merely did a little mental detective work for my own amusement," confessed Dr. Hall.—*N. Y. World.*

Kindly, But Firmly.

A merchant who had repeatedly dunned a man, sent him a bill of the amount due. In addition to the necessary rule and figure work, the merchant added the following:

"I am becoming tired of the indifference with which you treat this matter, and I desire to hear from this bill at once."

Several days afterward, the merchant received the following, written on a postal card: "Accept my thanks for the bill which you were kind enough to send. I have never troubled you about the matter. When I owe a man it is my disposition to treat him kindly, but firmly. I never hang around him. Well, whenever you haven't anything else to do, send me another bill."—*Arkansaw Traveler.*

—A farmer and his wife went into a dentist's. "How much do you charge for fillin' teeth?" asked the farmer. "From two to five dollars." "An' how much for pullin'?" "Fifty cents." "Mariar," he said, turning to his wife, "you'd better git it pulled."—*N. Y. Sun.*

FOR OUR YOUNG FOLKS.

MY FIRST POEM.

I'm going to make some poetry
About my brother Will.
'Tisn't every one that can make verses, though he try;
To some it's like climbing a very steep hill,
And a slippery hill, too—and perhaps I'll find it so.
But there's nothing like trying—so here I go!

It's a very good day
To say what I want to say;
'Cause I'm shut up at home—and it's snowin' hard;
And I hurt my knee;
For you see
I had a bad fall, 'cause it's very slippery in our yard.
And mother said I mustn't go out
Till my knee got well.
It's just about
Two weeks ago, if I remember, that I fell.

But Will—that's my big brother—
Says one day: "Mother,
I'm goin' out to the Pond to catch some fish."
And mother says to him: "Why, Will, the pond's all froze;
And do you suppose
You can catch anything? my son, I wish
You'd stay at home, and amuse your brother,
Who has got a lame knee
And feels the want of company."

my hideous of brother Will fishing.

But Will did not pay much attention to mother,
But went out to the Pond.
Will is so fond
Of fishing that he broke a hole in the ice,
And fished there nearly all day.
It was very cold, but he seemed to think it was nice,
And 'specially to have his own way.

But the wind was very cold and rough;
And Will wasn't dressed warm enough.
The breezes keen, they blew
And chilled him through and through.
And his fingers were numb and his nose was blue,

Will with a cold in his head.

And his hands were almost froze;
And quite wet were his clothes.
And besides that, he went where the ice was too thin,
And poor Will fell in
Nearly up to his chin!

He didn't catch any fish,
Crabs, catfish, or smelts;
But he caught something else
He didn't at all wish.
And that was a great blue and red
Cold in the head!

Me writing about it.

And now I've told my story
About Will and his glory.
And I believe all I had to say I have said.
But it's very hard, I find,
To make poetry to one's mind.
—"James Mumfries," in *Wide Awake.*

DAISY'S BIRTHDAY.

How They Found Out What She Needed Very Much and Had So Long "'Spected."

Daisy is a little girl who lives in Providence, R. I., and I suppose some of the children who read this story will laugh, and say: "Oh, my! How funny! We knew all about this in the time of it. It was little Daisy Vineron, you know!"

Long before Christmas Daisy had been saying, very wisely: "I 'spect to have a sled, Trismas, and a wax doll." And she called one day on her sister Lou, who was just married, and told her she "'spected the doll would have a pink dress, and she confided to her brother Tom, Lou's husband, that she "'spected the sled to be a green one." So, of course, it happened that, among the many gifts on the Vineron Christmas-tree, Daisy found the expected sled and doll. She was delighted, and danced about like a fairy; but as she loaded her sled with her presents, she said with a little sigh of regret: "Here's my doll and oranges and candy and pop-corn balls and A B C book, but I 'spected someting else."

It was in vain they all coaxed. Daisy kept her own counsel in her own curly head. She often said, however: "It is stwange, because it is someting I need so much."

On New Year's Day another deluge of presents came to surprise the dainty pet. There was a white kitten, with a blue ribbon round its neck; a pair of white mittens, with swan's down around the top; a satin hood trimmed with swan's-down, and, best of all, Daisy thought, one for the wax doll just like it.

"They are beau'ful," said Daisy, "and I fank you, but they wasn't what I 'spected. I 'spected someting else—som'ting that I need *very* much."

Daisy had heard her mamma say: "I do hope the children, in buying gifts for me, will remember my needs this year, for I need certain articles very much." Daisy was coaxed again by brother Tom and by all the other brothers and sisters in vain. She would shake her sunny head and purse up her cherry lips and say: "It's stwange that you can't see for yourselves what I need."

The weeks rolled by until the spring days came, when the sled and mittens and hood where laid away for another winter.

"Daisy's birthday comes this week," said Lou, one pleasant May Sunday afternoon, when all the family were gathered for lunch before returning to church and Sunday-school.

"Is it?" cried Daisy, in excitement. "Don't they give fings to good girls on their birfdays?"

"Certainly," said Tom. "What would you like to have, little one?"

They all suppressed their smiles, thinking the wee darling's secret was out now, but she shook her head gravely, as usual.

"There is one fing I need," she said; "and 'cause I'm afraid you haven't thought yet what it is I will write you a letter about it, and that won't be just quite the same as if I told it, 'cos mamma said she didn't fink it was very nice to tell what you wanted."

Getting a sheet of paper and a pencil Daisy sat down by mamma's desk, and scribbled away until the little zigzag lines covered one whole page. This she handed to Tom, saying, very politely, as her mamma did sometimes, when she had a family letter interesting to all: "Read it aloud, please, Tom, dear." So the laughing young man read:

"Dear Tom, I wish you would bring me a little black-and-tan dog named Pedro."

"Isn't such a word in it!" cried Daisy, so Tom passed the letter to her papa, who read:

"I would like a pair of ear-rings like Kitty Lee's."

"No," said Daisy "I s'posed *you* could read writing, papa."

The paper was passed around the room, each one of the large family reading it differently, but of the fans, parasols, chairs, lockets, bracelets, dolls, white mice, and rabbits. Daisy each time said: "No." When the paper got round to Tom again Daisy took it from his hand with an expression of supreme disgust and looked it over.

"It is just as fine lovely writing as ever was," she said. "But I never shall tell if you can't read it yourselves, when I have written tea-set, *tea-set*, TEA-SET, as plain as day all over it;" and away she ran upstairs in a huff.

She had no idea that her long treasured secret was out, and said, petulantly, as a shout of laughter followed her flying steps: "I don't fink its nice a bit to always laugh when I get vexed."

When, on her birthday morning, she found a doll's chair, and tea-set in the bay window of the breakfast-room, she said: "I should like to know who it was that fought and 'membered what I needed and 'spected ever since a dreat while before Trismus Day."—*Mrs. Annie A. Preston, in Christian Union.*

BETTIE'S BEAN-BAG.

A Kind Little Sister, and What She Did for Her Brothers.

"Please make *me* a bean-bag, mamma!"

Bettie's brothers had a small gymnasium in which some of the neighbors' boys came to play with them, and had great fun with bean-bags.

Mamma took a piece of strong, coarse netting which lay in her work-basket, and sewed it into a bag. Bettie thought it nicer than those the boys had, for when she went to put the beans in they showed through.

When mamma sewed it up she went out to play with it, and found it very nice indeed, much nicer than a ball, for it was easier to catch, and never hurt her hands.

"I do hope every mamma makes a bean-bag for her little girl," she said to herself.

It got dirty very soon, though, with being flung freely about the garden-paths and the dusty porches. Bettie made up her mind it wanted washing, so she laid it under the pump and gave it a good soaking. She thought it looked very much improved, and set it carefully away to dry.

"And I'll wash all the boys' bags," she said. "What a nice little sister they'll think I am!"

No one saw her as she brought them all by turns and gave them a thorough shower-bath, then carried them back to the gymnasium, and piled them up as she had found them.

The next day she went for her bag—but what had happened to it?

It seemed so crowded full of beans that it was as hard as a ball.

"Laws, chile!" said old Dinah, with a smile at her little disappayed face; "don't yer know beans'll allus swell when yer wets 'em?"

"Is it all spoiled?" asked Bettie, looking ruefully at it.

"Mebbe dey'll shrink if yer dries it, but mebbe not."

Bettie laid it on the piazza in the bright sunshine, and went to see what her little brother Ray was so *very* busy about on the lawn.

"Way mow gass," he said, working very hard to push his mother's carpet-sweeper over the green turf.

She tried to help him for a while, but it did not seem to mow well, so she went back to look after her bean-bag. It was harder than ever, and she flung it away and forgot all about it.

Two or three days later the boys came to have "a jolly bean-bag fight," as they called it. A great cry went up from the gymnasium.

"Hello! What in the world's the matter with our bean-bags?"

"I—washed 'em," said Bettie, looking very penitent as the damp, moldy, solid things were brought out.

Mamma laughed very heartily, but not a boy laughed until she had promised to make a dozen new ones.

"What are those coarse-looking leaves growing among the clematis-vines?" asked mamma, about a month later.

"I'll see," said papa. "Bean-leaves," he said, going nearer. "But how could they have got here? I'll root them out."

He hunted about at the foot of the trellis, behind a thick sweet-briar bush.

"This seems to be the root of the matter," he said, bringing out a square muddy mass from which bean-vines were growing.

"It's my bean-bag!" cried Bettie.—*Youths' Companion.*

—There was a remarkable phenomenon in F. W. Walker's pasture, near O'Donnell's mills, says a Benson letter in the Rutland (Vt.) *Herald*. A strip of sod measuring two or three by ten feet, was thrown up as if by a volcano, and water spurted up from the place, it is said, to a height of sixty feet. Many people have visited the place, but nobody can explain the thing.

—The *Popolo Romano* lately printed the following advertisement in English: "A Roman gentleman wishes to marry English, American or German lady. Very serious affair. Apply W. W."

—Ebert County, Ga., has a man who swoons at the sight of blood, no matter where it comes from.

MISCELLANEOUS.

—A large bowlder, weighing about 1,000 tons, was loosened from the top of Shelter Hill Rock, near Bethel, Conn., by the frost and rolled down the mountain side the other day, sweeping large trees and everything before it. The shock was felt for twenty miles around.—*Hartford Courant.*

—It is said that the largest grapevine in the United States grows on the premises of Mr. Madden, in Pike County, Ga. It is eighteen years old, is thirty-four inches in circumference at its base, is a quarter of a mile long, and yields five wagon loads of grapes.—*Southern Trade Journal.*

—Don't take a chew of tobacco just because some of the big boys say it will make a man of you and looks smart. Chewing tobacco never did make a man, but it has been known to make a boy very sick, and will cause him to regret it many a time. It is a mighty good thing to let alone.—*Texas Siftings.*

—Newspapers are appreciated in Washington Territory. The *Weekly Signal*, at Old Yokima, was about to remove to the new town called North Rakin, a distance of four miles, and the office was placed on trucks. That night the whole establishment was blown up with dynamite by the residents of the old town, who were opposed to the removal.

—An old landmark, the building owned by George Swords, in the heart of the city, was torn down in Steubenville, Ohio, the other day. It was the oldest house in the city, the last of the log houses. It was built in 1810. The lot was originally purchased in 1808 for forty-five dollars, sold in 1814 for $265, the following year for $700, in 1816 for $1,750, and in 1872 for $5,000. It was weather-boarded forty-five years ago.—*Pittsburgh Dispatch.*

—The latest freak among the young folks in New York is the "electric party." It is held at any house where there is a heavy carpet, and the fun consists of shuffling rapidly over the floor to generate electricity in the person, and then discharging it through the fingers, nose or lips against some other person or a metallic object. When two well-charged persons kiss the "snap" may be heard in the next room, and when a young man holds his nose near a gas-burner sparks fly from it and ignite the gas.—*N. Y. Tribune.*

—Mr. D. C. Robbins, in his "Annual Review of the Drug Trade of New York," states that in 1884 we imported 1,263,732 ounces of quinine and 2,588,307 pounds of cinchona bark. We are importing more quinine and manufacturing less every year. In 1884 we imported twice as much quinine and half as much bark as in 1882. In 1883 more opium was imported for smoking (298,153 pounds) than for all other purposes put together. The large duty placed upon this form of opium reduced the import for 1884 very considerably.

—From recent surveys it has been ascertained that the entire city of Virginia, Nev., has moved over thirty inches to the east since the big fire of 1876. The Maynard block, in Golden Hill, is known to be gradually sliding down in the direction of Gold Canyon, and has moved nearly two feet since its erection. This movement is so gradual that it does not affect in any manner the safety of the building, as the ground to the depth of nearly one hundred feet to the bed rock is known to be continually sliding. It is a well-known fact among practical miners that the ground on which Virginia City is built is what is termed a slide, and that it is necessary to sink nearly one hundred feet before finding the natural bed rock. These slides are caused by the constant crumbling of the rocks on the mountain sides.—*San Francisco Chronicle.*

A NEW SEAL.

The New Device Which Authenticates All Governmental Documents.

The new die for the great seal of the United States, which was received at the United States Department of State on April 21, and has been used on commissions since then (the first on which it was used being that of Mr. Jordan, the new Treasurer of the United States), is only the third one accepted for and used for the purposes designated by the law which ordered it in 1789, and which readopted the design first ordered in 1782, since the latter date. The new die which conforms more strictly to the letter of the law designating what the national coat-of-arms should be than did its immediate successor, which was made in 1841, and is more aristocratic than that of the first die made, all three of which are now in the Department of State, and which I have lately compared, cost, including the massive mahogony case, and the press for making the impression on papers, and the die itself, one thousand dollars. It was ordered a full year ago, and was made by Tiffany & Co., in New York. Its case is five feet eight inches high, and about half as wide and deep. The original die had thirteen arrows in the eagle's talon, as the law expressly stipulated, but when, in 1841, the old one having become worn, a new one was made, somehow it happened that only six arrows were put in the eagle's talon. Nevertheless, the seal was accepted and used until the new one arrived, with all the arrows the law required, on April 21. So now we have our national quiver full of arrows. But, better still, the new seal can, by a special arrangement of the machinery, cause the eagle's head to turn in any direction a treaty may require when its impression is to be stamped upon one. With the old one great difficulty was often experienced in attaching our stiff-backed national bird to cumbersome documents such as a treaty, as it would sometimes be found, after the impression was made, looking west, when he should look east, or north when he ought to fix his unterrified gaze on the south, or, worse still, he might come out in the treaty literally standing on his head. Now, thanks to the mechanical ingenuity of the manufacturer, we have a patent reversible quadruplex, back-action, fan-tailed American eagle, warranted to gaze at any point of the compass our foreign policy or domestic interests may demand. Whether this symbolizes the policy of the State Department under this administration or not is to be seen.—*Washington Post.*

A PARISIAN DINING ROOM.

One of the Extraordinary Restaurants o the Gay Capital.

The other day, bearing always in mind the present high estate of King Demos, I began a series of observations of his Majesty's kitchen and table service. The glorious Emperor Charles Quint, I had read, used to have for his dinner a whole roasted pig served up on a golden dish. What does that many-headed emperor, the sovereign people, have for dinner? Under the very shadow of the people's palace, in the Rue de la Verrerie, I found Demos' table spread. At the end of a black and sooty courtyard men and women were passing in and out through swinging doors. On one side of the doors was the tariff: Plate of meat, twenty centimes; wine, twenty centimes; soup, bread, vegetables, and dessert (!), each ten centimes. On the other side of the doors were placards, one stating that it was forbidden to bring bread, meat, or drink into the room, and another stating that the table utensils were placed in the safe keeping of the public: "Les verres, couteaux, fourchettes, et cuilleres sont places sous la surveillance des honnetes citoyens."

To the right of the doors outside is a ticket-office, where you buy as many two-sou zinc checks as your purse and appetite permit. I took five, and followed the crowd. Each one, as he entered, stooped near the door and snatched a glass out of a basketful that stood there. Then, bearing leftward, he approached a wire grating, through which is seen an immense kitchen and furnaces charged with huge cauldrons holding hogsheads of steaming food and running on rails. This grating is pierced with five little trap-doors; at the first is sold soup; at the second, boiled beef and cabbage, sausages, herrings and greasy stews; at the third, beans and lentils; at the fourth, dessert, consisting of stewed prunes, jam, cheese and bread, of which you get about half a pound for your two-sou check; at the fifth you can buy one-third of a litre of very sour *piquette* wine, or the same amount of cider for two checks. Each diner makes his choice, and gets served at the different trap-doors, takes a knife, fork and spoon out of a basket, and with his bread under his arm, his soup in one hand and his plate of meat in the other he goes and sits down wherever he can find a place, and eats in peace. The room is apparently a courtyard, over which an iron roof has been thrown; at one end is a fountain and at the other a bust of the Republic, with the words "Paix," "Travail," "Concorde" on the pedestal; on the walls are big painted maps of the departments of France, and here and there notices, "No smoking," "Aidez-vous les uns les autres," and a request to give up your place as soon as you have done eating. The floor is paved with red quarries; the chairs are of Austrian bent wood, and at the long, narrow marble-topped tables there are seats for 300 people. There are no waiters, no overseers; the only servant in the whole room is a man who strolls round with a basket-truck into which he collects the dirty plates and knives which each one leaves on the table when he has finished eating.

Here, indeed, you see all sorts and conditions of men—workmen, washer-women, beggars, organ-grinders, clerks, shop-girls of low degree—all degrees of poverty and misfortune. Many come in without buying checks, and loaf around on the chance of picking up scraps. After tasting my plate of stew (apparently composed of horse-meat, potatoes and thick, dark gravy), I concluded that it was too greasy, and laid down my knife and fork for a moment. Suddenly an arm was extended over my shoulder, and a hoarse voice whispered in my ear: "Citoyen, vous ne mangez plus?" and, almost before I had time to reply, my plate had disappeared. Nobody seemed to think the phenomenon strange, and after further observation I noticed that it was quite common. Pieces of bread, half-finished bowls of soup, lumps of cheese, were being constantly appropriated by the hungry, so that the dish-collector found only clean platters and no leavings. As I was sitting and meditating over this truly democratic dining-room, a man and a girl came in, sat down and began to exchange remarks and criticisms as to the fare and those who were partaking of it. "Ce sont des curieux," said one woman in a drawling nasal voice to her neighbor at my table; "ils rigolent a present." And her neighbor replied in a loud voice, so that the young couple could hear, "On devrait assassiner des gens qui se moquent d'une misere pareille!" The young man and his companion disappeared promptly after this hint, and we all went on eating in the most orderly manner, what little talking there was going on in a low tone.

The portions at this Pension Alimentaire, which is a specimen of several similar establishments in the populous quarters of Paris, are bountiful, but the food is naturally of the coarsest kind and horribly greasy, and the sour wine is not calculated to fill the heart of man with joy. Never have I seen a more gloomy and depressing sight than these 300 indescribable waifs and strays of humanity silently eating their miserable dinner. And to think that this one establishment feeds from 2,000 to 3,000 people a day! Still, even here there is progress to be noted; each man serves himself, there is no spying and overlooking, and no suspicion. It is not like a popular restaurant which I visited some years ago, near the Place Maubert, and frequented by masons and other workmen. This was a long room with an earthern floor; the table was simply a beam resting on legs of masonry, and hollowed out at intervals. In each hollow was a tin bowl nailed on to the wood. You walked in, sat down at the table, and a great stalwart waiter-woman immediately came up armed with a syringe full of soup, which she squirted into your bowl. But if you hesitated a moment to pay the nine sous which was the price of the dinner of soup, meat and cheese, the stalwart waiter-woman simply sucked back the soup into her syringe and walked away without a word. And this is how the sovereign people of Paris dine, and this is why Demos has to send round the hat for himself.—*Paris Cor. London World.*

A CENTENARIAN.

Interesting Account of a Connecticut Woman 103 Years Old.

Mrs. Clarissa Davenport Raymond, of Wilton, Conn., completed the 103d year of her age recently. When a reporter of the *Times* called and was presented to the old lady she shook his hand cordially, and was as ready to talk as the reporter was to listen. She remembered all about an interview with the writer last year, and although another year has been added to her remarkable age there was no perceptible change in her appearance. She wore a black cambric dress, a small light-colored shawl was thrown carelessly over her shoulders, and a white lace cap set off her features to advantage. During the interview Mrs. Raymond was seated in her old arm-chair, while she grasped the long birch staff which she uses when walking. The staff is fully six feet long. Mrs. Raymond is a ready and fluent talker, and nothing pleases her more than to narrate reminiscences of her early life to a patient listener. She is a member of the Congregational Church, but the last time she attended service was on the communion Sunday following her one hundredth anniversary. She has not been able to ascend the stairs during the last four years. Her sleeping apartment is on the first floor. Up to a year ago she insisted on taking care of her room and dressing herself without assistance. Last fall she was able to walk around the yard assisted by her grandson, but during the winter the old lady has remained indoors. She eats with relish three meals a day, and retires to bed and rises with the regularity of clockwork. Mrs. Raymond never drinks anything stronger than tea or coffee and has scarcely been sick a day during her long life. Within the past year her sight has become dim and her hearing has failed. The beginning of her one hundred and fourth year finds her mind clear, her memory as distinct, and her physical strength apparently as good as when, three years ago, she celebrated her one hundredth birthday. Up to a year ago Mrs. Raymond was able to read coarse print, but she has abandoned the custom, and her children now read to her.

Mrs. Raymond was born in Stamford. When Washington died she was seventeen years old, and she frequently relates incidents which occurred during his lifetime, of the War of 1812, and of the several wars later on. In 1804 she was married to Samuel Raymond, and removed to Poundridge, Westchester County, in this State. During the war of 1812 she removed to Hester Street, in this city, which was then little more than a country lane, and was considered outside the city. Mr. Raymond died in 1816, and his widow removed to Wilton, where she has since resided, making her home with her only daughter, Mrs. Comstock. Mrs. Raymond was the mother of five children, of whom the youngest, aged seventy-nine years, and widow of the late Nathan Comstock, is the only one living. In 1882 the family group, including five generations, was photographed, Mrs. Raymond forming the central figure. In that year also she did considerable knitting, repaired her own clothes, and wrote her name very legibly. Mrs. Raymond is a lineal descendant of the Rev. John Davenport, who was born at Coventry, England, in 1597, and who preached the first sermon ever delivered in New Haven. This was on April 16, 1638, under an old oak tree which stood at the corner of George and Church streets. The tree was cut down by the Rev. Henry Ward Beecher and was used for firewood in his shop on George Street. Mrs. Raymond is of a genial disposition and rarely forgets a face. When asked recently as to her health, she said: "Well, I believe I am getting old." The esteemed lady has no lack of visitors, many persons calling simply from motives of curiosity. She has a pleasant word for every one and appears to enjoy life.—*Hartford Times.*

MANIFEST DESTINY.

Russia and America Likely to Divide the World Between Them.

Suppose the dream of Russian ambition in the East should be gratified and Persia, Afghanistan, and British India fall under her power, the next step would be the conquest of China. The Czar would then rule over half the human race. The child is living who will probably witness this vast extension of Russian power. The British are detested by the Hindoos, who will welcome any change, not indeed so much that they have been badly governed as on account of the humiliations to which they have been subjected by the British authorities. Natives are allowed to fill but few, and those the minor offices of trust or honor in Hindostan. The principal ones are all filled by importations from the United Kingdom. Hence there is no opening for the ambitious youth of the great Asiatic peninsula. And hence the desire is universal to throw off the British yoke. The appearance of a Russian army would be the signal for a general rising, and the comparatively small British army would soon be overwhelmed. It is not at all likely that change would better the condition of the Hindoos, for it would probably be merely a transfer from King Stork to King Log. Still it must be confessed that Russia has proved to be a great civilizing power in Central Asia. Law and order has been introduced in a vast region of the earth's surface heretofore given over to turbulence and semi-barbarism. The Czar's government, judged by Western ideas, is not up to the most advanced standards, but it is admirably suited to bringing under control the wild tribes that have heretofore placed Central Asia outside of all civilizing influences. Any government is better than no government. But the situation of affairs is such that for many long years to come the news from that quarter of the globe will be eagerly scanned by Americans. There is a strong bond between Russians and Americans. It is believed somehow that they are eventually to divide the world between them. Both are growing powers—increasing in number and extent of territory at a swifter rate than any other of the nations. Some time in the not distant future we shall be supreme in this continent.—*Demorest's Monthly.*

SCHOOL AND CHURCH.

—The Seventh Day Adventists seem to be gaining in strength in New York. They have recently established missions in New York, Buffalo, Albany and Syracuse.

—Bismarck will devote $12,000 annual interest on his national birthday gift to establishing charitable foundations for students in universities for the study of philology.

—During the year there have been three hundred additions to the Baptist Church from the Cherokee Indians, making the total membership 2,000. There are 6,000 members of the denomination in the Indian Territory.—*San Francisco Call.*

—The *Christian Advocate* says: "A reasonable estimate justifies the opinion that more than 40,000 persons have professed conversion during the past three months and joined, or are intending to join, the Methodist Episcopal Church.

—Linear drawing has been introduced, by recent enactment, into all the elementary schools of England. The theory is that a knowledge of this kind of drawing is useful in almost every kind of trade or handicraft.—*Chicago Current.*

—The $1,500 required to complete the $25,000 for the Parsonage Building Fund of the American Congregational Union, for comfortable dwellings for home missionaries on the Western frontier, was contributed by the Clinton Avenue Congregational Church, Brooklyn, after an appeal by Rev. Dr. Taylor, of the Broadway Tabernacle.—*N. Y. Times.*

—At a colored church on the outskirts of the city Sunday afternoon the preacher notified the congregation that he must have $5 before he would preach. The hat was passed round, and when returns were made $3.50 was in the pot, whereupon the preacher said he must have $1.50 more before he would preach. The hat was passed around the second time and the $5 made up, when the congregation was treated to one of the best efforts of the pastor's life.—*Columbia (S. C.) Register.*

—The education of the Chinese in San Francisco is a problem that presents manifold difficulties. The board of education of that city have provided a school-room and a teacher, but it is found that the wealthier Chinamen object to having their youngsters associate with the offspring of the rabble, and they are opposed also to the co-education of the sexes. So far but one pupil is promised for the new school, which entails an expense of $40 a month for rent and $90 a month for the teacher.

—President Eliot says that, without special extravagance or fast living in any way, a Harvard student can easily spend $800 a year, and some get rid of much more. A calculation of the average expense at twenty-five of the principal colleges, according to the statements of their respective catalogues as to price of board, tuition, and general expenses, shows that it is a trifle over $500. An average college education, then, costs $500 a year, or $2,000. Of course, the thing can be done for less than this. Tuition may be remitted by the gaining of a scholarship, and a young man who is determined to support himself may do so in whole or in part by teaching and other work.—*Boston Journal.*

PUNGENT PARAGRAPHS.

—Earthquakes in North Japan are more numerous and severe in winter than in summer.

—A Milwaukee editor committed suicide because he was in debt. It is such an unusual thing for an editor to be in debt that he could not stand it.—*Boston Post.*

—In one issue of a Utica, (N. Y.) paper recently were accounts of no less than four suicides, two of which were ascribed to despondency over the loss of wives, and a third to the interference of a young man's family in his love affairs.

—Emma Nevada, the sweet singer of the Sierras, kissed three hundred girls before leaving San Francisco, and complains that it made her very tired. Served her right. Why didn't she hire a cheap young man?—*Burlington Hawkeye.*

—A man never begins to find out how little he knows about domestic matters until his wife asks him to keep his eyes on the baby and to see that a pan of melted butter is kept stirred while she goes into the attic to look through her rag bag.—*Cape Ann Advertiser.*

—A ministerial acquaintance thinks that he alone should decide what hymns are to be sung during service. He thinks that the choir should have no voice in the matter. They haven't in very many churches—that is to say, any voice to speak of.—*Christian at Work.*

—The life of a woman in Italy who was recently buried beneath an avalanche was saved by a hen. The account does not specify how this was done, but we presume the woman had a corn, and the hen in scratching for it dug her out.—*Rockland Courier-Gazette.*

—Emerson says: "All the world loves a lover." That may be true, but wide observation has taught us that the love of all the world doesn't make the lover any more contented so long as one little snip of a seventeen-year-old girl says that she can be to him only as a sister.—*Somerville Journal.*

—Clara (shyly)—Of all the months of the year, George, dear, which do you think is the happiest one for lovers? George (of a thrifty nature)—May is the happiest because it is the cheapest. Clara—Cheapest? How? George—It is too late in the season for oysters and too early for ice cream.—*N. Y. Times.*

—The other day, a reverend gentleman, addressing his lawyer companion at the fire, said he didn't see "why a stable should catch fire in the middle of the day when there was no fire-place or stove in connection with the building." Whereupon the legal friend replied: "They may have kept a fiery horse in there."—*Chicago Journal.*

—"So you are a stenographer?" "Yes, sir." "I should think it would be very difficult to take down everything a speaker says." "It's not so hard when you understand it. I was reporting a speech the other day, and I thought I would just try and see how fast I could report, and, will you believe it, none of the speakers could follow me!"—*Texas Siftings.*

SATURDAY, MAY 30, 1885.

Major Peters, editor of the Watseka *Republican* and member of the Illinois legislature, when assured of Logan's election as senator, telegraphed his friends from Springfield, "Logan is elected. Paint my old home red." The boys took him at his word, and, showing the message to Mrs. Peters, gained her consent, and forthwith the entire male population turned out, and, procuring the brightest red paint imaginable, painted the house, barn and outhouses scarlet, roof, chimney, and all, not sparing even the fences and tree trunks.

The Locust Plague.

WASHINGTON, May 25.—Professor Riley says of the seventeen locusts, whose visit is predicted, that they are harmless to growing crops and do no injury except to the twigs of forest and fruit trees. Whenever young orchards have been planted on land which has been cleared during the last seventeen years trees are liable to suffer, but it is probable that a kerosene spray upon the trees will protect them. The ordinary locust which is so destructive to growing crops has jaws which cut, while the seventeen year species, more properly called the cicado, has only a beak through which he suck his nourishment.

Our Washington Letter.

From Our Regular Correspondent.

WASHINGTON, D. C., May 25.

The district of Pennsylvania from which Mr. Samuel J. Randall is sent to Congress every two years, is said to have a majority of Republican voters beyond that of almost any other district in that great Commonwealth, but there are business interests of the people in the district that make it imperative that Mr. Randall should be designated to attend to, and right well has he attended to them. The Legislature has recently redistricted the State, and having let Mr. Randall's district alone, his Congressional career is assured for at least another decade. Under the apportionment, the Democrats have peen given eight districts, the Republicans take eighteen, and the other two are left to the chances of manipulating influences. In the last Congress the Democrats had 12 of the 28 districts, and the loss of the 4 is simply a sacrifice made by them for the sake of keeping Mr. Randall before (and behind) the people. It is also a suggestive fact that while Mr. Randall's district is overwhelmingly Republican, Mr. Kelley's Democratic pig-iron constituents, were they disposed, could relegate him to private life upon party issues by a majority quite as large as that which could down Mr. Randall upon distinctive party lines. But nobody entertains a thought of having a Congress without its Pig-iron Kelley, any more than a Congress twenty years ago could be expected to draw its breath without a Washburne to help it.

One of the usual Demscratic blunders is that which resulted in the election of General Logan to succeed himself as United States Senator from Illinois. With the Legislature a tie, and Republicans in the body whose antipathy to Logan had already kept him out of an election for very near five months, it needed only Democratic success in one of the strongest Democratic districts in the State, to not only prevent Logan's election, but to ultimately insure the success of some Democratic candidate, by the election of a successor to Mr. Shaw. Relying with the utmost confidence upon their strength in the district, Mr. Morrison hies himself away to Washington to see after the distribution of official pap, leaving the only assurance to Democratic success to the hands of such master Republican politicians as "Long" Jones, Dan Shepard, Ame Babcock and ex-Postmaster Palmer. These men went down into this Democratic stronghold, organized their forces in the dead of night, held them in reserve at every balloting place in the district until after 3 o'clock in the afternoon, lest the enemy might suspect their intentions, and when the vote was counted that night they had carried off their Senatorial prize by a round majority. At 1 o'clock on the morning after Logan's election, the President's ears were greeted with the thunder of 38 guns, fired under the very windows of the White House.

JUNIUS.

From the Baltimore American.

The Revised Old Testament.

Public interest and curiosity have at last obtained the means of satisfaction. The revisers have completed their arduous labors on both the Old and the New Testaments, and their published results are now before us. Great and important is the influence which the revised Bible is destined to exert; conservative and careful the method and spirit of the revising companies. The work itself certainly testifies to the consistent application of the first general principle laid down for the guidance of the companies, "To introduce as few alterations as possible into the text of the authorized version, consistently with faithfulness." There is evident throughout a determination to yield as few points as possible to the opinions of a rapidly increasing liberal class, who regard the exact English rendering of the Hebrew original of more importance than the particular interpretation of any school or denomination; men who, having nothing to gain or to lose by a false translation, prefer to give the sense of the text literally rather than in language which interprets at the same time it translates, for we must know that the translator is compelled to be an interpreter in all those places in which the accepted rendering is grammatically no more to be preferred than many suggested and different renderings. Thus, for instance, in the opening verses of Genesis—"In the beginning God created the heaven and the earth," "And the earth was without form and void; and darkness was upon the face of the deep"—the revisers have translated: "In the beginning God created the heaven and the earth," "And the earth was waste and void; and darkness was upon the face of the waters." Now, we are fully aware that the correct translation of these verses has for centuries been a cause of bitter controversy, and we are also aware that the authorized translation has been a serious obstacle to belief in Revelation to men like Herbert Spencer, Thomas Huxley and others, who find no evidence in nature of the so-called "carpenter" theory of creation. It can no longer be disputed that a faithful and accurate rendering of the Hebrew would also allow "In beginning God formed the heavens and the earth; for the earth had been desolation and emptiness." This would avoid the inference that the creative act was instantaneous, would leave the origin of the earth's matter unrevealed, and would deprive the argument against the reliability of the account of much of its effectiveness. Nor does this translation lack defenders. Professor Taylor Lewis, the translator of Scribner's edition of Lang's Commentary, says that this is not only linguistically possible, but that is is preferable to the other. Professor Sayre, of Oxford University, England, makes this improvement on the accepted version a test of accurate knowledge of the Hebrew verb. He says: "What fresh vividness is given to the picture! God hewed out the heaven and the earth; now the earth had been waste and desolate." The Hebrew of "create" means originally to hew trees, to clear a forest; and its more abstract meaning, "form," "make," is a secondary and derived meaning, just as the word for "reveal" primarily means "to uncover." So, in all languages, the concrete and material meanings of words are primary, and the abstract and figurative secondary. In Genesis i., 20, "Let the waters bring forth abundantly the moving creature" has been retained by the revisers, and "Let the waters swarm with swarms of living creatures" introduced into the margin. The latter reading is plainly the correct one, and why its insertion into the text was not found consistent with faithfulness is not explained. We are glad to notice the change made in Genesis ii., 5, "No plant of the field was yet in the earth, and no herb of the field had yet sprung up," instead of the authorized reading that God made "every plant of the field before it was in the earth, and every herb of the field before it grew." This verse as revised enables us to see in the English text some evidence of the documentary nature of at least this portion of Genesis. A comparison with i., 2; "Let the earth put forth grass, herb yielding seed," etc., will clearly show that there is something that seems to favor the theory that more than one author composed the book. In chapter iii., 15, "Between thy seed and her seed; it shall bruise thy head, and thou shalt bruise his heel," the exchange of "he" for "it" is an excellent example of interpretation and translation at the same time. Either would fairly represent the original; but, as many sincere Christians have thought that "he" referred to Christ, and that the firs Messianic prediction was made to the serpent, the revisers are to be highly commended for making the change. As Hebrew has only two genders, all English neuter nouns are either masculine or feminine in Hebrew, and require in English a neuter pronoun, in Hebrew either a masculine or feminine. "*It* shall bruise thy head" can only refer to the collective posterity, "seed" of the woman, and not to any single individual. In Genesis x., 21, Shem is called "the father of all the children of Eber, the elder brother of Japheth;" but the marginal "the brother of Japheth, the elder," is in accordance with the order of the Hebrew words, though by it the Hebrews, the descendents of Eber, lose the honor of descent from the first-born. Respect for the Hebrew nation does not require a departure from the plain sense of the Hebrew language.

In Genesis xi., 3, it is to be regreted that "Go to" was not replaced by "Come," which is less obsolete and better understood. Joseph's coat, Genesis xxxvii., 3, is still one of "many colors," and Joseph himself "the son of his (Jacob's) old age," although this full rendering of words is scarcely permissible, "coat of pieces" and "son of old age" would be more literal and equally expressive. The margin explains, "a long garment with sleeves," which would require the translation, "coat of extremities," meaning a coat that extends to the wrists. But, to retain "son of his old age" as applicable to Joseph, is to forget that Benjamin was the youngest son of Jacob, and Joseph's natural brother, and was, therefore, the son of Jacob's old age, if any was. The literal "son of old age" carries with it the meaning that Joseph was a precocious youth—had an old head on young shoulders. The Jews themselves in the Targum of Onkelos, explain "a wise son," and with this the history of Joseph's dreams, abduction and exaltation in Egypt is entirely consistent. The first occurance of "Sheol" is in Genesis xxvii., 35, where the new version retains "grave," explaining in the margin that it is "the name of the abode of the dead." This accompanying note is inestimable in its importance to a better and more intelligent reading of the Bible. Many well-meaning Bible readers have been puzzled to understand its application in those places in which sheol is "hell" in the accepted version. In only one instance—Isaiah xiv., 9,—is "hell" allowed to remain, and in this place, as is explained in the revisers' preface, there is little danger of misunderstanding, "the dead" being mentioned in connection in the succeeding member. Time alone will prove how great the obligation bestowed by this scholarly attempt to purge the sacred text of all false translations. It is a step in the right direction—an acknowledgment of the possibility of progress even in the department of religion. That this work is not perfect, the revisers themselves must honestly admit. Many of them now have textual preferences over the adopted readings; but that it is valuable that it expresses to the present generation the sense of the actual Scriptures more nearly than does the old version, will be freely and gratefully acknowledged by all friends of true religious advancement.

J. G.

Prayers for Grant.

NEW YORK, May 23.—The cure of Gen. Grant by mircle has been undertaken by a band of Perfectionists in this city. They are the followers of the late Phœbe Palmer, who used to preach the doctrine of personal holiness at Methodist camp meetings, notably for many years at Ocean Grove, the great religious summer resort, near Long Branch. After her death the leader was Dr. W. C. Palmer, a wealthy New Yorker, whose second wife is now at their head, he having died a year ago. The Rev. J. C. Hughes is her first lieutenant. She spends the income of her fortune almost entirely in defraying the expenses of holiness literature. In her residence, a fine house facing Stuyvesant Square, weekly prayer and praise meetings are held. The services bear close relation to the belief that men and women may lead perfectly sinless lives of entire consecration to God, and they lay stress upon their power in prayer, owing to their compliance with the required conditions of spiritual perfection. Specialties for prayer have been constant since the establishment of these meetings, nearly twenty years ago; and the case of Grant was taken up with much sincerity and fervor. The wonderful improvement in the General's disease set in immediately, and Mrs. Palmer is sure that the betterment was in direct answer to her band's petitions. When asked if she looked for complete recovery, she replied "That is as God wills. We shall continue praying, confident that we have thus far been answered, and hope that we shall continue to be."

The "King of the Black Legs."

Piedmont, W. va., Cor. Baltimore Sun.

The central figure at Elk Garden during the recent strike was Jacob M. Biggs, called by many of his admirers "The King of the Black Legs," and known throughout this and the Maryland coal region. He is a character, and what he says is considered solid by all who know him. He is expected to do whatever he announces, and has worked through all the strikes in this section for many years. At the outbreak of this last trouble he said he would work if there was not another man in the mine, and stuff nine cars full of coal each day. He has two sons that work with him. One of them, a well-grown lad, wanted to strike, and his father had a difficult time in thrashing the boy into the mines. Biggs related this domestic conflict to the officials of the mine, and in closing said, "but I brought him, and don't you forget it."

He told the story comically. Biggs it is said, sees the folly of strikes, and never has joined in one, but always makes his big money during their continuance. During this strike he has made $7 to $8 each day. He is a fearless king, and goes anywhere during strikes. His dust-blacked face may be seen in among the strikers after he comes from the mines, though it is said some are very bitter against him. About three years ago he leased ground from the company at Elk Garden and built a nice house. His plant, he says, is worth about $3,000. In addition to this, he has two acres of choice land here—more than any one else. The company allowed Biggs to choose his own location, to go where he pleasd, because he was the King of the Black Legs, a valuable, trusty man, to be depended upon by the company in strikes or any other difficulty. The Methodist preacher in charge of this circuit lives with Biggs, who generously gives him apartments and board gratis.

Biggs uses expletives sometimes, and to this the minister has objected, but the host has always said that the minister would have to take his home as he found it. It is said, however, that the minister is doing Biggs good and that he is less emphatic than heretofore. Mr. Biggs came out of the mine to-day looking most business like, with his miner's lamp and coaldust-covered suit. He said in reply to questions: "I never 'black-legged' in my life; that is I never joined strikers and then went back on them by going in the mines to work. I have always done what I thought was right, but the strikers have called my working 'black-legging.'" Taking their view of it, Mr. Biggs declared he was the king of the "black-legs" of this region. He is 51 years of age and was born near Oakland, Md. For many years he was brakeman, conductor and dispatcher of trains on the B. & O.

In 1869 he dug his first coal in the old Hampshire mine, in Mineral county, W. Va. When this mine struck in 1874 for scales he worked on until the company stopped him. After six weeks the scales were put up and the men worked two or three days, when they struck to have Biggs discharged. They failed, and went in after a week. Several times mobs have got after him, but he has stood his ground. At the new Hampshire mine he worked through many strikes. In the strikes in the Virginia mine he worked, and through the strikes in Elk Garden. He has never refused to work during a strike, and has on each occasion had what he calls a pic-nic. In concluding he said: "The striking party always get worsted. I have never seen any of them do any good yet. Digging coal pays better than anything I can go at, and I can do almost anything. It is not any particular love I have for it, but because of the money that is in it. I act up to my convictions. I came here to stay, and I will stick."

A Maryland Rip Van Winkle.

Snow Hill special to Phila. Times.

A rival to Rip Van Winkle has just risen to fame in Worcester county, three miles from here. On thursday last, Levin Newton, a small farmer of good repute, disappeared from his home. His family, knowing that he had made many enemies on account of his opposition to the five acre oyster bed law, which gives citizens the right to take up oyster beds for private use, feared that he had been murdered. A rigid search was made for him and he was given up for dead. Late on Sunday afternoon a neighbor went into Newton's barn to feed the horses and cattle, and to his astonishment noticed the missing man stretched out at full length on his back on the top of the hay. He was sleeping soundly and only awoke after being vigorously shaken. Newton exhibited no surprise on being awakened, simply saying: "Well, John, is it late?" He evidently thought that he had been sleeping but an hour or so.

Inquiry showed that Newton rose at 6 o'clook on Thursday morning, after sleeping from 10 o'clock the night before. He went to the barn, where he fed his horses. Feeling drowsy, he says, he laid down on the hay. "I don't remember anything more," he remarked to-day, "until Neighbor John called me. I then thought I had been asleep but an hour at most." Newton's sleep extending from 10 P. M. Wednesday until 6 A. M. Thursday, and from 7 A. M., one hour later, until 5:30 P. M. Sunday. Excepting the hour on Thursday morning he was asleep 90 hours and 30 minutes, the longest natural sleep known to physicians in this State.

A Proposed Change of Name.

From the Episcopal Methodist.

We shall shortly be called on to vote either for or against a change in the name of our church. The word South has come to convey a meaning which never entered into the heads of our fathers, and their sons seem anxious to prove that they do not belong to a sectional church, and to disprove the charge that our very name has a political significance. The new name proposed is "The Methodist Episcopal Church in America." With the light we now have we shall not only vote against this proposed change, but shall most heartily oppose it. We shall do so for the following reasons, viz: The name proposed is a misstatement of fact. Our church is not, and never will be the M. E. Church in America, since the M. E. Church stands in the way of any such claim, and since our work is confined mainly to the Southern States, with some mission stations in Mexico, and these form a very small part of America. Next, we shall oppose it because the name proposed does not really stand for any principle or fact to excite admiration or esteem. A name ought to be a rallying cry, and should serve to aspire to unity and effort. Then again, the change proposed is a virtual concession to the clamor that our church name is incorrect, and does not stand for a living fact or principle, which we are prepared steadfastly to affirm. Further, the change amounts to an acknowledgment that the record we have made under our old name should be covered over by a new one, and we are not prepared to admit this in any degree. And lastly, if a change of name be deemed important, we favor the name Episcopal Methodist Church, for reasons long since given. Our church is a Methodist Church chiefly, and Episcopal only in a modified sense, and by all rules of construction the adjective which most nearly qualifies the noun should be in juxtaposition to it. Put Episcopal before Methodist and it tells directly what sort of Methodism it is in contrast with all other portions of the Methodist family, and then, as it leaves out all locality it will give us no reason to explain at our Mission Stations, or to limit us in any way to America. We want to be world-wide. But as the latter name is not now in the issue we drop the subject here, to recur to it probably again.

State of Trade.

NEW YORK, May 23.—The movement of general merchandise throughout the country the past week, as reported to *Bradstreet's*, has not varied much from that of the preceding week. Dealers in staple lines at leading distributing centers do not look for any permanent gain or activity in mercantile circles during the coming quarter. Dry goods merchants at New York are more cheerful than elsewhere. The heavy auction sale of last week merely substituted jobbers for agents as holders for $2,000,000 worth of cotton.

At the West petroleum continues inactive and featureless. Some special brands of pig-iron have cut prices $1 per ton—that is, have made actual prices asking prices. There is no other change of note either in iron or steel. Copper in the home market has declined some.

The reports from the winter wheat region continue unfavorable. The Commissioner of Agriculture telegraphs that his reports indicate a shortage of 117,000,000 bushels of winter wheat. The specials from Washington Territory and Oregon point to a gain of 40,000,000 bushels as compared with last year, and there is now no known reason for believing that the total spring and Pacific coast wheat crops will fall much if any behind 1884. In that event the outlook for the aggregate of wheat this year is 396,000,000 bushels. It may run below this, and it is equally possible that the total may be larger. There are too many uncertainties at present for a definite forecast.

Hog products have been very dull. Speculation therein is almost at a standstill. Stocks are ample and the demand light. The movement in grocery staples in general shows no improvement. Sugar and coffee are higher. Dairy products have again shrunk considerably and close slightly more active.

BOSTON, May 23.—The *Advertiser* in its weekly review of the wool market says: The market has been fairly active for the season, and indeed no great movement is to be expected until new wools arrive. This is really "between seasons," when old wools are being closed out and new wools are about to come forward. Manufacturers buy in such a market only what they need to bring them up to clip time, and dealers and commission men have agents and representatives in the interior either purchasing wool or obtaining consignments. Prices are fairly steady for all choice descriptions, but as selections are broken prices vary considerably more than usual. It takes an extra lot of X Ohio to command 32c. but we report such a sale. The sales of Michigan have been larger than last week, and stocks are now quite low. Prices are steady for good wool under this condition. Very little Territory is now on the market, but there have been several sales of Texas, being mostly new. The prices of some of the transactions are withheld, but as the sales show, some lots have brought from 20a23c, the latter being exceptionally high. On good authority we hear of a small sale at 24c, which is included in unclassified, but this is for a very fine lot of medium. A correct quotation for fair to good lots is 19a22c. Sales of combing and delain have been larger than a week ago.

A story, creditable to the President, is told in Washington. A Senator, who wanted the place for his son, induced Roosevelt, Consul at Bordeaux, to resign, promising him a consulship in Canada instead. Roosevelt, who is a one-legged Union soldier, fearing that his days would be short in Bordeaux, and having an intimation from the State Department, went into the arrangement. But the Canadian consulship lingered, and Roosevelt went to the President, who is reported to have said: "Mr. Roosevelt, you can return to Bordeaux at your pleasure, and I assure you that so long as you perform your duties you shall remain there. I am determined that no man who lost a limb in the United States army shall be removed during my term of office, unless for very good cause."

Facts for Farmers.

Money economically spent in draining wet places may lift a mortgage from a farm.

Josiah Hoopes says the Fay's Prolific currant produces bunches that surpass the large representations made of them.

Soot is an excellent "starter" for corn, as it is rich in nitrogen. It is a substance that is often wasted, but which is really valuable.

Soft-wooded plants should always be placed nearest the light, while hard and smooth-leaved ones will not suffer in quite shaded situations.

New celery seed has a faint tinge of green, and is very aromatic, but it loses the green and becomes less fragrant if more than one year old, and is doubtful.

A writer in the *Rural Workman* says a teaspoonful of coal oil poured into the wound made by peach-borers in the body or limbs of trees is sure death to the borer.

Leaf-mold, rotten cow manure and good garden loam in equal parts, with a small addition of sand, well mixed together, makes a suitable soil for nearly all plants.

The roots of clover and some other grasses often find their way to very considerable depths, but drains laid rom three to four feet deep are seldom choked by the roots.

Trees whose roots seek water should never be allowed near the drains. The roots entering the pipes choke them. The willow has been known to travel 100 feet to enter a well.

The Indiana Bureau of Statistics says that underdraining not only decreases the tendency to malarial diseases, but in that State has been known in five years to increase the yield of corn and wheat 50 per cent.

Use plenty of lime in the orchard and around the vines. It prevents the attacks of insects and also serves as plant food, as well as hastening chemical action in the soil, thereby rendering the inert substances available.

Lampblack mixed with strong vinegar is said to make a paint for marking sheep that will not injure the wool and will remain for a year. It is worth trying. Tar and pitch are both blotening and difficult to scour from wool.

For the improvement of heavy soils lime should be used for the first dressing, and the crop for the first season should be potatoes, the second season oats, then corn, next wheat and then clover, commencing again with potatoes.

The magicial cure of colds and coughs, by Ayer's Cherry Pectoral, is indisputable.

LOCAL NEWS.

LODGE MEETINGS.

OAKLAND LODGE, I. O. G. T., meets in Sturgiss' Hall every Tuesday night.

LOCAL BRANCH, No. 85, of the Iron Hall, meets in same Hall 1st and 3d Saturday nights of each month.

ALTA LODGE, No. 574, K. of H., meets in same Hall 2d and 4th Thursday nights of each month.

SHEALTIEL LODGE, No. 122, I. O. O. F., meets in Legge's Hall every Monday night.

PATMOS COUNCIL, No. 386, A. L. of H., meets in same Hall 2d and 4th Friday ntghts of each month.

—Go to Newman's for oranges, lemons and bananas.

—Mr. Thomas J. Stanton is at home from college to spend vacation,

—The Oakland Hotel is being repaired, inside and out, and will be refitted and refurnished for the present season.

—Groceries and flour at Newman's. 5 9 4t.

—Mr. John G. Brant has discovered and opened up a ten foot vein of coal on the North Branch of the Potomac, about four miles above Bloomington. This is a valuable discovery, and will add much to the value of lands in that neighborhood.

—Mr. Lawrence Stanton has purchased and removed to the Hoopes residence, near the Court House. We understand that Mrs. Hoopes has purchased a lot on the east end of Oak street, and will erect a residence thereon in the near future.

—If you want a good cigar go to Newman's.

—Married, Monday evening, May 25th, 1885, at the brides' home in Grantsville, by Rev. J. M. Evans, Mr. Franklin Bill and Miss Mary Wagner, both of Grantsville, Md.

—Only behold the fine lot of toys at Newman's, sold so cheap that you can't help but buy them.

—On Thursday, May 21st, 1885, the town Bailiff, under direction of the Burgess, arrested H. W. Hesen on the charge of obstructing Wilson street, by erecting a fence thereon. After the arrest Hesen was taken before the Burgess who imposed a fine of twenty dollars. Inasmuch as Hesen had no trial ar opportunity to summon his witnesses to clear himself of the charge, and finding that the ordinance under which he was arrested only provided for a fine of from one to ten dollars or imprisonment of from one to ten days, he declined to pay the twenty dollars fine, whereupon the Burgess committed him to jail for twenty days. On the same day Hesen, through his counsel, Messrs. Peddicord & Thayer applied to Judge Hoffman for a writ of *Habeas Corpus*, which was granted, and the Sheriff ordered to produce Hesen before the Court in order that the facts might be inquir d into. In obedience to the writ Sheriff Hamill, on Monday last, carried the prisoner to Hagerstown (where the Judge was engaged in court.) Upon examining the commitment and ordinance under which it was made the Court very promptly discharged Hesen from custody on the ground that the Burgess had exceeded his authority. The difficulty which led to Mr. Hesen's arrest grows out of a difference of opinion as to the location of Wilson street, in Wilson's First Addition to the town of Oakland. Mrs. Hesen owns lot No. 1 in Wilson's First Addition, which fronts on Wilson street, and Hesen undertook to put his fence upon what he believed to be the line, but the town authorities claim that the fence is upon the street, and hence the arrest.

It occurs to us that imposing a fine will not settle the line in dispute, and we think, therefore, it would be more wise to institute proceedings of some kind which would settle that question and determine the rights of the parties. Until it is settled in this way or by agreement it will remain a source of annoyance and expense.

—We desire to call attention to one or two matters which in our judgment have become nuisances. The first is the practice which has grown up among the young people and boys of the town to assemble in large numbers at the Postoffice either before or during the opening of the afternoon mail. Especially is this the case on Sabbath afternoons. The crowd is so great that the sidewalk is completely blockaded for a time. All this would not be so bad if the numbers thus assembled would remain quiet and orderly; but this, we are sorry to say, is not done. On the contrary, many boys and some young men, who ought to know better, indulge in loud and often times improper talk, to the infinite disgust and annoyance of all decent people who happen to be within hearing. We have noticed amongst the crowd at various times quite a number of ladies. Now we respectfully and with great deference suggest that the ladies do not go to the postoffice until the mail has been opened and the crowd dispersed, and thus, by absenting themselves, discountenance the evil refered to above. We further suggest that the Bailiff look into the matter, and see that these youngsters behave themselves or suffer the consequences.

In the next place we wish to say a word to the men who plant themselves in front of the M. E. Church before each service and stare at every lady who goes up the steps to enter the church. If these people do not know that their conduct in this particular is a crying shame, it is high time they were informed upon the point. Such vile impertinence as that refered to is, we are happy so say, rarely seen anywhere else, and if it be persisted in here we will be compelled to perform the unpleasant duty of giving names.

We hope "a word to the wise" in this case will be sufficient.

—A carp weighing 3¼ pounds was caught in the dead pond, near the Oakland water station, by Master John Stevens, aged about ten years Monday. The carp was in shallow water in search of food, when the little boy killed it with a hoe. The pond is said to be alive with these fish. They were placed there by Fish Commissioner Delawder about two years ago. A number were also placed in the same pond about seven years ago by Dr. J. Lee McComas.

A Few Remarks from Harne & Lawton.

—Now is the time to do up your summer dresses. If you want them clean and white and free from that yellow cast, buy a cake of Frank Siddalls soap at Harne & Lawton's Grocery.

—Smoke K. K. tobacco, ¼ lb package and a good pipe for 10c., at Harne & Lawton's Grocery.

—There is rest in that "sweet by and by" for the man who buys for CASH at Harne & Lawton's Grocery

—12 dozen shirt buttons for 5c at Harne & Lawton's Grocery.

—12 dozen pantaloon buttons for 15c at Harne & Lawton's Grocery.

—If you are in love, buy your pickles at Harne & Lawton's Grocery, 10c per dozen.

—The biggest bottle of chow chow you ever saw for 35c, at Harne & Lawton's Grocery.

—Straw hats at cost, at Harne & Lawton's Grocery.

—Men's and boys' wool hats at cost at Harne & Lawton's Grocery.

—Ladies' fancy hose at 8 and 10c per pair, at Harne & Lawton's Grocery.

—Washboards 10 to 35c, at Harne & Lawton's Grocery.

—Only be lathered and you shall be shaved, and if you do not shave yourself, insist upon your barber using Brown's barber soap, for sale at Harne & Lawton's Grocery.

—3 lbs. of rice, 25c.; 3 lbs. Turkish prunes, 25c; 3 lbs. granulated sugar, 25c; 3 cakes of Ivory soap, 25c; 5 cakes Lone Star soap, 25c; 4½ lbs. oat meal, 25c, and various other articles too cheap to mention, at Harne & Lawton's Grocery.

Church Services--Sunday.

M. E. Church—Preaching at 10½ A. M. and 8 P. M. by Rev. M. W. Rider.

Stone Church—Preaching at 11 A. M. by Rev. John S. Foulk.

Lutheran Church—Preaching at 10½ A. M. and 8 P. M. by Rev. C. W. Sechrist.

Preaching at Deer Park, by Rev. C. W. Sechrist, at 2½ P. M.

St. Peter's, Catholic— Preaching every Sunday at 10½ o'clock A. M., except the second Sunday of each month.

Notice!

All persons knowing themselves indebted to me will please call and settle by cash or note. All claims not settled by the 1st of June next will be given out for collection.

H. A. RASCHE.

The Best is the Cheapest!

That's what we mean when we say Newman keeps the finest candies in town. Call and see his stock.

For Sale Cheap.

A second hand Smutt Machine in good running order, will clean from 15 to 20 bushels per hour. Call on, or address,

H. A. RASCHE.
Oakland, Md.

Chance for Investment.

For sale or rent, two cottages, furnished, with use of horses and carriages.

MRS. E. A. KILBOURN,
4 11 Oakland, Md.

The Sang Run Store.

Mr. S. M. Friend desires to inform the citizens of the Sang Run neighborhood, that he has lately enlarged his stock of general merchandise, and is now enabled to sell as low as any merchant in the county. He will pay the highest market prices for good produce. Call and see him.

Increase in Basis of Taxation.

Clerk Merrill informs us that a large increase has been made in our taxable basis by assessing lands not heretofore on the tax books. The total number of acres added is 15,727, at an average assessment of $3,70 per acre, or a tofal of $58,230. The basis for 1885 has been increased $146.612, over that of 1884. Much credit is due to Hon. R. T. Browning, our efficient collector, for looking up property not heretofore assessed.

Notice!

All persons knowing themselves indebted to the estate of Chas. H. Sincell, deceased, are requested to settle within 30 days, otherwise their accounts will be placed in the hands of an officer for collection.

LEAH F. SINCELL.
EDWARD H. SINCELL.
Administrators.

Oakland, Md., May 30, 1885.

Quarterly Meeting.

There will be a Quarterly Meeting held at Southpoint, June 6th and 7th. Services for Sunday will be as follows: Lovefeast, at 9 A. M.; preaching, at 10½ A. M.; sacrament of the Lord's Supper immediately after preaching. Evening services will be announced at the morning meeting. Rev. E. Harper, of the U. B. Church, will preside. We extend a general invitation to all. A. F. Rogers, preacher in charge.

Public Sale of Hay Rakes.

Wishing to close out my entire lot of Hay Rakes, I will sell to the highest bidder, on SATURDAY, JUNE 13th, 1885, in front of my furniture room, Oakland, Md., eleven hay rakes, all in good condition, and all guaranteed to do good work. These rakes will be sold without reserve. Terms will be made known on day of sale. Will sell at private sale at any time.

5 30 3t JOHN SHARTZER.

A New Ordinance.

At a special meeting of the town commissioners, Tuesday evening, a much needed ordinance was passed, and should be impartially enforced, not only against those who may violate its provisions in the future, but also against any person or persons who may have heretofore appropriated to their own use and now hold any portion of any street or alley in the town. All of our streets and alleys should be thrown open to the public. Don't make fish of one and flesh of another, but treat all alike. Here is the ordinance in full:

ORDINANCE NO. 14.

An Ordinance to provide for the comfort, convenience and prosperity of the inhabitants of the town of Oakland, and for the removal of nuisances within said town.

SECTION 1. Be it ordained by the Burgess and Commissioners of the town of Oakland, That it shall not be lawful for any person or persons, their agents or servants to wilfully hinder or obstruct the free passage of a person, persons or conveyance of any description along or upon any of the streets, side-walks or alleys within the town of Oakland by erecting or placing any gate across any side-walk or digging holes or setting posts or erecting any fence or portion thereof on any street or alley, or any part thereof, or by placing any other obstruction that proves a hindrance to the free passage of any person or persons, or any vehicle within the limits of said town.

SEC. 2. Be it ordained by the Burgess and Commissioners of the town of Oakland, That any person or persons, their agents or servants offending against the provisions of section first of this ordinance shall, upon conviction thereof before the lawful authorities, be fined the sum of not less than one dollar nor more than twenty dollars.

SEC. 3. Be it ordained by the Burgess and Commissioners of the town of Oakland, That if any person shall neglect or refuse to pay any fine imposed for a violation of the provisions of this ordinance, the said Burgess is hereby authorized to commit such person or persons to the county jail or town lock up for the space of time not exceeding twenty days, or the said Burgess shall, in his discretion, cause said person or persons to work out said fine within the limits of said town, and said duties shall be performed under the supervision of the Bailiff by direction of the Burgess.

SEC. 4. And be it enacted that this ordinance shall take effect from the date of its passage.

Passed this 26th day of May, 1885.
D. E. OFFUTT, Burgess.
J. HART, Clerk.

Bloomington Blooms.

It was the good fortune of your correspondent to witness the entertainment given last Wednesday night under the auspices of the M. E. Sunday School in the M. E. Church at this place. So much has been said here in regard to the possibilities of failure, that many of the projectors have "fallen by the way-side," and the prospects for failure at one time seemed very bright, but the management was given partly into new hands, who manifested unusual interest in the success of the affair, and to which the brilliant success it attained is largely due. The little children did splendid. Will Owens, George Hepburn, Wm. Smith, Thos. Doughety and Joseph Diche acquitted themselves in a manner reflecting credit upon the management; Mrs. Kemp, Mrs. Cecil, Mrs. Rawlings and Gutherie deserve praise for "Keeping a secret" so well, the young ladies won the admiration of all—especially the young men, but whether it was the young ladies that were so captivating, or the parts they performed, is the difficult problem to solve. "Keeping a secret" and "Strategy" seemed to be the general favorites, indeed, "Keeping a secret" was so well performed and the characters so well chosen that many were led to believe the ladies were enjoying a social "confab" and were not aware of the fact that they were on the stage. "Strategy" was well performed, and Miss Emma Owens was justly pronounced the "Star" of the evening, and prudence demands that she be allowed to return to college in peace. In short, it was a successfully managed affair. The amount taken in at the door was $31 70, the audience was well entertained and all went home agreeing that it was a well spent evening.

It is rumored that they will favor Bloomington with another entertainment sometime during the "heated term," and if they should, building an addition to the church is anything but an ill-advised plan.

TACK HAMMER,

Bucklen's Arnica Salve.

The best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by W. D. Nydegger, Druggist, Oakland, Md.

Deer Park.

Deer Park begins to look like summer at last, and houses are fast filling up for the season.

Hon. S. B. Elkins and family arrived this Wednesday morning.

Mr. J. W. Williams and family are expected daily.

Mrs. Senator Davis has been quite ill in Keyser for some time, but is now improving and will come to Deer Park as soon as she has sufficiently recovered her strength.

Mrs. A. C. Lote, of Baltimore, with her mother and daughter reached Deer Park Tuesday night, to occupy a house here during the summer. Her son, Mr. Fred Lote, has been Senator Davis' secretary for the past year.

Mrs. W. R. Davis, with her family, will come to her summer residence next week.

Miss Jennie Hoye returned home a few days ago.

Mrs. James Graham will remove to Piedmont shortly.

Mr. L. H. Schoolfield left for Baltimore Tuesday night to attend the funeral of his brother, Mr. Charles S. Schoolfield, who will be remembered by some of our citizens, he having spent some time in Deer Park last summer.

Mr. Jos. Nesbitt, of Fairmont, W. Va., was in town for a short time one day last week.

Rev. J. W. Bedford has returned from his trip to Pennsylvania.

Mrs. W. S. Lantz has been quite ill for the past two months or more.

Vice-President Spencer of B. & O. R. R. was in Deer Park last Sunday.

Dr. J. W. Laughlin intends putting up a drug store in our town very soon.

A Lodge of Good Templars will organize here on the 30th inst.

Registered at Wing-and-Wing:

Washington, D. C.—Z. S. Malone.

Baltimore, Md.—John F. Lumpkin and Wm. J. Digges.

Wheeling, W. Va.—Charles Chadduck.

Cumberland, Md.—John W. Hewett, Philip McCall and Danl. S. Kitzmiller.

Parkersburg, W. Va.—A. D. Casteel.

Rowlesburg, W. Va.—John H. Ott and Walter Bowman.

***

Pleasant Hill, W. Va.

Farmers here are generally done planting corn and are preparing to sow buckwheat.

Miss Kate Spindler, of Morgantown, has returned home to remain during the summer.

Miss Alice DeWitt and Mrs. Ella DeWitt were visiting relatives and friends at Terra Alta a part of last week.

Assessor Albert R. Fearer, of Glade Farms, was in this neighborhood last week assessing property.

Messrs. G. W. and R. M. DeWitt, of Sang Run, were here last week.

Mr. Will Hoye, one of the successful and enterprising farmers of Sang Run neighborhood, passed through here last week *en route* to Kingwood.

Messrs. Enlow & Savedge, of Cranesville, have disposed of their stock of merchandise to J. M. Hartman & Co., of Confluence, Pa. They have removed to Sang Run and we are informed that Mr. Enlow contemplates opening up a store somewhere on Sang Run.

Miss Teresa Mattingly is visiting her sister, Mrs. Thomas White, and other friends in Oakland.

Mr. Jos. A. Beatty, of Terra Alta, has purchased a tract of land from Wm. T. Kelly and is preparing to build a house on it.

Mr. Geo. M. Cramer is working at Deer Park.

P. L. Cramer's new house is nearing completion.

Frank B. Kelly has sold his property in the Kelly settlement to Henry Sisler. Mr. Kelly has moved to Guseman.

W. M. Spindler is building a buggy manufactory at Terra Alta. Mr. Spindler is a first-class workman.

Miss Ella Guseman will teach a summer school at Cranesville, so we are informed.

David A. Albright is running his steam saw mill at Cranesville to its full capacity.

We learn that Ambrose Mattingly has purchased a farm near Oakland.

Walter N. Teets, of near Terra Alta, was visiting friends here last Sunday.

Michael Teets purchased a tract of land from W. Clark May a short time since.

Henry Kelly, a son of the late Harrison Kelly, is lying very low with pneumonia fever. It is thought he cannot recover.

Mr. R. P. Beatty and wife, of Terra Alta, are visiting relatives in the Kelly settlement.

The Rev. A. F. Rogers, of the Glade circuit, U. B. Church, preached, at the Kelly church on last Sunday evening.

WANDERER.

Selbysport.

The church grounds have been cleaned of stones and enclosed by a neat fence.

Rev. Woodruff will fill the Presiding Elder's place at the Quarterly meeting here on Saturday and Sunday. We are always pleased to see him.

We have heard from D. W. Frazee since he went west. "Adam" is well pleased with his new home.

The heavy rains have destroyed a great deal of corn in this neighborhood.

Large numbers of fish are being caught in the river this spring, and this seems to be the main point of attack upon the finny tribe, especially with Pennsylvanians.

A party of five went from here to "White Rock" Friday afternoon and caught 387 trout. They put in the night there, and a jolly night it was. Austin Brown (better known as "Longyarn") played cook. He cooked about one hundred trout, or rather warmed them, for supper. Now a warm trout is worse than no trout at all, but what he lacked in the cooking was made up in telling yarns. He and Henry amused the party with their stories all night. They say it is the roughest place they were ever in.

"Doc" Green returned home Monday from a trip through Pennsylvania.

W. F. Kessler and Franklin Welch are in Pennsylvania peeling bark. They will come home Saturday to attend the quarterly meeting.

Baltimore Live Stock Market.

[From Baltimore American.]
MONDAY, May 25, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5¾@6c. that generally rated first quality 5@5¾ cts; medium or good fair quality 4½@5 cts; ordinary thin steers, oxen and cows 3@4½ cts; extreme range of prices 3@6 cts; most of the sales were from 5@5¾.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 2,157 head, against 1,046 last week and 1,444 head the corresponding week of last year, and the sales were 697 head, against 883 last week, and 752 head the corresponding week of last year.

Trade on the Hill to-day has generally been fair—a few dealers only reporting their sales as rather slow. The quality of the offering shows a general improvement on those of last week, few common cattle being among them. In view of the improved order of the offerings, prices show an advance of about ½c. in the opinion of most of the dealers, though some few report no change in their prices. Quotations ranged from 3 to 6c., few selling at either extreme, most sales being reported between 5@5¾, a considerable number selling at 5¾.

THE SHEEP MARKET.

There is a fair increase in the number of the receipts over the fairly full offerings of last Monday, and their quality is not as good as it was then. There is no outside demand, and that on the part of our home butchers is slow, as their wants have been quite light and easily supplied, without causing as much as a ripple in the market, which all dealers report as an exceedingly dull one, common sheep not being wanted, except in limited numbers, at our lowest quotations—2c.—and the sales ranged to 4½, with sow at latter price. Same time last year sheep sold at 3@5½c., and lambs at 4½@6½.

NEW ADVERTISEMENTS.

"LIFE IS SHORT AND SWEET."

It will not pay you to waste time in theorizing and experimenting upon chances and luck, and circumstances, when the straight, short and quick road to fortune, lies here right before you. Buy your

THE GREAT-GRANDMOTHER.

Bring flowers: for back to kindred dust
We give our dead to-day:
Bring flowers, upon a long-tried heart
In toil-worn hands to lay.
But not for her the florist's art
Shall heap the sweet regret,
Of pansy and of heliotrope,
Tea-rose and mignonette.

The frosts of more than ninety years
Have bleached the locks of gold
That lay upon her mother's knee
In many a shining fold,
When she, so wrinkled now, and gray,
Knelt, at the twilight fair,
A little, rosy, dimpled child,
And learned her earliest prayer.

Of those who watched her infant years,
Or shared her childish play,
Or knew her girlhood's hopes and fears,
Not one is here to-day.
Nor is there of that later group,
She saw about her bloom,
One left to weep beside her bier,
Or lay her in the tomb.

But still her old home stands, embowered,
In fragrant locust-trees;
The sweet-brier that her father trained
Still sweetens every breeze.
The rose-trees that she used to tend
Beside the door-step grow,
And grass-pinks load the balmy air
With hints of long ago.

Across the wall the pleasant wood,
Wherein her girlhood strayed,
Still breathes its wealth of fragrance out,
Still spreads its cooling shade.
There, haply, 'neath the odorous pines
Her early dream of love
Made sweeter all the woodland scents,
And charmed afresh the grove.

Then bring the bayberry and the fern,
The locust's heavy plume,
The brier-rose and the cinnamon
In the old beds that bloom.
Bring spicy pinks and lillies sweet
Beside the wall that blow—
Such lilies as that garden knew
A hundred years ago.

Fragrant with loving deed and word
And old-time courtesies,
Her life its fitting emblem found
In flowers such as these;
A life whose quiet, modest bloom
We knew but in decay—
The lingering sweetness of a rose
Slow withering away.

Apart from all she loved in youth,
She ends her pilgrimage.
This face we hide, to us has been
Always the face of age.
But mindful of her early home,
Her girlhood's sunny hours,
We lay upon the aged breast
The dear, old-fashioned flowers.

—*Miss E. F. Frye, in Chicago Advance.*

PETHERICK'S PERIL.

Thrilling Account of a Dangerous Adventure.

Each story of the Shelton Cotton Factory is fifteen feet between floors; there are seven such over the basement, and this rises six feet above the ground. The brick walls narrow to eight inches as they ascend, and form a parapet rising above the roof. One of the time-keepers of the factory, Jack Hardy, a young man about my own age, often runs along the brick-work, the practice giving him a singular delight that has seemed to increase with his proficiency in it. Having been a clerk in the works from the beginning, I have frequently used the parapet for a foot-path, and although there was a sheer fall of one hundred feet to the ground, have done it with ease and without dizziness. Occasionally Hardy and I have run races on the opposite walls, an exercise in which I was invariably beaten, because I became timid with increase of pace.

Hopelessly distanced last Wednesday, while the men were off at noon, I gave up midway, and looking down, observed the upturned face of an old man, gazing at me with parted lips, wide eyes, and an expression of horror so startling that I involuntarily stepped down to the bricklayers' platform inside. I then saw that the apparently frightened spectator was Mr. Petherick, who has been for some weeks paymaster and factotum for the contractors.

"What's the matter, Petherick?" I called down. He made no answer, but walking off rapidly, disappeared round the mill. Curious about his demeanor, I descended, and, after some little seeking, found him smoking alone.

"You quite frightened me just now, Petherick," said I. "Did you think I was a ghost?"

"Not just that," he replied, sententiously.

"Did you expect me to fall, then?" I inquired.

"Not just that, either," said he. The old man was clearly disinclined to talk, and apparently much agitated. I began to joke him about his lugubrious expression, when the one-o'clock bell rang, and he shuffled off hastily to another quarter.

Though I puzzled awhile over the incident, it soon passed so entirely from my mind that I was surprised when, passing Petherick in the afternoon, intending to go aloft, he said, as I went by:

"Don't do it again, Mr. Frazer!"

"What?" I said.

"That!" he retorted.

"O! You mean running on the wall," said I.

"I mean going on it at all!" he exclaimed. His earnestness was so marked that I conceived a strong interest in its cause.

"I'll make a bargain with you, Mr. Petherick. If you tell me why you advise me, I'll give the thing up!"

"Done!" said he. "Come to my cottage this evening, and I'll tell you a strange adventure of my own, though perhaps you'll only laugh that it's the reason why it sickens me to see you fooling up there."

Petherick was ready to talk when Jack and I sat down on his doorsteps that evening, and immediately launched into the following narrative:

"I was born and grew to manhood near the high cliffs of the coast of Cornwall. Millions of sea-fowls make their nests along the face of those wave-worn precipices. My companions and I used to get much excitement, and sometimes a good deal of pocket money, by taking their eggs. One of us, placing his feet in a loop at the end of a rope and taking a good grip with his hands, would be lowered by the others to the nest.

"When he had his basket full they'd haul him up, and another would go down. Well, one afternoon, I thus went dangling off. They paid out about a hundred feet of rope before I touched ledge and let go."

"What ledge?" asked Jack.

"Oh!" said Petherick, after a pause. "I see it will be troublesome to make you understand the situation." Then, after reflecting for some moments——

"You must know that most of the cliffs, along that coast overhang the sea. At many points one could drop six hundred feet into the sea, and then be forty or fifty feet from the base of the rock he left. The coast is scooped under by the waves. But in some places the cliff wall is as though it had been eaten away by seas once running in on higher levels. There will be an overhanging coping, then some hundred feet down, a ledge sticking out farther than that of the top; under that ledge all will be scooped away. In places there are three or four such ledges, each projecting farther than those above. These ledges used to fall away occasionally, as they do yet, I am told, for the ocean is gradually devouring that coast. Where they did not project farther than the upper coping, one would swing like a pendulum on the rope, and get on the rock, if not too far in, then put a rock on the loop to hold it till his return. When a ledge did project so that one could drop straight on it, he hauled down some slack and left the rope hanging."

"Did the wind never blow it off?" asked Jack.

"Seldom, and never out of reach," said the old man. "Well, the ledge I reached was like this," illustrating with his hands. "It was some six feet wide; it stuck out may be some ten feet farther than the cliff top; the rock wall went up pretty near perpendicular, till near the coping at the ground, but below the ledge the cliff's face was so scooped away that the sea, five hundred feet below, ran in under it nigh fifty feet.

"As I went down thousands of birds rose from the jagged places of the precipice, circling round me with harsh screams. Soon touching the ledge, I stepped from the loop, and drawing down a little slack, walked off briskly. For fully quarter of a mile the ledge ran along the cliff's face almost as level and even in width as that sidewalk. I remember fancying that it sloped outward more than usual, but instantly dismissed the notion, though Gaffer Pentreath, the oldest man in that country-side, used to tell us that we should not get the use of that ledge always. It had been as steady in our time as in his grandfather's, and we only laughed at his prophecies. Yet the place of an old filled fissure was marked by a line of grass, by tufts of weeds and small bushes, stretching almost as far as the ledge itself, and within a foot or so of the cliff's face.

"Eggs were not so many as usual, and I went a long piece from my rope before turning back. Then I noticed the very strange conduct of the hosts of sea-fowls below. Usually there were hundreds, but now there were millions on the wing, and instead of darting forth in playful motions, they seemed to be wildly excited, screaming shrilly, rushing out as in terror and returning in masses as though to alight, only to wheel in dread, and keep the air in vast clouds.

"The weather was beautiful, the sea like glass. At no great distance two large brigs, and nearer a small yacht, lay becalmed, heaving on the long billows. I could look down her cabin stairway almost, and it seemed scarcely more than a long leap to her deck.

"Puzzled by the singular conduct of the sea-birds, I soon stopped and set my back against the cliff, to rest while watching them. The day was deadly still and very warm.

"I remember taking off my cap and wiping the sweat from my face and forehead with my sleeve. While doing this, I looked down involuntarily to the fissure at my feet. Instantly my blood almost froze with horror! There was a distinct crack between the inner edge of the fissure and the hard-packed, root-threaded soil with which it was filled! Forcibly I pressed back, and in a flash looked along the ledge. The fissure was widening under my eyes, the rock before me seemed sinking outward, and with a shudder and a groan and roar, the whole long platform fell crashing to the sea below! I stood on a margin of rock scarce a foot wide, at my back a perpendicular cliff, and five hundred feet below the ocean, now almost hidden by the vast concourse of wheeling and affrighted birds.

"Can you believe that my first sensation was one of relief? I stood safe! Even a feeling of interest held me for some moments. Almost coolly I observed a long and mighty wave roll out from beneath. It went forth with a high, curling crest—a solid wall of water! It struck the yacht stern on, plunged down on her deck, smashed through her swell of sail, and swept her out of sight forever.

"Not till then did my thoughts dwell entirely on my own position; not till then did I comprehend its hopelessness! Now my eyes closed convulsively to shut out the abyss down which my glance had fallen; shuddering, I pressed hard against the solid wall at my back; an appalling cold slowly crept through me! My reason struggled against a wild desire to leap; all the demons of despair whispered me to make an instant end. In imagination I *had* leaped! I felt the swooning helplessness of falling and the cold, upward rush of air!"

"Still I pressed hard back against the wall of rock, and though nearly faint from terror, never forgot for an instant the death at my feet, nor the utter danger of the slightest motion. How long this weakness lasted I know not; I only know that the unspeakable horror of that first period has come to me in waking dreams many and many a day since; that I have long nights of that deadly fear; that to think of the past is to stand again on that narrow foot-hold, and to look around on the earth is often to cry out with joy that it widens away from my feet!"

The old man paused long. Glancing sidewise at Jack, I saw that his face was pallid. I myself had shuddered and grown cold—so strongly had my imagination realized the awful experience that Petherick described.

"Suddenly," said the old man, "these words flashed to my brain: '*Are not two sparrows sold for a farthing? And one of them shall not fall on the ground without your Father. Fear not, therefore; ye are of more value than many sparrows.*' My faculties so strained, I seemed to *hear* the words. Indeed, often yet I think I did truly hear a voice utter them very near me."

"Instantly hope arose, consciously desperate indeed, but I became calm, resourceful, capable, and feeling unaccountably aided. Careful not to look down, I opened my eyes and gazed far away over the bright sea. The rippled billows told that a light outward breeze had sprung up. Slowly, and somewhat more distant, the two brigs moved toward the horizon. Turning my head, I could trace the narrow stone of my footing to where my rope dangled, perhaps three hundred yards distant.

"It seemed to hang within easy reach of the cliff's face, and instantly I resolved and as instantly proceeded to work toward it. No time remained for hesitation. Night was coming on. I reasoned that my comrades thought me killed. They had probably gone to view the new condition of the precipice from a lower station, and on their return would haul up and carry off the rope. I made a move toward it. Try to think of that journey!"

I nodded to him silently.

"Shuffling sidewise very carefully, I had not made five yards before I knew that I could not continue to look out over that abyss without glancing down, and that I could not glance down without losing my senses. You have the brick line to keep eyes on as you walk along the factory wall; do you think you could move along it erect, looking down as you would have to? Yet it is only one hundred feet high. Imagine five more such walls on top of that and you trying to move sidewise—incapable of closing your eyes, forced to look down, from end to end, yes, three times farther! Imagine you've got to go on or jump off! Would you not in an ecstacy of nervous agitation, fall to your knees, get down face-first at full length, clutch by your hands and with shut eyes feel your way? I longed to lie down and hold, but of course that was impossible."

"Still there was a wall at your back," observed Jack.

"That made it worse! The cliff seemed to press outward against me. It did, in fact, incline very slightly outward. It seemed to be thrusting me off. O, the horror of that sensation! Your toes on the edge of a precipice, and the implacable, calm mountain apparently weighting you slowly forward."

Beads of sweat broke out over his white face at the horror he had called before him. Wiping his lips nervously with the back of his hand, and looking askant, as at the narrow pathway, he paused long. I saw its cruel edge and the dark gleams of its abysmal water.

"I knew," he resumed, "that with my back to the wall I could never reach the rope. I could not face towards it and step forward, so narrow was the ledge. Motion was perhaps barely possible that way, but the breadth of my shoulders would have forced me to lean somewhat more outward, and this I dared not and could not do. Also, to see a solid surface before me became an irresistible desire. I resolved to try to turn round before resuming the desperate journey. To do this I had to nerve myself for one steady look at my footing.

"In the depth below the myriad sea fowl then rested on the black water, which, though swelling more with the rising wind, had yet an unbroken surface at some little distance from the precipice, while farther out it had begun to jump to white-caps, and in beneath me, where I could not see, it dashed and churned with a faint, pervading roar that I could barely distinguish. Before the descending sun a heavy bank of cloud had risen. The ocean's surface bore that appearance of intense and angry gloom that often heralds a storm, but, save the deep murmur going out from far below my perch, all to my hearing was deadly still.

"Cautiously I swung my right foot before the other carefully edged around. For an instant as my shoulder rubbed against the rock, I felt that I must fall. I did stagger, in fact, but the next moment stood firm, face to the beetling cliff, my heels on the very edge, and the new sensation of the abyss behind me no less horrible than that from which I had with such difficulty escaped. I stood quaking. A delirious horror thrilled every nerve. The skin about my ears and neck, suddenly cold, shrank convulsively.

"Wild with fear, I thrust forward my head against the rock and rested in agony. A whir and wind of sudden wings made me conscious of outward things again. Then a mad eagerness to climb swept away other feeling, and my hands attempted in vain to clutch the rock. Not daring to cast my head backward I drew it tortoise-like between my raised shoulders and chin against the precipice, and gazed upward with straining of vision from under my eyebrows.

"Far above the dead wall stretched. Sidewise glances gave me glimpses of the projecting summit coping. There was no hope in that direction. But the distraction of scanning the cliff-side had given my strained nerves some relief; to my memory again returned the promise of the Almighty and the consciousness of His regard. Once more my muscles became firm-strung.

"A cautious step sidewise made me know how much I had gained in ease and security of motion by the change of front. I made progress that seemed almost rapid for some rods, and even had exultation in my quick approach to the rope. Hence came freedom to think how I should act on reaching it, and speculation as to how soon my comrades would haul me up.

"Then the idea rushed through me that they might even yet draw it away too soon; that while almost in my clutch it might rise from my hands. Instantly all the terrors of my position returned with tenfold force; an outward thrust of the precipice seemed to grow distinct, my trembling hands told me that it moved bodily towards me, the descent behind me took an unspeakable remoteness, and from the utmost depth of that sheer air seemed to ascend steadily a deadly and a chilling wind. But I think I did not stop for an instant. Instead, a delirium to move faster possessed me, and with quick, sidelong steps—my following foot striking hard against that before—sometimes on the point of stumbling, stretched out like the crucified, I pressed in mortal terror along.

"Every possible accident and delay was presented to my excited brain. What if the ledge should narrow suddenly to nothing? Now I believed that my heels were unsupported in air, and I moved along on tip-toe. Now I was convinced that the narrow pathway sloped outward, that this slope had become so distinct, so increasingly distinct, that I might at any moment slip off into the void. But dominating every consideration of possible disaster, was still that of the need for speed, and distinct amid all other terrors was that sensation of the dead wall ever silently and inexorably pressing me outward.

"My mouth and throat were choked with dryness, my convulsive lips parched and arid; much I longed to press them against the cold, moist stone. But I never stopped. Faster, faster—more wildly I stepped—in a delirium I pushed along. Then suddenly before my staring eyes was a well-remembered edge of mossy stone, and I knew that the rope should be directly behind me. Was it?

"I glanced over my left shoulder. The rope was not to be seen! Wildly I looked over the other—no rope! Almighty God! and hast Thou deserted me?

"But what! Yes, it moves! it sways in sight! it disappears—to return again to view! There was the rope directly at my back, swinging in the now strong breeze with a motion that had carried it away from my first hurried glances. With the relief tears pressed to my eyes and—face bowed to the precipice almost forgetful for a little time of the hungry air beneath—I offered deep thanks to my God for the delivery that seemed so near."

The old man's lips continued to move, but no sound came from them. We waited silent while, with closed eyes and bent head, he remained absorbed in the recollection of that strange minute of devoutness.

"I stood there," he said at last, "for what now seems a space of hours, perhaps half a minute in reality. Then all the chances still to be run crowded upon me. To turn around had been an attempt almost desperate before, and certainly, most certainly, the ledge was no wider where I now stood. Was the rope within reach? I feared not. Would it sway towards me? I could hope for that.

"But could I grasp it should I be saved? Would it not yield to my hand—coming slowly down as I pulled, unrolling from a coil above, trailing over the ground at the top, running fast as its end approached the edge, falling suddenly at last? Or was it fastened to the accustomed stake? Was any comrade near who would summon aid at my signal? If not, and if I grasped it, and if it held, how long should I swing in the wind that now bore the freshness and tremors of an imminent gale?

"Now again fear took hold on me, and as a desperate man I prepared to turn my face once more to the vast expanse of water and the nothing beyond that awful cliff. Closing my eyes, I writhed, with I know not what motions, easily around till again my back pressed against the precipice. That was a restful sensation. And now for the decision of my fate! I looked at the rope. Not for a moment could I fancy it within my reach! Its swayings were not, as I had expected, even slightly inward, but when falling back against the wind, it swung outward as though the air were eddying from the wall.

"Now at last I gazed down steadily. Would a leap be certain death? The water was of immense depth below. But what chance of striking it feet or head first? What chance of preserving consciousness in the descent? No, the leap would be death; that at least was clear.

"Again I turned to the rope. I was now perfectly desperate, but steady, nerved beyond the best moments of my life, good for an effort surpassing the human. Still the rope swayed as before, and its motion was very regular. I saw that I could touch it at any point of its gyration by a strong leap.

"But could I grasp it? What use if it were not firmly secured above? But all time for hesitation had gone by. I knew too well that strength was mine but for a moment, and that in the next reaction of weakness I should drop from the wall like a dead fly. Bracing myself, I watched the rope steadily for one round, and as it returned against the wind, jumped straight out over the heaving Atlantic.

"By God's aid I reached, touched, clutched, held the strong line. And it held! Not absolutely. Once, twice, and again it gave, gave with jerks that tried my arms. I knew these indicated but tightening. Then it held firm and I swung turning in the air, secure above the waves that beat below.

"To slide down and place my feet in the loop was the instinctive work of a moment. Fortunately it was of dimensions to admit my body barely. I slipped it over my thighs up to my armpits just as the dreaded reaction of weakness came. Then I lost consciousness.

"When I awakened my dear mother's face was beside my pillow, and she told me that I had been tossing for a fortnight in brain fever. Many weeks I lay there, and when I got strong found that I had left my nerve on that awful cliff-side. Never since have I been able to look from a height or see any other human being on one without shuddering.

"So now you know the story, Mr. Frazer, and have had your last walk on the factory wall."

He spoke truer than he knew. His story has given me such horrible nightmares ever since that I could no more walk on the high brickwork than along that narrow ledge in distant Cornwall.—*E. W. Thompson's Prize Story in Youth's Companion.*

A GYPSY CAMP.

How the Men and Women Manage to Employ Their Time.

A gypsy camp, with tents and wagons, horses, dogs, babies, hard working women and lazy men, is located in the woods on the east side of Fifty-second Street, north of Baltimore Avenue, West Philadelphia. There are over fifty persons, young and old, in the camp at present and more are expected every day. Some have been there all winter, while others have just arrived. They came from the South where they have been camping out all winter in the pine woods of North Carolina and East Tennessee. The gypsies were found last night sitting around little fires or attending to their horses. They are not a very communicative set, and they looked with evident suspicion upon an intruder.

"Why don't you build up a more cheerful fire?" was asked of a group of men and women sitting around a little heap of half dying embers.

"Wood's scarce," was the laconic rejoinder.

"Where do you come from?"

"Wales."

"Lately?"

"North Carolina."

After an hour of this kind of conversation it was discovered that most of them are named Lovell, which is the name of the queen of the gypsies, who died in New Jersey last summer. Some of the party were formerly with the "Romany Rye" company in New York, but they tired of theatrical life, preferring to live in the open air with their dogs and horses. Several negroes are in the camp. They came with the gypsies from the South, and take care of the horses. One of the women, or "ladies," as the men called them, was asked what she charged to tell a fortune.

"I wouldn't think of it for less than two dollars," she said.

"Do many people have their fortunes told?"

"Yes, indeed. Many ladies come out here to have us tell their fortunes, and they pay well for it. There's more old women than young girls; and men, they come, too, very often."

The women are the workers of the camp. Every morning they get up early, build the fires and cook the breakfast. Then they take their baskets and bundles and go down into the city to peddle clothespins and baskets and to tell the fortunes of credulous servants and others. They always take their babies with them. They make a sort of sling of a shawl and carry the baby in it, leaving their hands free to carry the baskets. The men spend their time loafing around taverns and stables and trying to trade horses.

The gypsies live well. They will buy nothing but the best of everything. The best butter, meat and vegetables are carried back to camp every evening by the women. People who live in the houses near by say that the gypsies don't steal from them. The reason given is that they know they would be the first persons suspected and are too sharp to run the risk of being arrested. —*Philadelphia Times.*

MARRIAGES MADE EASY.

A Truth That Finds Fresh Illustration Almost Daily.

Some one has said that if ministers were not so careless about marrying people there would be fewer divorces. This is a truth that finds fresh illustration almost daily. The facility with which very-young persons can get married is as great a scandal, if not as great an evil, as the frequency of divorce. It is only a few days since two boys and two girls went to a minister in Brooklyn and got him to marry them, without the knowledge of parents or any friends, and one of the boys is now a fugitive from the vengeance of his child-wife's father. The woman who is suing Ross Winans to establish a claim as a wife was the wife of another man at fourteen, and divorced soon after. In a very large number of divorce suits it comes out that the parties were married very young, and frequently without the knowledge of parents. The ministers are greatly to blame for this, beyond doubt. And they are all the more to blame for the reason that in a great many cases their chief motive in marrying young persons is to get a fee for the service. The fee is usually small—or a mere trifle—yet some ministers are as anxious to get it as a petty lawyer is to make five or ten dollars out of a client. If one of these ministers should hang out a shingle inscribed: "Marriages performed with promptness and dispatch, no questions asked," he would merely announce what he actually does. If the rule of "calling" marriages in advance, that is followed in the Catholic Church, were adopted in the other churches, there would be a good deal less grist for the divorce mill. Ministers who perform marriages without asking many questions may not intend to play into the hands of the divorce lawyers, but that is exactly what they do, nevertheless. And I don't know but some might claim a commission from the divorce lawyers for business provided.—*K. G., Cor. Detroit Free Press.*

—A Polish dish: Cut in very small pieces any sort of baked or roast meat (veal, mutton or beef), add soft-boiled eggs and finely minced onion, lettuce, or endive. Mix all thoroughly with a dressing of oil, vinegar, mustard and pepper and serve.—*Boston Budget.*

—Every farmer who has tried it knows that work can be accomplished in much less time if it has been carefully planned before-hand. When you go into a field to work, know just what you want to do, then do it.—*Prairie Farmer.*

TEMPERANCE.

CALL OF THE CHILDREN.

I can hear the voices of the children,
Calling in the dawning and the dusk:
Sweet as cleft pomegranates are their faces,
Sweeter than the scent of myrrh or musk.
Softer are their voices than the lute is,
Soft their laughter falls as falls the dew;
Yet the voice of their lamenting pierces;
Wheresoe'er we go it doth pursue.

For the little children all are crying
In the lanes, the alleys and the streets,
Crying with the sobbing that betrays them
When they fain would hide from those they meet.
Crying in the depths of loathsome hovels,
Crying in the homes of wealth and ease,
Crying in the crowds of costly cities,
Crying in far, silent places by the seas.

Evermore goes up the ceaseless wailing,
Neither dawn nor dusk can bid it cease;
And no change of swift-returning seasons
Has the power to say unto it: Peace.
'Mid the daisies in the fragrant spring-time,
'Mid the roses in the summer's hush
'Mid the fruity treasures of the autumn,
Comes no change, no pause, no moment's hush.

For the children weep for fallen fathers,
Weep for homes made desolate as death;
Weep for fear, for shame, for wild foreboding,
Cower before a demon's blighting breath;
Cower before an unspeakable terror,
Cower before unpardonable wrongs,
And their hearts sound only miserere,
When their young lives should be glad as songs.

And they cry against the cup that blights them
Till the cry is deeper than a curse;
Deeper, aye, and to our ears who hear it
Seems the cry far sorer, bitterer, worse.
And to God, who listens up in Heaven,
Could no curse pierce half so keen
As the frenzied sobbing of the children,
Reaching to the depths of Heaven serene.

And they call to the great world unheeding:
Help us, brothers, or we perish ere our time;
Save us from our fathers, from our brothers,
Save us from the woe, the shame, the crime.
Hurl the cup far from us, oh, our brothers;
We are weak and bound by cruel thongs;
We can only sob on in the darkness,
Urge in baby voices all our wrongs.

Help us, oh—our brothers and our sisters,
Innocent are we, yet held in thrall;
Rise! deliver us from out the bondage
Which the stoutest heart may well appal.
Give us help to live the lives of children,
Clean, and pure, and innocent, and calm;
Help to change the voice of our lamenting
To a song of triumph—to a psalm.

Brothers, shall we turn away our faces?
Shall we leave the children in their tears?
Shall no echo from our happy child-life
Plead with us down through the lengthening years?
Must we leave them to the blighting presence
Of a wrong so deep, so dark, so dread,
That we joy to see the faces that it darkens
Lie before us, faces of the dead?

Nay, my brothers; nay, my sisters, hearken
To the children calling in God's name;
All their trusting faces turn toward you,
Plead with you to help them in their shame.
Cruel ye who would be kind and tender,
Far more cruel than ye feel or know,
If ye leave the children undefended
From the cup of cursing and its woe.

—*Hattie Tyng Griswold, in Chicago Times.*

MODERATE DRINKING.

Several Excellent and Conclusive Reasons in Favor of Total Abstinence.

You are quite willing to admit that intemperance is a great evil, that drunkenness is a great disgrace and that multiplied and intolerable burdens are put upon society through the medium of the liquor traffic, but you say: "All this comes from excess; if people would only restrain themselves, there would be no great harm done. Why may I not drink moderately?"

1. Because moderate drinking is prejudicial to health.

The old time idea was that alcoholic liquors were necessary as well to prevent disease as to cure it. But that was before the period of investigation. Now better opinions prevail. There is no appreciable food value in drink. It does not increase, but rather diminishes, the natural temperature of the body. It hinders rather than helps digestion. It is the fruitful parent of very many of the diseases which afflict humanity, and has the effect of predisposing toward them.

The following are sample testimonies of some of the most celebrated medical men of Great Britain:

It is perfectly certain there are multitudes at this moment who are injuring their constitutions and shortening their lives by taking alcohol daily in an amount which they consider strictly moderate.—*Dr. Ridge, M.S., B.A. B.Sc., London.*

I should like to say that a very large number of people in society are dying, day by day, poisoned by alcohol, but not supposed to be poisoned by it. It is one of the commonest things in English society that people are injured by drink, without being drunkards. There is a great deal of injury done to health by the habitual use of wines and alcohol in various shapes, even in so-called moderate quantities.—*Sir William Gull, M. D., F.R.S.*

In the "average man" the habitual use of alcoholic liquors in moderate or even small quantities is not merely unnecessary for the maintenance of bodily and mental vigor, but is unfavorable to the permanent enjoyment of health.—*Dr. W. B. Carpenter, F.R.S., F.S.S.*

As far as my experience goes alcohol is in no sense necessary to health. I will say more. Alcohol is in no sense necessary to work. Not only is alcohol not necessary to health, but no man or woman can ever realize that full sense of the joy of health until they live without alcohol.—*Sir Andrew Clarke.*

2. Because there is danger that you will soon drink immoderately.

There never was a drunkard in the world but began as you say in moderation. Each one repeated over and over the very words which you have uttered: "Why may I not drink moderately?" and yet each one found himself at last bound as a slave and driven to utter destruction. Are you stronger than all these?

Alcohol tends toward producing a physical craving in the body for itself. In this it is different from all foods. The effect produced by a certain quantity to-day can only be produced by a greater quantity to-morrow. The dose must be enlarged and so on and on until the awful craving maddens and brutalizes. Is it well for you to tamper with so strange and fatal a poison? Is it not the wiser course to give it a wide berth? Drink weakens the will-power, tends to destroy self-respect, weaves a strong subtle chain of appetite about you, and brings with it a thousand associations which tend neither to purify nor strengthen. It is far braver as well as safer to make no alliance with the deceitful thing.

3. Because your example is bad.

It is quite possible that you may be able to take just your few glasses per day and never exceed that measure. But where are you leading those who look up to you and follow your example, and alas follow it in everything but its dressing of oil, vinegar, mustard and pepper and serve.—*Boston Budget.*

best point of view, the strong man was riding from crag to crag, forgetful of the tender strength of the boy, whose voice at length came from the distance: "Look out, papa, I'm following you." Then he bethought himself that he should measure his pathway by the standard of his child's capacity.

Would that every day there might sound in your ears the words, which even though not uttered, are yet true: "Look out father, mother, teacher, preacher, man of business, man of office, elder in society, we are following you," and be careful to take no steps in the pathway which proves so fatal to so many of the growing children of every generation. They simply see you enter the tavern, stand at the bar, take the glass at the social board, and they say: "If he drinks why can not I?"

How many a mother's heart near breaks with awful anxiety as she observes how her boy chafes under her restraint and pleading as he answers every plea with: "But mother, Mr. B. drinks, and he is a perfect gentleman."

How many a wife's hopes grow dim and faint as all her expostulations with the husband she loves are met with the ready reply: "Yes, dear, but there is Mr. A. who takes his wine, and is respected and prosperous, surely I can follow his example."

Please just sit down and think if any child of yours, any friend, anybody that comes into contact with you is being led by your example to taste and love the drink. You can do without it and be far better off in health and pocket. Then do so, and give no occasion to stumble or fall to any one in your way.

Do not drink at all; then no one who follows your example can be injured.

4. Because in drinking you help support and perpetuate the traffic.

And what is this traffic? Behold it. Millions of bushels of food are by it annually wasted and turned into a subtle poison. Millions of dollars of capital are kept by it from productive business, and turned into an enginery of waste and ruin. Idleness, discontent, poverty, misery, crime and death crowd together in its wake. The homes it destroys, the hearts it breaks, the lives it sacrifices, the hopes it quenches, the immortal happiness it destroys, are simply incalculable. It is a foul, dark, devilish blot upon our civilization. There is no good thing it aids, there is no evil thing it does not render more evil.

Every dime you spend for drink goes to build up and keep this monstrous system of evil. Why should you help it with your money? Every time you darken the doors of a dramshop your influence is given to the traffic. The more respectable you are the more help you are to it. Why should you lend your influence to this dark system of wrong?

Every time you put your money or influence at its back, that act is known and noted by many. The example tells. Others do as they see you do, your custom brings others' custom, and thus by example you are bringing grist to the fatal mill. Why should you draw custom for such an awful business?

And the traffic has the benefit of your indorsement. Whenever the drunkard's shame brings the blush to its face, whenever the earnest, honest denunciation makes its conscience uneasy, whenever the tears and expostulations of the wife or widow soften its heart for the moment, whenever the terrible ghastliness of the ruin it works flashes before its vision, it finds support and comfort in your sanction and influence and name, and wrapping itself about in the robes of your respectability forgets the shame, stifles conscience, denies the prayer of the heart-broken, and fortifies itself for the continued work.

As a moderate drinker you injure your health, you play with an awfully fatal temptation, you lead others astray, and put your money and influence at the back of a most vile and destructive traffic. Can you afford to do that?—*Prof. S. E. Foster, M. P.*

WHY HE DIDN'T SAY AMEN.

A Business Which the Lord Will Not Take Under His Care.

A few years ago, as Charles G. Finney was holding a series of meetings in the city of Edinburgh, many persons called upon him for personal conversation and prayer.

One day a gentleman appeared, in great distress of mind. He had listened to Mr. Finney's sermon on the previous evening, and it had torn away his "refuge of lies." Mr. Finney was plain with him, pointing out the way of life clearly, and his only hope of salvation. The weeping man assured him that he was willing to give up everything for Jesus—that he knew of nothing he would reserve—all for Jesus.

"Then let's go upon our knees and tell God of that," said Mr. Finney. So both knelt at the altar, and Mr. Finney prayed:

"O Lord! this man declares that he is prepared to take Thee as his God, and cast himself upon Thy care, now and forever."

The man responded: "Amen!"

Mr. Finney continued: "O, Lord! this man vows that he is ready to give his *wife, family and all their interest*, up to Thee."

Another hearty "Amen!" from the man.

He went on: "O Lord! he says that he is also willing to give Thee his *business*, whatever it may be, and *conduct it for Thy glory.*"

The man was silent—no response. Mr. Finney was surprised at his silence, and asked:

"Why don't you say 'Amen,' to this?"

"Because the Lord will not take my business, sir; I am in the *spirit trade*," he replied.

The traffic could not withstand such a test as that. "The Lord will not take" such a business under His care. He demands its destruction, as one of the mightiest obstacles to the progress of His cause in the earth.—*National Presbyterian.*

THE vigorous work of the Brooklyn (N. Y.) Excise League is having marked effect. The successful prosecution of liquor-dealers for violations of the Excise laws has caused large numbers of saloon-keepers to surrender their licenses rather than stand prosecution.

FACE POWDER AND ROUGE.

How the Ladies Enhance Their Natural Charms—Preparing for the Opera or Ball—A Belle's Toilet Set—Dudes Using Bandoline and Powder.

"There is scarcely one woman in a hundred," said a well-known druggist to a reporter's inquiry, "but uses face powder. Some use it only on rare occasions, and very little of it; others are powdered up every day as regularly as they are dressed. It would be very hard to find a woman who has never applied the beautifying dust to her face."

"Of course young women use more than the older?"

"I can not make any rule on that subject. We have customers for face powder old enough to be grandmothers. It is not at all uncommon to see on the streets highly powdered women who at a distance seem to be about thirty years old, but, coming nearer, the wrinkles of the three-score years are plainly visible. Most of our business in this commodity is done with the middle-aged women. The young generally do not need anything to improve the complexion. But when a woman gets to be thirty years of age, if she has not taken good care of herself, her charms begin to fade, and powder and other devices for enhancing their beauty are resorted to."

"Are there many kinds of powder in use among the ladies?"

"Hundreds, I would say. Generally a woman does not care for any powder in particular and a druggist can sell just what he recommends. Some of course have their preferences among powders and will purchase no other. The manufacture of face powders is a large business and many firms have become wealthy in it. It used to be profitable for the retailer to handle these goods, but now the large dry goods stores are dealing in them and the trade of the drug stores is much reduced. But there are many ladies who would not purchase powder in any other place than a drug store because they think they are more liable to get a better and purer article there."

"What are face powders made of?"

"There are various components from which they can be made. Magnesia, chalk and lead are the principal. Some powders are almost entirely composed of chalk, and are of the cheaper kind. Quite a number of women, instead of purchasing powder, use plain drop chalk or pyramid cakes of magnesia. These come much cheaper than the manufactured powders."

"Do you regard powders as injurious to the face?"

"Many powders are chemically pure, that is, contain no ingredients that are poisonous, while others contain lead, which is harmful. Now if a lady comes in to purchase powder and asks me if I have any which is not injurious I give her a pure powder with very little or no lead in it. But all powders are injurious, whether they be chemically pure or not. They close up the pores of the face and destroy the natural functions of the skin. After a woman has used powder for any length of time, her face becomes hard and the skin scaly. Then cream or glycerine must be applied every night to soften the skin and open the pores. Thus the skin, which has its functions just the same as any other part of the body is made to do treble work and finally becomes sore and scabby. I've seen lots of such cases from the use of large quantities of face powder."

"Women use much else besides face powder for the adornment of their charms, do they not?"

"Well, I should say so. You'd be surprised to see all the articles many a belle uses to get herself up for a special occasion, a ball or the opera for instance. She often starts the night before to begin the preparations. She has been in the habit of using powder and her face, as I told you before, becomes rough and scaly. The first thing to do, then, is to apply something to soften the skin. Generally a woman uses cream or glycerine and many have a sort of mask which they wear over night on the inside of which the cream or whatever it may be is rubbed. In the morning the face is soft and smooth. Then as the evening approaches the hare's foot is used to put on the powder. And how do you suppose she gets such nice red lips! She uses rouge, of course. And at the ball she looks perfectly charming—fair but false."

"Do they use anything else besides powder and rouge?"

"Certainly. We have a large sale for face washes, vaseline, toilet water, washes for the scalp, bandoline, camphor ice, eye-brow pencils and a dark liquid for the eye-brow and lashes, not to speak of the quantity of cologne that is disposed of. Many ladies keep all these articles in stock. Then the list of toilet articles includes, of course, a comb, a tooth brush, a set of manicure instruments, a Turkish towel, a flesh brush, tooth paste, a hand glass and other things too numerous to mention. O, yes, the ladies are often the best and most profitable class of trade that a druggist can have."

"Are not the ladies ashamed to come to your store for these articles, especially, the powder and rouge?"

"Most of them are not. They have got used to it and think it no disgrace or no one's business if they use powder or rouge. But some of them, when they come to purchase, always give the clerk to understand that they want the articles for some friend. They never use such things. O, no! And yet you can often see the powder on the face and the rouge on the lips while they are trying to give you this taffy. Many ladies send a messenger boy for all such articles, and thus keep the fact that they use powder somewhat secret. But a man can't see well if he can't tell the difference between a powdered face and one without powder."

"Do men ever use face powder?"

"Men? No, certainly not. But I have sold both powder and rouge to two or three young dudes. And they weren't a bit ashamed of buying them, and acknowledged that they used them regularly. Some dudes also use bandoline for their hair in front, just as ladies do. Bangs seem to be going out of fashion with the ladies. I don't wonder at it, since the dude has caught on to the style.—*Albany Argus.*

FARM AND FIRESIDE.

—Early lambs are considered by many sheep men the most profitable source of income from the flocks.

—Slapjacks: One quart of milk, one pint of Indian meal, seven spoonfuls of flour, a little salt, four eggs; beat the eggs light; add milk, flour and meal, and bake on griddle or "spider." Eat with syrup.—*The Household.*

—Nut Cake: Three eggs, one and a half cups of sugar, one-half cup of butter, one half cup of milk, two and a half cups of flour, one and a half teaspoonfuls of baking powder, one cup of the meats of any kind of nuts, stirred in the last thing.—*N. E. Farmer.*

—All fowls that feather slowly are usually hardy. For instance, the Brahmas. It is owing to the fact that the drain on the system occasioned by quick feathering does not weaken them. Slow feathering, while growing, is indicative of hardiness.—*Rural New Yorker.*

—Fried Bread: Take a half pint of sweet milk and add a well-beaten egg and a little salt; dip in this slices of bread (if dry let it soak a minute) and fry on a buttered griddle until it is a light brown on each side. This is a good way to use up dry bread.—*Household.*

—If you have never tried the soiling system do so, even on a small scale, this summer. Pastures are almost always short and parched in July and August, but sowed corn or oats and peas sown together, will help over the dry time. Rye is one of the best soiling crops.—*N. Y. Examiner.*

—Cracker Pie: One egg, three heaping tablespoonfuls of sugar, four crackers rolled fine, one and one-half pints of milk, cinnamon, and salt to taste. Beat the egg and sugar together, add the rolled crackers, then the milk, spice and salt. This recipe makes two pies on common-sized baking plates. Please try these recipes and report. *Exchange.*

—The Indian method of planting corn was to make a conical hillock, in the top of which the corn was placed, and being used for the same purpose, these hills became so hard that they have, in some old fields, lasted till today. In some places in Michigan a heavy growth of maple has sprung up since, and yet the old cornhills are clearly marked.

BEANS.

The Proper Culture to Make This a Profitable Crop.

With a good yield and fair quality of crop, bean culture is quite profitable. They are not exhaustive, and I have never found a better crop to prepare the land for wheat. Belonging to the same botanical family as clover—the *leguminosæ*—they leave the land in a condition extremely favorable for the growth of the wheat plant.

The navy bean will, in ordinary seasons, mature in eleven weeks from planting, and this will enable the farmer to grow a crop of rye to turn under before planting to enrich the land, or if he has a piece of land full of foul seeds, he can, by early plowing and subsequent stirring, get most of the weed seed to start, and destroy them before the beans are planted; so it is seen that rightly managed beans are a cleansing crop.

In several counties of Southern Ohio beans have been grown largely as a field crop by a method which I have never seen elsewhere. The land is plowed early and frequently cultivated, so as to kill the weeds and get in nice condition, and about the 10th of June the beans are drilled at the rate of about one bushel of seed per acre, with the wheat drill, with every third hoe stopped. This gives two rows, eight inches apart, then a space of sixteen inches, and two more of the close rows. After sowing, the field is rolled so as to leave it level, and nothing more is done to the crop until maturity, when they are cut with the mowing machine, thus doing away with the hard and slow work of pulling. It is wise to plant as soon after a rain as the land can be worked, and it is very desirable that there should not be any heavy rains until the beans are up and have a good start, for, if a heavy rain falls soon after planting, they are likely to rot in low spots, making an imperfect stand, and the weeds will start with them and choke the crop. If, however, the conditions are favorable for the first few days, and the crop gets a good start, they will soon cover the ground so as to keep down the weeds and produce a good crop. If the beans are to be cultivated, sow with the wheat drill, and make the rows two feet apart. Cultivation should be shallow and level, so as not to heap any earth up at the rows, and with favorable weather will need to be repeated but once, as the crop will soon take possession of the soil. Harvesting should not be deferred till the pods are dry, or there will be loss from shelling. As soon as half the pods are yellow, the crop may be cut or pulled, and should be cured as rapidly as possible, and taken to shelter as soon as possible. If lofts, with open floors, can be had to store them on, there is little danger of damage to them in the barn, as they do not pack closely and the air will circulate through quite a bulk of them.

The best time to thresh beans is in clear, cold weather in winter, but if it is not convenient to keep them, there are usually drying, windy days through the autumn when they are in prime condition. The quickest and best way to thresh is to tramp with horses, but care must be taken not to let the horses step on the bare floor, or to have thin places, or the beans will many of them be split, which will detract from their appearance and injure their sale.

If the weeds have been kept down in the crop, it will be better not to plow the land for wheat, but simply mellow the surface with the cultivator or harrow, and drill in the seed, as the land where beans have grown will be found to pulverize easily. I have spoken only of the navy bean, because it is a standard variety. On some soils, and for certain markets, some other variety will often prove more profitable, and each grower must judge for himself what to plant. The "tree bean," which has been largely advertised for some years, seems to be only an improved navy, and the name I consider a misnomer, as it does not, as the name implies, grow in tree form.—*Cor. Country Gentleman.*

A New Tanning Agent.

A new tanning agent has been discovered. The statement is made that a tanner at Tempe, Arizona, two or three years ago discovered a plant which carried a large proportion of tannin, and which, when used in the manufacture of leather, gave extra weight to the product. The plant is of annual growth, indigenous to the deserts and dry uplands, and is known to the Mexicans and Indians as "gonagra." It has a root somewhat longer and more scraggy than the cultivated beet, though resembling it in appearance.—*Arizona Gazette.*

CONGRESSMAN MUTCHLER, of Pennsylvania, states that a severe cough leaves at once when Red Star Cough Cure is taken.

"WHAT is there in a mince pie?" asks a household journal. By the way, we have always been rather curious to know ourselves.—*Boston Post.*

How Pale You Are!

is frequently the exclamation of one lady to another. The fact is not a pleasant one to have mention, but still the act may be a kindly one, for it sets the one addressed to thinking, apprises her of the fact that she is not in good health, and leads her to seek a reason therefor. Pallor is almost always attendant upon the first stages of consumption. The system is enfeebled, and the blood is impoverished. Dr. Pierce's "Golden Medical Discovery" will act as a tonic upon the system, will enrich the impoverished blood, and restore roses to the cheek.

PERSONAL paragraphs in the Dutch newspapers are put under the head of "Meinheer Matters."—*Detroit Free Press.*

"I Love Her Better than Life."

Well, then, why don't you do something to bring back the roses to her cheeks and the light to her eyes? Don't you see she is suffering from nervous debility, the result of female weakness? A bottle of Dr. Pierce's "Favorite Prescription" will brighten those pale cheeks and send new life through that wasting form. If you love her, take heed.

WATCHMAKERS describe the recent attack on the Salvation Army in Berne as a "Swiss movement."

BEDRIDDEN
FOR LIFE.
MRS. ANNA RAMP, of Belair, Ga., under date of Nov. 6, 1884, says: "I have been using your wonderful remedy, Bradfield's Female Regulator, in my family a long time, and I would to God that every afflicted woman in our land knew of its wonderful virtues and curative powers as I do; there would be a great deal less suffering among our sex. I am sure I would have been *bedridden for life* had it not been for the Regulator. I recommend it to every woman I hear of who is suffering with any womb trouble, no matter of what description, and I have yet to hear of a single failure to cure."

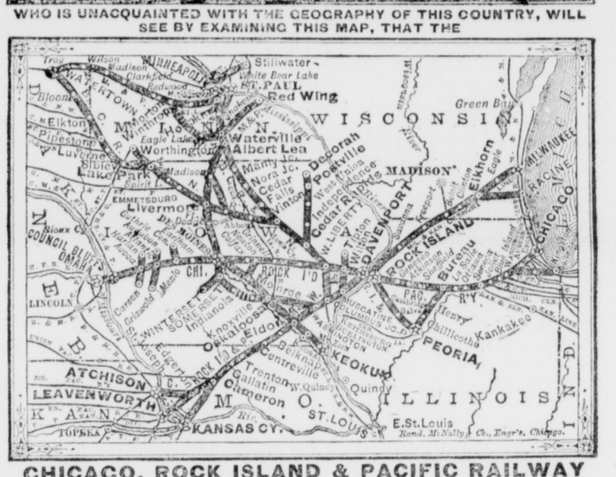
is no flatterer. Would you make it tell a sweeter tale? Magnolia Balm is the charmer that almost cheats the looking-glass.

A MAN
WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE



CHICAGO, ROCK ISLAND & PACIFIC RAILWAY
By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.
The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.
THE GREAT ROCK ISLAND ROUTE
Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.
The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.
THE FAMOUS ALBERT LEA ROUTE
Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.
Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.
For detailed information see Maps and Folders, obtainable, as well as Tickets, at all principal Ticket Offices in the United States and Canada; or by addressing
R. R. CABLE, President and General Manager, Chicago.
E. ST. JOHN, General Ticket and Passenger Agent, Chicago.

PARSONS' PURGATIVE PILLS
MAKE NEW RICH BLOOD
Positively cure SICK-HEADACHE, Biliousness, and all LIVER and BOWEL Complaints, MALARIA, BLOOD POISON, and Skin Diseases (ONE PILL A DOSE). For Female Complaints these Pills have no equal. "I find them a valuable Cathartic and Liver Pill.—Dr. T. M. Palmer, Monticello, Fla." "In my practice I use no other.—J. Dennison, M.D., DeWitt, Iowa." Sold everywhere, or sent by mail for 25 cts. in stamps. Valuable information FREE. I. S. JOHNSON & CO., BOSTON, MASS.

Friend of Woman.
This title is often applied to Mrs. Lydia E. Pinkham, of Lynn, Mass., by happy wives and mothers who have been cured of distressing disorders and relieved of pain and suffering by Mrs. Pinkham's Vegetable Compound. Mrs. L. H——, of Strother, S. C., says in a recent letter: "Your medicine has done me so much good that I don't think I can stop taking it until I am entirely well. I owe all my good feelings to you. The doctor can't get any credit for curing me, it is your medicine that has done me more good than anything I have ever taken." A Dressmaker in Findlay, O., says: "I have derived so great a benefit from the use of your Vegetable Compound that I recommend it in the strongest terms, with the utmost confidence and am sure it will cure the most stubborn cases. I consider it *very much better* than any other preparation made for all Female Complaints."

Built up Meteors.

Dr. Kleiber, of St. Petersburs, publishes in the *Astronomische Nachrichten* the results of investigations by himself and Dr. Keller on the amount by which the earth's mass is increased each hour by the meteors falling upon the globe from space. The original memoirs, which are printed in Russia, have not reached this country, but the summary referred to is extremely interesting. Observations by Professor Schmidt, of Athens, and others, have shown that on the average a single observer will see about ten meteors per hour. This is a number which depends upon experiment simply. A single observer does not command the whole sky above his horizon, but only some twenty-three percent of it. Professor Newton, of Yale College, has shown that about 10,000 times as many meteors fall on the whole earth in an hour as fall as to be visible above any one horizon. Combining these separate reductions, it follows that 10x 100x10x460x23 (or about 450,000) meteors fall on the surface of the whole earth each hour. It is to be remembered, too, that only such meteors as would be visible to the naked eye are included in the enumeration. Every astronomer knows that there are vast quantities of extremely minute telescopic meteors in the heavens. One can hardly work for two or three hours without seeing at least one meteor in the very small field of view of the telescope. The number given above, then, is clearly minimum. Professor Alexander Hershel has shown that the average weight of a meteor may be taken as five grams, whence it follows that the earth receives hourly not less than 2,250 kilograms, or 4,950 pounds of foreign material deposited upon it from the celestial spaces.—*New York Evening Post.*

A Wonderful Piece of Mechanism.

E. M. Calkins, of Warnerville, N. Y., has completed one of the most wonderful pieces of mechanism ever produced. He has worked on it twenty years, and like Darius Green's flying machine, "at last it is done." On a large platform, 7x20 feet, constaucted so as to represent mountain scenery, rocks, trees, lawns, rivers, cascades. caves and lakes, there are several hundred moving figures of men, birds, and beasts. In the centre is a life-like fac-simile of Washington's residence at Mount Vernon. On the roof are two beautiful figures, carved and painted so as to represent sculptured marble guarding with drawn swords the historic mansion, while a gilt eagle perches upon the porch. In a room Washington is lying on his deathbead, surrounded by weeping friends. In the kitchen are colored servants at work. In the yard are men sharpening their scythes and chopping and sawing wood. Several incidents connected with Indian life are vividly pictured. Railway cars are running, and a ship with sails unfurled and laden with passengers float in a miniature river. Even Noah's ark is represented, with Noah at the head of the procession marching into it, while up on the hill tops surrounding are men and women awestruck at the rising waters. A perfect grist mill in operation is represented; also a country home, with the father and mother sitting by the fireside, reading by the light of pine knots. The figures are all kept in motion by a small overshot wheel, less than ten inches in diameter. All of the figures were carved with jack knives, Mr. Calkins having worn out several since he began the work.—*New York Sun.*

The Iron-Clad Mersey.

From London Letter.

To a man in the crowd who looks at the launch, the Messey, as Mark Twain says of his frog, it has no points different from any other iron-clad. But to the person who knows her construction she is the most extraordinary craft ever set afloat. It is claimed the enemy could shoot away the two upper decks, all the upper works, and then blow away the remainder of the hull till not a vestige of the ship we saw launched remained, yet, after such heroic treatment, the Mersey would not only remain afloat, but it would actually steam away from the enemy, and if the weather were good reach port with her crew. Imagine the consternation of a Russian crew who had successfully battered in all the upper works of such a cruiser and then left off a torpedo under her and found that the outside hull or shell sank and left afloat a new kind of steel boat, the like of which they had never seen, and fancy their feelings as they saw the rest of her quietly steam away, defiantly firing a stern-chaser at the Russians, like a man who slipped off his top coat before starting on a run. I fancy the Russians would think that the devil had come to the aid of the British sure enough.

Ayer's Sarsaparilla is the best alternative, tonic, diuretic, and blood purifier, ever produced.

Bits of Humor.

On a war-footing—The veteran with a wooden leg.—*Mail and Express.*

"Necessity knows no law." It is largely this that makes lawyers a necessity.—*San Francisco Ingleside.*

"The most unkindest cut of all" is frequently furnished by your butcher with the assurance that it is sirloin. —*Boston Post.*

"Why is it called the honeymoon?" asks an exchange. Honey, because it is full of cells, and moon because it "comes high." Throw another one at us.—*Yonkers Statesman.*

The old lady who asked for a gold ring at 16 parsnips fine was propably related to the elderly gentleman who said that his daughter was attending the conversatory of music, says a colaborer in the vineyard of truth.—*Bloomington Eye.*

A newspaper correspondent says the Duchess of Buckingham has her stockings marked in cross-stitches, with the initials A. B. C. and a ducal coronet above. It is singular what discoveries people who are not near-sighted will sometimes make.—*Boston Transcript.*

"Ah, captain," said a fresh young man on an ocean steamer, "when you board a vessel, where do you get the timber?" "Ugh," replied the captain, looking him over critically, "we get it out of the log, of course." The f. y. m. went below.—*Cincinnati Merchant Traveler.*

A New York actress has "leaped at one bound into the realm of fame" by appearing on the stage before an audience in her bare feet. This fashion of nudity on the stage seems to have reached the other extreme. Lydia Thompson, a score of years ago, also "leaped at one bound into the realm of fame," but we believe she wore shoes—and not much else. —*Norristown Herald.*

"What in the world are you muffling up so for?" inquired Mr. Blank, seeing his wife putting on her furs atop of her heavy circular; "the thermometer is up to 70 and it is positively hot in the sun." "But you forget, dearest," replied Mrs. B., "that I am going to a church social." "Oh!" responded Mr. B., "that's a different matter; I hope you've got a jacket or something or other under that circular. In this pneumonia season one cannot be too careful."—*Boston Transcript.*

He Practiced Economy.

A factory owner in Illinois went up to Chicago last week to raise a couple of thousand dollars on a third mortgage, but he only found one capitalist willing to advance the money, and he wanted security outside of the mortgage.

"Give you a chattel mortgage on my $3,000 turn-out," said the man.

"The horse might die."

"Well, my wife has $6,000 worth of diamonds."

"Yes, but in case of disaster she might make trouble."

"I've got $10,000 worth of paintings in my picture gallery."

"No good."

"Might take a second mortgage on my opera-house?"

"Not without outside security. Haven't you been a little reckless with your income to indulge in so much extravagance?"

"Extravagance! Great Scots! Why, I've cut down wages three different times within a year.—*Wall Street News.*

London in Brief.

About 3,000 horses die each week.

About 129,000 paupers infest the city.

About 11,000 police keep good order.

About 120,000 foreigners live in the city.

About 10,000 strangers enter the city each day.

About 9,000 new houses are erected annually.

About 700,000 cats enliven the moonlight nights.

About 2,000 clergymen hold forth every Sunday.

About 620 churches give comfort to the faithful.

About 125 persons are added to the population daily.

About 28 miles of new streets are laid out each year.

About 500,000 dwellings shelter the population of London.

No glory could come to us from the slaughter of Englishmen and Russians. We have no national ambitions to promote, and no wrongs to avenge which can justify a war between these great nations. Our interest in it is mercenary. War would probably raise the price of wheat and pork, and stimulate trade and manufactures and for this reason some are not over-anxious for peace. Is it really so? Are we willing to have men slaughtered to increase the price of hogs? Is this the Christian civilization that we boast? Shall we look complacently on the agonies of war because our pockets are thereby filled with gold? Are American women willing to be decked with jewels which are but the crystallized tears of European widows and orphans? Instead of listening with any favor to this clamor for war, the people of this country should be in favor of peace. War is barbarism.—*Western Christian Advocate.*

NEW ADVERTISEMENTS.

Nervousness.

The moment there is danger of impairment of the mind from exessive nervous exhaustion, or where there exists forebodings of evil, a desire for solitude, shunning and avoiding company, vertigo and nervous debility, or when insanity has already taken place, PERUNA and MANALIN should be implicitly relied on. But it is never well to wait so long before treatment is commenced. The early symptoms are loss of strength, softness of the muscles, dim or weak sight, peculiar expression of the face and eyes, coated tongue, with impaired digestion; or in others, certain powers only are lost while they are otherwise enjoying comparatively good health. In all these PERUNA and MANALIN should at once be taken.

Mrs. S. Smith, Hillsville, Lawrence County, Pa., writes: "DR. S. B. HARTMAN & Co., Columbus, O.: I have been a great sufferer for ten years. It seemed as though every organ in my body was diseased at one time or another. I had about given up all hopes, when I commenced taking PERUNA and MANALIN. I immediately began to improve, the soreness and pain disappeared, strength gradually returned, and now I am as well as ever in my life, and I owe it all to your PERUNA and MANALIN. I recommended it to my friends and it gives better satisfaction than any other medicine I ever heard o."

Miss Maria Roderick, Warren, Ohio, writes: "It is with pleasure and many thanks that I write to you to tell you of the great benefit I have derived from the use of the PERUNA. I have used several bottles of your PERUNA, and can safely say it has done me a great deal of good. I have improved ever since I commenced its use."

Mr. T. J. Webber, Plymouth, O., writes: "I am selling your PERUNA, and having a good trade on it. It gives excellent satisfaction."

Mr. Thomas Acton, Brooklyn Village, Cleveland, Ohio, says: "I received a severe wound in my foot by tramping on a spike. It inflamed and was painful and swollen. I had every reason to fear lockjaw. Your simple suggestions as to local applications and the taking of your PERUNA and MANALIN were followed to the letter, and, thanks to you, my foot is entirely well, and I am happy."

NEW ADVERTISEMENTS.

TRUSTEE'S SALE!

Under and by virtue of a deed of trust from Thomas Coddington and Cecilia J. Coddington, his wife, executed to me and recorded in the office of the Clerk of the Circuit Court of Garrett county, for the benefit of the creditors of the said Thomas Coddington, I will

ON TUESDAY,
THE 2D DAY OF JUNE, A. D. 1885,

at ten o'clock A. M., at Coddington's Hotel, Oakland, Md., offer at public auction to the highest bidder without reserve the following described property, to-wit: All the right title and interest of the said Thomas Coddington and wife in and to the real estate which was conveyed to the said Thomas Coddington by William P. Totten, executor of Ezekiel Totten, deceased bearing date April the first, A. D. 1881, and recorded in Liber W. H. T. No. 8, folio 502, it being the

HOTEL PROPERTY

where the said Thomas Coddington now resides. The interest of the said Thomas Coddington in said real estate being the Equity of Redemption, and the said real estate will be sold subject to two mortgages, the first in favor of M. A. R. F. Carr for seven hundred dollars and payable on the first of April, A. D. 1887. The second in favor of Ida M. Crow for one thousand dollars, and payable on the twenty ninth day of July, A. D. 1887. Said Hotel Property is more particularly described as Lots Numbers ten and twelve on the plat of Totten's Sub-Division to the town of Oakland, Maryland. Said Lots are improved by a large two-story frame Hotel building, also large stable, ice-house and necessary outbuildings. This is one of the best locations for a Hotel or boarding house in the town of Oakland.

Immediately after offering the above described real estate I will offer in like manner all the

HOUSEHOLD AND KITCHEN FURNITURE

formerly used by the said Thomas Coddington in running said Hotel, consisting of six heating stoves, two cooking stoves and utensils, twelve bedsteads, beds and bedding, large number of chairs, washstands, bureaus, carpets, lamps, hat racks, tables, stands, &c., &c. Table ware, consisting of knives, forks, plates, dishes, &c. One sofa one marble top center table, also barroom fixtures, including one large bar mirror, one elegant bar counter, stock of whiskey, brandy, wines, gin, cigars, tobacco, bar bottles and decanters, &c; also one buggy, one set of harness, four shoats and many small articles too tedious to enumerate.

TERMS OF SALE:—On the real estate one-half cash on the day of sale, and one-half in sixty days from the day of sale. On the personal property, all sums of twenty dollars and under cash, all sums over twenty dollars a credit of sixty days, on all deferred payments the purchasers to give their single bill, with security to be approved by the trustee. If the sale is not completed on the said Second day of June, it will be continued from day to day until finished. No property will be delivered until terms of sale are complied with.

JOHN B. BRANT, Auctioneer.
FRED. A. THAYER,
5 9 4t. Trustee.

NOTICE.

I, the undersigned, will offer at private sale my farm containing 168 acres, known as part of the Elk Plain Survey, with a house and other out-buildings, about 50 acres improved, well fenced and watered with good springs, all in good order, with a young apple orchard of one hundred trees; 50 are bearing trees of choice fruit. Also a fine grove of spruce, hemlock, beach, birch and sugar trees, situated 2 miles from the W. Va., C. & P. Railroad, and 11 miles south of Oakland and 3 miles south of N. W. Pike.

For further particulars call and inquire of the owner on the premises.

NICHOLAS RINKER,
5 21 2m Garrett county, Md.

ROAD PETITION.

This is to give notice that application will be made to the County Commissioners of Garrett county, after thirty days from the first publication of this notice, for the appointment of viewers to locate a public county road, beginning at or near the residence of Mrs. Seabold, and running by the most practicable route to the Oakland and Ryans Glade road at or near John A. Delawder's residence.

GEORGE D. WHITE,
B. REYNOLDS,
5 9 5t JAMES SEABOLD.

An Old Soldier's EXPERIENCE.

"Calvert, Texas,
May 3, 1882.

"I wish to express my appreciation of the valuable qualities of

Ayer's Cherry Pectoral

as a cough remedy.

"While with Churchill's army, just before the battle of Vicksburg, I contracted a severe cold, which terminated in a dangerous cough. I found no relief till on our march we came to a country store, where, on asking for some remedy, I was urged to try AYER'S CHERRY PECTORAL.

"I did so, and was rapidly cured. Since then I have kept the PECTORAL constantly by me, for family use, and I have found it to be an invaluable remedy for throat and lung diseases. J. W. WHITLEY."

Thousands of testimonials certify to the prompt cure of all bronchial and lung affections, by the use of AYER'S CHERRY PECTORAL. Being very palatable, the youngest children take it readily.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

SPEER'S
PORTUGAL GRAPE WINE,

—Also—

UNFERMENTED GRAPE JUICE.

Used in the principal Churches for Communion. Excellent for Females, Weakly Persons and the aged.

ADOPTED IN HOSPITALS AS THE BEST

SPEER'S PORT GRAPE WINE!

FOUR YEARS OLD.

THIS CELBRATED WINE is the pure juice of the dead ripe Oporto Grape, raised in Speer's vineyards. Its valuable,

TONIC AND STRENGTHENING PROPERTIES

are unsurpassed by any other Wine. Being produced under Mr. Speer's own personal supervision, its purity and genuiness, are guranteed by the principal Hospitals and Boards of Health who have examined it. The youngest child may partake of it, and the weakest invalid use it to advantage. It is particularly beneficial to the aged and debilitated, and suited to the various ailments that affect the weaker sex. It is in every respect A WINE TO BE RELIED ON.

Speer's Unfermented Grape Juice,

Is the juice of the Oporto Grapes, preserved in its natural, fresh, sweet state as it runs from the press by fumigation, thereby destroying the exciter of fermentation. It is perfectly pure, free from spirits and will keep in any climate.

Speer's Burgundy,

It is a dark rich medium Dry Wine used by the wealthy classes as a Table or Dinner Wine, and by physicians in cases where a dry wine instead of a sweet port is desired.

Speer's (Socialite) Claret.

Is held in high estimation for its richness as a Dry Table Wine especially suited for dinner use.

Speer's P. J. Sherry.

Is a wine of Superior Character and partakes of the rich qualities of the grape from which it is made.

Speer's P. J. Brandy.

IS A PURE distillation from the grape, and stands nat rivalled in this Country for medicinal purposes.

It has a peculiar flavor, similar to that of the grapes from which it is distilled.

See that the signature of ALFRED SPEER, Passaic, N. J. is over the cork of each bottle.

Sold by A. G. STURGISS, and by druggists everywhere. Feb. 16'84 1y.

NEW DWELLING HOUSE

On Oak Street, 8 rooms and good cellar. Large livery stable attached; room for 18 horses and 15 vehicles. Good stand for business. Excellent opportunity for any desiring to go into livery business.

NO. 10.

100 ACRES EXCELLENT LAND

Near Oakland. Well timbered. Title indisputable. Price, $8 per acre.

NO. 11.

GOOD DWELLING & LARGE LOT

Near Court House. 10 rooms and out-buildings. Good well of soft water. Terms easy.

NO. 12.

A FINE LARGE FARM OF 169 ACRES

On Deep Creek. 75 acres in grass. Will be sold cheap. A rare chance for a good investment.

PEDDICORD & THAYER,
Atty's at Law, Oakland, Md.

A Rare Chance to Secure a Home.

FOR SALE,

Several Tracts of Land on the Hooppole Road, 3 miles from Deer Park and 6 miles from Oakland, Md.

These lands are of excellent quality, each tract has a stream of water running through for cattle, and springs of excellent water, and a quantity of valuable timber. The Hooppole road passes through the lands and the Deer Park road quite near them. They adjoin the farms of John L. Browning, Frank R. Nethkin, Wm. Schooley, Joseph Spiker, Ralph Browning, Jacob Sell, W. M. Rhodeheaver and others.

These lands will be sold CHEAP and on the MOST FAVORABLE TERMS: One fourth cash and the balance in three or four equal yearly payments, with interest and security to the satisfaction of the owner.

For further information apply to,

JAS. A. HAYDEN,
Republican Office, Oakland, Md.

BLACKSMITHING.

I am prepared to do all kinds of blacksmithing. Farmers' work a specialty. Prices as low as can be had for first class work. Shop near "Browning House."

tf 24 DAVID LITTLE.

AYER'S
Ague Cure

contains an **antidote for all malarial disorders** which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE

to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to **refund the money.**

Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists.

NEW ADVERTISEMENTR.

A HOME DRUGGIST
TESTIFIES.

Popularity at home is not always the best test of merit, but we point proudly to the fact that no other medicine has won for itself such universal approbation in its own city, state, and country, and among all people, as

Ayer's Sarsaparilla.

The following letter from one of our best-known Massachusetts Druggists should be of interest to every sufferer:—

RHEUMATISM. "Eight years ago I had an attack of Rheumatism, so severe that I could not move from the bed, or dress, without help. I tried several remedies without much if any relief, until I took AYER'S SARSAPARILLA, by the use of two bottles of which I was completely cured. Have sold large quantities of your SARSAPARILLA, and it still retains its wonderful popularity. The many notable cures it has effected in this vicinity convince me that it is the best blood medicine ever offered to the public.—E. E. ANDREWS, Druggist, Tower St., Buckland, Mass., May 13, 1882.

SALT RHEUM. GEORGE ANDREWS, overseer in the Lowell Carpet Corporation, was for over twenty years before his removal to Lowell afflicted with Salt Rheum in its worst form. Its ulcerations actually covered more than half the surface of his body and limbs. He was entirely cured by AYER'S SARSAPARILLA. See certificate in Ayer's Almanac for 1883.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists; $1, six bottles for $5.

DR. JOHN BULL'S

Smith's Tonic Syrup

FOR THE CURE OF

FEVER and AGUE

Or CHILLS and FEVER,

AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chill and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.

BULL'S SARSAPARILLA is the old and reliable remedy for impurities of the blood and Scrofulous affections.

About Davis City.

Cor. of the Wheeling Intelligencer.

ST. GEORGE, W. VA., May 25.—That region of forests and wildernesses extending from Fairfax Stone, the corner-stone of Maryland and West Virginia, southward and westward along the western face of the Allegheny mountains for fifteen or twenty miles, was until recently entirely unknown to the outside world, and even now it is not thoroughly explored. The W. V. C. & P. railroad has pushed its surveys into jungles and thickets where until the last year or two none but the adventuresome hunter or the roaming woodsmen had ever penetrated. The railroad has now reached Davis City, a new town springing up at the confluence of Black Fork of Cheat river and Beaver creek. Black Fork comes in from the south, and flows through the splendid Canaan valley, the fame of which is no new thing. Beaver flows down from the summit of the Allegheny mountains, and its course tends to the west, and from source to mouth, a distance of about twenty miles, it flows through one unbroken forest of gigantic pines and one immense wilderness of laurel, tangled and impenetrable. The new town of Davis is regularly laid out under the supervision of the railroad company, and occupies a beautiful situation on a rising ground, overlooking the bronze colored waters of Black Fork.

A few days ago I had occasion to visit the town of Davis. It is named after Senator H. G. Davis, and he is sparing no mean to make it a popular and fashionable summer resort. Already the site is pointed out where he and Stephen Elkins will shortly erect their superb residences, and the grounds are laid off for magnificent flower gardens, and for fountains that will flow with water from living springs. But now there is no artificial beauty about the place. The men are only preparing for works of art. They are tearing down the temples of Nature's building—the groves, for the site of the town was recently, and part of it still is, covered with huge pines, thick together and standing straight and symmetrical one hundred feet high. It cost $100 per acre to remove the timber from the ground. I watched this work going on. When the trees had been cut down and the trunks hauled off and the tops and limbs burned, the surface of the ground was almost hidden by stumps. One could nearly walk from stump to stump. Next followed a corps of workmen with crowbars and dynamite. A hole was made under the stump and a cartridge of dynamite put in place. With the explosion of the dynamite the stump was torn from the ground. Sometimes trees were thus blown out, and the explosion would tear the tree into splinters.

The country around Davis is not minutely explored. The laurel is so dense that it can hardly be penetrated. While I was there, R. W. Eastham, the founder of Davis, came in. He had just returned from an exploring expedition on a hill standing on the opposite side of the river, a half-mile away, and had discovered a very large and cold spring of water, the existence of which was not before known. The spring is higher than the town, and the water can be carried in pipes into every dwelling.

But that which claimed my attention most and excited the deepest curiosity was not the town springing up where four months ago had stood the wilderness, nor the effect which the explosion of dynamite had on trees and stumps; but it was the decaying of the forests, the dying of the gigantic pines that had grown and lived and stood for generations and centuries and now, with no visible cause, dying. That whole region, facing westward from the Alleghanies and reaching to the Backbone mountains on the west, an area of more than one hundred square miles, is one grand grove of pines and hemlocks, the stately beauty of whose trees I have hardly seen excelled in the cypress swamps of Louisiana or the redwood groves of Nevada or California. No one who has an appreciation for nature as she is manifested in the venerable woods, can look over this forest and not feel impressed with the magnitude and regularity of its million trees.

But the trees are dying. Some mighty poison seems to have blown its breath upon the land, and the groves are blighted, and the gray moss clinging to the leafless limbs tells that death has seized these regal kings of the wilderness and they are yielding. A forest of living pines are always green; but the eye observes that instead of green, a dull gray is seen. The trees are not all dead, neither are they all dying; but very many of them show the workings of decay. On every hand can be observed withering branches and failing twigs. As far as can be seen the same meets the view. Dead trees, withering and decaying. The appearance is one of loneliness and melancholy. The very wind that wanders through the forest seems to sigh, dying, dying, dying.

The plagues told of in history which have swept away such myriads of the human race are not explained, nor is it known why of necessity one race must succeed another, or why one order of animals become extinct and another takes its place, or why some portions of the earth's surface are covered with forests and others, equally fertile, are not. If these reasons were known it might be told why these forests on the upper waters of Cheat River are dying. It is well known that vegetation is often killed by vast herds of microscopic insects which feed upon it. I have seen thickets of nettles entirely eaten to death in this manner. I believe that it is even claimed by learned men that all decay natural to the animal kingdom, is nothing more than a mere eating away by microscopic parasites. If this be true of the animal kingdom, it may also be of the vegetable; for I recognize very little difference between the two orders of existence.

Then it may be that the decaying of the timber for a hundred square miles around Davis city is due to the ravage of insects which have come upon the land like locusts and lice came upon Egypt. The ground beneath the trees is damp and chilly. It seems itself like the harbinger of death. The rocks are beaded with icy water, and a damp, cold mold is eating away the very stones. I had been hunting all day for a certain landmark in that wilderness, and had failed to find it. I ate in the afternoon I sat down to rest under the withering pines by a small puddle of ink-black water, collected from the rains, in a little rocky depression of the earth. I don't think that a ray of sunshine has ever touched that little lake. The branches and trunks of trees are too thick above. But while I sat there a little frog came up out of the water and perched himself on a stick and looked at me and sang his tuneless song as though he had basked in sunshine all his life.

H. M.

A Chat with Gough.

John B. Gough, the temperance orator, was seen at his hotel recently by a *Mail and Express* writer. He chatted freely about temperance work. "Of all the societies, I think the Woman's Christion Union is doing more good work than any of the others. It seems to me that there is less drinking and drunkenness now than there has ever been, and public sentiment is moving in favor of prohibition. The work in this country, however, is not to be compared to the work in England. All over the United Kingdom the temperance workers are making rapid strides. There some nine million persons are total abstainers, and it is becoming quite the proper thing to decline drink."

"How do you account for this great revolution?"

"The Britishers are a more steady plodding people than the Americans. They are very careful before they take hold of anything to examine it thoroughly, and then being convinced of its worth they lay hold of it with a bulldog tenacity and stick to it. Then they are great organizers. You know Whitfield preached and Wesley preached, but Wesley preached and organized, consequently the Methodist cause is growing all over the world. The same with the temperance cause. We here preach while our English cousins preach and organize. Why, do you know that a little while ago in Liverpool they had a congress that lasted for a whole week, and at it such men as the bishops of Exeter, Durham, Rochester, Bedford, Gloucester, and Manchester, Canons Wilderforce, and Farrar, and Cardinal Manning were present. Look at the grand fetes they have in London every year at which over 70,000 total abstainers are congregated together at one time. I verily believe if that were to be done here they would be mobbed. Look at their societies—the Church of England Temperance Society with 14,000 members, Cardinal Manning's Society, the Society of Holy Cross with 36,000 members, the National Temperance League, the British, the Scotch, the Irish and the United Kingdom Temperance alliances, and hosts of others. We want this organization here, and then see the stride it would make."

"How long have you been working for this cause now?"

"Forty-two years last October. For eighteen years I spoke on nothing but temperance, but since 1860 I have lectured on various other subjects. I always make it a point, though, to introduce total abstinence into my talk somewhere. Since returning from England in 1860 I have lectured on temperance 967 times. 'London' has been delivered 284 times; 'London by Night,' 33; 'Here and There in Britain,' 73; 'Eloquence and Orators,' 263; 'Peculiar People,' 422; 'Fact and Fiction,' 214; 'Habit,' 173; 'Curiosity,' 201; 'Circumstances,' 251; 'Will It Pay?' 171; 'Now and Then,' 152; 'Blunders,' 147; 'The Powers that Be,' 49."

"Then you have traveled considerable?"

"Up till last July I had traveled 498,000 miles. I have been three times in Europe—once in 1853, returning in 1855; then 1857 until 1860, and in 1878 and '79. In the United Kingdom alone I have traveled 57,000 miles, and during the first five years in London I spoke ninety eight times in Exeter hall."

"Have you any method of preparing your lectures?"

"You know I received no education, and since I was 10 years old I never went to a school of any kind. My lectures are not orations. Every single sentence could be criticised. I am a keen observer, and, if working on a new lecture, I think it out while traveling, and it becomes as it were crystalized on my mind, and when I have observed enough I give it to the public. When in London I spoke so frequently on temperance that I ran dry of anecdotes, and to get a fresh supply I used at night to often go around the worst slums in company with detectives, and so get my illustrations from real life. Although I said I gave, say, the lecture on London 284 times, I guarantee it was different each time, and that I have never given the same lecture twice over. They are like an umbrella I gave my niece some five years ago. She liked it so that it has been recovered, had a new handle, a new stick, and all the ribs replaced but one, yet she says I gave her that umbrella, although there is only one rib of the original. So with the lectures, the subject is all that remains in fact."

"Do you feel at all fatigued by working so hard?"

"I do a great deal. I am 68 years of age now, and it tells on me considerably. So much that I have decided not to travel any more at night, and if an engagement can't be filled without traveling at night it will have to be dropped."

"Are you a prohibitionist?"

"I am, but not like a number of people. I do not believe in forcing a prohibition bill on the people suddenly. I would work up to it; do all that is possible to hinder the sale of liquor by such bills as the Sunday closing, local option, and so lead up to the principal measure. It is no good forcing a measure on the people that the public sentiment is against. You might just as well pass a law to legalize theft as to pass a prohibition measure the people are not in favor of. I think the measures taken to license the sale of liquors in this city on Sunday a disgrace to New York. What do they do it for? Does the community derive any benefit from it? Not the least. Why, do you know Dr. Andrew Clarke says the first teaspoonful of liquor taken into a healthy body does it harm?"—*N. Y. Mail and Express.*

An Important Discovery.

The most important Discovery is that which brings the most good to the greatest number. Dr. King's New Discovery for Consumption, Cough's, and Colds, will preserve the health and save life, and is a priceless boon to the afflicted. Not only does it possitively cure Consumption, but Coughs, Colds, Bronchitis, Asthma, Hoarseness, and all affections of the Throat, Chest, and Lungs, yield at once to its wonderful curative powers. If you doubt this, get a Trial Bottle Free, at Nydegger's Drug store

Henry O. Flipper, the once famous colored cadet, is now a colonel of Mexican volunteers with a handsome salary.

That taint of scrofula in your blood can be wholly eradicated by Ayer's Sarsaparilla.

The Republican.

JAS. A. HAYDEN, Publisher.

OAKLAND, GARRETT CO., MD.

THE CONDUCTOR'S CAROL.

I like to stand by the platform guard
At the end of a rushing train,
To watch the rapid interchange
Of forest, hill and plain,
And see the iron rails reeled off
Like threads from an endless skien.
Lickety, lankety, ling!
The chords of iron ring
In tune with every jar
Of the swiftly moving car.
Music and motion, well combined,
Will give relief to a troubled mind.

The trees and fences near the track
Go flying backward fast,
And houses swim in level fields
Until it seems at last
That I alone am standing still
And the world is gliding past.
Clickety, clackety, clang!
A bridge goes by with a bang,
The time to cross its span
Is a jot in the life of man,
And a span of life is much too brief
To be shortened or clouded by useless grief.

A dozen homes are left behind
At every minute's run—
I know that somebody's hope or fears
Are centered in every one.
Somebody's race has only begun
And somebody's nearly done.
Bumpety, bampety, bind!
Around the curves I wind.
The platform rocks and swings,
But rests on trusty springs.
There's nothing so good for a tired brain
As a ride at the end of a lightning train.
—*A. M. Ensign.*

WHAT HE REMEMBERED.

The One Never-to-be-Forgotten Act of His Life.

George Mason was a very prominent man in Beaver's Falls. For several terms a member of the Legislature, and twice Governor of the State, his name was widely known and universally respected; and his friends, many of whom dated their acquaintance with him from boyhood, said he was a strictly upright man and had never done anything mean, dishonest, or cruel.

But there was an incident of his early youth of which they knew nothing, an incident he had never mentioned to any one, and of which he could not think, even at sixty years of age, without a tingling in his cheeks, and a feeling of deepest shame and contrition.

It was connected with his sister Susan, and though Susan never alluded to it in any way, and seemed to cherish only the kindest feelings toward him, George felt sure that she remembered it to the day of her death, and that the remembrance was as painful to her as to him.

She was only his half-sister, and there was a difference of nearly seventeen years in their ages. George could not remember either of his parents, for they had died when he was an infant; but he had never felt their loss, so tireless and complete was Susan's devotion to him.

For his sake she had given up her dreams of becoming a teacher, and had taken up the laborious occupation of a laundress; and that he might be comfortably clothed and sent to school, she had denied herself almost the necessities of life.

Hard as she was obliged to work, and few as were her pleasures, she never complained and was so bright and cheerful always that George, when a little fellow, took it as a matter of course that she should toil for his maintenance, and never thought to thank or pity her.

But as he grew older he began to realize his obligations to her, and to wish that he could take on his own shoulders the burden hers had carried so long. When he graduated at the High School in Beaver's Falls, he begged her to let him find employment of some kind; but her heart was set on his spending a couple of years at the Drinkwater Academy, and she would not listen to any other plan.

"Now is the time for you to learn, George," she said, "and I want to see you well fitted to take your place in the world. A good education is of the first importance to a man, and I know if I allowed you to leave school now I would regret it as long as I lived. Never mind about my working so hard. I'm used to it, and wouldn't know how to be idle."

So George went to the Academy at Drinkwater, and his brave, unselfish sister continued to wash and wring and iron, proud that her labors secured to him the education she considered of such paramount importance.

Her letters to him were models of cheerfulness and good humor, and she made no mention of the severe headaches which frequently prostrated her for hours, or the terrible cough she contracted by doing without rubber shoes which she did not feel able to buy. George could only guess at the sacrifices she made for him.

Over the mantel in Susan's little sitting-room hung a fine photograph of George, neatly framed. Susan valued it as her dearest earthly possession, and at Christmas time it was always wreathed with bright holly and smilax. George did not know how frequently his sister's eyes sought that pictured face, when sitting at her sewing, nor how many times she left her washtub to take a look at it. He laughed one day at the tender, gentle way in which she handled it when taking it down to fasten the cord more securely.

"You show more respect to that picture than you do to me, Susan," he said. "Do you think a great deal of it?"

"O, George, you can't imagine how I value it!" answered Susan, warmly. "It is such a comfort to me when you are gone."

"I think I ought to have one of *you*," he said.

"George!" She flushed painfully, and the tears rose to her eyes. Some accident which had occurred when George was only two years of age, and about which he had never been told, had taken from poor Susan's face all the beauty it had ever possessed, save that which shone in her gentle, earnest eyes. A terrible scar hopelessly disfigured brow, cheek, and chin, and the skin was withered and faded like that of a very old woman.

"I did not mean to hurt you, Susan," said George, going to her, and putting his arms about her, "and I really *would* like to have a photograph of you."

Susan brushed away her tears with one hand, while with her other she pushed back the hair from her brother's brow.

"No, no," she said, in a low voice. "You must not ask it, dear George. I know you love me too well ever to feel ashamed of either me or my picture, but I would rather not grant this request. Say no more about it, dear brother."

So George turned the conversation to something else, and speedily forgot all about the matter.

The most popular teacher in Drinkwater Academy was Prof. Reeves, who had the class in English Literature and Natural History, and he was particularly kind to George, who took a great and genuine interest in everything pertaining to nature, and was an excellent historian. It may therefore be understood how great was George's pride and pleasure in being asked by the Professor to make one of a small party which had in view a visit to the museum at Beaver's Falls.

George had frequently strolled into the museum when at home and knew by heart the contents of almost every case it contained, but he had never had any one with him who could talk intelligently about them, or who could explain to him the nature of various odd objects which had puzzled him.

"I'm sure to have a capital time," he thought, "and perhaps I may have a chance to call on Susan. I'll give her a genuine surprise."

Beaver's Falls was only sixty miles distant from Drinkwater, and the natural history party, taking an early train, reached the museum at eleven o'clock.

George kept as close as possible to Professor Reeves, and was deeply interested in the discussions which took place between that gentleman and a noted scientist who was an excellent talker and possessed a wonderful fund of information on the subject of natural history. But some of the other boys grew tired, after a time, of the learned gentleman's views, and strolled away in different directions in search of amusement of some kind.

George was listening attentively to the Professor's description of a strange species of moth found in Australia, when he was annoyed by a touch on his arm, and turning, saw John Drake, his boon companion at the Academy, and the son of wealthy and aristocratic parents.

"Come along with me," whispered John. "I know you have heard enough of this sort of talk, and I want you to see the ugliest woman you ever laid eyes on. She's enough to give a fellow the nightmare for a week. Dill and Manning have been trying to chaff her, but they can't get a word out of her. Look, there she is now,"

George turned his eyes toward the door, and saw, coming slowly toward him, a heavy basket of towels on her arm, *his sister Susan.*

All the boys at the Academy knew that George had a sister, and that she lived in Beaver's Falls, but were not aware that her occupation was that of a laundress. He had never considered it necessary to mention that fact. Could he acknowledge it now? Could he go forward and embrace fraternally this tired-looking, stooping, plainly dressed woman with the scarred, distorted face? What would the boys say if he did so? And Prof. Reeves——. No he *could not* do it.

Yet he hesitated a moment, his better feelings, his love for the sister who had done so much for him, struggling for the ascendancy; then, with the thought: "She will never know," he turned aside to avoid the meeting.

But he turned too late. Susan had happened to glance in the direction in which he stood, and recognized him at once.

She gave a slight exclamation, and was about to put down her basket, when suddenly she paused and her face flushed crimson. In her brother's expression of mortification and annoyance, in his attempt to avoid her, she read the truth—*he was ashamed of her.*

For an instant she stood motionless; then with, a long, gasping sigh, which seemed to George to come from the depths of her heart, she lifted her heavy basket higher on her arm, and with averted face passed by him without a word.

He saw her stop at a desk at the other end of the room, and give the basket to a janitor, who gave her some money in return, but saw no more; for fearing to meet her eyes again, he turned his face toward a case of butterflies and moths, and pretended to be deeply interested in them.

He was startled by an exclamation of surprise and pleasure from Prof. Reeves, who broke off in the middle of a sentence, and started forward toward the center of the room with outstretched hand.

"Susan! Susan Shields?" he cried, in a voice that was distinctly heard by every one in the room. "I can't be mistaken! Have I met you at last, after all these years?"

It seemed to George as if the room was whirling around him. Could it be possible that it was Susan, the sister of whom he had been ashamed, that the Professor held by the hand so gladly, and whom he was leading toward the man of science with so eager an air?

"Beaufort," he heard him say, "I want to introduce you to the bravest, noblest woman it has ever been my lot to know. But for her I would in all probability not have been alive now. She saved me fifteen or sixteen years ago from a frightful death. I was lying sick in bed, unable to move hand or foot, when a sudden breeze, coming into an open window, blew the curtains into the gas-light. Susan Shields, waiting in the hall to speak to my mother, who was engaged with company, smelled the smoke, and rushing up stairs, made her way through the flames, and carried me bodily from the room."

"A brave act!" said Prof. Beaufort, "I am indeed proud to know you, Miss Shields."

"An act that I have never been able to reward, deeply as I have felt my obligations to her for it," said Prof. Reeves. "When I recovered my health and I inquired for Miss Shields, I found that she had moved from the town, and I have never been able to discover——"

George could endure no more. Pale, bewildered and contrite, he hurried from the building.

When Susan entered her home an hour later, she found him lying on the sofa in the little sitting-room, his face buried in the great patchwork cushion. He did not move or speak as she approached him.

"George," she said, tremulously, "won't you look at me, dear? I have something I want to say to you."

Still he did not move.

"You must not feel so badly about it, dear," continued Susan, still in that tremulous voice, and laying her hand tenderly on his shoulder. "I was a little hurt at first, of course. But it don't matter, and I don't wonder that you acted as you did. It was only natural that you should be ashamed of me, coming in upon you so unexpectedly and in this plain, cheap dress—and—I don't mind it at all, really!" But even as she spoke she sank down in a little heap on the floor, and hiding her face in her hands began to cry as if her heart would break.

George was by her side in an instant, his arm around her: and as he kissed over and over again the poor, scarred, tear-wet face, he poured forth words of deepest sorrow and contrition, and pleaded humbly to be pardoned for the pain he caused her.

"O, Susan!" he said, it is *you* who ought to be ashamed of *me.* I can never, never forgive myself. If you had only told me how you came by these scars, dear sister! If I had only known!"

Of course Susan returned his kisse twofold, and told him over and over again that she loved him just as well as ever. Then she began to look for something nice for him to eat, and packed a little basket full of goodies for him to take back to the Academy.

"This painful matter must never be referred to again, dear George," she said as she kissed him good-bye. "We will both forget it."

Ah, that was easier to say than to do. George knew that the memory of it clung to his sister as long as she lived, and made her doubly sensitive to her unfortunate appearance, and he would willingly have given all the wealth and honor he acquired in his later years to rid her eyes of that mournful expression which reproached him for that one never-to-be-forgotten act.—*Florence B. Hallowell, in N. Y. Examiner.*

HUCKLEBERRIES.

How a Couple of Young Americans Secured a Supply for the Winter.

"Ge whiz! Look at the huckleberries?"

"Golly, ain't that immense!"

The speakers were two small boys, sun-burned, barefooted, and with big straw hats. They wore short pants, buttoned to a waist, with large white buttons, and were on their way to the creek to swim; but at sight of a large patch of ripe berries forgot all about the water.

"Go for 'em!" said the older boy; and without more delay both scrambled into the bushes, and were soon stained inside and out with bright blue juice. It does not take long for a boy to fill himself, and soon both boys were as full as they could hold.

"Um—guess that is all I can hold," remarked the first boy.

"I'm full too, you bet! but I wish I was holler all the way to my feet. so I could hold more. Let's take some home to mother."

"All right, but how can we carry 'em? I can't hold any more inside of me, and we ain't got a basket or sack."

"I'll tell ye what! Let's take off our pants, tie up the legs an' carry 'em home full."

"All right." And without a moment's delay the two little rascals slipped off their pants, tied up the bottom of each leg with string and soon had each pair of pants full of ripe berries. Slinging their pants over their shoulders they started for home, slipped along by the woods, down the hollow, past the old watering trough, and reached the barn, where they found a large basket, emptied the berries and put the pants where they belonged. And do you suppose the berries were all nice whole ones? Not a bit of it. About one-third were mashed and the inside of the pants were damp and blue.

The boys didn't notice this but picked up the basket and carried the berries to mother. Wasn't she delighted! That same day the berries were prepared and put in jars, and all that winter we had huckleberries. But you should have seen those boys that night when they undressed for bed! Of all the blue sights you ever saw, and it would not rub off either.

From the waist down those boys were one, or rather two, masses of blue. (Blue mass is a better phrase.) How they did yell and laugh, until their mother came up to see what the matter was. Then both crept into bed and drew a blanket over the scene.—*Peck's Sun.*

Boston Rules.

"I had quite a wow the other night," said the dude, as he attempted to twist into a curl the first half-dozen of hairs that were struggling into life on his upper lip.

"Ah! indeed," said his girl; "with whom, pray?"

"With my hated wival, Smith," he answered.

"You did not come to blows, I hope?"

"We did wather. In fact, he struck me on the mouth."

"O, that was altogether unfair."

"Not at all. I struck him first."

"Nevertheless it was unfair of him to strike you on the mouth. It is not right to strike a mustache when it's down."—*Boston Courier.*

—As a rule, longevity is less frequent than people think. The age of 80 is reached only by one person in 18, the age of 100 by one in 3,500, and the age of 110 by one in 1,000,000. Out of 1,000 individuals 74 die between 60 and 70, about 55 between 70 and 80, 24 between 80 and 90, and not more than one between 90 and 100. The average of life seldom exceeds 30 years, even in the best regulated and temperate communities.—*Boston Post.*

—A handful of rice ground through a spice-mill cleans it effectually. The particles of spice or pepeer or of coffee will not adhere to it after this rice is ground through it.

WIVES OF SOLDIERS.

How the Matrimonial Question is Regulated in the British Army.

The general reader knows more, probably, about the solar system than about the details of regimental life; though he is always ready to listen to a tale of wrong like that which was lately told about soldiers' wives. It will be news to many that a soldier can not lawfully get married, or is not recognized as lawfully married, until he has completed six years' service and is also the possessor of a good conduct badge. Having served the allotted period, leave has to be obtained from the commanding officer of the regiment; but as a rule permission is granted readily enough. But even then it may be some time before the newly-elected benedict can avail himself of the privileges of "free quarters."

The proportion of married men for whom accommodation is provided by Government is about ten per cent. of the total strength of the regiment, and when a man has obtained the necessary permission to enter the holy estate it may happen that the "married strength" of the regiment is already above the limit, in which case he has to support his wife and self on his regimental pay and rations. But he is allowed the privilege of "living out of mess;" that is to say, instead of taking his meals in barracks with the other men he is permitted to draw his rations and do his best to make three-quarters of a pound of meat per diem and one pound of bread fill two mouths instead of one. How the men contrive to make both ends meet under such circumstances is a mystery; but they do, and as a rule the married men of a regiment contrive to keep up a better kit than their unencumbered companions. Of course there are exceptions; and many an officer will be able to call to mind some startling effects encountered in his subaltern days on the occasions of "kit inspection"—as when what to all intents and purposes seemed to be a neat folded linen shirt or flannel vest has proved on closer inspection to be the remains of an article of female attire not usually worn by the male sex.

When once a married man has become enrolled on the "strength" his position is materially improved. He has his single room in barracks, with coal, gas and wood free; his wife gets a share of the regimental washing, and if she is a good laundress, frequently has some of the mess and officer's linen to wash. By the practice of strict economy a soldier's wife can, under such conditions, enjoy a more comfortable existence than if she is mated to an agricultural laborer or mechanic. But even under the most favorable conditions it is hard to lay by for a rainy day; and we may be sure that many of the wives of the brave fellows who have lately set out for the Soudan had not more than a few shillings to make a fresh start with. In civil life a thrifty housewife will endeavor to lay by a small stock against bad times occasioned by slackness of work, when the bread-winner may, through force of circumstances, be compelled to endure a spell of enforced idleness; but with the soldier's wife this necessity is not so apparent. So long as her husband remains in the service (ill or well) so long will he receive a certain amount of daily pay; and although the contingency of his services being required abroad may at times present itself to her mind, the possibility of such an event is usually overlooked until it arrives to find her quite unprepared.

Putting aside the men married "with leave," there are in nearly every regiment a large proportion of men who have got married without the necessary permit to do so. Although they do not actually offend against military law, their status as married men can not be recognized by the authorities. The man who marries without sanction is to all practical intents and purposes looked upon as single. He is compelled to continue to mess with his comrades in barracks, although as a rule a certain amount of laxity is observed in allowing leave to sleep out of barracks. When a regiment moves from one station to another the wives of such men often find it a matter of extreme difficulty to scrape together the necessary funds for the railway journey; although, to their credit be it said, they as a rule do manage to solve this difficult problem some way or other, and before their husbands have fairly settled down in their new quarters they are generally located in a lodging within easy distance of the barrack gate.

Incredible as it may seem, not very many years ago as many as three or four soldiers' families had to accommodate themselves in a single room in barracks, the only division being curtains stretched across. After a time the authorities awoke to the fact that this state of things was not quite what it should be, and a single room to each couple has long been the order of the day.—*London News.*

Color Blindness.

The prevalence of color-blindness is, in round numbers, ten times as great in the male sex as in the female. The facts rests upon the examination of many thousand persons in different countries; and the examinations have not only been conducted by trained scientific observers perfectly familiar with all the sources of error in connection with the subject, but also in such a manner as to exclude the names of colors from consideration. The persons examined have been required to match sample colors by selection from among a great variety of skeins of wool; and only those have been set down as color-blind who commence by selecting some shade of stone-color or drab as a match for pale green. Further tests would then determine whether the blindness was to red, to green, to violet, or to all three. In England, among Eton boys, 2.16 per cent. were found to be color-blind in some form; and among males of the laboring class the percentage rose to nearly five.—*N. Y. Post.*

—A fire engine company of Fairhaven, Mass., stopped to elect a foreman pro tem in the street close to the burning building before putting a stream on the flames.—*Boston Globe.*

TEMPERANCE.

A GIRL'S PINK BOOTS.

Where the Money That Purchased Them Came From—A Father's Resolve.

A drunken man came staggering along a village street. As he reached a corner he saw a group of boys watching something across the way. He had not entirely lost his senses, so he wondered what they found so interesting.

"Wha-a-ar-yer-yer lookin' a-at?"

"Well, old fellow," answered Billy Door, "we're looking for a beauty to come out o' that store over there."

"A beau-tie?"

"Yes, a beauty; but go on, there's no use o' your lingerin' to see Pink Boots; your old, red eyes can't see half across the street."

But the rude boy was mistaken; the "red eyes" were not quite so bloodshot as usual, and they were looking with as much interest as the younger eyes at Pink Boots, who just then opened the door of the store opposite them and came out. Pink Boots was a beautiful girl of ten years, and her hands full of flowers—roses, lilies and carnations. She walked a half-dozen or more steps down the walk, and was just stepping into a handsome carriage when another little girl came in sight. For a brief moment the two children stood in strong contrast—Florence Burr, with glowing, happy face, and Celia Hunt, with her pale, distressed one. Florence was dressed in an elaborately-embroidered pink cashmere and her feet were incased in beautiful pink kid buttoned boots; for Florence was going to a tea party. She wore also a broad-brimmed hat with nodding pink plumes. As for Celia, she wore an old faded dress, so shabby that it revealed her bruised ankles, which were bare like her feet. An old veil tied about her pinched face did duty as head-protector, but no wrap covered her thin shoulders, although one was much needed this chilly day.

The carriage drove away with Florence, and Celia stood gazing after it. Of course the drunken man saw the poor child, so did the boys. The latter laughed, and Billy Dorr said: "I tell you it pays better to sell liquor than it does to drink it. What's your opinion, Daddy Hunt?"

"Daddy Hunt" did not answer; he stood stupidly gazing at his barefooted, weary-faced child.

"I say, old fellow, did you buy Celia's fall outfit at the same store that Pink Boots' father bought hers?"

"Shut up, now, will you? If you don't I'll knock the breath out of you."

The drunkard spoke savagely and raised his hand to execute his threat, when suddenly a little arm touched his, and a voice said coaxingly: "Come, father."

The man suffered himself to be led away from the heartless group; cruel Billy singing after them: "O father, dear father, come home."

It was a long walk to the drunkard's home. Before he reached it he was sober. "Celia," he said, "wouldn't you like some pink boots?"

"No, father, I would not want them!"

"Why not?"

"They wouldn't correspond with my rags," the child said, bitterly; "and I wouldn't wear Florence Burr's pink boots if I had silk dresses to wear with them," she added, savagely.

Again her father questioned: "Why not?"

"Because they were bought with money that ought to have bought bread and meat for poor starving children and their crying mothers."

"Who told you so?"

"Nobody told me, I found out for myself."

"You're a strange child, Celia."

"Yes, perhaps I am, but I love you, father."

And Celia put her cold hand within her father's.

"I don't see how you can," he said, chokingly.

"I guess it's because you're my father," was the innocent answer.

As father and daughter entered the house the mother arose, put the sleeping babe in its wretched cradle, and said: "Come to supper."

Such a supper for a family of six! Only a part of a stale loaf of bread and some weak tea. The patient, weary wife would not have been surprised at her husband had he thrown the bread across the room at the wall and hurled the teapot after it, cursing her at the same time, as he had done often before; but she was surprised when he rose from the table—just after seating himself—and said, huskily: "Eat this miserable stuff if you can, poor things! I must be gone."

He started for the door, weak and faint, but determined. His wife followed him, beseeching: "Oh! don't go out again to-night, Fred, don't; the baby is sick, and ——"

She said no more, for, with the words: "The little fellow is sick, is he?" the father went back to the cradle, stooped and kissed his infant child for the first time, and arose with tears glistening upon his eyelashes.

"I'm not going out to drink, Mary. Don't be worried; I'll be back by nine o'clock, and if the child should get worse Celia will find me at Sergeant Wright's."

"What do you suppose it all means, mother?" asked Celia, as soon as her father was gone.

"I don't know, child; but perhaps it means there is a blessing coming on us all. Pray to God that it may be so."

"Mother," said Celia, "father asked me this afternoon if I wanted pink boots. What do you think of that?"

"It was a strange question, child. I'd be thankful if he'd save enough money to buy you some black ones. Your feet are blue with cold."

At nine o'clock a face peeped through the little curtainless window of the kitchen. The eyes saw a desolate picture. It was this: a bare, cold looking room; a haggard woman bending over a sick babe; a little sad-faced girl fallen asleep on the hard floor while bravely "waiting for father," and two pale-faced boys asleep on a low bed against the wall. Upon the boys' faces were traces of tears, for they were only little fellows of four and six, and had cried themselves to sleep because they were hungry.

The face moved from the window, and the man to whom it belonged opened the door and walked in.

"Wife," he said, bending down to kiss his wife's worn face for the first time in years, "I've been an idiot and a brute, and I'll not ask you to forgive me to-night. I'll wait until you thank God that I am! Ah! Celia, you're waking, child. Florence Burr will never buy any more pink boots with the money that belongs to my little ones. I've been over to Sergeant Wright's working hard at blacking stoves for four hours, and while I blackened the stoves he whitened my heart a little. God bless him! He paid me, too, a good price and to-morrow I'm to begin work in his tin shop. Wake up the poor little boys, Celia, my dear little girl. Tell them their father, and not a brute, has come home, and brought such a supper that they'll shout for joy."—*Toledo Blade.*

Beer Drinking.

Against the still widely prevalent notion that fermented liquors are comparatively harmless, and are useful in driving out whisky and other of the stronger liquors, Temperance workers are sternly setting their faces. The "Devil's kindling-wood," as the milder alcoholic beverages have been well called, are found to be poor material with which to put out the fires of intemperance. Says Judge Pitman, of the Massachusetts Supreme Court, in a recently published letter: "An experience of over twenty years in the administration of the criminal law shows to me also that * * beer * * is as potent an incitement to crime as the more overwhelming stimulants." The last known act of a recent Philadelphia murderer and suicide before the double crime was committed, was to send out for beer (that "harmless" beverage!), by which he secured enough frenzied strength to drive two sinful souls into eternity. A dissipated foreigner, of New York City, who, a short time since, after pawning every household article he possessed, tried to sell his daughter for a thousand dollars, was only a "beer-drinker." These are wise words of an Episcopal rector and Temperance worker of New York, spoken in opposition to the movement for cheap licenses for beer-shops, which has of late shown such unfortunate power in that State: "I would make beer-saloons the most expensive of all, for it is there men start to drink. It would be better for poor men and women if they could find no liquor-shop cheap enough for them."—*S. S. Times.*

TEMPERANCE ITEMS.

A TEMPERANCE guild was organized in a barber-shop among young men waiting to be shaved, in Troy, N. Y., by Rev. Father Dolan. He induced twenty-two to sign the pledge, and the organization was formed immediately.

MAINE has passed a law preventing persons from soliciting trade for liquors in the State. Drunkards will be imprisoned from five to thirty days for first offense, and from ten to ninety for second offense. The Legislature has passed a law prohibiting newspapers from advertising liquors.

THE BAR-ROOM AS A BANK.—You deposit your money and lose it. Your time—and lose it. Your character—and lose it. Your manly independence—and lose it. Your self-control—and lose it. Your home comfort—and lose it. Your children's happiness—and lose it. Your soul—and lose it.

A LONDON Temperance manifesto to workmen contains the following: In manufacturing one hundred dollars' worth of liquor two dollars goes to labor. In manufacturing one hundred dollars' worth of boots and shoes, twenty-two dollars goes to labor. The money turned over by one distillery employing one hundred and fifty men would, if employed in more useful ways give work to fifteen thousand men.

INTOXICATION seems to be a specially expensive luxury in Madagascar. An English newspaper states that the Madagascar Government imposes on any person found drunk in the district of Imerina a fine of seven oxen and seven dollars; and the introduction of any quantity of rum into the district is punishable with a fine of five oxen and five dollars—sums, of course, made much larger relatively through the poverty of the people.

IT is an apparent mistake to suppose that the liquor business ever pays for itself, so far as society at large is concerned. Boston, for instance, receives annually half a million dollars in license fees from liquor-dealers; but it pays out for police, criminal court, almshouse and hospital expenditures, $2,324,866—which last sum is, of course, in large, very large part, expended for the restraint of criminals and support of paupers, rendered such by the liquor habit. In every city where licenses are issued, the proportion is similar.—*S. S. Times.*

IN connection with the International Exhibition to be held in Antwerp, Belgium, this year, arrangements are being made for the holding of an International Temperance Convention there. The *National Temperance Advocate* of New York expresses the hope that as many American travelers abroad as can will attend this Temperance gathering, which will assemble some time in September—the exact date being not yet fixed. The *Advocate* adds: "Temperance counsel and testimony from Americans is most welcome and helpful to the struggling friends of Temperance on the Continent."

I HATE the rum traffic. It burned my father to death after squandering his property as a rumseller. Trouble then came through sickness and poverty, and we children were thrust into the poor-house, and father and mother into the asylum. Who ever knew the Rum Devil to stop until it had finished a man and landed him in hell, unless he came in contact with some of God's agents and was saved? My father was burned with his last bottle, the candle falling against his clothing while full of this accursed poison; and he was burned until the flesh dropped from the bones while he was yet alive; and mother was full of the same rum at the time. Ah, what a scene there was in the morning. * * * The only hope I now have of my mother is to send her to a brother in Kansas, where rum is not so free.—*The Voice.*

FOUR OF A KIND.

How a Chicago Hackman Played It on a Quartette Who Were Painting the Town Red.

Some time ago a quartette of Colorado bucks came to Chicago to swap wealth for soaring hilarity and to carminate the metropolis. They paid homage to Bacchus until they began to get somewhat shaky in the legs and then chartered a hack, and then the jamboree commenced in earnest. After an hour's ride, with stops at all way stations for refreshments, one of the Big Four took the hackman aside, and with an air of much impressiveness inquired in a cautious whisper the extent of his claim to their beneficence. He was quiet about it, because the leading characteristic of a Colorado man is to insist on paying for everything when he knocks around with a crowd.

The hackman said his bill was ten dollars.

It was paid, and the carnival progressed at a rattling gait. At the next pause to irrigate, another man found an opportunity to exchange a few private words with the jehu, in the course of which he inquired the amount of political influence he considered himself entitled to.

The hackman said he had no hope of getting a post-office and would have to call it ten dollars.

It was paid and the excursion resumed its winding way. In a short time the wheels of the chariot had ceased to whirl, and the four gidsome bricks were again looking to the zenith and hearing something gurgle. At this pause the third man made it his business to quietly step aside and put a few words in the ear of the acquisitive pilot of the expedition, as to the nature and extent of his claim upon their standing in society for the kindness of his escort.

The hackman said that times were hard, but that he could get along with ten dollars.

Again they loaded up and went forward in quest of a still further addition to their prospect for headache in the morning, and, when the corks had popped and the evanescent sparkler disappeared, the remaining philanthropist found an opportunity to get his breath in the neighborhood of the brigand's nose, and with much incoherency of speech wanted to know the extent of the levy

The hackman said Colorado people came his way so seldom that he would have to exact a ransom of ten dollars.

Once more the wheels were put in motion, and along towards morning the boozy party brought up at the Grand Pacific and disembarked for good. As they were about to go into the hotel one of the men said to the hackman:

"I paid you, I believe?"

"Yes," said the bold buccaneer, "you did."

"But I paid you myself, didn't I?" inquired the second man.

"Yes, sir."

"But hold on. I paid the rascal, too. Didn't I, John?" put in the third.

"It runs in my head that you did?"

"But I gave him ten dollars just a short time ago. Didn't I?" said the last victim.

"You did, for a fact."

"And do you mean to say that you have taken ten dollars from each one of us?"

"That's the way it looks to me."

"Well, are you satisfied now? Do you want any more?"

"Just as you please, gentlemen. Suit yourselves and you'll suit me."

"Thunder, man! You ought to be in Congress. You're a credit to Chicago, and I'm proud to know you. Do us the honor to come in and have a bottle of wine with us. What do you say?"

"That strikes me," said the man of staggering gall, as he threw the blanket on his horses.

And into the hotel the party went, and put in the remainder of the night pouring wine into the gourmand, with the vain hope that they would crowd him to the wall and make him refuse to take anything more. But he sat up with them till they gave it up as hopeless, and beat a retreat.

He had learned his trade at Niagara, and understood his business thoroughly, as they found to their cost. This is not a flight of fancy, but an actual occurrence.—*Chicago Ledger.*

TITLED FOREIGNERS.

The Secret of the Fascination They Exert Upon the Frank and Free-born Yankee Maiden.

American girls who marry foreigners are supposed to have but one motive—adoration of titles—but one excuse for their folly, the influence and encouragement of mothers sillier than their offspring. It is a foreigner, one who not only traveled in the United States, but lived for several years in the best society of New York and Boston, who furnishes a better reason for such marriages than any given by Americans who have attempted to find the secret of the fascination foreigners exert upon the frank and free-born Yankee maiden. Says this observant stranger:

"Men—ladies' men—are terribly scarce in America, where husbands and fathers, brothers and cousins, mostly business men, are off early in the morning after an early breakfast, only to be back in the evening for a late dinner or supper; and they come home worn out with work, debased by greed, unfitted for ladies' company by want of congenial education and polish, of sympathy with female pursuits, or appreciation of female talents and graces.

"Hence it is that a male visitor, a man free from engagements and with indefinite time at his disposal, willing to devote himself to women, to humor them, to take some interest in their not very serious or heavy occupations, is looked upon as a godsend in all American households."—*N. O. Times-Democrat.*

—Cocaine, the new anesthetic, is a colorless fluid not unlike glycerine. Under its effects, a patient at a hospital the other day submitted to the ball of his eye being punctured by a delicate spearhead knife, and in its place a small suction pump inserted which brought out some pus from a sack which the knife had punctured, and all the while the patient, mentally conscious, chatted pleasantly with the operator, as insensible of the operation as though it were being performed on his hat band.—*Chicago Journal.*

CARE OF THE SICK.

Poultices, Plasters and Blisters—How They are Prepared.

Poultices are used in so many cases that it is very important to know how to make and apply them properly. They are intended to convey warmth and moisture to the parts affected, and so must not be made too dry, nor allowed to grow cold before being put on. A wet, sloppy poultice is almost as objectionable as a dry, hard one, and a little care will enable one to attain the happy medium. Flaxseed meal is the best material for a poultice; it is not always at hand in a country house, and then a substitute must be found for it. If many poultices are likely to be required, as in peritonitis, or inflammation of the bowels, it is well to buy a few pounds, for nothing can satisfactorily replace it. If it has not been applied to an open surface where there is a discharge of matter, the flaxseed can be scraped from the cotton and heated again, adding a little water if too stiff, or more meal if there is not enough. To make it, have ready a sufficient quantity of boiling water in a sauce-pan (two teacupfuls will make a good-sized poultice), and into this stir enough of the meal to make a soft, thick paste. By stirring in one direction, and putting in the meal gradually, there will be no lumps. It need not boil after the flaxseed is in. Have ready a piece of old cotton, about two inches larger each way than the poultice is to be when applied, and a small piece of thin muslin. Dip a spoon in boiling water, and spread the flaxseed evenly on the cotton, leaving at least two inches of margin on all sides; lay the muslin on top of the poultice, and fold the margin neatly over it. This prevents the possibility of the flaxseed oozing out. No poultice or plaster should ever be directly applied to the skin; there should always be a layer of muslin, old linen, fine cambric, or some thin fabric, between, to prevent the skin from being soiled, and to make it more easy to remove the application.

Carrots, boiled soft and smoothly mashed, make a good poultice, and turnips prepared in the same way are sometimes used. These must be spread quickly, or they will cool too rapidly. Onions boiled in water to which a little vinegar has been added, make an excellent poultice; they should be crushed with a spoon when spreading them on the cotton. Indian meal makes a tolerable substitute for flaxseed, and is improved by the addition of a third part of slippery elm. Bread is a good material for a small poultice; it should be stale and only the crumbs used. Crumble it between the fingers, and pour over it enough boiling milk or water to moisten it thoroughly. When a poultice is intended to relieve pain, a small quantity of laudanum is sprinkled on the surface. If it is applied when there is an offensive discharge, powered charcoal is used in the same way, or a tablespoonful of carbolic acid solution is put into the water with which it is made. A poultice ought to be removed every two hours at least, and covered with a piece of oiled silk, India rubber cloth, or several thicknesses of flannel, to retain the heat. Before applying it, test it with the finger; if it feels uncomfortably warm, it is certainly too hot to lay on a sick person. When a gentle stimulant is required, a mustard plaster is generally used. Equal parts of mustard and wheat flour is a good proportion. They should be mixed to a smooth paste with warm water—boiling water destroys the essential oil of the mustard and renders it less efficacious—and then spread as thinly as possible on a piece of stout cotton, covered with muslin and applied. In ten minutes a corner should be raised, the state of the skin inspected and, if very red, the plaster removed. It is not desirable to raise a blister, as one made by mustard is more painful than any other. It is said that when mixed with the white of an egg, it will not blister. Flannel dipped in vinegar and thickly sprinkled with red pepper, makes a stimulating application, that is also free from this objection. An admirable plaster for a swelled breast is made by melting together a piece of resin the size of an egg and a lump of mutton tallow as large as a nutmeg; let them remain on the stove for an hour, and when taken from the fire, stir in the yelk of an egg. Have ready a piece of cotton the proper size, cut round and with a hole in the middle, spread the mixture on it, cover with part of an old handkerchief, shaped like the cotton, and apply warm to the breast. It usually gives great relief, and may be left on three or four days.

When a doctor orders a blister, he generally sends one ready prepared from an apothecary's shop, or a bottle of blistering fluid, which only requires to be painted on the spot where the blister is to be raised. It must not be applied where the skin is broken; the surface should be washed, and, if not too tender, rubbed with a rough towel. The time required for it to rise varies in different persons; it is usually from six to twelve hours. If it is very slow, it can be hastened by putting on a warm poultice; the vesicles will then be larger, and less painful. When the blister is raised, if it is intended to let it heal, the skin must not be removed, but snipped carefully in one place with a pair of sharp scissors, and the fluid that has accumulated allowed to escape, then dressed with a piece of soft linen spread with lard or vaseline. If it is to be kept open, the skin must be carefully cut around the edge and taken off, the surface being dressed with any stimulating ointment the physician orders. In either case the place must be washed every morning by gently squeezing tepid water over it from a sponge, a basin or thickly folded towel being placed underneath, to absorb the moisture. The ointment must be applied again as at first.—*Elizabeth Robinson Scovil, in Country Gentleman.*

—A woman of Middleton, Conn., who had become exasperated at an eagle that had stolen her chickens and pigeons saw him taking a siesta the other day after lunching on a spring chicken. She got down a double-barreled shotgun, pointed it at the eagle, shut both eyes and fired both barrels. She brought down the bird, which is to be stuffed as a trophy. — *Hartford Courant.*

MISCELLANEOUS.

—The *Popular Science Monthly*, after a careful investigation, concludes that the human race began about 2,000,000 years ago.

—During the recent Franco-Chinese difficulty the latter country was for the first time in her long history compelled to borrow money from foreign sources.

—Newport is agitated over the condition of the famous old stone mill, one of the wonders of the world and a genuine antique. The extreme cold of last winter has so badly damaged the structure that extensive repairs will be required to keep it from falling to the ground.—*Providence Journal*

—Dr. Holmes gives a receipt for a popular novel: "Hero—heroine—papa—mamma—uncle—sister, and so on. Love—obstacles—misery—tears—despair—glimmer of hope—unexpected solution of difficulties—happy finale. Landscape for background according to season. Plants of each month got up from botanical calendars."

—The late Schuyler Colfax, at a meeting of the Daughters of Rebekah, in Indianapolis, last summer, declared from the rostrum that it was his pride to say that the Rebekah Degree was the best kept secret in the order. Men had been expelled from the order (Odd Fellows) for divulging the secret work, but there was no instance on record of a woman having ever proved recreant to her obligations.—*Albany Express.*

—The saltpetre beds of Nevada are far better situated for the development of their deposits than the nitre region of South America, which is a desert entirely devoid of water and all vegetable life. Water for all purposes is condensed from the ocean water, and carried to the nitre fields, while fuel has to be procured from the mountains in the South of Chili. In Nevada the saltpetre deposits are in the vicinity of a rich farming country, with an abundant supply of water and wood close at hand.—*Chicago Journal.*

—The Fenian ram that aroused considerable public curiosity through the columns of newspapers two years ago is still at New Haven, Conn., in a wooden building on the bank of Mill River. It is about thirty feet long, cigar-shaped, burns petroleum for fuel, and can make excellent speed under water. It is said to have cost $15,000. No one is allowed to see it except those in whose charge it is, and they refuse to talk about it. The building has no side windows and the door is strongly barred.—*New Haven Register.*

—An angler thus tells of his own experiments as to the effect that sound produces on trout, and he assumes that all fishes are more or less alike in this respect: "Frequently when able to observe a trout, while myself unseen, I have screamed and shouted at the top of my voice. These demonstration have invariably been without the slightest effect, but when varied by a concussion which would communicate itself to the water this has no longer been the case, and evidence of alarm, or at least that the concussion was felt, has been apparent."—*Chicago Herald.*

—The use of the revolver by women to avenge real or supposed injuries, is becoming very common in France. Recently a Paris physician, residing in the Rue Lafayette, had a maid servant named Louise Chasot, whom he dismissed. She left, vowing vengeance, of which he took no notice. The next day a messenger called to ask him to go and see a person who was ill at Rue de Dunkirk. He went to the apartment indicated, and on the door being opened to him he found himself in the presence of his late domestic. She immediately fired two shots of a revolver at him. One bullet grazed his ear. The other passed through his left thigh.

—Some thirteen years ago Hon. Gideon Haynes, of Massachusetts, in the course of business mailed four Bank of England notes of the aggregate value of $500 to a correspondent in Brazil. The mail steamer was burned on the passage, with her cargo, and the money was given up as lost. Recently Mr. Haynes discovered that each note was stamped with a mark and a number, and that a duplicate of this was kept in the record of the bank. He communicated with Messrs. Kidder, Peabody & Co., and that firm, together with its London correspondent, Baring Brothers & Co., soon had the matter investigated and the lost bills replaced by new ones. —*Boston Journal.*

The Anamese Aristocrat.

The upper class of Anamese have modeled their life and manners as closely on those of the same class in China as their circumstances would permit. They dress much the same, but in silk of less glossy hue. They never wear their hair en queue. They either wear sandals or go barefooted. When they appear in public it is with a certain number of huge umbrellas or parasols, some before or beside them to indicate their rank. The number has been considerably abridged since the occupation of Tonquin by the Chinese. The vehicle in which they travel is a horselike palanquin or hammock, covered by an oval roof, bent down at the sides. The dignitary always reclines, and is entirely screened from the vulgar gaze by curtains that entirely fill the uncovered openings. He is attended by a multitude of coolies, who carry, beside the parasols, his betel-nut box, spittoon and any other articles which may be wanted during the excursion.—*Cor. St. Louis Globe-Democrat.*

Bustles, Steels, Etc.

Bustles are worn very large because there is a tendency to do away with masses of drapery on the tournure. The separate bustle for each dress is a cushion or pillow of hair made thicker than it was last season, and tacked through with threads at intervals to keep the hair from matting; this is sewed permanently to the belt, and below it are two steels run in casings across the back of the foundation skirt. When a pad bustle is objected to, modistes use a third steel in a casing about eight inches below the belt, cutting it in two for the opening of the placket-hole, and putting a hook and eye at the end of the casing to fasten it. —*Harper's Bazar.*

DECGARY INCREASING.

Hulking Tramps Who Dog Women Until They Get Money from Them.

"I doubt very much," said a gentleman who recently returned to town after a long absence, "if New Yorkers realize what a pestiferous nuisance street begging has become. Before I went to Europe, in 1879, there were old men and women grinding organs on New York street corners, with old cigar boxes resting on the gutters for such pennies as people chose to throw them. Occasionally people saw rag pickers collecting bits of bread and the like from door to door, and now and then an able-bodied tramp soliciting assistance. But all this is vastly different from the begging which one must endure on every side now. If I come out of my hotel in the morning and stand on the corner waiting for a stage, I am beset by two or three men before I can climb into the vehicle. There are gangs of tramps who lurk about in the vicinity of the Union and Knickerbocker Clubs and regularly annoy the members. Public parks are also affected by the beggars.

"Another thing which struck me yesterday was the number of big hulking tramps who beg from women. These dirty and disagreeable-looking specimens actually intimidate and annoy women into giving them alms. One of them yesterday followed my wife for two blocks along Fifth Avenue, just below Twenty-third Street, walking beside her and annoying her so that, finally, she was obliged to give him a dime to get rid of him. At the foot of the elevated railroad stations at Twenty-third, Fourteenth, and nearly all of the up-town stops, one can always find one or two of these men. They do not beg from every passer by, but single out their victims and approach them with apparent respect.

"But if the men are bad, the children are worse. There are gangs of these young mendicants who are fit subjects for police attention. They cry and whine about having no place to sleep and nothing to eat, and so succeed in reaching their victim's pocket. If a man is in a hurry he has to push these little beggars aside before he can get ahead. Some of them sell evening papers, but the majority are simply mendicants. I suppose some of this is the result of hard times. But with New York's ample charity institutions it should be possible to keep these street beggars at least under control. There can be no doubt in the minds of men who know anything about it that two-thirds of the street beggars are frauds of the most palpable description."—*N. Y. Sun.*

SNAKES.

Ophidians That Abound in the Penjdeh Valley.

Remittent fever has of late years played sad havoc among the Jamshidis of Kushk. All the neighboring valleys, including Penjdeh, are infected, and are only habitable in spring and summer by the acclimatized. Another drawback to this valley is the number of snakes which infest it. In spring the country must swarm with them; at present they are to be found, when there is occasion to dig some eighteen inches or two feet below the surface, hibernating in sleepy torpor.

Before winter closed in, one of the Lancers—a strong, healthy young fellow—very nearly fell a victim to one of these reptiles. When picking up a stone he was bit in the back of the hand, and he owed his life to his own prompt presence of mind and Dr. Charles' care and skill. Tearing off a strip of his turban he bound it tightly—so tightly that in the hospital they could not tighten it—round the arm above the wrist. He then made off for the hospital, and half an hour after being bitten he was under Dr. Charles' care. But already there were signs of paralysis in the left leg, and this gradually spread till both extremities were completely paralyzed. He suffered from great heat, followed by intense cold, tingling and numbness in the arms and legs, and much pain over the heart—his heart was "on fire," he complained.

Altogether his case, after an hour or so, seemed hopeless. He was plied with brandy and ammonia, and made to walk till his legs were deadened by paralysis, and then he was put between hot blankets, and hot bricks were applied to his feet. Hypodermic injection of ether was found very useful, and at last, after three hours of unremitting care, he slowly passed out of danger; and Dr. Charles has the satisfaction of being one of the few who have successfully treated a snake bite. However, the man did not completely recover at once. He suffered from blood poisoning, and it was three weeks before he was discharged from hospital.—*London Times.*

The German Ahead.

It is a remarkable circumstance that in every part of the commercial world Germans are supplanting the English as merchants and business men. The reason for this superiority is obvious on its face. The German is highly educated; this makes him intelligent, and then he is patient and thrifty. The number of Germans who can not read or write is smaller than in any other country, while the university graduates are more numerous, and hence they are supplanting the British trader because of their greater intelligence and economical habits. Americans are out of this fight for commercial supremacy. We have neither colonies nor trade with other nations. If we had we would probably hold our own with the Germans except in the matter of education and economy. Our people are reckless spenders, even more so than the English, but this now makes no difference as we have no commercial ambition, and the new administration does not seem to favor any departure from the traditions that have been handed down to us from a past generation.—*Demorest's Monthly.*

—After repeated trials penny dinners in London and Birmingham are becoming successful, though it is admitted that, to a great extent, the children of the very poorest classes are not reached. Half-penny dinners are now being tried in Birmingham.

FOR OUR YOUNG FOLKS.

SONG OF THE REDWING.

The bogs show green in the meadow,
The brook goes babbling along;
High-perched, on a dead-limbed willow,
Gay redwing is whistling his song:
"O-ka-lee! O-ka-lee!
Here are we; come and see!

"My little wife cares for the babies—
I see them in yon grassy clump;
Do you think I will tell *you* just which one?
Be careful, now; look where you jump!
O-ka-lee! O-ka-lee!
Babies wee, babies three!

"Oh, fine is this bright, warm weather!
The tender leaves whisper around;
The shad-birch now whitens the hill-sides,
And violets sprinkle the ground.
O-ka-lee! O-ka-lee!
Envy me? *Envy* me?

"I can not sing all I would like to,
My wife says: 'Be still as a mouse!'
But I do just dote on this willow,
And I dreadfully hate keeping house.
O-ka-lee! O-ka-lee!
Pity me? *Pity* me?

"We redwings are singers and poets;
In meadows and brooks we delight;
But, though glossy our shining black dress-coats,
Our family cares are not light.
O-ka-lee! Children three;
Don't you see? O-ka-lee-e!"
—*S. J. Douglass, in Our Little Ones.*

HOW HARRY WAS LOST.

A Great Scare Which Happily Ended in Great Rejoicing.

It was a sultry day in July and Grandma Morrison had risen with the sun, that she might take advantage of the early morning hours and do her week's baking. By the time Eben came in to get the milk-pail, that he might make his morning call on old Bess, grandma had two beautiful loaves of cake all baked and set away carefully in the pantry, and was bustling about from stove to table and from table to stove, baking cookies. As Eben came up on the piazza and stepped into the kitchen she was just taking the first panful, brown and tempting, out of the oven.

"Good-morning, Eben," said she, deftly sliding the cookies out of the pan on to the table, "won't you have one of my nice crisp cookies before you go out to milk? I always bake a batch when baking day comes round, no matter how many other things I have to do, for Harry thinks there's nothing like grandma's cookies," and her kindly face lit up with a pleasant smile at the thought of her little grandson of five summers, for whom there was not much her old hands grudged doing.

"Thank ye, ma'am, I don't mind," said Eben, taking up a nice brown one and placing it between his teeth. "Do you know is Mr. Morrison goin' to the lot this mornin' to cut that hay?"

"Yes, Eben, he is going, and he said that he would like your help if you could give him the time."

"Well, yes, I calc'lated sparin' to-day to him if he wanted it, and I'll be round by the time he's ready to start."

Shortly after Eben had left the house, swinging his milk-pail and singing "Annie Laurie," Mr. Morrison came clumping down the back stairs, and, opening the door at the foot, said: "Mother, Harry has set his heart on going to the lot with me this morning, and I guess I'll take him along if you think you won't worry about him."

"I can't promise that, father, but I suppose he might as well go if he wants to. I shall have to suffer him out of my sight sometimes; but do, father, be careful, and don't let him go too near the brook or into the next field where the savage bull is, or—"

"Pshaw, mother, what's the use of telling me all that? Don't you suppose I am able to take care of my own grandson?" and grandpa Morrison looked a little piqued.

"Well, yes, I suppose you are, dear; but you know sometimes when you get to working hard you forget everything else, and I promised Sophie, you know, that nothing should happen to her boy while he was staying with us."

A happier boy than Harry, as he ate his breakfast that morning, would be hard to find. Grandma found a nice little basket which had been used for her boy Tom on similar occasions, and filled it with her newly-baked cookies, which, she thought, in addition to grandpa's well-filled dinner basket, would be all the little fellow would want.

"You know, grandma," said he, as she put on his hat and led him to the door, "I'm going to learn how to work like grandpa, so I can s'port mamma by-and-by."

"That's a brave little man," and grandma's eyes were suspiciously dim as she lifted him up into the wagon, which had just come rattling up to the door, and put him on the seat between grandpa and Eben.

"I declare," she said, after watching them drive out of the gate and down the road as far as she could see them, "I declare, I almost wish I hadn't let him go, for grandpa *is* so careless; but there, there's no use worrying," and turning into the house she was soon so busy with her household cares as to forget that Harry was not playing about the house as usual.

About five o'clock Eben came in, saying that he had had a slight chill, and Mr. Morrison had sent him home. Grandma gave him a dose of quinine, and some more to take home with him, making sure, before he left the house, that Harry had not fallen in the brook, or been gored by the old bull.

It had begun to be dusk before grandma heard the welcome sound of the wagon coming into the yard. She hastened to the door, sure that Harry would be ready for a good supper and an early bed.

"Why, where's Harry?" she said, as the wagon loaded with hay went right on toward the barn without stopping at the door.

"Harry!" and grandpa pulled up his horses with a jerk. "Why, he came home with Eben some time ago."

"I've seen nothing of him," said grandma, her face exhibiting great alarm. "Eben came in alone, and went right home after getting some quinine from me. He certainly would have said something about it if Harry had come with him."

"Well, now, that's queer, for I left him to go home with Eben, and went over to see Collins for a moment. When I came back, I'm sure he wasn't there. I'll go over and see Eben about it," and grandpa hastily drove his load of hay into the barn, not stopping to unload it, and, after unharnessing the horses, started as quickly as he could for Eben's house.

Fifteen minutes after, grandma, waiting anxiously in the kitchen, heard him come hurriedly up the walk to the house.

"Mother," cried he, as he entered the room, "it is exceedingly strange. Eben isn't at home, and his wife doesn't know where he is; but she says there was no one with him when he came in this afternoon, and he said nothing about Harry."

"Oh, father, how dreadful this is! If I had only clung to my better judgment this morning and kept him at home, for I almost knew something would go wrong. I should never have undertaken the care of the child in the first place, even for these few weeks, if Sophie had not been so anxious that he should have a breath of country air. But why do we waste time in talking? You must harness Kitty to the buggy and drive right out to that field again, for the child is probably there yet, and frightened almost to death. Take some cookies in your pocket," she added, as he was hurrying from the room, "for you must be very hungry."

Grandma Morrison will not soon forget the suspense of those two hours in which she waited for news of Harry—Harry, her darling and the joy of his mother's life. She tried to busy herself about something, anything which would divert her mind from the dreadful thoughts which haunted it. That brook—what more likely than that he had been playing near it, and had fallen in? At last, driven almost to distraction, she took down her Bible from the shelf, and sat down to read. This had been *her* consolation in all previous sorrows, and she was sure that it, if anything, would be now. She had just taken her seat when she heard the buggy coming back, and with rapid beating heart, she went out upon the steps. There were certainly two figures on the seat, but was the second Harry?

"Is Harry with you, father?" she asked eagerly, as old Kitty stopped before the steps.

"No, mother, this is Eben," replied grandpa, in what seemed to her a surprisingly cheerful voice under the circumstances; "But, I say, mother, Harry has been at home all this time that I've been scouring the country for him."

"Impossible, father! What do you mean? You certainly would not joke at such a time as this."

"No, indeed, mother, it is no joke, but a happy fact. Harry is now sleeping on top of the load of hay which I brought home, if I'm not very much mistaken."

Without stopping to give or receive an explanation of this strange statement, they all three hastened to the barn, where, sure enough, Harry was found sleeping quietly in a little nest on top of the load of hay.

When he had been taken into the house, and duly petted by all, Eben explained how it had all come about. Harry had decided, after his grandfather left him to go home with Eben, that he would rather wait and ride home on the hay, and Eben had put him up on top of the great pile which was to wait there until Mr. Morrison came back, supposing, of course, that Harry would call to his grandfather as soon as he came back. He had, however, become tired of waiting, and gone to sleep, so that when Mr. Morrison came back he had seen nothing of him, and supposed he had gone with Eben.

After Harry was all snugly tucked in bed that night grandma could not refrain from stealing into his room every few minutes to assure herself that he was really there; and she resolved that Sophie should never know what a fright they had had, although Harry had really been safe all the time.—*N. Y. Observer.*

CAUSE AND EFFECT.

How Johnny Was Cured of Crying fo One Day, at Least.

Johnny and Nellie were playing in the sitting-room, when Johnny fell down and bumped his nose. It did not hurt him much, but he was fond of crying. The tears came into his eyes.

"Don't cry, Johnny," said Nellie.

"How can I help it," replied Johnny, "when I have fallen down and bumped my nose?" And he began to cry with all his might.

"Then," cried Nellie, "there is nothing for me to do but to beat the arm-chair till Johnny stops crying." So she seized a stick, and began to beat the chair as hard as she could.

Fred came running in. "O Nellie!" said he, "why are you beating the arm-chair?"

"How can I help it," replied Nellie, "when Johnny has fallen down and bumped his nose, and is crying with all his might? I must beat the chair till Johnny stops crying."

"Then," cried Fred, "there is nothing for me to do but to blow my tin trumpet." So he took the trumpet from his pocket, and began to blow with all his might.

In came Sophia, the older sister. "O Fred!" said she, "why are you blowing so loud on your tin trumpet?"

"How can I help it," replied Fred, "when Johnny has fallen down and bumped his nose, and is crying with all his might, and Nellie is beating the arm-chair? I must blow the trumpet till Johnny stops crying."

"Then," cried Sophia, "there is nothing for me to do but to ring the dinner-bell." So she seized the bell, and began to ring as hard as she could.

The noise soon brought in Mother Allen. "O Sophia!" said she, "why are you ringing the dinner-bell so hard?"

"How can I help it," replied Sophia, "when Johnny has fallen down and bumped his nose, and is crying with all his might, and Nellie is beating the arm-chair, and Fred is blowing his tin trumpet? I must ring the bell till Johnny stops crying."

"Then," cried Mother Allen, laughing, "there is nothing for me to do but to look for the switch which stands near the pan of cookies." And she ran to the kitchen with all her might.

Johnny jumped up, and ran after his mother. He was ashamed, but he tried to laugh. Nellie ran after Johnny, Fred ran after Nellie, Sophia ran after Fred. Johnny had stopped crying for that day.—*Our Little Ones.*

SATURDAY, JUNE 6, 1885.

We have often heard it said "that any man who will attend to his own business will have enough to do," and we respectfully commend this old adage to the anonymous scribbler, signing himself "Oakland" in last week's *Democrat*, who in casting his "immature reflections before the public" undertakes to find fault with our merchants because, forsooth, they see proper to conduct their business to suit themselves. "The charge that this is the dearest country town in the United States has gone out," says this scribbler. Who made the charge? If the charge has been made who has circulated it? Such scribblers as "Oakland," who, having little or no business of their own, or being too lazy or incompetent to attend to it if they have, take it upon themselves to manage the affairs and business interests of "our merchants." This correspondent seems to have an idea that, if the merchants of our town would lay aside the knowledge which they have acquired by many years' experience in business and adopt his peculiar notions, they would thereby enhance the value of property, increase the population and add to the prosperity of the town. All the assumptions and recommendations of scribbler "Oakland" are based upon the statement that "our merchants have everything up to the highest notch." This statement is untrue to start with, and is simply a slander upon men who have been engaged in business here for many years, and who have always enjoyed the confidence of the community. It is our "deliberate opinion" that if all such meddlers in other people's affairs as scribbler "Oakland" would betake themselves to "Hutton's, or Terra Alta," or some other place where they would be allowed to regulate the business of other people, the community would be better off.

We are surprised that the *Democrat* gave space for such a letter as the one refered to, because it is a request to the customers of our merchants to go to Hutton's, Terra Alta, Mountain Lake, St. George, or anywhere in the United States except Oakland, if they want to buy cheap goods. Now, if this letter has any effect upon the readers of the *Democrat* it certainly would be to the disadvantage and against the business interests of all the people of Oakland, whether merchants or not. We are much more surprised that the *Democrat* editorially endorses the communication as containing a great deal of truth. The editor eagerly seizes the opportunity to add the weight of his influence and wisdom to this wanton attack upon the business men of Oakland. The editor is right, however, in supposing that any suggestions from him "would prove a mere whistling down the wind." The people of this community have learned to value suggestions from such a quarter at their real worth, and to look with suspicion upon any statement which is endorsed as thruthful by the *Democrat*.

But apart from the baselessness of the charge, the unthruthfulness of the general statement and the vindictiveness toward a class of respectable men, we submit that it is none of this scribbler's business whether the merchants charge large or small profits. If the *Democrat* and its anonymous writers cannot buy goods at such prices as they desire in Oakland it is their right to go elsewhere, but it is neither their right nor privilege to make such attacks upon our merchants and through them upon the whole business community. In the meantime the merchants would be very grateful if Mr. "Oakland" or the *Democrat* would kindly consent to give them his name.

Colonel Baughman, of the Frederick *Citizen*, is very much incensed at the appointment of Major Allison as deputy postmaster for Baltimore. He has a lengthy editorial on the subject, in which he larrups the "independent" Democrats pretty lively and concludes as follows: "We would like to know when we are to commence to stick to the old doctrines of the party, for if the true men are everlastingly to be turned down for disorganizers, then good-bye to Democracy in Maryland."

A week or two ago we copied two editorials, one from the *Baltimore Herald*, the other from the *Wheeling Intelligencer*, upon the subject of counting the funds in the U. S. Treasury. We gave proper credit for the articles and did not attempt to rehash them and palm them off upon our readers as our own matter, as we have frequently known others to do. The *Democrat* finds fault with us for publishing these articles. They do not suit him. They were not meant to suit him. We did not even think of him in connection with them. We are editing this journal in accordance with our own judgment and in doing so made the selections refered to, and although the *Democrat* says there is nothing in them, the editor devotes a whole column to replying to them. A great deal of work, neighbor, replying to nothing. We have no doubt the readers of the *Democrat* would be grateful to the editor if he would fill the space usually devoted to his own composition with well selected matter from other and abler writers.

An interesting discovery, said to have been made by Appointment Clerk Higgins, is that the records of the departments contain large numbers of cases in which Government employes obtain or seak to retain their positions on the strength of false claims to military service in the late war. Higgins claims to have discovered a number of cases in the Treasury Department in which incumbents have falsely represented themselves as being old soldiers, with a view to secure the consideration which the law promises to that class. Higgins proposes to have the war records searched and the military claims of Treasury employes verified. He is reported to have claimed that there are scores of cases in which he is awaiting final and formal evidence of misrepresentation.

James Graham Pearre, son of the late Judge Pearre, of Cumberland, was convicted in the Baltimore Criminal Court on Wednesday of last week, of attempting to commit a felonious assault upon a Mrs. Kirkland, a few months ago. The affair occurred at the Albion Hotel, where the two boarded at the time. Pearre is twenty-two years of age and a law student. Mrs. Kirkland is thirty-five and has been separated from her husband for some time. The penalty is from two to ten years in the penitentiary. Senator Whyte, counsel for Pearre, will carry the case to the Court of Appeals. Mr. Pearre has been bailed in the penal sum of $5,000 to await the action of the court.

The entrance of the new B. & O. railroad into Philadelphia has not yet been definitely settled upon, but it will be made by an elevated road branching off from the main line at the Schuylkill and running to the very heart of the city. The route, it is stated, will run between Chestnut and Market streets and will extend as far south as Fifteenth street, and a passenger station is to be built fronting the latter street. Every obstacle has been thrown in the way of this line but the company has been able to overcome the most of them and push the work forward with wonderful rapidity.

Offensive Partisans.

WASHINGTON, May 30.—The *Critic* has the following: "The *Critic* is credibly informed that at the last caucus held in March by the Republican Senators the following two rules in substance, were adopted in accordance with their views of civil service reform:

"First—That in case of the removal of any efficient Republican public officer on the alleged ground of offensive partisanship and the nomination of a Democratic partisan in his place, that such nomination will not be confirmed.

"Second—That any Democratic partisan who causes the removal of an efficient Republican and receives as his reward for causing such removal the nomination as successor to the decapitatrd official, that such nomination will no be confirmed."

The reasons assigned for the adoption of these rules are understood to be in effect that the Senate, under the constitution provision of "advice and consent," is an advisory body to the Executive, and with him is held responsible for the character of the Civil Service, and that under the laws of Congress establishing Civil Service reform in the public offices of the country, their duty requires some such action as indicated in the above given caucus rules.

A recent complete survey of the Western and Southern wheat-growing states made by the *Farmers' Review*, of Chicago, indicates that the outlook for the winter-sown wheat is the worst in ten years.

Secretary Lamar and the civil service commission are at loggerheads as to the right of naming candidates for clerkships.

Our Washington Letter.

From Our Regular Correspondent.

WASHINGTON, D. C., June 1, 1885.

The return of Gen. John A. Logan to succeed himself as U. S. Senator from Illinois, is the great political event of the season since March 4th. As he is an indefatigable worker, well acquainted with the political machine, and a Republican of brains, backbone and courage, he will be no deadhead from this time on. Had Blaine been elected, he would have bounced nearly all of Logan's friends. Logan in turn will demand the removal of all who snubbed him and coddled up to Mr. Blaine, and will thus open the doors so that about 1,100 voters employed as clerks in the different departments, will be pointed out to Mr. Cleveland as proper subjects for a rest. Their places in several cases must be filled by Republicans, but as a general thing Democrats will come as the Blainites go out. As the Senate is Republican and needed in political business, it has corresponding power and privilege in naming clerks. The great contest of 1888 has virtually begun already, with Logan in the lead as the coming Republican.

With all the machinery and accessories requisite for the printing of postage stamps, obtained at a cost infinitely greater than that incurred by any private concern, the Government is asking for bids to supply the Post Office Department with four billions of postage stamps of various denominations. Should any individual be guilty of a piece of folly so unequivocally stupid as this, there would be no hesitation about consigning him to some institution for the feebleminded. However, the syndicates in New York and elsewhere have somehow or other always managed to get the best of the Government in these contracts, and the expensive machinery might just as well as not be sold for old iron. When the contract for printing the Government bonds some few years ago was awarded to the American Bank Note Company, it was demonstrated that the Bureau of Engraving and Printing could do a better and finer work, for about one-fourth of the contract price awarded to the company; yet, in the face of that fact, the Treasury Department continued for years to award the contract to the same company. If this manner of doing Government business does not call for a reform, perhaps it were better to farm out every other species of Government work to private parties.

That was a very pretty broadside to the civil service rules that was given by the Interior Department the other day, in the appointment of a clerk of class four as a "chief of division" in the General Land Office. That such an officer is not known to the law, made no difference to the appointing power in this case, which, in its anxiety to provide for the family, did not hesitate to override the law. With this exceedingly shallow excuse for avoiding the rules laid down in the civil service law, we shall expect that chiefs of divisions will be as thick as black-berries in the Land Office, and who as such, will be "fired out" *ad libitum*, in order to create vacancies for that hungry, and "you may well suppose thirsty," horde who infest the corridors to so great an extent that "standing room only" is the admonition to the outside throng.

JUNIUS.

State of Trade.

NEW YORK, May 30.—The general trade situation, as reported to *Bradstreet's*, has not been improved during the past week. At Chicago dullness has been conspicuous; preparations are making for a quiet summer. The bank reserves are larger than ever and loan rates there were never lower than at present. At Cincinnati and at St. Paul the dry goods markets are more active, owing to the summer season and other special influences. At the former city warm weather and concessions by sellers of cottons and summer fabrics have stimulated sales, and in the northwest the demand for summer goods has resulted in increased sales. At St. Louis prices of dry goods have been revised and reductions made in several lines of cottons, but the movement has declined. No gain is expected by the trade until after harvesting. At Boston the movement of cottons from first hands is lighter and the outlook is unimproved. The late auction sales have settled prices on a lower level, which will, for the time being, have to be maintained. So far as the volume of general trade is concerned there has been no appreciable change from last week.

There is much that is discouraging concerning the newly planted corn crop. The weather in the Mississippi valley has been unfavorable. Some of the corn will have to be replanted. In the northwest the weather has been excellent for the spring wheat. The corn acreage there is larger than last year. The wheat acreage is more likely to be larger than last year than otherwise. Its condition is good. The wheat market has declined conspicuously; No. 2 red closed at $1.00 last night, against $1.04½ a week ago. Indian corn closed at 52c., against 55½c. May 22. The war boom (in Asia) was, evidently, a disadvantage, it having unduly stimulated the quotations as well as the shipments on this side. There has been no further news respecting damage to the wheat crop. Cotton is lower, spots having weakened in sympathy with futures. Middling uplands closed at 10 15-16c., against 11c. a week ago. Trade in grocery staples is very quiet, with sugar firm at the advance. Dairy products are demoralized.

The price of American pig iron, bar and of steel rails, have not been changed. The long-time past nominal quotations are still made, and are as frequently subjected to shadings to secure contracts. There is little likelihood of any improvement or increased activity prior to August. Sales have been light. The metal trades prefer at present to await the outcome of the strike between the Amalgamated Association of Iron and Steel Workers and the Manufacturers' Alliance.

BOSTON, May 30.—The *Advertiser* in its review of the wool trade says: Although the total sales of the week are larger than the previous week, trade has been less active, as of the total sales 2,334,400 lbs., 678,000 lbs. were foreign carpet. The sales of domestic were about 400,000 lbs. less than a week ago, which practically shows the dullness referred to. The sales of Australian were about 26,000 lbs. more than last week. Sales of Texas were larger than a week ago, and more sales of choice 12 months have been made at 24c, although not directly reported.

A Bad Outlook for Wheat.

CHICAGO, Ill., May 31.—The growing wheat crop having reached a critical stage, and winter wheat having approached a condition sufficiently near maturity to approximate the acreage and probable yield, the *Farmers' Review* has followed up its usual weekly summary by a complete survey of all the Western and Southern wheat-growing states, reports having been received from over 3,000 correspondents, covering every wheat-producing county in Ohio, Michigan, Indiana, Illinois, Kentucky, Tennessee, Missouri, Kansas, Nebraska, Iowa, Wisconsin, Minnesota and Dakota, together with a very accurate and recent summary from the Pacific coast region, made by the Associated Press. It is believed this will be one of the most complete reports ever prepared. The review has been carefully prepared, and the information is believed to be the most exhaustive and latest that has yet been obtained, and foreshadows the state and government reports. The *Review* says: "The gloomiest views have been advanced concerning the winter wheat outlook for 1885 must now be accepted as the most accurate. The promising conditions of 1884 have this season been completely reversed. The absolute uniformity of the returns indicates that the outlook for the winter-sown wheat this year is the worst in 10 years, and it may be now set down as positive that under the most favoring conditions the total winter and spring wheat yield is to fall considerably under the short crop of 1881, when the total product was 380,000,000 bushels. With the exception of Michigan, Oregon and Washington Territory, as the far Western slope, the causes leading to a decreased output of winter-wheat are almost identical. In Ohio, Indiana, Illinois, Kansas and Missouri the ground was bare of snow during the winter, and the severely cold weather at the close of the winter was followed by dry, cold winds later on. There was also a decreased acreage, owing to the low prices which prevailed for the crop of 1884. In California the decreased acreage was accompanied by a severe drouth, which has tended to almost thin the growing crop. Oregon and Washington Territory were saved by bountiful showers, which came in time to save the grain. When the states are considered in detail the situation can be better appreciated.

Illinois—Fifty-three per cent of the entire wheat crop of the state has been plowed up, and more would have been plowed had not the ground been sown to clover and grass. A very large proportion of the wheat that is heading out proves to be chess, and there is no probability that bread and seed will be made in Southern Illinois this year. Four entire counties in the central and southern tier have been plowed up, and in eight other counties the crop is reported as an entire failure. The average condition of all the counties of the state does not exceed 46 per cent of the yield of 1884, based upon the fields not yet plowed up.

Kansas—The same conditions which exist in Illinois are to be found in Kansas, with this exception—that the Hessian fly has been at work more largely in the one state than the other. The acreage of the state not plowed under is 52 per cent of 1884, and the average condition of the plant is 53.

Missouri—The state presents the same conditions spoken of with reference to Illinois and Kansas. The winter-killed fields having been plowed under leaves the total acreage remaining 58 per cent of 1884, and the average condition is 52. The state will not produce more than one-third of its last year's yield.

Ohio—The northern tier of counties are making a better showing than the average of the states already given, but in all the southern counties the plant has been badly winter-killed. The growing acreage has been reduced to 76 per cent of last year, and the average condition does not exceed 58 per cent of 1884.

Indiana—In portions of Northern Indiana there is a promise of an average yield, but in the southern portion of the state the outlook is no more promising than in Ohio and Illinois. The yield of the state will be about 45 per cent of last year.

Tennessee—The winter-wheat prospect in this state has been running down steadily for 30 days, and the latest advices indicate that the state will not harvest one-fourth of the crop of 1884.

Kentucky—In a few counties of Kentucky the wheat crop promises to be fair, but the returns by counties indicate that the crop will not exceed 50 per cent of last year.

California, Oregon and Washington Territory—The prolonged drouth in California has very greatly injured the prospects for the growing crop in that state. Edwin F. Smith, secretary of the State Agricultural Society of California, has computed the yield of that state for the Associated Press at 25,000,000 bushels, while Oregon and Washington Territory, under improved conditions, will turn out 17,200,000 bushels, an aggregate of 42,200,000 against the aggregate of 68,700,000 for the Pacific coast in 1984, or a shortage of 26,500,000 bushels for the Pacific coast region.

Michigan—This state is the only one in the winter-wheat belt to-day which gives the promise of an average yield. While the winter-wheat in the other states was bare of snow, the wheat in Michigan was well protected and covered, to which cause is to be ascribed the present promising condition of the crop. The state promises to turn out fully 96 per cent of an average yield.

From a close compilation, and taking the most cheerful view of the situation, the winter-wheat yield for the present year will not exceed 200,000,000 bushels, and the absolute percentages from the most trustworthy sources indicate that the yield will fall somewhat under than over the figures given.

Turning to the spring-wheat belt, the outlook is altogether more promising. Full returns from Nebraska show slightly enlarged acreage as compared to last year, while in Iowa, Wisconsin and Minnesota the decrease in acreage will be about 10 per cent, while the condition is about 95 per cent. The acreage of Dakota is about 8 per cent less than last year, and the condition fully equal, though the season is from 10 to 12 days later. The probable spring-wheat yield, based upon continuing favorable weather, will be 130,000,000 bushels. The total wheat crop of the country, therefore, from the present outlook, will be from 320,000,000 to 330,000,000 bushels, against an average yield for the past five years of 464,000,000 bushels.

SAN FRANCISCO, May 31.—The wheat crops of California this season will be the smallest for many years. There are two reasons for this: First, the large yield of last year and the low prices received caused a great shortage in the acreage: second, the late sown grain on winter-plowed land will, from a lack of rain, be nearly all cut for hay. The acreage of wheat in 1884 was, in round numbers, 3,500,000 acres, yielding 57,000,000 bushels. Edwin F. Smith, secretary of the State Agricultural Society of California, estimates the acreage of the present year at 2,800,000 acres, with a total yield of 25,000,000 bushels, or less than half a crop as compared with last year. There is still on hand in the state 15,000,000 bushels of last year's crop. By deducting 10,000,000 for home consumption, there will remain 30,000,000 for export.

The estimates for Oregon and Washington Territory show large gains. The acreage in Western Oregon is 23 per cent greater than last year. In the "Indian Empire," comprising Eastern Oregon and Washington Territory, an increase in acreage over last year is estimated at 42 per cent. The early rains of the present month, which were followed by cool, cloudy weather, have assured the spring-sown grain, while the present condition of the winter-wheat is better than at the corresponding period of last year. Close estimates fix the quantity of wheat for export from Western Oregon at 6,500,000 bushels, and from Eastern Oregon and Washington Territory at 7,500,000, making a total available for export from Oregon and Washington Territory of 14,000,000 bushels. The total yield of wheat in Oregon and Washington Territory last year was 11,700,000 bushels. The estimated yield this year will be 17,200,000 bushels.

A good story of Judge Bond, of the United States District Court, is told by one of his Western friends. It occurred in Boston in 1877. The two went to call on a medium. They were shown many wonders, and at last the Judge was told to write a list of names on a slip of paper, which being done, he was instructed to run his finger down the list and stop when the accustomed rap on the table was heard. When he got to the middle of the list a violent blow was struck upon the table. Thereupon a long conversation ensued between the Judge and the materialized spirit, in which were rehearsed many astonishing facts (most of which the Judge had ingeniously managed to drop in the opening of the conversation with the medium.) Finally, the exhibitor suspected something, and the "spirit" abruptly departed. Then the Judge fell into a brown study, from which it was difficult to arouse him. Suddenly looking up, he said, with the most admirably assumed tone of astonishment and conviction; "This is the most remarkable thing I ever dreamed of; I almost doubt the power of Omnipotence to equal it." "Ah" says the medium, "I can show you greater things than that." Further conversation ensued in a similar strain, when Judge Bond burst out with: "But I tell you, sir, I challenge the Almighty to do such a thing. Why, sir, can you believe it? I left that gentleman not twenty minutes ago on the steps of the Parker House!" At this the medium became naturally furious and exclaimed: "I told you to write the names of dead men on that list." "No," replied Judge Bond, with a look of childlike simplicity, "you did not; you told me to write the names of friends, and I did so. There isn't the name of a single dead man on that list." It is needless to add that the Judge and his friend departed without ceremony.

A Florida Vendetta.

A despatch from Madison, Florida, gives a description of the desperate affray at Hickory Grove school house. It was the outcome of a quarrel between the West and Langford families, and three on each side took part in the fight. In the forenoon, while Sunday school was in progress, Eugene West drove up with his brothers, John and Abe. William Langford, who was sitting in the shade outside the church with some friends, got up and approached the West boys. Only a few words were exchanged before Longford drew a revolver. Both sides began shooting almost simultaneously. Eugene West was shot while attempting to jump out of the carriage. The bullet struck him in the back and lodged in the shoulder. Babe and Taff Langford ran up to protect their brother, and the firing became general. Thirty shots were exchanged. Babe and Taff Langford were armed with knives only. Eugene West was cut in the right arm and nearly bled to death. His coat was cut to pieces. John West was cut in the left hip and Abe West in the back. William M. Langford was shot in seven places, and his recovery is doubtful. His brother Babe was shot in the bowels and fatally wounded. Taff Langford was struck on the head by a bullet, but the wound is not necessarily fatal. When the firing ceased the parties were surrounded by a number of the Sunday school teachers and further fighting was prevented. Several women and children are dangerously ill from shock induced by fright and excitement. The fight was the result of a feud of long standing between the two families. The ill-feeling was revived during the campaign last fall by personal letters published in two local papers by William Langford and John W. West. All of the parties are well connected and wealthy, and it is feared that the quarrel will be taken up by others.

A train arrived in Chicago Sunday afternoon in charge of a madman, who, with a pistol, had terrified the train hands and passengers. Before he was captured he killed one police officer, mortally wounded another, and was fatally injured himself.

An earthquake has laid Serinagur, the capital city of Cashmere, in ruins, entailing a great destruction of life and property.

Coming! Coming!

A new stock of stationery, plain and fancy, of the latest designs. Will be on hand in a few days at the Post-office, Grantsville, Md. Look for it. Wait for it.

LOCAL NEWS.

LODGE MEETINGS.

OAKLAND LODGE, I. O. G. T., meets in Sturgiss' Hall every Tuesday night.

LOCAL BRANCH, No. 85, of the Iron Hall, meets in same Hall 1st and 3d Saturday nights of each month.

ALTA LODGE, No. 574, K. of H., meets in same Hall 2d and 4th Thursday nights of each month.

SHEALTIEL LODGE, No. 122, I. O. O. F., meets in Legge's Hall every Monday night.

PATMOS COUNCIL, No. 386, A. L. of H., meets in same Hall 2d and 4th Friday ntghts of each month.

—A few more straw hats at cost, at Harne & Lawton's Grocery.

—Evan Jones, a miner working in the Armstrong mine, at Elk Garden, who was crushed on Friday evening of last week, by a fall of breast coal, has since died.

—1,000 matches for 10c., and 3 boxes shoe blacking for 10., at Harne & Lawton's Grocery.

—Bring in your buggies and wagons and have them repainted. Shop over Naylor & Richardson's wagon shop, Z. F. MALONE,
6 6 4t. Carriage Painter.

—Buy Gun Powder, Imperiel, Loo Choo and Oolong teas, at Harne & Lawton's Grocery.

—F. D. Brooke and sister will open a Photograph Gallery on Pennington street, near Main, on Monday, June 8th. See advertisement in another column.

—Just received at Harne & Lawton's Grocery, a fine lot of candies.

—John Jacobs, an old employe of the Phœnix mine, committed suicide at Westernport on Thursday of last week, by severing his jugular with a razor. He was about sixty-six years of age, and had been a resident of Westernport for many years.

—Buy your groceries at Harne & Lawton's Grocery, and have them delivered to your home free of charge.

—Mrs. White has opened a bakery and confectionery in the room formerly occupied by C. P. Smith, on Second street. Fresh bread, cakes, pies, candies, nuts, &c. &c., always on hand. Will furnish ice cream by the plate or in any quantity.

Just received at Harne & Lawton's Grocery, a nice lot of hams, shoulders and bacon.

—The average life of farmers is sixty-five, while that of printers is thirty-three, which shows the necessity of prompt payment to the latter, so that they may have the pleasure of handling their own money during their short sojourn on this sublunary sphere.

—Just what we want—some of Harne & Lawton's old reliable cigars.

—The County Commissioners have been working on the levy from Monday to the time of going to press. The tax rate for this year will be about $1.35 on the $100, for State and county purposes. We expect to publish the Levy List next week.

—Throw away your old washboiler and use Frank Siddalls' soap, at Harne & Lawton's Grocery.

—It is currently reported that Senator Gorman and family will arrive about the first of July to spend the summer in Oakland. If this be true the Senator will have an opportunity to make the acquaintance of the factions hereabouts and hear what they may have to say about each other. It might be well for the Senator to have the Postoffice matter settled before he comes.

—Use Harne & Lawton's celebrated Guiding Star flour.

—The Ladies Aid Society of the Ev. Lutheran Church of Oakland, held a fair and festival last week, for the benefit of said church, which was a success in every way. The net proceeds amounted to the neat sum of $63.82. The ladies desire to return thanks to Mrs. A. A. Perry for the gratuitous use of her building, to the ladies (especially those of other denominations) who assisted in doing the work, and to the people generally for their patronage.

—Private families furhished with fresh roll butter during the season at reasonable prices at Harne & Lawton's Grocery.

—Whenever anybody made application to the Burgess and Commissioners for the office of Bailiff he was told to put in his bid. The applicants put in their bids. Mr. Thomas R White offered to take the office for $15 per month and a certain percentage for collection of taxes. Mr. Chisholm offered to act as Bailiff for $40 and a certain percentage for collection of taxes, and said "he would do it for no less." Mr. Chisholm was appointed. Comment is unnecessary.

—At the regular monthly meeting of the town council Monday nigat the Burgess announced the usual committees. The declination of the office of Bailiff by Mr. P. A. Chisholm was announced, when, on motion, the Board proceeded to an election to fill the vacancy. Mr. Thos. R. White being the only candidate placed in nomination, a motion was made that his election be made unanimous which was lost, the vote standing 3 for and 4 against. After several ineffectual ballots, the vote standing 3 for Mr. White and 4 blanks, the matter was dropped. The Burgess and Commissioners Hamill and Heibig voted for Mr. White and Commissioners Jamison, Delawder, Mason and Compton voted blank.

Church Services--Sunday.

M. E. Church—Preaching at 8 P. M. by Rev. M. W. Rider.

Presbyterian Church—Preaching at 11 A. M. and at 8 P. M. by Rev. John S. Foulk.

St. Peter's, Catholic— Preaching every Sunday at 10½ o'clock A. M., except the second Sunday of each month.

Notice!

All persons knowing themselves indebted to me will please call and settle by cash or note. All claims not settled by the 1st of June next will be given out for collection.

H. A. RASCHE.

For Sale Cheap.

A second hand Smutt Machine in good running order, will clean from 15 to 20 bushels per hour. Call on, or address,

H. A. RASCHE.
Oakland, Md.

Chance for Investment.

For sale or rent, two cottages, furnished, with use of horses and carriages.

MRS. E. A. KILBOURN,
4 11 Oakland, Md.

Festival!

The Ladies of Oakland will hold an Ice Cream and Strawberry Festival for the benefit of the Oakland Athletic Association, in the Brooks building, on Wednesday and Thursday, June 10th and 11th, 1885. The proceeds will be used in purchasing base ball uniforms for the different teams of the Association. The public generally are invited to attend.

Camp Meeting.

The camp meeting at Mountain Lake Park will commence Saturday, July 11th, and close Monday, July 20th, 1885. This meeting will be in charge of Dr. Dugan Clark and D. B. Updegraff, Ministers of the Society of Friends. Ministers and Evangelists of other denominations will participate in these services. Persons in the surrounding country are invited to come in wagons, with tent covering. There is plenty of shade, grass and water free of charge. Board can be had at $1 per day.

J. M. DAVIS,
Superintendent.

W. C. T. U. Inter-State Conference and Training School.

The Woman's Christian Temperance Unions of Maryland, Virginia, West Virginia, Ohio, Pennsylvania and the District of Columbia will hold a Conference and Training School for Temperance workers at Mt. Lake Park, Md., from July 1st to 4th. Speakers of National reputation will deliver addresses. Illustrated lectures on the methods of W. C. T. U. work, including a "Model Union" and "Band of Hope" will be given under the supervision of Mrs. Mary Woodbridge, of Ravenna, O., and Mrs. Nelly Bayley, "National Chalk Talker," of Chicago, Ill. Mrs. Chapin, of Charleston, South Carolina, will speak for the South. Here will be a rare opportunity to enjoy the mountain air, and the companionship of cultured Christian workers. Reduced rates will be given on Railroads, and ample accomodations afforded at "Grace Cottage," the delightful home of Jennie Smith, our R. R. Evangelist, and at the various Hotels at the Park. Send for programme, giving each day's lectures, addresses, discussions, music, &c., with names of the eminent speakers, to

MRS. I. H. JOHNSON,
Chairman Committee on Program,
Parkersburg, W. Va.

Public Sale of Hay Rakes.

Wishing to close out my entire lot of Hay Rakes, I will sell to the highest bidder, on SATURDAY, JUNE 13th, 1885, in front of my furniture room, Oakland, Md., eleven hay rakes, all in good condition, and all guaranteed to do good work. These rakes will be sold without reserve. Terms will be made known on day o sale. Will sell at private sale at any time.

5 30 3t JOHN SHARTZER.

Bucklen's Arnica Salve.

The best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by W. D. Nydegger, Druggist, Oakland, Md.

Stove Wood for Sale.

The undersigned is prepared to furnish and deliver to the residents of Oakland, dry stove wood, cut ready for use, at a reasonable price. Orders by mail will receive prompt attention.

6 6 3t. WM. CASTEEL.

Death of Mrs F. R. Seymour.

Mrs. Elizabeth Seymour, wife of F. R. Seymour, deid at her husband's residence in West Virginia at 7:30 o'clock Saturday morning, in the 71st year of her age. Her maiden name was Welton, and she was a native of Hardy county. She was a lady of many good qualities and generally esteemed. Her husband, who is a well known and highly respected farmer, survives her, with ten children, all married. The deceased leaves behind, besides the ten children, 39 grandchildren and 9 great-grandchildren. Mrs. D. E. Offutt, of Oakland, is her daughter. The funeral took place Monday morning, and was largely attended. The remains were interred in the cemetery on the home place. Rev. J. E. Moffatt officiated.

Special Attention.

In the various departments of our business we endeavor to meet the popular demand for new goods and low prices. We have a large variety in ladies' and children's hats and bonnets, both trimmed and untrimmed. We also have a complete line of trimmings, flowers, feathers, plumes and pompons, silver and gilt laces, ribbon scarfs and other novelties. Good assortment of ladies' cotton, lisle thread, silk and kid gloves, all colors and latest styles. Satin and silk coaching parasols, of latest styles and lowest prices. Our shoes are from the best manufacturers. We guarantee every pair as represented and as low as the same quality can be bought anywhere. Orders by mail or otherwise promptly attended to.

M. L. SCOTT.
Baltimore Store.

Obstructed Streets and Alleys.

We desire to call the attention of the Burgess and Commissioners to the fact that there are several streets and alleys within the town which have been fenced up and obstructed. The persons who have taken possession of these streets and alleys never bought nor paid for them. The erection of fences across them is, we are told, a violation of the law. The town officials have acted commendably (so many people say) in removing obstructions from streets lately. Let the work go on until all the streets and alleys are free from obstructions of any kind. If it should be found that some of our prominent citizens or even officials have obstructed the streets or alleys don't let the good work stop, but let the council see to it that all the people of the town obey the law.

Meeting of the Board of Health.

OAKLAND, MD., May 30 1885.

The Board of Health held a meeting this day for the purpose of thorough organization, and to elect new members. All members of the Board was present, consisting of Dr J. Lee McComas, Prest., Dr. B. T. Keller, J. W. Vietch, State's Attorney, and Dr. E. H. Bartlett, Secretary,

On motion the following named gentlemen were elected members of the Board: P. T. Garthright, of Mt. Lake Park, Hon. P. Hamill, Hon. R. T. Browning, Geo. L. Bosley and S. L. Townshend, of Oakland.

The Secretary was instructed to notify these gentlemen of their election, and to furnish our local papers with the proceedings of this meeting, requesting a notice of the same.

The next meeting will be held on Monday, June 8th, at the office of Dr. McComas, at 8 o'clock P. M. No further action being deemed necessary at this time, the Board adjourned to meet as above.

E. H. BARTLETT, secty.

Marriage Licenses.

Marriage Licenses were granted to the following parties during the month of May:

Israel A. Beverlin and Mary C. White.

W. Z. Warnick and Lillie E. Dawson.

Frank Bill and Mary Wagner.

Wm. A. Smouse and Katie Shaffer.

And one with request not to publish.

List of Letters.

List of letters remaining unclaimed in the Post Office at Oakland. Garrett county, Md., June 6th, 1885.

Friend, Geo. B. M.,
Huff, Jennie,
Lewis, Roxana,
Powell, Joseph,
Paugh, John W.,
Rush, David 2,
Schooley, E. O. Miss,
Thompson, Walker,
Wan, James.

Persons calling for them will please say they are advertised.

R. THAYER, P. M.

Real Estate Transfers.

The following is a list of real estate transfers filed for record in the office of W. H. Tower, Clerk of the Circuit Court for Garrett county, for the month of May:

Thomas Gilpin to George H. Gilpin, part of the tract of land called "The Pink of Allegany," containing 35 acres; $5.00.

Wm. Casteel and others to John O. and Wm. M. Thayer, their interest in several tracts of land lying in Garrett county; $500.00.

Jacob L. Camp to Mary Camp, 3 acres of military lot number 2732; $220.

Hannah J. Matheny and others to Samuel Faulkner, all their undivided interest in lots Nos. 2987, 2988 and 2990, containing about 200 acres and known as the "Samuel Sisler Farm;" $300.

Emanuel Efsing and wife to Ezra Savage, part of a tract of land called "Utica," containing 199¼ acres; $400.

Zachariah S. Claggett and Geo. W. Smith, Jr., trustees, to Julius Oester, 696 acres and 84 perches of land lying on Keyser's Ridge; $500.

Benjamin Griffith and wife to Wm. Walter and Nancy C. Griffith, an undivided one-third interest in military lot No. 2801, and 1¼ acres of lot No. 2802; $100.

Benjamin F. Harvey and others to Emily T. Hinebaugh, all their interest in a certain parcel of land situated in the Town of Deer Park; $1, &c.

Julia A. Edwards to Alfred Kelly, 8 acres and 1¾ perches of land situated in Garrett county, Md.; $112.00.

John W. Veitch, trustee, to Wm. H. Hall, 85 acres of the tract of land called "The Promised Land Resurveyed"; $300.00.

Christian M. Beachy to Susan Beachy, part of military lots Nos. 2387 and 2390, containing 60 acres; $160.

James T. and Viola N. Grove to Elizabeth Frazee, all their interest in an undivided piece of land bought of Jesse Groves, deceased; $20.00.

Joseph R. Anderson and wife to Mary C. and Thornton Wilt, 9¾ acres of the tract called "Latent Worth"; $100.

John T. Gary and wife to L. M. Albright, part of military lot No. 3282, containing 80 perches; $50.00.

George W. Beeghley to James W. Beeghley, part of military lots Nos. 3206 and 3207, containg 51½ acres; $455.

Edward McCarthy and wife to Alice O'Brien, lot No. 9 in the town of Oakland; $50.

Ellen E. and Geo. W. Atkinson to Alvaro F. Gibbens, lots Nos. 84 and 77 on the plat of Mt. Lake Park; $1.

James F. Sebold to Rebecca Hoopes lot No. 5, on the plat of "Brant's Addition to Oakland"; $350.

John P. Hubbard to the J. L. Rumbarger Lumber Company, all their interest in a tract of land called "Fairfax," containing 400 acres; $1440.

Henry Beckman and wife to John Moon, 87½ acres of land situated in Garrett county, Md.; $525.

Benj. A. Richmond and Fredk. Perry, trustees, to Thomas Carr, all that tract of land called "Sugar Cove" containing 240 acres; also "Myrtle and Vine," containing 73 acres; also "Hunting Ground," containing 61½ acres; also another piece containing 4 1-10 acres, and being known as the "Beeman Farm"; $4005.00

Wm. Casteel and others to Mahlon Glotfelty, all their interest in a part of a tract of land called "Glencove"; $120.

John Spiker and wife to Sampson Butler, military lots Nos. 2304 and 2305, containing 100 acres; $150.

Henry Yoder to George Failinger, military lots Nos. 2676, 2677, 2680 and 2681, contaiing 50 acres each; $2400.

George Failinger and wife to Frederick Kolb, military lots Nos. 2680 and 2681 and 22½ acres of lot No. 2677; $1500.

Noah Wilt and wife to Samuel Warnick, lot No. 1978, containing 50 acres; $450.

Mountain Lake Park.

The Hall now presents a handsome appearance since the second coat of paint has been applied.

Dr. Frysinger has had both his cottages ceiled up stairs.

The large dining hall belonging to the Association is now under roof, and will soon be ready for use. Mr. W. H. Hagans, of Oakland, is to have charge of it this season. He is now occupying one of the cottages until the dining hall is ready for him.

Mr. LaFetra, of Washington, D. C., was here last week to let the contract for the erection of his cottage on H street.

Mr. and Mrs. S. L. Allen, of Grafton, were here two days putting their cottage in order for the season.

All of the Directors were here two weeks ago, and made a general inspection of the Park. They are endeavoring to make it as pleasant and attractive as possible.

Mr. E. J. Stone, of Wheeling, is here fitting up his new cottages. He is thoroughally furnishing seven or eight. The Association's six cottages are also furnished for lodgers.

Mr. Isaac Myers has just staked off the LaFetra cottage.

The depot was again opened on the first inst. A young Mr. Laughlin from Deer Park is our agent.

Mr. H. H. VanMeter has returned for the summer. Mrs. Bullard and family have also arrived.

The Association is having a board walk laid in front of their new cottages and dining hall. J. A. E.

A Religious Wave.

NEW YORK, June 1.—The *Sun* publishes the following special to-day from Atlanta, Ga.: Atlanta has been swept by a wave of religious excitement, which promises to eclipse anything of the kind ever known in the South. It had its rise in the meeting of the National Convention of the Young Men's Christian Association. The session of that body was attended by all the magnates of business and fashion of the city. They were welcomed by Chief Justice Jackson, and a prominent place on the stage was held by Governor McDaniel. The proposition to build a $75,000 house was made, which was afterwards taken up in secular circles and to-day the cash subscriptions have swelled to $65,000. While this excitement was up, the Methodists induced the Rev. Dr. Munhall, of Missouri, to remain over and conduct a series of meetings. As by wildfire the zeal spread and the social circles of Peachtree, heretofore engaged in progressive euchre, and the German, began to quote Bible texts, and one after another the announcements of the conversion of noted men added fuel to the flames. Go where you will, there is noting talked of but the soul's salvation,

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, June 1, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5⅝@6c. that generally rated first quality 4¾(@5⅜ cts; medium or good fair quality 4¼(@4¾ cts; ordinary thin steers, oxen and cows 4¼(@4¾ cts; extreme range of prices 3@6 cts; most of the sales were from 4¾(@5⅛.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 1,140 head, against 2,157 last week and 1,299 head the corresponding week of last year, and the sales were 840 head, against 697 last week, and 813 head the corresponding week of last year.

The market has been slow throughont to day, and toward the close exceedingly sluggish. Prices are off all through the list, the better grades suffering rather more than other grades, or, at least, quite as much. Prices are generally considered as ½ to ¼c. lower than last week, considering quality and make-up of bunches. The offerings were of quite as good grades as last week, good butchers' cattle being well represented. Prices 3@6c., few selling at either extreme, most sales 4¾@5⅛c. There were a number of Maryland "grassers" here this week, and Virginia shipments are expected to begin next week. The Lehmans bought on private terms of Harry Cover, of Carroll county, a superior bunch of 53 cattle for shipment by the Oranmore.

THE SWINE MARKET.

The offerings, some 600 head less in numbers than those of last week, are generally reputed as of fully good quality as were the offerings then. Trade is fairly active, the supply being about equal to a fair to good demand, a few of the dealers having sold out. Prices 5(@6c., most sales 5½@6c.; rough sows and stags about 5. Same time last year Hogs sold at 6¾@7¾c., net.

THE SHEEP MARKET.

The offerings number more than 1,500 head less than they did last Monday, and their quality is not as good as were the offerings of that day. With some Eastern demand now developing, trade shows some improvement for good stock, as there is a fair demand from our home butchers for that class of stock, though common Sheep are not wanted at our even lowest prices—2@2¼c. Quotations range up to 4¼c. for Sheep, as to quality; Lambs range at 5½(@7½ gross. Same time last Sheep sold at 3@5½c., and Lambs at 5½@8¼.

Dissolution of Co-partnership.

EGLON, W. VA., June 1, 1885.

The co-partnership heretofore existing between Julius Scherr and George Giessman, under firm name of Julius Scherr & Co., is this day dissolved by mutual consent, George Giessman retiring.

JULIUS SCHERR,
GEORGE GIESSMAN.

Having taken entire charge of the Mercantile Business of the late firm of Julius Scherr & Co., at Eglon, W. Va., I will continue to do business at the old stand and shall be pleased to serve my many friends and old customers. I will at all times pay full market price for produce, and guarantee to sell goods at the very lowest prices.

All accounts and notes due the late firms of A. C. Scherr & Co., and Julius Scherr & Co., must be settled as speedily as possible, either by cash or produce, or by note.

To the cash buyer and prompt payer I will say: Call and examine my stock and see prices before purchasing elsewhere. It will be to your interest to buy your goods from me, believing that a "nimble sixpence is better than a slow shilling." Quick sales, prompt payments and small profits.

Very Respectfully Yours,
JULIUS SCHERR.

N. B.—Mr. M. C. Feather will remain with the new firm, and will be pleased to have his many friends call. 6 6 3t.

Estate of Daniel Fichtner, deceased.

UNDER A THORN-TREE.

Wife, you see I kept them snugly,
Our old pictures of lang syne—
Old ideals grow often ugly,
Not this cottage one of mine—
Yours a color in September—
Wife, it seems but yester morn
When we sketched, do you remember?
Underneath that crimson thorn.

Yes, that large white owl was near us,
In our woodland painting place,
Seeming loth to see and hear us
With an interested face;
Looking, O, so wise and woolly,
We could fancy he might say:
"Ah, I knew love's frenzy fully
In my young and heedless day!"

Did Sir Robin too deride us
Up against that Autumn sky,
On a tree which could not hide us
From his bright and merry eye?
"Bob," you said, "seems sketching boldly
In his mind a larder bare,
With us twain both crying coldly:
'Not a crumb for Bob to spare!'"

Then you questioned archly, sadly:
"Must love's summer always go?
Can it be that love loves madly?
Owl and redbreast tell us so!"
And I drew a robin peering
Through a cottage window pane,
Singing o'er his crumb-feast cheering:
"True love's summer does not wane."

O, the owl's a cynic, dearest,
And a satirist is Bob—
Love," I said, "oft sees the clearest
All its wealth which none may rob—
If to Heaven's Gate we take it,
Asking for its blessing there,
Love will have a fount to slake it
That can keep it fresh and fair."

So we left that thorn-tree gayly,
Happy-plight, hand in hand,
And our love has since been daily
To us twain a summer land.
Now the bells of age are tinkled
In our ears, my white-haired wife,
But though old love grows not wrinkled
If its summer is for life.

—*H. E. Waring, in Good Words.*

IN A TIGHT PLACE.

How an Accident Determined a Young Lady's Choice.

It was at that time of the year when the period technically known as the season had closed, and the symptoms, natural and artificial, which accompany the progress of the month of September into its second half were present in their usual prevalence, when Ned Chilton found himself pecuniarily justified in purchasing an excursion ticket, good for ten days only, and availing himself of the "greatly reduced rates" at the Mendon House, under the shadow of Weehausett, for a brief outing. It must be brief indeed; for even the small pickings that come to a young lawyer just admitted to the bar were of importance in his calculation of ways and means, and he must be on hand in his little office—shared by a real estate agent, and with desk-room to let, where the promoter of a Mexican railroad had just failed—for fear that his great case should come and find him absent. And it was the very day following his arrival that, at three o'clock in the afternoon, he was stumbling along the bowlders that fret the current of Rocky Branch, with the recklessness which comes of frequent submersion.

His fish basket thumped lightly against his side, for the spell of preoccupation was upon the eager and not unskillful fisherman, and sadly interfered with the exercise of his craft. For, early as he descended to breakfast, there, in the breezy dining-room of the Mendon House, he had seen an apparition which caused a thrill of mingled alarm and delight in his soul.

A round-faced boy, with short hair, brown cheeks and other physical evidences of an out-door life of some months' duration, sat alone, engaged in the demolition of hot soda bread, thin steak and cakes with maple molasses, with one of those appetites which are unappreciated only by their possessors. It was not so much the boy as the contingencies which the boy represented that caused the commotion in the young lawyer's breast. Where George Burleigh was disporting himself, neither his devoted mother nor his comely sister Alice could be far distant; and it was Alice Burleigh who had, a short three months before, displayed an amount of worldly wisdom little less than incredible for her years in declining the possible honor and preferment of Mrs. Ned Chilton. How much of the purpose of his sister's suitor this youth had divined can not be known; but it was with a sort of reminiscent grin as well as a start of genuine surprise that he raised his eyes to encounter the glance of Chilton, and instantly exclaimed in a voice largely mingled with potato, "Hello!"

Mastication interfering with the further expression of the boy's sentiments, Chilton was able to return the salutation before George recovered his speech and began to display the usual volubility of his age.

"I say, why didn't you come up here before, Mr. Chilton? It's been getting awful stupid since the fellows went away. Alice is no fun at all, and there's nobody else that's good for anything. Mother thinks so, too, for I heard her tell Alice that she hardly expected any congenial society—that's what she said—after August. She says her health forbids her to return; but I know better. If it wasn't that somebody was coming"—and here the boy's tones suggested confidence and buttered biscuit—"I believe she'd go to-morrow."

"Do you expect friends?" inquired Chilton.

"No, I don't" frankly answered the boy; "but mother's bound that he shall see Alice. I heard her talking about it with Uncle George. He's sort of guardian to Alice, you know. I was out on the piazza roof tending to my snake, and I heard mother tell him they could talk freely, because Alice was away and George was in bed. If my snake hadn't got out of his box I could have heard it all, though it didn't amount to much, except that he was on a tour through the moutains, and would be along this way about the middle of September."

"Who is 'he?'" asked Chilton, undeterred by any fastidious scruples from getting what information he could from this scion of the house with which he had sought to ally himself.

"Why, that Lankton fellow, of course, who's been hanging around Alice. Mother likes him ever so much."

Now, this is but a fragment of the conversation, ranging through topics of home and society, sport and adventure, with which young Burleigh entertained his newly-arrived acquaintance at breakfast, with a wisdom peculiar to his years, and a happy freedom of expression that would hardly have pleased either the mother or the sister whom he so easily introduced in his narrative. But this is the portion which caused the preoccupation of Ned Chilton's mind so favorable to the continued happy existence of the spotted trout against which he had sallied forth after his early breakfast.

For although he had received his dismissal from the lips of the fair Alice, he had, being an obstinate fellow, by no means relinquished his purpose, and, being so foolishly in love, had neither given up his hope; and the appearance of Arthur Lankton as a suitor, favored by parent and guardian, was peculiarly unpalatable. It was not college rivalry which had bred antipathy between these young men, nor yet competition in the business of the law, to which profession each had devoted himself; but the chance which brought them into conflict in the courts had also imposed upon Chilton the unpleasant duty of exposing, in the interest of his client, certain conduct on the part of the opposing counsel which touched close upon unprofessional sharp practice. And the natural consequence was that Lankton heartily hated his former classmate and rival, while Chilton was far from kindly in his sentiments toward such a claimant for the hand of the girl who held captive his own fancy.

The singular coincidence that brought them all to this particular spot in the mountains together, with associated thoughts, had been in Chilton's mind as he fished up the brawling stream all the day with such poor luck, and was uppermost in his cogitations as he unjointed his rod and took the homeward route.

This led him, when near its close, through the Cathedral Woods—a wide and long stretch of heavy pine and hemlock growth that occupied the plateau between the green meadows of the intervale and the slope of the Weehausett range. The lofty stems mounted straight from the ground, bare, after the manner of their kind, until they reached a height of thirty or forty feet, where scraggy branches began to obtrude, finally widening far above the head into masses of foliage that jealously struggled to interpret the sunlight, softly muttering and crowding against each other as the wind swept by. In mid-day it was indeed church-like, and in moonlight it was weird as the woods about Camelot. In the season it was not unusual for church services to be held here, and it was, moreover, a daily resort for such boarders at the houses within the range of a few miles as affected poetry and sentiment and lazy solitude.

It was here that Alice Burleigh had betaken herself that sunny September afternoon, and thither had George, much to her discontent, followed her. His boyish gabble distracted her thoughts from the high romantic subjects of which at that time she considered much, and his unsympathizing practicality jarred upon her customary mood. Therefore it was only with increased annoyance that an exclamation from her brother directed her attention to a figure seen indistinctly making its way along the avenue of tree trunks at a little distance.

"Mr. Chilton! Mr. Chilton!" cried the irrepressible youth, hailing the advent of a more congenial companion. "How many have you caught?"

"Hush, George," said Alice. "Don't call any gentleman here."

"But it's Mr. Chilton, and he's been fishing. You know Mr. Chilton first rate," persisted the boy.

The angler had advanced until too near to either feign ignorance or to make a graceful retreat. The salutations were somewhat awkward on his part, a trifle cold on the other, when George interrupted the formal exchange:

"We're just going to the house, Mr. Chilton; ain't we, Alice? And I wish you'd let me carry your fish for you. You can take Alice's book, or she can put it in the basket."

Chilton had recovered his self-possession enough to realize that if his rival was soon to appear on the scene, fortune had not done him an ill turn by bringing him into the field of action, even in wet clothes; and he set himself to make the most of it, calling in all his resources for agreeable conversation. But Miss Burleigh was in one of her lofty moods, to whose prevalence Chilton conceitedly attributed his rejection, and her responses were not encouraging.

"I suppose it was very gay here earlier in the season," at length ventured her companion. "When I left, all the town had returned, with reports of excursions by day and hops by night."

"Yes, it was quite lively at some of the houses; but mother prefers quiet, and I really don't care much for such things," replied Alice, adding, with an air as if the gravity of a hundred years of worldly experience rested on her young spirits, "I don't find society very satisfying as we have it at these resorts."

"And so you come out for the best of all good company—yourself and solitude. Well, I can't disagree with you. But you see you are not safe even when you take sanctuary in the Cathedral. Society follows you, even in wet boots; and no wonder."

"Please don't make it personal, Mr. Chilton," said Alice, annoyed that she should have led the talk along in that channel. "All my friends know how I feel on this subject. What I do not find in society is a high and earnest purpose, a knightliness, and a true elevation of spirit which I feel confident would make themselves evident in the face and form as well as in the mind of the people who had them."

"*Sana mens in corporo sano*," murmured the young man, quietly amused at this girlish rhapsody.

"There is nothing ideally good or great," went on the young woman, now fairly mounted on her hobby. "It is all commonplace and dull. The girls have their little sentiments, the women have their dress and their children, and the men have their tiresome and vulgar business. They make money and they grow bald. There is no romance in it anywhere. One of King Arthur's knights would be laughed at in our society, but a true woman would worship him."

"This is the very place where one of these knights ought to be found, if anywhere," said Chilton, anxious to make a diversion. "How his charger's hoofs would crush these yellow ferns! But armor would be uncomfortable wear in fighting the dragons of these days."

"You don't understand me," replied Alice, with a touch of haughtiness in her tone. "I could recognize a knight in blue flannel or broadcloth."

Here the path led them out toward the road, from which George was seen running with excitement.

"I told you he was coming, Alice. Now I hope mother will be satisfied, and get ready to go home."

"Who is coming?" asked Alice, a little nervously.

"Why, Mr. Lankton—Arthur Lankton; and he just drove by in one of the teams from Foskitt's. Come along quick, and you will see him."

They met at the supper table. Lankton was a fine fellow, physically and mentally, a model of elegance both in action and repose. His manner was faultless and impressive; and whether he was listening to Mrs. Burleigh's talk of her symptoms, or was interjecting remarks in Alice's fluent conversation on more æsthetic subjects, his tone and his air indicated the most intense sympathy. Chilton recognized him as a dangerous companion where the peace of mind of a romantic young girl was concerned, especially since the first two days developed an evident preference and attraction between the two; while Mrs. Burleigh had the satisfaction, which does not always come to match-makers, of seeing her work prosper under her hands from the start. Chilton saw that, while he had doubtless won the esteem and a measure of the confidence of the girl who had rejected his warmer advances, the brilliant Lankton had already fascinated her, and knowing the man to be in some sort a moral sham, he was by no means content.

One morning, at the end of the first week of his stay, coming down to a late breakfast, Chilton found the Burleigh family, with Lankton in attendance, already packed in a mountain wagon, preparatory to an ascent of Weehausett, and the young lawyer was asked, with more or less cordiality, according to the individual, to make one of the party. He excused himself, and sat down to a solitary meal; in the course of which, revolving all the circumstances in his mind, he decided that his interests, if he had any, would perhaps be better served by remaining near Alice for the short time that was left, not leaving the field to the enemy. It was not too late to reconsider. There would be delay in changing from carriage to saddle at the foot of the mountain, and he could walk there in time to join them or horseback.

A brisk tramp of a few miles brought the young man to the station where guides and horses were taken for the ascent. But with the exception of Mrs. Burleigh, who was comfortably ensconced in the farm-house parlor, her courage having failed at the last moment, none of the party was visible. The rest were already on their way up the great slopes of the mountain, and had taken the last horse from the stable with them.

There was nothing left for him but a day's climbing on his own account, whether or not fortune brought him into the society of his friends. So, cutting a stout staff, he set out with a swinging step up the bridle-path. He passed the cold spring, near which was the fresh imprint of a little boot in the moist earth, telling that here Alice had dismounted, and perhaps drank from the very tin dipper which Chilton, on the chance of it, put reverently to his own lips. He passed on and upward into the region of broad ledges, past small plantations of stunted pines, ash and cedars. Far above him once he caught sight of the little cavalcade moving like a march of ants. Here the bridle-path made a wide detour to the northward to avoid the precipitous slope of the eastern side. Let him take the chord of the arc described by the traveled way, and he would gain a half-hour and meet them at the summit.

It was a rough scramble after leaving the path; more difficult than he had imagined. He battled his way through interlaced scrub, scaled a slippery incline, clambered a precipice. Then he found himself among bowlders, great fragments split by frost and storm from the ledges, and set standing apart until storm and frost should again dislodge them for a reeling plunge down the mountain. They stood breast-high in terraces, with narrow paths between, or hung balancing over each other. Chilton leaped from bowlder to bowlder on his upward path, helping himself now with his hands, now with his staff.

It was at the end of half an hour's hard climbing that, as he grasped the overhanging edge of one of these obstructing rocks, he saw it lean slowly toward him. The great stone had rested there perhaps for a hundred years, waiting the touch of his hand to disturb its delicate equipoise. Slowly it swayed under the impulse of gravity, and settled down upon Chilton, caught in one of the paths of the stony labyrinth, an immovable rock behind him, others on each hand. Slowly it seemed, but too quickly for escape. One desperate leap he gave, and the descending bowlder settled against his thigh, pinning him with a giant grasp to the rock beneath.

So gently was it done that Chilton failed to realize its power. As well as his constrained position would permit, he grappled the edge of the bowlder and strained to lift it from his pinioned limb. One effort was enough. It rested as firmly as the mountain itself against any strength he could bring to bear.

He had retained his grasp of his staff. This he placed beneath the stone and endeavored by leverage to shift the weight. The staff bent, then snapped in his hand.

No wonder the young man's brain whirled, or that he leaned his head against the cruel granite that imprisoned him in an agony of fear lest faintness should overpower him and make his doom certain. For pain had now come. The grinding weight of the stone became each moment less endurable. The dull ache in his fettered limb was followed by sharp pangs, and these became fiery tortures shooting through his whole frame.

Even then the incongruity of his situation and surroundings was not lost upon him. Horribly grotesque it was, this contrast between solemn beauty and intense suffering. The bright September sun never shone on a fairer land than that which lay spread out in intervale and mountain and river and glinting lake and distant villages before his agonized vision. A peace that was hardly life-like lay on it all. Amid all this beauty and glory and peace of nature he was caught to die like vermin in a trap—to figure as a "mysterious disappearance."

It was too horrible. He must cry for help if only the birds heard him; for the increase of pain and cramp would soon deprive him of all power to call.

"Help!"

Hardly had the first cry issued from his lips when a distant clatter reached his ears. He called again, and listened. It was in truth a party descending the mountains. Every moment brought nearer the sound of hoofs striking sharply the rocky path and hammering across the bare ledges. Yes, they were surely coming in his direction.

"Thank God!" groaned Chilton. "If I can only make them hear."

Nearer and nearer came the invisible cavalcade. A light breeze sprang up from the north, and on it was borne to his ears the sound of an airy laugh mingled with the clank of the horses' steps. Even in his anguish Chilton rebelled at the thought that this laugh was in answer to Lankton's pleasantry. But the breeze that carried these snatches of merriment to Chilton's ears wafted away the cries which he sent up for aid.

"Help! Help!" he called. And "Help!" came back in musical echoes from the opposite hills.

The tramp and the laughter suddenly ceased. Had he been heard? No; the sounds returned again, but fainter. The party had turned the corner, which had momentarily shut off the noise of their march.

For an instant Chilton yielded to despair, and prayed for the insensibility which was so painful in its coming. It was more as a duty than as a hope that he again raised his voice in the solitude, and uttered the monosyllable of such awful import on human lips.

"Help! Help! O God! help me!" he groaned, as he weakly bowed his head on his granite rock.

"Hi!" was the response to his prayer, in a boyish voice.

Raising his glance in wonder, he saw, peering over the ledge above him, framed in some stunted bushes, a pallid and terror-stricken face, round-cheeked and sunburned, with stains of mountain blackberries about the mouth, and eyes expanded beyond belief.

The angel had come in the shape of George Burleigh

"George," said Chilton, abbreviating his directions as much as possible, "run after your party, and bring back the guides to get this rock off me."

George was not lacking in perception or lazy in execution; and as Chilton bowed his head again in pain and thankfulness, he stumbled back along the route on which he had recklessly wandered from the path in search of berries, and slid rather than walked down the steep mountain road in pursuit.

From his lofty position Chilton saw the party emerge upon and cross the rocky plateau far below him, and enter the woods where the cool spring flowed. His throat was parched and his body seemed on fire. Then a smaller figure, on foot and with no hat, was seen to dart across the stony ledge, tripping and falling at full length as it went, and to disappear also among the trees.

Chilton was now at liberty to faint, which he did forthwith.

How the two stout guides found him insensible; how between them they managed to raise one end of the bowlder and release his limb from its terrible grip; how George steadied the limp body as it slid down to a safe place among the rocks—of all this Chilton knew nothing. He awoke to consciousness to find himself flat on his back, staring at the bright sky, with scared faces about him, and rough but kindly hands rubbing his limbs.

When at length he was swathed in compresses, put on gruel diet and stretched on his bed at the Mendon House for slow recovery, he had time for reflection and for explanation. It all came out when George was allowed to visit and talk to the convalescent.

"I tell you what, Mr. Chilton," said he, "if Alice didn't send that Lankton fellow kiting!"

"What do you mean?" asked Chilton, with as much animation as could be expected of a man still unable to turn over in bed.

"You ought to have been there," continued the boy, which, as Chilton was at the moment referred to, under the rock, would have been a pleasure as well as the duty which George's words indicated. "It was when I got to the spring. Mr. Lankton was lying on the ground close by where Alice was sitting, looking up in her face, and asking her something, and I couldn't see where the guides were, and I ran right up to him, and he said: 'Confound the boy!' But I didn't mind that, Mr. Chilton. And I called out to Billy Westman—Billy, was one of our guides, and he is a good fellow, too—and I told him a man was under a rock up on the mountain. And Westman said: 'Where?' And Mr. Lankton said: 'He's fooling.' And I said: 'I ain't fooling, for it's Mr. Chilton, and he told me to come and get you to help him.' And Westman said: 'Come along Mr. Lankton, and my brother will bring the horse.' And Mr. Lankton said: 'I don't believe the story,' and he looked wicked, and said he would ride that horse down the mountain himself. And Westman said: 'I'll be hanged if you will, so long as that horse belongs to me.' And Alice she got white as a sheet at first, but now she was red enough, and she drew herself up just as she does when she feels top-lofty, and said: 'Mr. Lankton, you can have your answer right here, and it's no, siree.' She didn't say just those words, but she looked like it. And she pointed to her own horse, and said: 'You may take mine to ride down the mountain, and as far away as you choose, and you will find a side-saddle an appropriate seat for the chivalry you profess.' But he didn't take her horse, though he went right away. I told Alice yesterday I thought she gave it to Lankton first-rate, for a fellow that won't run to help another fellow isn't fit company for a fellow. She said I mustn't say 'fellow' so much."

"George, you're a brick," exclaimed Chilton, somewhat irrelevantly.

"That's another word she says I mustn't say," answered George.

Nothing more was needed to expedite Chilton's recovery. The revulsion of feeling in Alice's mind caused by Lankton's conduct in a moment that called for chivalrous service—although the complex motives working upon him at that time were not all known to her—seemed to have influenced her judgment of the qualities of her other rejected suitor. Lankton was not seen again; and before the family's departure it was Alice's arm that supported, or pretended to support, the limping Chilton in his promenade on the piazza; and it was George who, when tending his snake in the box on the roof of that structure one evening, surprised them both gazing at the moon, and leaning over, like an angel from above, hoarsely whispered:

"Alice, I'm mighty glad of it. You may talk freely."—*Harper's Weekly.*

REGARDING PLOWING.

Deep or Shallow, Which?—The Manner of Plowing Dependent on the Character of the Soil.

Probably ever since there has been use for the plow there has existed a difference of opinion regarding the manner of plowing, and more especially in the matter of the depth. For years agricultural papers have been the medium for the expression of views upon this question, which at times have waxed exceedingly warm. The advocates of deep plowing have been earnest in their advocacy of their system, and have been as vigorously opposed by those who practice shallow plowing, and yet the question is now no nearer satisfactory solution than when the discussion first commenced, for the reason that the mode of plowing is governed by conditions of soil as to mechanical character, depth, etc. Soils vary very much, especially in New England. Upon many of the hillsides they are of necessity shallow, while in the valleys and river bottoms they are comparatively deep. This condition is one that can not be easily avoided, for the reason that the tendency is for the fertile portions of the soil to be carried from the hillsides to the valleys below, unless a system of terracing is produced, which would be both expensive and laborious.

All soils go through an atmospheric preparation before they are suited to the growth of crops, as is well known by every thinking farmer, and that portion becomes the available soil, so to speak. Beneath the cultivable soil is the more compact soil or hard pan, to which the depth varies according to circumstances of cultivation or natural deposit. In valleys the cultivable soil may be increased in depth by a natural deposit brought down from the hillsides or the overflow of streams passing through them; or the depth may be increased by a gradual working over of the subsoil, in slightly increased depth of plowing, fertilizing and cultivation. Now, the depth of plowing rests upon the simple secret of the depth of the cultivable soil to be plowed; there is no arbitrary rule that applies to the case, further than the healthy feeding capacity of the soil to be plowed. Until the subsoil has been exposed for a time to atmospheric action it is of little use, and, in fact, if turned up in large quantities, appears to act as a poison, and for that reason it regulates the depth of plowing.

It would be the height of folly to plow a field having an available soil of only four or five inches to a depth of ten or twelve inches, because there would be turned up six or seven inches of soil that is not yet fitted to sustain plant life, and hence the man who on the recommend of some one who is fortunate in possessing a soil of such depth that plowing to a depth of twelve inches is profitable, and so recommended by him, would, in consequence of the failure, be ever after a bitter antagonist to deep plowing when the trouble all arises from their different conditions. Every farmer must be the judge for himself regarding the manner of plowing upon his own farm, and the tenacity of the subsoil will be a good index for his guidance. It is always safe, in case of shallow soils, to cause them to be deepened by the gradual working over of the subsoil, but among New England farmers owning fields with a subsoil completely ballasted with rocks and bowlders this process means an amount of work that presents a discouraging aspect to the case. The deeper a soil is worked the more enlarged becomes the feeding ground of crops of every kind that are brought under cultivation, and the more enduring it becomes in character.—*Boston Globe.*

—The following is recommended as a good cough syrup which has been tested by long use and found to be excellent: One ounce thoroughwort, one ounce slippery elm, one ounce extract of licorice, one ounce flaxseed; simmer together in one quart of water, until the strength is thoroughly extracted; strain carefully; add one pint of best molasses and one-half pound of loaf sugar; simmer them all together, and, when cold bottle tight.—*Toledo Blade.*

—Mention is made in the *Medical and Surgical Reporter* of a man who has "had no bad colds since he learned to sleep with open windows."

THE CHARMING WIDOW.

How She Impressed a Hard-Hearted Storekeeper, as She Always Does, with Her Dainty Sobs and Tearful Glances.

She was pretty and sweet, so much so that the several clerks nearly broke their necks in struggling to see who would be the one to wait on her, but she ignored them all, and, sitting down on a stool, drew from her pocket a handkerchief which she held in readiness for an application to her eyes, and sent for the manager. He soon came up to the lady, who, with the handkerchief to one eye, flashed the other brilliant orb at his, and told her story thusly:

"Mr. B——, Charley, my husband (sob,) is dead and I have no suitable (sniffle) mourning. I came down to see (gulp) if you would trust me for a (sob) mourning outfit." (Sniffle.) Here the other eye was hid behind the handkerchief, while a kind of cold chill shudder passed over her.

"But, my dear madame, I don't know you. It would be rather departing from our rules to comply with your request," replied Mr. B——, politely. "How much of a bill did you wish to buy?"

"I want (sob) everything as nice (sniffle) as I can get (sob) about (another sniffle) $200, I (sob) guess.

"I am sorry, but as you are a stranger to me I shall have to decline unless you can furnish security or come recommended by some one known to us."

"Do you (sob) know Mr. (two sobs) Mr. Richfellow?" (Two sniffles.)

"Yes, madame, I know him; do you think he would guarantee the payment of the bill?"

"I don't (sob) want (sniffle)—want you to (sniffle) ask him (sniffle) because I am going (two sniffles) to marry him (sob) when my (sob) mourning has expired." (Sob.)

"Well, in a case of that kind of course we will trust you; we can present the bill to him after your marriage."

"O, thank you (brightening up), thank you; indeed, that will be all right. Now I want a box of black gloves number six and a half, fourteen yards of cashmere, thirty yards of crape cloth, twelve yards of veiling, two boxes of black silk hose (number eight) and the necessary trimmings; please fix it up nice. Don't you think I will look nice in mourning?"

Mr. B—— looked into her eyes, his heart began to jump, and thinking discretion the better part of valor, he assured her that her order would be filled and the lady departed smiling. Mr. B—— after the flash of the pretty widow's eyes would have filled a thousand dollar order and paid it out of his own pocket. He is bald-headed.—*Brooklyn Times.*

CHANGHI.

Visit of a Traveler Who Enjoyed His Surroundings.

A scene I cherish with especial tenderness is that passed at Changhi, behind Singapore. A Malay fishing village lay beneath our bungalow upon a broad and snowy beach. In barbarous regions of the North men live underground, but these dwellings were suspended in the sunny air among plumes of cocoanut and betel; behind them rose the shadowy jungle. There was no cultivated land in sight, for the Malay finds his harvest and his garden in the sea. The smooth sand below high water mark was a parterre of sponges, green and red, and purple blue, intermixed with coral. Old fashioned people in Europe cherish certain round masses of limestone, daintily fluted, and put them under a glass case for ornament. Imagine their beauty in the spot where nature places them, every lip and hollow on the cream white surface traced out in vividest pencilling of green, with the seaflowers of sponge around them.

But after the first impulse of delight one almost comes to overlook this charming foreground; for beneath the water lives a tangle and a maze of all things lovely for shape and color and growth and motion. Coral takes a hundred flowery forms, weeds branch like trees or wave like serpents; sponges are cups of amethyst and ruby. When waves lie still, one sees just as clearly into the depths below as into the air above, and almost as far as it seems. The vegetation is gigantic in its loveliness. There are coral growths shaped like an Egyptian lily and as white, but three feet in diameter, wherein a mermaid might take her bath. Others break into a thicket, each twig covered with snowy rosettes which bear a morsel of green velvet in their bosoms. Others are great round hillocks diapered with emerald, with here and there a bush of scarlet thorn springing from their sides. Through and over the garden long silvery weeds tremble and quiver in a net. Small fish as quick as humming birds, and almost as gay, dart to and fro. Water snakes float past in coils like Indian enamel of every shade, in red and brown and yellow and purple. I am grateful that fate allowed me three weeks of life at Changhi.—*Frederick Boyle, in Belgravia.*

Pompeii's Danger

There is reported danger that the latest eruption of Vesuvius will overwhelm Pompeii afresh. The whole of the old city has not yet been disinterred by any means. It is slow work to resurrect a wealthy place which once contained at least 20,000 inhabitants, from such a deep tomb of ashes and scoriæ; and furthermore the work had to be prosecuted with extreme caution. Reckless haste might result in the destruction of priceless works of art; a too sudden exposure to light and air might cause masterpieces of fragile material to crumble into dust. It has been hoped that further researches would be rewarded by the discovery of precious manuscripts—works of unknown authors, or complete copies of works whereof the greater part has been lost, and of which we possess only fragments of exquisite beauty. Already many manuscripts have been found; but these were not of the character hoped for. A deluge of lava would end all research of this kind, and deprive the world of one of its most delightfully interesting places of pilgrimage.—*N. O. Times-Democrat.*

—According to the Salt Lake *Tribune* the lineal descendants of Brigham Young now number 15,000.

SCHOOL AND CHURCH.

—The Congregational Academy at Salt Lake City, Utah, has six teachers and 240 pupils, a large proportion of whom come from Mormon homes.

—Washington is a remarkably religious city. Statistics show 189 churches, with 49,351 members. Of this total membership, however, about 21,000 are in the colored churches.

—A returning missionary writes to a church paper: "We suffer so much in the hot season that we are fully convinced that it is the will of the Lord that we should return to America before the hottest Indian weather is upon us again."

—He was a graduate in nature's university. Nature is wiser than the schoolmaster; she educates, but she never crams. Her scholars do not go up to take their degrees; their degrees come to them.—*Jean Ingelow.*

—In 1877 there were twenty-three Danish-Norwegian Baptist churches in eight Western States, with 1,350 members, seventeen ordained ministers and twelve meeting houses. Now there are thirty-nine churches, thirty-four ministers and twenty-seven meeting houses.—*N. Y. Examiner.*

—Since 1870 women have been admitted to universities in Sweden, Norway, Russia, Switerland, Italy, Spain and France. At St. Petersburg in 1882 ninety-nine young women were given degrees in the literary and historical department and sixty-four in the scientific department.

—Japanese educators are making an effort to substitute Roman letters for those now in use in Japan. It would probably require but little persuasion to induce the people to adopt the English language outright, if one may judge from the willingness with which they have accepted other American and English customs and methods.—*Current.*

—The public hears from time to time of a discussion over the question of public worship at Harvard University. In point of fact, there are at present no regular Sunday services in the college chapel. During the winter an occasional discourse was given. Attendance upon some church on Sunday is no longer requisite, but by a recent decision compulsory attendance upon morning prayers in the college chapel is continued.—*N. Y. Sun.*

—An ancient custom was observed recently at a London church where, in accordance with the will of Peter Symonds, which dates so far back as the year 1586, sixty of the younger boys of Christ's Hospital attended divine services in the morning, and afterward received a new penny and a bag of raisins. It was stated that this was the two hundred and ninety-first celebration of this quaint ceremony.

—At Portland, Me., a clergyman who manages a Gospel temperance mission has organized a "Gideon's Band," which is said to introduce Wagnerian effects in the choruses sung during the services, the idea on which the scheme is founded being taken from Judges, vii., 16: "And he (Gideon) divided 300 men into three companies, and he put a trumpet into every man's hand, with empty pitchers and lamps within the pitchers."—*Boston Journal.*

—The famous "Codex Argenteus," the four gospels translated by Bishop Ulphilas, is preserved in the University of Upsala. It is written on 182 leaves of parchment in letters of silver on a ground of faded purple. It is kept in a glass case and under lock and key. It dates back to the second half of the fourth century, and, besides being of value to the religious world, it gives the secular world all the knowledge it now possesses of the early Gothic, the parent of all the Germanic tongues.

PUNGENT PARAGRAPHS.

—A man content to live in an oleomargarine boarding house does not know on which side his bread is buttered.—*N. O. Picayune.*

—Schools are are to be established in the navy for instruction in the culinary art. The fine old expression, "son of a sea-cook," will henceforth have added force.—*N. Y. Mail.*

—Ella Wheeler has written a poem on malaria. She must think editors are idiots if she expects to get one of them to take it willingly, even if she offers to give it to him for nothing.—*Oil City Derrick.*

—A Jersey City doctor forms his written prescription into poetry. A doctor's prescription is bad enough under any circumstances, but written verse must be an awful dose.—*Yonkers Statesman.*

—Electric scarf pins are the latest thing in dudedum. The spark is kept alive by means of a pocket battery. Perhaps, by and by, a little light can be admitted into a dude's head by a similar process.—*Broome Republican.*

—A shrewd old gentleman once said to his daughter: "Be sure, my dear, you never marry a poor man; but remember that the poorest man in the world is one that has money and nothing else."—*Chicago Tribune.*

—Chinese doctors induce faith in their prescriptions by making them of gigantic size. A writer in the *Fortschritt* describes one of them two feet long and calling for twenty different ingredients.

—An angler's paper speaks of the "shrinkage of trout streams." A trout stream may shrink, but the trout never does. It generally expands and increases in weight after being removed from the stream by an angler.—*Norristown Herald.*

—If a man weighing 150 pounds were as active in proportion to his weight as a flea, he would be able to jump over a three-story building. But, unless a man carried a feather bed with him to fall on, he wouldn't jump over a three-story building more than once.—*N. Y. Graphic.*

—Two colored dandies were overheard indulging in the following conversation on one of the streets of a Texas town: "I say, Jim, you doesn't call around as much as yer used to, at de house ob Miss Matilda Snowball." "De troof am, Julius, I'se called on her so many times in dese heah clothes dat I'se afeered she will suspect my wardrobe am limited." "Pshaw, niggah, you is a fool. Jess keep on going ter see her jess as you is, and den she will be sure to take to you, bekase you are so unchanging in your suit—heah! heah!"—*Texas Siftings.*

FARM AND FIRESIDE.

—It pays to keep one man in constant attendance on thirty head of fattening cattle.—*Prairie Farmer.*

—A salad of oranges and cocoanuts is recommended as a breakfast dish sufficiently dainty to set before a king.

—Cucumber Sauce: Three dozen cucumbers, six or eight white onions, half pint salt, two quarts cider vinegar, quarter cup black pepper, one cup black mustard seeds, six dozen cloves. Slice the cucumbers and onions, and put them with the salt in a bag to drain for six hours; then add pepper, mustard seed and cloves, and cold cider vinegar. —*The Household.*

—An old housekeeper says: "To wash prints of delicate colors, boil bran in soft water, and when cold, wash the goods in it, and rinse thoroughly several times. It will cleanse them beautifully without hurting the colors." She adds: "I have washed delicate lawns of fading colors, in which I had grated two or three large potatoes. It kept them bright and clear for many washings."

—The making of a good milker depends not only in the ability of the cow to produce milk at a minimum cost, but essentially, also, in the training, not only to develop these qualities to the highest degree. Proper feeding is necessary, and of fully as much value will be the training that induces reliance upon the feeder and milker, and the absence of fear.—*Chicago Times.*

—An excellent rule for making nut candy is to take two pints of maple sugar, half a pint of water, or enough to dissolve the sugar and no more. Let this boil until it becomes brittle, when a little is "tried" in cold water. Butter some plates or tins, cover with nutmeats and pour the candy over them. Hickory nuts or butternuts are nicer with this than almonds or peanuts.—*Philadelphia Press.*

—Poor Man's Fruit Cake: This cake is excellent as well as economical. Take one and a half cups of brown sugar, two cups of flour, one of butter and one of chopped raisins, three eggs, three tablespoons of sour milk, half a teaspoon of soda, half a cup of blackberry jam. Mix the sugar, butter and eggs together first, then the flour and milk and fruit. Bake in a moderate oven.—*Chicago Journal.*

—Soda Biscuit: Put one quart of flour, before sifting, into sieve with one teaspoon of soda and two of cream tartar or three of baking powder, one of salt and tablespoon of white sugar; mix all thoroughly with the flour, run through sieve, rub in one level tablespoon of lard and butter, or half of each, wet with half pint of sweet milk; roll on board about an inch thick, cut with biscuit cutter and bake in a quick oven fifteen minutes. If you have not milk use a little more butter and wet with water. Handle as little and make as rapidly as possible.—*Boston Budget.*

PROFITABLE FEEDING.

Not Enough Consideration Given to the Value of the Manure from Fattening Animals.

The value of the manure from fattening animals is a matter less within the positive knowledge of the average farmer than should be the case. The effect of different kinds of feed on the value of manure is also a matter not so thoroughly appreciated as would be for the advantage of farmers. Much of the feeding, so far as the value of the manure is concerned, is at haphazard. Farmers can generally give some idea as to the best feed for the production of pork, beef and mutton. By the feeding of so much corn, hay, oats or barley they expect to make a certain quantity of meat. But how much the manure from this will be worth is to many an unsolved and often an unthought of problem.

The truth is that the value of the manure from a ton of some kinds of feed is a much more certain quantity than the weight of meat that it will produce. During the past winter, for example, the manure heap will in some cases be worth far more than anything else obtained from the feed. It is possible to make this the fact nearly always, and that, too, while giving kinds of feed that are excellent for making fat and flesh. We have lost much in this country from our inattention to this point, while England has profited by the popular ignorance prevailing in this and other countries of the varieties of feed essential to making the richest kinds of manures. Many years ago Sir John B. Lawes published tables showing the comparative value of manures made from a ton of the various kinds of food. Linseed cake and cotton-seed cake stand at the head of the list, and it is a noteworthy fact that for very many years these oilcakes were the staple food for fattening beef cattle.

In this country fully three-fourths of the food given to fattening, or other stock, is corn. It does not become us to speak against corn. Growing and feeding it largely are evidences of improved farming. We rather exalt ourselves on the fact that farmers here can grow corn, while those in England can not. But, after all, corn is not among the more valuable feeds for manure, especially on lands requiring phosphates, as most of our long cultivated soils do. What has been called the English farmer's prejudice against feeding corn is possibly a recognition of this fact. According to Mr. Lawes' tables, based on values in England, the manure from a ton of Indian corn meal can be worth only $6.65. That from a ton of linseed cake is worth $19.72, from beans $15.65, and from peas $15.75. The manure from a ton of clover hay is worth $9.65, while that from coarse to fine wheat middlings varies from $13.53 to $14.50. These figures are very suggestive. They show not only that many kinds of feed have more value as manure than corn, but that some of these are worth more for the manure alone than the money value of their cost. It is not uncommon to have wheat bran selling very near to what it is worth as manure even in the East. At the West it can often be purchased for $10 or $11 per ton in the fall. It must be remembered that the above figures are made in England, yet the matter of comparative values is equally applicable here.—*N. Y. Herald.*

HOME NURSERIES.

The Advantages of a Well Stocked Nursery.

The numerous advantages of a well stocked home nursery, especially where planting is extensively carried on are so well known and are appreciated by every proprietor of large estates, that comment on this subject seems almost unnecessary; however, a few remarks on the subject may not be out of place. I do not propose to dilate on the details of nursery management, my object being more to dwell on the advantages of a home nursery for the rearing of plants for special purposes, such as the planting of barren, exposed districts, as well as the convenience of having at hand a stock of plants suitable for all emergencies, and whose hardiness can to a great extent be relied upon.

Where ornamental planting, game coverts, or hedging is performed on an extensive scale, the convenience of a home nursery can not be overvalued, the plants being always at hand and of the size and in the quantity required, thus obviating the necessity of sending to a distance for these when wanted. The advantages in these cases are too well known to require comment, and plants, more especially those of a large size, sent from a distance can not, after packing and transmission by road and rail, be expected to succeed equal to those raised and planted on the same day. The extra soil or ball with which large plants can be removed for a short distance is also much in their favor, but which is next to impossible where packing and transit have to be resorted to. It is well known that too sudden a change from rich, well-sheltered nursery borders to bare exposed hillsides often proves fatal to young plants; and when we consider that few public nurseries are at a greater elevation than three hundred feet, the necessity of proprietors rearing their own stock whose plantations are perhaps upwards of one thousand feet above sea level will the more readily be seen. There are certainly difficulties to contend with in planting high-lying ground, more especially if the soil is poor and the situation exposed, and in these cases the advantages of using hardy plants that have frequently been transplanted in a well-chosen home nursery are only too perceptible, especially when contrasted with others that have been grown under more favorable circumstances and in a sheltered position. Some plants seem better adapted than others for this removal, but in the majority of cases the shock sustained by transferring from low-lying ground to that of a great elevation is only too apparent, and from which the plants seldom recover. A good deal of comment has taken place as to the necessity of rearing trees from seed sown on the site of the future plantation; and although the suggestion has many points in its favor, still, artificial planting is better adapted to the wants of our country and not at all likely to be superseded by artificial reproduction, which is more fitted for countries differently situated from our own. The nursery treatment of plants is, therefore, sure to remain a prominent feature of British forestry, and as such the soil and situation, as well as most successful treatment of these, so as to produce plants suitable for the positions they are intended to occupy, will require due consideration, and very much according to the situation of the estate and ground to be planted.

In choosing the site of a home nursery a good deal will depend on the general elevation and exposure of the estate. The situation should be neither too much exposed nor yet sheltered, but partaking to a certain extent of both, and with a southern or western exposure; for although too sudden a change from sheltered to exposed ground often proves fatal to young trees, this should not altogether form a criterion for rearing such in situations unfavorable to the development of strong, healthy plants. The soil should be good friable loam on an open, porous subsoil; but the quality of ground required for different seedlings is so diversified that it is next to impossible to suit all within the small bounds required for a home nursery. As water is indispensable where seedlings are raised, as well as for numerous other purposes in the nursery, it is well to have provision made for a continuous supply, either by a stream running through the nursery ground or in close contiguity to it. From six to ten acres will be found sufficient nursery ground for most estates, but it is advisable to add a little more than is really required, so that the breaks may not all be under forest trees at the same time, but undergo, when found necessary, a course of green crops, which will not only enrich, but clean the ground and leave it in good condition for replanting with seedling forest plants, bearing in mind that farmyard manure should always be applied first to the green crop, and never directly to the plants themselves. Land intended for nursery ground should be thoroughly trenched to the full depth of the soil, and, where necessary, heavily manured or enriched by the addition of lime, vegetable soil, or loam, as the case may require. In laying out the ground into breaks it will be found convenient to have these either square or rectangular in shape, and, if possible, parallel to each other. The breaks may be divided by different kinds of hedges, which, when well kept, give not only a neat and tidy appearance to the nursery, but are highly beneficial in the way of shelter. The site chosen for the seed beds should be naturally sheltered, or, failing this, such artificial shelter as is found necessary should be provided, as exposure of the young plants to cold, cutting winds causes them to become stunted and bark-bound. Young trees, like other plants, rarely thrive well in a bleak situation.

In the management of a nursery the amount of care and attention required is certainly great, but any trouble as well as expense connected with starting and keeping it in good condition afterward will be amply repaid by the increased value and superiority of the stock obtained; and as the subject of extended planting is one well worthy the consideration of proprietors owning exposed or otherwise worthless tracts of land, a step in the right direction will be the establishing and maintaining in good order a well stocked home nursery.—*Cor. The Garden.*

Zach Chandler.

Zach Chandler's florid countenance, which led strangers to believe that he indulged too freely in strong potations, was the result of a gas explosion the first evening after he had removed into a new house in Detroit. Immediately after the gas was turned on and lit, the smell of escaping had aroused the family and servants, and search was made for the leak. The daughter, now Mrs. Hale, then a child, with a lighted candle detected it in a closet off the back parlor. The father, knowing the danger of an explosion, hurried to the closet with a servant, took the candle from the daughter's hands, and shielded her just in time to receive the full blast himself, burning his head, neck and hands almost to a crisp. The nose, ears, eyes, lips and flesh of the face were so completely burned that old Zach embraced the opportunity and mumbled through his blistered lips: "Bring on your cannibals, I'm cooked!" Such is the history of a face only saved by the nicest skill of surgery.—*Ben Perley Poore.*

Workingwomen in England

There are in England 347 female blacksmiths who actually swing heavy hammers, and 9,138 women employed in nailmaking, who make nails for horse-shoes.

Ten thousand five hundred and ninety-two women bind books and 2,302 assist in printing them.

In intellectual occupations women also fill an important place, the number of teachers being 123,995; of missionaries and preachers, 7,162; of clerks in civil service, 2,260; of painters, 1,180; of "students," 1,000; and of engravers, sixty-four.

There are 37,910 women engaged in medical and surgical work, nursing, etc.; 452 busy themselves in editing, compiling, and writing books, and 1,309 are employed in the various departments of photography.—*Exchange.*

AUDITOR LEBLIE, Pere & Marquette Railroad, says Red Star Cough Cure is safe and sure.

"PERFIDY in Sugar" is the title of an article in an exchange. We never heard sand called by that name before.—*N. Y. Herald.*

Is it Really Consumption?

Many a case supposed to be radical lung disease is really one of liver complaint and indigestion, but, unless that diseased liver can be restored to healthy action, it will so clog the lungs with corrupting matter as to bring on their speedy decay, and then indeed we have consumption, which is scrofula of the lungs, in its worst form. Nothing can be more happily calculated to nip this danger in the bud than is Dr. Pierce's "Golden Medical Discovery." By druggists.

DUDE, coming into the editor's sanctum asks: "Anything fresh to-day?" Response: "No; nothing until you came in." [Exit.]

Young Men, Read This.

THE VOLTAIC BELT CO., of Marshall, Mich., offer to send their celebrated ELECTRO-VOLTAIC BELT and other ELECTRIC APPLIANCES on trial for 30 days, to men (young or old) afflicted with nervous debility, loss of vitality and all kindred troubles. Also for rheumatism, neuralgia, paralysis, and many other diseases. Complete restoration to health, vigor, and manhood guaranteed. No risk incurred, as 30 days' trial is allowed. Write them at once for illustrated pamphlet, free.

ALL WEAKNESSES OF DIGESTION, $1.00 A BOTTLE.

H. H. WARNER & CO., Rochester, N. Y.

PROF. J. O. ADAMS, South Syracuse, N. Y., recommends Warner's TIPPECANOE, The Best, in the strongest terms for dyspepsia and stomach disorders.

For Toning up the System, No Superior, $1.00 A BOTTLE.

H. H. WARNER & CO., Rochester, N. Y.

J. H. DENIO, Esq., of Aldon, N. Y., years ago was taken with stomach disorder, sleeplessness, melancholy, headaches, etc. He gave up his business and resorted to farming in the hope that out-of-door exercise would restore him. He exhausted all the known means of the best physicians in vain. 1884 began taking Warner's TIPPECANOE, The Best, and in March, 1885, he stated that his health was better than it had been for years, and that no medicine he knew of or had ever heard of equaled Warner's TIPPECANOE, The Best, for stomach disorders.

WILHOFT'S FEVER AND AGUE TONIC

LOUISIANA

CHAS. F. KEELER, Prop., Chicago, Ill.

RIDGE'S FOOD

Alike on the veranda of the mansion of wealth and in the little cottage upon the hill will the refreshing influence of Ridge's Food Blanc Mange be apparent. It is nourishing, satisfying, and is prepared in a few minutes. Full directions accompany each can. For custards, puddings, etc. Put up in four sizes—25c., 65c., $1.25 and $1.75. No. 4 size especially adapted to families.

PINKEYE. A REMARKABLE CURE OF a HORSE.

I had a valuable horse taken with the pinkeye, resulting in blood poison. After nine months of doctoring with all the remedies to be found in the horse books, I despaired of a cure. His right hind leg was as large as a man's body, and had on it over forty running sores. At last I bought of Swift's Specific. I used fifteen bottles. In August last all symptoms of the disease disappeared. There have been no signs of a return, and the horse has done a mule's work on my farm ever since. Jas. L. LEMING, Augusta, Ga. January 9, 1885.

Treatise on Blood and Skin Diseases mailed free. THE SWIFT SPECIFIC CO., Drawer 3, Atlanta, Ga., or 159 W. 23d St., N. Y.

is no flatterer. Would you make it tell a sweeter tale? Magnolia Balm is the charmer that almost cheats the looking-glass.

Marriage and Health.

Pittsburgh, Pa., Nov. 5th, 1883. Mrs. Lydia E. Pinkham: "As is frequently the case with mothers who have reared large families, I have been a great sufferer for years from complaints incident to married life. I have tried the skill of a number of physicians, and the virtue of many medicines without relief, and as an experiment I concluded to try yours. I can assure you that the benefits I have derived from it came not because of any faith I had in it, for I had but slight hope of any permanent good. I am not a seeker after notoriety but *I want to tell you that I have been wonderfully benefited by your medicine.* I am now using my fourth bottle, and it would take but little argument to persuade me that my health is *fully restored.* I should like to widely circulate the fact of its wonderful curative powers." PHEBA C. ROOP.

AGENTS WANTED FOR OUR NEW BOOK HEROES OF THE BIBLE

$40 PAYS for a Life Scholarship in the COLEMAN BUSINESS COLLEGE, Newark, New Jersey. Positions for graduates. National patronage. Write for Circulars. COLEMAN & PALMS.

CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.

The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.

THE GREAT ROCK ISLAND ROUTE

Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.

The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.

THE FAMOUS ALBERT LEA ROUTE

Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.

Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.

For detailed information see Maps and Folders, obtainable, as well as Tickets, at all principal Ticket Offices in the United States and Canada; or by addressing

R. R. CABLE, President and General Manager, Chicago.

E. ST. JOHN, General Ticket and Passenger Agent, Chicago.

It is a well-known fact that most of the Horse and Cattle Powder sold in this country is worthless; that Sheridan's Condition Powder is absolutely pure and very valuable. Nothing on Earth will make hens lay like Sheridan's Condition Powder. Dose, one teaspoonful to each pint of food. It will also prevent and cure CHICKEN CHOLERA, Hog Cholera, &c. Sold everywhere, or sent by mail for breeders' use, price $1.00; by mail, $1.20. Circulars sent FREE. I. S. JOHNSON & CO., Boston, Mass.

MAKE HENS LAY

I CURE FITS! When I say cure I do not mean merely to stop them for a time and then have them return again. I mean a radical cure. I have made the disease of FITS, EPILEPSY or FALLING SICKNESS a life long study. I warrant my remedy to cure the worst cases. Because others have failed is no reason for not now receiving a cure. Send at once for a treatise and a Free Bottle of my infallible remedy. Give Express and Post Office. It costs you nothing for a trial, and I will cure you. Address Dr. H. G. Answer This if You Can.

Is there a person living who ever saw a case of ague, biliousness, nervousness or neuralgia, or any disease of the stomach, liver or kidneys that Hop Bitters will not cure?

"My mother says Hop Bitters is the only thing that will keep her from severe attacks of paralysis and headache.—Ed. *Oswego Sun.*

"My little sickly, puny baby, was changed into a great bouncing boy and I was raised from a sick bed by using Hop Bitters a" short time. A YOUNG MOTHER.

"No use to worry about any Liver, Kidney or urinary trouble; especially Bright's Disease or Diabetes, as Hop Bitters never fails of a cure where a cure is possible ! ! !

"I had severe attacks of gravel and Kidney trouble; was unable to get any medicine or doctor to cure me until I used Hop Bitters. They cured me in a short time. T. R. ATTY.

Unhealthy or inactive kidneys cause "gravel, Bright's disease, rheumatism, and "a horde of other serious and fatal diseases, which can be prevented with Hop Bitters" if taken in time.

"Ludington, Mich., Feb. 2, 1879. I have sold Hop Bitters for four years, and there" is no medicine that surpasses them for bilious attacks, kidney complaints, and all diseases incident to this malarial climate. H. T. ALEXANDER.

"Monroe, Mich., Sept. 25th, 1875. SIRS: I have been taking Hop Bitters for inflammation of kidneys and bladder. It has "done for me what four physicians failed "to do—cured me. The effect of the Bitters seemed like magic to me." W. L. CARTER.

GENTS—Your Hop Bitters have been of great value to me. I was laid up with typhoid fever for over two months, and could get no relief until I tried your Hop Bitters. To those suffering from debility, or any one in feeble health, I cordially recommend them. J. G. STOETZEL, 853 Fulton St., Chicago, Ill.

—Paralytic, nervous, tremulous old ladies are made perfectly quiet and sprightly by using Hop Bitters.

Nonegenuine without a bunch of green Hops on the white label. Shun all the vile, poisonous stuff with "Hop" or "Hops" in their name.

Popular Errors Concernig Health.

Prof. George H. Rohe, of the College of Physicians and Surgeons, Baltimore, in a recent lecture on "Some Popular Errors Concerning Health and its Preservation," quoted the saying, "One Man's meat is another's poison," and showed that, while idiosyncrasies with regard to certain articles of food or medicines do exist, they are far less frequent than is generally believed. Articles of food which ordinarily disagree may be better borne if differently cooked. A more serious error is that one should rise from the table hungry. The sensation of hunger is a cry of the tissues for food, and should always be appeased. Much of the ill-health of brain workers is due to a lack of sufficient food. It is impossible to lay down hard rules as to the quantity of food one should eat, but the remarks of the old country doctor who had lived in good health, doing hard work until fourscore and ten, might be taken as examples. "I have always eaten when I wanted to eat, as much as I wanted, and the best food I could get." Another fallacy is, that all diseases are due to disturbances of digestion. Graham bread, oatmeal, cracked wheat, etc., are more difficult of digestion than pure wheat bread.

It is a dangerous error to withhold cold drinks from persons sick with fever. It is cruel, objectless, and the dangers that are said to follow it are imaginary. The effects of alcohol upon the body were discussed at some length, and the conclusion drawn that alcohol does not supply heat to the body, but rather withdraws it. The greatest danger to the man who gets dead drunk in cold weather is that he may freeze to death. The use of alcoholic drinds in health is injurious, but its medicinal use is valuable in many instances. The notion that we should not bathe while overheated is as unreasonable as it is widespread, but persons should not remain in the bath long enough to become chilled. The traditional axiom that boils are in evidence of good health is a snare and a delusion. Prof. Rohe said: "For my own part, I should prefer to be without that sort of health. Even Job, when suffering from an abundant crop, could not gain consolation from his would-be comforters."

That vaccination does not prevent smallpox is a very dangerous error, but that it is preventive of other diseases is equally a fallacy. Statistics prove that before the introduction of vaccination deaths annually from smallpox numbered nearly 3,000 for every million inhabitants. Since the practice has become general the percentage of deaths has fallen to about one-tenth of the former number. Without vaccination the deaths from smallpox in this country would be 150,000 a year. Vaccination has not increased other diseases. That any one remedy is a cure for all diseases that afflict humanity is an absurdity. While hydropathy and electropathy are unquestionably of benefit in some dieeases, they cannot be relied upon for the cure of all.

It Paralyzed Him.

Cin. Commercial Gazette.

One day in 1878, during the progress of a game between the Cincinnatis and Bostons at the Avenue grounds, Charley Johnson, of the *Volksblatt*, was very persistent in "boning" a brother newspaper man for a bet on some possible point of the game. The b. n. m. would not bet however, but finally in sheer desperation, said, as Will White came to the bat: "I'll bet you that man don't make a home run," White at that time usually struck out, and was not known to hit hard. The offer was, therefore, not a flattering one, and Johnson replied: "What odds will you give me?" This reply came assuringly and boldly: "My watch and chain against a quarter." What are they worth?" asked Johnson, "Two hundred and fifty dollars," was the reply. Johnson studied a moment and then said: "I'll go you." The quarter and the watch were handed over to Jerry Cochran as stakeholder.

Just then White whanged away at the ball and it went away down toward the carriage gate, over the centre fielder's head. He had never before made a home run, but it now seemed assured. He lost a little ground by stumbling over third and came in collision with the ball right at the home plate. Even then there was a doubt as to whether he had scored or not, but when the umpire said "Out!" the owner of the watch sank back on the bench speechless, moist, cold and almost paralyzed. After he regained his power of speech he whispered: "Boys, I've made my last bet. Take me home." A week later he appeared on the streets and swore he didn't stop sweating for two days after the bet had been saved, and that he had to use alcohol to close the pores.

Try Ayer's Catharic Pills! They are mild and pleasant in action, but thorough and searching in effect.

Amenities of War.

Chicago Inter Ocean.

While we were in front of Chattanooga it became fashionable along the picket line to exchange papers. The plan was for Confederates who wanted a paper to come to the front, shake a southern paper as a flag of truce, and in this way invite exchanges. The pickets on either side in that immediate vicinity would cease firing, the Union soldier would start from his line and the Confederate from his line, and they would meet half way, shake hands, exchange papers, and if there were no officers in sight, sit down and have a chat. This had been kept up for several days, when there came an order from headquarters that no more papers should be exchanged. But the boys, choosing their time for exchange continued the practice against orders. There came a week, however, in which no rebel responded to waving, or shaking, or flutterings of paper or handkerchief, and we knew that orders against exchange had been issued on that side as well as on ours.

But one morning my partner discovered a man on the rebel line frantically waving a large paper. He suggested that we slip away from the reserve and go out and see what the man wanted. He took a paper, and we started toward the rebel in front. When we had proceeded about half way to the point of meeting the fellow ceased to wave his paper. We were puzzled at this, and concluded that he was down in a hollow, and we would see him when he came up on a high ground. So we walked without warning into a group of soldiers at the rebel picket post. The men were just ready to take breakfast, and after the first flurry they joked us a good deal about our extraordinary willingness to get into their clutches at breakfast time. When we spoke of the exchange of papers the officer in charge informed us that orders were positive against exchange, and that all his men understood it. As this was the case, he took the position that we had come willingly into their lines, and that he could not allow us to return. I saw at once that his men disagreed with him, but the question was how we were to get away.

My partner, who had been a soldier in Germany, joined in the jokes at our expense, and proposed that he make the boys some coffee that was coffee. The Confederates had a very poor excuse for that article, and without more ado he proceeded to make a kettle of coffee, the aroma of which seemed to fascinate the coffee hungry sharpshooters. When he had poured the coffee into the cups and had expatiated on the good it would do the men, he took up his rifle and said to me: "Now let us start for our own line." I followed him, and not a soldier on that picket post lowered the cup of coffee from his lips or looked our way.

Passover Wine.

The editor of the *Methodist Times* personally witnessed the Hebrew pascal servies in one of the Synagogues of London at the last annual celebration. He made many inquiries respecting their present ceremonial significance. One topic which has been somewhat in dispute in the Baltimore Preachers' Meeting and places may be illuminated by a quotation from his report:

"Supper being ended, I said, amongst other things, to an intelligent and affable Rabbi, who sat next to me, 'May I ask with what kind of wine you have celebrated the Passover this evening?'

'With a non-intoxicating wine,' he promptly replied. 'Jews never use fermented wine in their synagogue services, and must not use it on the Passover either for synagogue or home purposes. Fermented liquor of any kind comes under the category of 'leaven,' which is prescribed in so many well known places in the Old Testament. The wine which is used by Jews during the week of Passover is supplied to the community by those licensed by the Chief Rabbi's Board, and by those only. Each bottle is sealed in the presence of a representative of the ecclesiastical authorities. The bottle standing yonder on the sideboard from which the wine used to-night was taken was thus sealed. I may also mention that poor Jews who cannot afford to buy this wine make an unfermented wine of their own, which is nothing else but an infusion of Valencia and Muscatel raisins. I have recently read the passage in Matthew in which the Paschal Supper is described. There can be no doubt whatever that the wine used on that occasion was unfermented. Jesus as an observant Jew would not only not have drunk fermented wine on the Passover, but would not have celebrated the Passover in any house from which everything fermented had not been removed. I may mention that the wine I use at the synagogue is an infusion of raisins. You will allow me, perhaps, to express my surprise that Christians who profess to be followers of Jesus of Nazareth can take what he could not possibly have taken as a Jew—intoxicating wine—at so sacred a service as the sacrament of the Lord's Supper."

NEW ADVERTISEMENTS.

A Lady's Opinion.

Mrs. Geo. Gilbert, Bryan, Ohio, writes: "DR. S. B. HARTMAN & Co., Columbus, Ohio: I commenced on the fifth bottle of your PERUNA this morning, and should just as soon think of doing without my meals as without my medicine. I have been doctoring for about four years, and kept getting worse all the time and was just giving up in despair when I got one of your books, "The Ills of Life." I was in bed at the time. I read and re-read your book and felt like trying your medicine. My folks thought there was no use in trying anything more, I was too far gone, and might as well make up my mind to die. I told them PERUNA was the medicine I needed, and I intended to try a bottle. It proved a success in breaking the chills, and if it had not done one thing more, I would have been satisfied. But it has done more, and I feel like another person. Everybody that sees me is surprised to see me looking so well, as they all thought I was dying with consumption, and now my own folks have as much to say for the PERUNA as I. I recommend it to everybody I see. There were two of our neighbors in yesterday inquiring about the PERUNA. I gave the one my book to read; told her to bring it back, as I prized it very highly. The other got the name of the PERUNA to send to his son in Chicago. He is a telegraph operator. My disease is something similar to Mrs. Milo Ingram's, though nothing compared to being so bad. There was a lump raised on my collar bone, and it was a long time before it looked like opening. The doctor said he would have to lance it in a few days, but I thought I would attend to that myself, so I put a little fly blister on it and it opened; then I put a poultice on and then salve, and kept the salve on all the time. It got so bad and spread upon my left shoulder, and one place under my left breast. Then there were two places on my head, one near the temple and one back of my ear that was just dreadful. No tongue can tell what I suffered. My head felt so strange sometimes, I thought I was going crazy. Since I have used the PERUNA (I don't use the salve any more) my sores healed up right away. And oh, what a relief it is to get around without chilling and having to suffer with my sores. I feel like letting everybody know all about it."

John Ferguson, Gallitzin, Pa., writes: "Your PERUNA is a good medicine, and we sell lots of it. Will you please send us some more 'Ills of Life,' with a few German."

An Old Soldier's EXPERIENCE.

"Calvert, Texas, May 3, 1882.

"I wish to express my appreciation of the valuable qualities of

Ayer's Cherry Pectoral

as a cough remedy.

"While with Churchill's army, just before the battle of Vicksburg, I contracted a severe cold, which terminated in a dangerous cough. I found no relief till on our march we came to a country store, where, on asking for some remedy, I was urged to try AYER'S CHERRY PECTORAL.

"I did so, and was rapidly cured. Since then I have kept the PECTORAL constantly by me, for family use, and I have found it to be an invaluable remedy for throat and lung diseases. J. W. WHITLEY."

Thousands of testimonials certify to the prompt cure of all bronchial and lung affections, by the use of AYER'S CHERRY PECTORAL. Being very palatable, the youngest children take it readily.

AYER'S
Ague Cure

contains an **antidote for all malarial disorders** which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE

to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to **refund the money.**

Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists.

NEW ADVERTISEMENTR.

IT LEADS ALL.

No other blood-purifying medicine is made, or has ever been prepared, which so completely meets the wants of physicians and the general public as

Ayer's Sarsaparilla.

It leads the list as a truly scientific preparation for all blood diseases. If there is a lurking taint of Scrofula about you, AYER'S SARSAPARILLA will dislodge it and expel it from your system.

SCROFULA

For constitutional or scrofulous Catarrh, AYER'S SARSAPARILLA is the true remedy. It has cured numberless cases. It will stop the nauseous catarrhal discharges, and remove the sickening odor of the breath, which are indications of scrofulous origin.

CATARRH

"Hutto, Tex., Sept. 28, 1882.

ULCEROUS SORES

my children was terribly afflicted with ulcerous running sores on its face and neck. At the same time its eyes were swollen, much inflamed, and very sore.

SORE EYES

Physicians told us that a powerful alterative medicine must be employed. They well d in recommending AYER'S SARSAPARILLA. A few doses produced a perceptible improvement, which, by an adherence to your directions, was continued to a complete and permanent cure. No evidence has since appeared of the existence of any scrofulous tendencies; and no treatment of any disorder was ever attended by more prompt or effectual results.

Yours truly, B. F. JOHNSON."

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists; $1, six bottles for $5.

DR. JOHN BULL'S
Smith's Tonic Syrup

FOR THE CURE OF

FEVER and AGUE

Or CHILLS and FEVER,

AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.

BULL'S SARSAPARILLA is the old and reliable remedy for impurities of the blood and Scrofulous affections.

A TRYST WITH DEATH.

I am footsore and very weary,
But I travel to meet a friend;
The way is long and dreary,
But I know that it soon must end.

He is travelling fast like the whirlwind
And though I creep slowly on,
We are drawing nearer, nearer,
And the journey is almost done.

Through the heat of many summers,
Through many a spriggtime rain,
Through long autumns and weary winters,
I have hoped to meet him in vain.

I know that he will not fail me,
So I count every hour chime,
Every throb of my heart's beating,
That tells of the flight of Time.

On the day of my birth he plited
His kingly word to me;—
I have seen him in dreams so often,
That I know what his smile must be.

I have toiled through the sunny woodland,
Through fields that basked in the light;
And through the long paths in the forest
I crept in the dead of night.

I will not fear at his coming,
Although I must meet him alone;
He will look in my eyes so gently,
And take my hand in his own.

Like a dream all my toil will vanish,
When I lay my head on his breast;
But the journey is very weary,
And he only can give me rest.

Labor and Capital.

Extracts from an address on "The Industrial Question in the United States," delivered by Hon. S. B. Elkins before the Alumni Association of the University of Missouri. June 3, 1885.

There is no natural antagonism between capital and labor. These two forces must act together, or not at all. The antagonism is between employer and employed, and comes of error on both sides. The one seeks to get as much labor as he can for the smallest wages; the other to do the smallest amount of work for the most wages he can get. This, through the law of competition, leads to a constant war of interests, where there should be harmony. This war must cease, or it will wreck our whole industrial system and social fabric.

The ordinary remedies, such as forcing division of property, nationalization of land, socialism and communism as generally understood, furnish no relief for existing evils. If all property were equally divided among the people, and there was no change in the industrial system, those that have the most now would probably get a still larger share soon after the division. The right to property legally acquired, under the existing system, should not be disturbed. The question is to secure better distribution in the future. The time for labor to get its fair share is not after wealth has been created and distributed, but at the time of its creation. There is not and there never can be too much wealth in the world. All the wealth is needed that the ability and power of individuals and corporations can legally produce.

It is said the country is suffering from over-production. But so long as millions want more food, clothing and shelter, there is not too much production for them. There is now brought from abroad seven to eight hundred millions worth annually of products. In 1882, there was paid in round numbers, for breadstuffs, seventeen millions; for manufactured cotton goods, thirty-six millions; for eggs, two millions; for hides, five millions; for steel and iron, and articles manufactured from them, forty-nine millions; for leather and leather goods, thirteen millions; for potatoes, three millions; for wood and products of wooden manufacture, eleven millions; for wool and woolen goods, fifty-three millions. If there is over-production, why import these articles when they can be produced here?

Who shall place a limit on even the necessary wants of man? If the fifty-one thousand millions of property in the United States could be divided equally among the people, there would be less than $1,000 for each individual. All will agree that it is not enough. No country can produce beyond the wants of its people. But it may produce more of somethings than they can buy, because they produce not enough of other things. If the people of this country had to-day the ability to buy simply what they need to make them reasonably comfortable, every mill, factory and car now standing still would start to-morrow and continue work. The army of unemployed workers would find employment at once at fair wages. Whenever the people have had constant employment at fair wages, they have been contented and the country prosperous, and whenever the people have not found employment, depression in business, discontent and poverty have followed.

Some advocate free commerce and foreign markets as the true remedy. England has free, the United States restricted commerce. In England commercial depression is greater and wages are eighty-four percent lower than in the United States.

The methods which now seem to promise the best results in solving the industrial problem after knowledge becomes more general and society better prepared for their adoption, are:

1. Arbitration and conciliation.
2. Co-operation.
3. Profit sharing.

Arbitration, as a method of settling differences between nations and individuals, has already made great triumphs and secured the best results. In France and England arbitration and conciliation have made gratifying progress in adjusting differences between capitalist and laborer. The State of Pennsylvania has passed a law providing regulations to govern arbitration of disputes between employer and employed. It has already prevented some strikes and violence, and promises to do well.

Productive co-operation has made the greatest progress in France; co-operative credit and banking in Germany, and distributive co-operation in England. The British official report shows that, in 1883, there were 1,328 industrial co-operative societies, with 691,961 members, and over $45,000,000 working capital, whose sales exceed $140,000,000, and whose profits averaged 28 percent, the average of Scotch companies even reaching 55 percent. In this country, as in all the countries named, co-operation has been retarded by lack of intelligence on the part of laborers. Men without education have been unable to combine, or have lacked the ability, training and discipline to manage large or even moderate business enterprises. Educate the worker, furnish him the opportunities for training and discipline, and co-operation will be a success.

Incorporated co-operation has been suggested, as one means of uniting the interests of laborer and capitalist, with the provision that the shares may be paid for in money and in labor. There are many excellent features in this plan.

Profit sharing, based upon industrial co-partnership, seems to furnish the best means of uniting the interests of employer and employed in agricultural, manufacturing and other large business enterprises. Profit sharing is not new in this or other countries; it has been adopted in agricultural industry in portions of some of the Southern and Western States, and is growing in favor. The forces employed in transacting business and producing wealth, are labor and capital. The question is to unite these forces in a way that the interests of those controlling them shall be the same, and not hostile, as now. Constant war between employer and employed has brought great loss to both. Such war can be and ought to be superseded by their becoming partners, so that both shall have an interest in the business in hand. The interest need not be equal at first. As a basis, the capitalist should have for the use of his capital a percentage of the amount he contributes, and as against this, the laborer fair wages. Then, after paying all expenses, the profits should be divided between the capitalist on one side, and the body of laborers, according to their earnings, on the other. In addition, each worker should have the right, by leaving with the working capital of the concern such part of his earnings or shares as he may choose, to become a partner in the ownership.

But it is said, this is all theory, all sentiment; the capitalist has not in the past been found ready for any such arrangement, and will not in the future agree to it. This is a natural objection, and there are others, all difficult to meet; else the great question would not give society such concern.

There is, however, this answer. Already some capitalists in various civilized countries, partly as a matter of self-interest, and partly to do good to their fellow men, have entered into just such co-partnerships with satisfactory results. Moreover, the past and present are growing unlike. Conditions are constantly changing. New elements are entering into the question. One is, that the worker is to be armed with knowledge, which is power, and particularly the power of intelligent combination. Just as the capitalists combine to do their work efficiently, so workers will combine to settle the terms upon which their labor shall be joined to capital for production.

It is said, even now there is an association in this country, composed of peaceable, honest, law-abiding and intelligent workers, who through their chief officer can, by a word, stop in a day all the locomotives on the trunk line railroads in the country. This is the power of combination, and where is there any other power equal to it? This power exists, is increasing, and must be considered in dealing with the industrial problem.

There is another element even more irresistable. It is the power of public opinion, which is reaching the conclusion that the laws of competition, supply and demand, as applied to the wage-receiver, operate unjustly; that the worker does not now, in many cases, get a fair share of what he helps to produce; that he is in effect a partner with the capitalist, though not treated as such. It is to be further considered, that the worker, who heretofore has had little to say, is helping now, through education, to make this public opinion, which in the end must stand as the sole judge and final arbiter of what is just and fair between him and the capitalist. In view of these new conditions, and for other reasons, the capitalist should seriously consider the best plan of uniting his interest with that of the wage receiver. In admitting the principle of co-partnership, would he not make, in the way of increased profits, nearly if not all that he would be called upon to concede? The worker having a direct interest, would do more and better work. The saving, by better care of property, tools and machinery, and by diminution in the cost of superintendence, would in the aggregate afford a large return to increase the profits. With co-partnership between employer and employed, the worker would feel he was more nearly equeal to the capitalist, his pride and ambition would be stimulated to better action, and the sense of inferiority he is made to feel by having no interest in the business would largely disappear. Unity of interests would prevent strikes, and the loss of time and wages, and the destruction of property incident to them.

Mazzini said:—"Every political question is rapidly becoming a social question, and every social question a religious question."

The aggressive civilization of to-day, the one that will conquer the world and supersede all others, the one that has proved the best for man, and that has lifted him up to higher plane than any other, is that built upon and shaped by the teachings of Christ. The best thought of all the best thinkers and writers upon the industrial problem have found nothing equal to the words, "love thy neighbor as thyself," "do unto others as you would have them do unto you." All correct phylosophy, all sound teaching and reasoning, conduct us unerringly to these simple truths, which combine in themselves every essential principle necessary to the solution of the industrial problem. A solution based upon these would abide, because it would be founded on simple justice between man and man.

A Great Discovery.

Mr. Wm. Thomas, of Newton, Ia., says: "My wife has been seriously affected with a cough for twenty-five years, and this spring more severely than ever before. She had used many remedies without relief, and being urged to try Dr. King's New Discovery, did so, with most gratifying results. The first bottle relieved her very much, and the second bottle has absolutely cured her. She has not had so good health for thirty years." Trial Bottles free at Nydegger's Drug Store. Large size 50c. and $1.00.

Two eminent members of the Irish bar quarreled some years ago, so violently, that from words they came to blows. The more powerful man (at the fists at least) knocked down his adversary twice, exclaiming with vehemence, "You scoundrel, I'll make you behave yourself like a gentleman." To which the other, rising, answered with equal indignation, "No, sir, never; I defy you—I defy you—you can't do it!"

A lamb can distinguish its mother's cry among a hundred similar sounds. It is the same with a boy, but he seldom pays the same attention to it that he does when his father speaks.—*Graphic.*

If your beard is not of a pleasing shade, remedy the defect by the use of Buckingham's Dye for the whiskers.

The Republican.

OAKLAND, GARRETT CO., MD.

SLUMBERLAND.

My little child, with yellow hair,
And eyes of April violets,
My heart is full of dim regrets
For the long journey you must go,
A little wraith in robe of snow;
To-night, alone, through storm or fair,
A pretty pilgrim, bound for where?

If I should put within your hand
A staff, and sandals on your feet,
You would not understand me, sweet;
Yet as in days of old romance,
Unknowing of their fate or chance,
The pilgrims went by God's command,—
So you will go through Slumberland.

Upon what ocean blue and deep,
Across what mountains fierce and cold,
With snow-wrapped summits, fold on fold,
Or through what valley, safe and low,
Will my wee bed-time traveler go?
While I a tender vigil keep
Over the fortunes of her sleep.

I may not follow or unbar
The unseen gates of Slumberland;
Though fast in mine her wee white hand,
I shall not know what faces bend
Beside her, or what thoughts attend
My darling going fair and far,
To worlds beyond the evening star.
—*Juliet C. Marsh, in Youth's Companion.*

STUPENDOUS SPIDERS.

Some Not Very Pretty Insects Found in the Tropics.

Tarantulas, Scorpions and Centipedes, and How They Conduct Themselves—Sand-Flies and Mosquitos—Life in the Bahamas.

With the budding out of the fresh leaves and blades there come out of their lairs the only wild beasts of the Bahamas. They are tarantulas, centipedes and scorpions. They have lain hidden somewhere or other all winter, barely showing themselves, but the first rains of spring put new life into them and they come creeping out, and turn up always where least expected. They are to the people of Nassau what tigers and lions are to the East Indians. Just shout "Look out for that scorpion!" or "There's a centipede!" if you want to see everybody jump. They are all small, but all venomous. If one of them bite you, you are sure to have trouble. The poison may not kill you, but it will give you more pain than any body cares about enduring, and it will give you "the fever," as every bodily ill is called here by the natives. If it is a centipede or a scorpion, you may accidentally pick one up in your hand; but you will not hold him long. And anybody who spends a few months in the tropics learns to treat them with the greatest respect. Without much of that fear of spiders and insects in general that some persons have, I think I should rather encounter a panther or a bear than any one of these three insects. With the big brutes, you see them coming, or know about where to expect them, and can be on your guard. But you have not much chance to guard against the tarantula, the centipede or the scorpion.

The tarantula being the largest of the three, the most hideous, and, I think, the most dreaded, he is perhaps entitled to be looked at first. He is known by almost every body in Nassua as "the ground spider," but he is the real poisonous tarantula, the same as I have met him in Arkansas, in Texas, in Mexico and in Cuba. There are more of them in Arkansas, I think, than anywhere else in the world. In a morning's walk of six or eight miles there, I have seen several, and considering the spider's deadly character and great size, that was running across them pretty fast. Here they are not so plenty, but still there are enough about in the rainy seasons to make a stranger feel rather uneasy. We have the common "house spider," too, as it is called, sometimes almost as large as the tarantula; but he is entirely harmless, and people hardly ever take the trouble to kill him. House spiders catch and eat flies and ants and other small insects and thus pay their rent. But even the house spider is not a pleasant companion in a room. The tarantula, however, will empty a room of its occupants in about as short order as a tiger would. The first one I ever saw in Nassua was when I had been at Waterloo about a month and was having the bushes cleared away from about the house. Some of the colored boys were at work in the flower garden, and one morning they made a grand dash for the front piazza. They all looked well frightened, and I asked them what was the matter.

"Groun' spider, boss," one of them replied as soon as he could catch breath enough.

We all went out to kill him armed with hoes, rakes, brooms and all the long-handled implements we could find, as well as a wagon load or so of good-sized stones. He sat among the grass and weeds, easily seen and watched on account of his intense blackness, and did not offer to move. None of the boys would go within eight or ten feet of him, because it is commonly believed that tarantulas can and do spring a long distance, being well provided with muscular and hairy legs for that purpose. I think, however, that this is a mistake. I have seen a great many of them and never yet have seen one jump or make any movement beyond a slow, crawling walk. Their legs are kept well under them when they walk, elevating them, I should think, about two inches above the ground. At any rate we all kept at a respectful distance from this fellow and pelted him with rocks. The first shot must have hurt him, for he made no effort to get away, and in a minute or two he was pounded into a jelly—a nasty, hairy, black jelly that no one would care to touch. When he was used up beyond all danger of resusciation we cut him to pieces with the hoes and threw him over the wall. He was not a very large one for a tarantula—perhaps about four inches long and three inches broad. The hairy black legs make them look more obnoxious and disgusting than they otherwise would. It is hard to tell just how large and powerful the legs are on account of the thick black hair with which they are covered. After this the boys were cautious when they disturbed any big stones in the yard, and looked carefully into any thick cluster of weeds before they disturbed it.

Opinions differ as to whether the bite of a tarantula is ever fatal. Any colored person in Nassau will tell you that his bite is sure death. I have taken some pains to make inquiries for any person who has ever known, of his own knowledge, of a fatal result from the bite of a tarantula. It is impossible to find any well-authenticated case.

The scorpion is the next gentleman to demand attention. He is very much smaller than the tarantula, much livelier, and not much handsomer. There are a thousand scorpions, I suppose, to one tarantula, and their bite is fully as bad. I must confess to having had a very vague idea about the scorpion before becoming acquainted with the tropics. I think if I had been driven to it, I should have described him as a creature with wings, black, and somewhere about the size of a humming-bird. This would have been about as inaccurate a description as can be imagined. He has no wings, he is not black, and he is nowhere near the size of even a half-grown humming-bird. There is an imaginary picture of him in all the almanacs, but it doesn't look very much like him—that sign of the zodiac. Referring to Mr. Webster to see how my experience compares with an authoritative description of him, I find that he is "a pedipalpous, pulmonary arachnidan, of the genus scorpio," and I am glad to learn, of course, that he is a pedipalpous. Anybody would be a pedipalpous who would take hold of one of them, if he could help it. But nobody ever does. We hear of snake-charmers, and lion-tamers, and tamers of wild beasts in general; but did anybody ever hear of a man fooling unnecessarily with a scorpions. A full-grown scorpion is from two to two-and-a-half inches long, and his color is a sort of ashy gray. He has eight legs, upon all of which minute hairs grow, and his tail is much longer than there is any necessity for, considering the size of his body. The tail is, in fact, only a continuation of his body, and I have included that in measuring his length. It is at the end of his tail that he carries his venomous sting, and when he curls up his body into a semi-circle, and brings that lively end of his tail to bear upon an enemy, the enemy can not drop him too soon. His body is no where as thick as a lead-pencil, but at the head it branches out into claws, or horns, or additional legs, whichever you like to call them; so that in shape he is somewhat like a tack hammer. He is shaped very much like a hammer-headed shark, only hammer-headed sharks are not familiar enough in Northern waters to serve for an illustration. He is a creature of mold and slime, like the snail. Let an old box lie on the ground, particularly in a moist place, till the bottom boards begin to decay, and your scorpion trap is ready. When you want your game lift up the box and there is your scorpion. But be careful to take hold of the box near the top, and not get your fingers in the way, for the scorpion is very rapid in his motions and he will give you a sting before you know it. When he strikes you with the end of his tail, like a wasp, he exudes a venomous liquid, and a man might better hold a red-hot iron in his hand than get the tenth part of a drop of this liquid into his blood. It is not necessarily fatal, particularly in the Bahamas; but it condenses the heat of forty furnaces. In some parts of South America scorpion bites are frequently fatal, but I have not heard of any one having being killed by them in Nassua. This is easily accounted for. The scorpion likes to feed upon decaying wood.

The centipede is much larger than the scorpion, and I think even more to be dreaded. He grows sometimes to be six or eight inches long, but is slim and rather flat. He, too, travels rather fast (he ought to, he has legs enough), and he scratches rather than bites, leaving an ugly mark wherever he sets in one of his numberless claws. Like the scorpion, he lives under boards or stones or at the bottom of old walls. He is made up all in joints, like the tapeworm, and each joint has either two or four legs. I never examined one closely enough to see exactly which, for even after they are all cut into bits the pieces have an unpleasant habit of wiggling themselves about. They say about them here that a centipede will not die before dark, no matter how much you cut him up; but I think that story will do to go with the yarn about snakes having the same bad habit. I have cut up a few dozens of them with hoes, here in Nassua, that I am sure died before I was through with them. When I say in Nassua I mean here at Waterloo, which is a mile and a half out of town. These insects are rarely seen in the city, and American visitors often complain that they have to go home without a sight of any of them. The centipede's poison lies in his claws. There is a bent and very sharp claw at the end of each leg which sticks into the flesh, and if he gets one of these claws into you he quickly pulls himself up upon your hand, or whatever part of you he has hold of, and sets in the rest. I have talked with people who have been poisoned by centipedes, and they describe the sensation as anything but pleasant. He has not, of course, a hundred legs, but he has a great many, and makes them all count. One gentleman in Nassau described to me a thrilling encounter he had with a centipede. On going to bed one night he put on that long white linen garment which is so comforting to the senses in a hot climate, and it did not take him long to discover that there was something in it. A moment later a centipede was fastened to his back, and the gentleman was trying to tear the linen off with as little delay as possible. The centipede by this time had given up all claim to the linen, but held on to the back for dear life. They stick very tightly, having to be almost torn off; and the gentleman had to call for help to have him pulled off. By the time assistance arrived the insect had crawled a foot or two up his victim's back, leaving a fiery red mark wherever a claw had touched. And all this time the gentleman was enjoying the sensation of having a hundred hot needles run into him. From this and some similar experiences it is quite fashionable in the tropics to shake your clothes well before putting them on. I remember a lady—a new arrival at the hotel—asking me one day whether I hung up my shoes at night to keep the insects out of them? I try to imagine a man taking the trouble to hang up his shoes before going to bed, but can't quite do it. Centipedes are more plentiful than scorpions, but not quite so likely to sting. I have seen a barefoot man step on one without being hurt, probably because the insect had no chance to turn and use its claws. They are just about on a par with scorpions as regards the effect of their poison. In some places the effect of a centipede's sting has been fatal, but it is not so here.

I wanted to end this chapter on tropical nuisances by saying something about my ancient enemy, the sand-fly, but words fail me. It is very seldom, and then only on remarkably still days, that there are any about in the winter. But during the rainy season they are exceedingly thick. No mosquito netting will keep them out, they are so small. They give no warning, like a mosquito, but proceed at once to business. You feel a sting on some part of your skin, and perhaps see there a black speck about the size of a pin's point. But he must be full of poison, for the bite swells up and itches, and you get twenty more of them, and you scratch till they're all sore and get little scabs on them, make and you look as if you had small-pox. When I get back to New York no mosquito shall ever tempt me into impatience. I'll just think of the sand-flies and be content.—*Nassau (Bahama) Cor. Cincinnati Enquirer.*

THE EARTH.

How This Terrestial Habitation of Ours is Growing.

Careful mathematical calculations have been made recently to ascertain the residuum left on the earth by the deposit of meteoric matter. It is known that the region along the earth's orbit abounds in meteors, and that at two points the orbit passes through streams of meteors where these little planetoids are unusually thick. These two points are encountered in August and November, when the precipitation of the little bodies marks the firmament with lines of fire. But meteors are falling to the earth all the time—in other months of the year as well as August and November—in the day time as well as at night. Very brilliant ones have been seen shooting across the sky in broad daylight, and one who observes the sky patiently and attentively any dark night may count them. A careful estimate makes the average number to be seen by a single observer in a limited quarter of the sky about twelve per hour; and another estimate makes the precipitation of meteoric matter to the earth from the whole heavens two and a half tons per hour. In rare instances the meteorite, or part of it which is a solid body, reaches the earth in an unconsumed state, but far the greater number are entirely consumed in the conflagration set up by their passage through the earth's atmosphere, and only the ashes or meteoric dust reaches the soil. But even when the meteorite is thus burned to ashes, no part of it is lost. All its original elements survive in the residuum of ashes and vapor, which, thenceforth, belong to our earth. These meteorites or planetoids are iron rocks, and if one of them as large as the St. Louis court house, in passing through our atmosphere, were entirely burned up, it would still bring as much increment to the earth as if it fell to the surface in a solid mass. The estimate of this steady and perpetual increment to our earth's weight is two and a half tons per hour, or sixty tons a day, or 21,900 tons a year, or over 2,000,000 tons every century. It would take 100 ordinary railroad freight trains, therefore, to haul the meteoric deposit which the earth gathers from the sky every year, and if this matter could be gathered into one mass and made to revolve round our planet it would make a respectable little satellite added to the earth every year. The earth is demonstrably growing in size and weight all the time. Relatively, however, the increment is small, though it appears large when considered by itself. The earth has been weighed. If anyone wants the figures, here they are: 6,000,000,000,000,000,000,000 tons.

It will take ages of steady precipitation of meteorites to appreciably increase this enormous mass of matter, and the estimate of it recently made has no other interest, therefore, than as an astronomical curiosity.—*St. Louis Republican.*

TOUGH TO THE LAST.

An Authentic Account of the Last Hours of Yankee Sullivan.

I was very much pleased to meet last week with Judge McGowan, one of the Argonauts who, in 1849, discovered the golden fleece, which has—to coin a term—royalized California. In the course of our conversation the Judge told me the concrete history of the tragic end of the famous prize-fighter, Yankee Sullivan.

Sullivan, whose real name was Ambrose Murray, was arrested and imprisoned. He feared that the Vigilantes would put him to death, though, as Judge McGowan tells me, his apprehensions were unfounded. The purpose of that body was to ship him back to Australia on the first clipper ship that sailed to Melbourne, it having been definitely understood that Sullivan, or Murray, was an escaped convict. The poor devil, however, was so affrighted that he took no stock in the hope of escape from the harsh business of Judge Lynch. He called eagerly from his prison windows for a priest, feeling that death was settling close around him, but was answered by jeers from the mob without. Finally, in sheer desperation, he opened the veins of his left arm with a case-knife and bled himself to death.

Yankee Sullivan was one of the finest prize-fighters in the records.—*Washington Hatchet.*

—Stage robberies have become somewhat numerous on the Pacific coast, one stage alone having been pillaged no less than four times within six months. —*Chicago Times.*

—During the last nine years France has spent nearly $5,000,000 per annum on increasing and reorganizing her university institutions.

LATE FASHIONS.

What the Ladies of the Metropolis Assume to be the Mode.

Eton, Spanish and zouave jackets are worn by young girls in their teens.

Golden oats and wheat are sold by the head for bonnet and hat trimmings.

Red and yellow, golden brown and tan are immensely popular spring colors.

The jersey is the best bodice for lawn tennis, for it is a game that is rough on sleeves.

The Recamier coiffure requires the use of a large old-fashioned comb of tortoise shell or jewelled metal.

China crape and sailcloth canvas is an admired frequent combination in the trimming of French hats.

Red woolen lace trims admirably dark blue cloth and blue wool etamine suits for seaside and mountain wear.

More and more marked grow the differences between street and indoor frocks, morning, afternoon and evening toilets.

English mohair fabrics, plain and broche, are found in all the large retail dry goods houses in both single and double widths.

Veils of tulle and crepe lisse in every imaginable shade of color and black are finely dotted with gold, silver, steel, bronze or jet.

Even silver gray can be made loud and striking by too free use of bright steel or silver braid, tinsel, fringe, balls, embroidery, or motifs.

Morning dresses and elegant house toilets are made dressy with profuse use of ribbons in bows, flots, cascades, panels, and floating loops and ends.

The height and trimmings of hats and bonnets are as exaggerated as ever, and yet comparatively few of these exaggerated shapes are seen in the streets as yet.

The French productions of silk handkerchiefs in Oriental colors and designs, shot with gold, are utilized to an enormous extent for trimming fine hats and bonnets.

More and more golden grow bonnets, hats, scarfs, accessories of the toilet, dress trimmings, and broche stuffs of all kinds either for dresses or upholstery and house decorative effects.

Ribbons were never more in demand for decorative dress and furnishing than this spring.

The Recamier coiffure, lately introduced in Paris, bids fair to supercede the high figure 8 on the top of the head hair dressing and the catogan look in the nape of the neck.

The newest silk hosiery consists of lace-woven stockings, the foot and ankle having lengthwise clocks and embroidery up the sides in inch-wide bands, leaving a plain strip down the instep, while the calf of the leg is entirely lace-woven.

The skirt destined to summer popularity is destitute of drapery or flounces, is gathered full in the back, pleated at the sides, and plain in front, simply hemmed or has a hem and three, two, or several overlapping tucks or folds above the hem.

Salesmen in the best houses now tell ladies that sixteen yards of silk are sufficient for a dress this season instead of the twenty necessary last season, as there is so much less drapery, less looping and less flouncing and pleating than formerly.

Very rich summer black dresses are made of China crape, embroidered for the skirt, and overdresses of black lace, but the richer combination is made of satin rhadames for the skirt and underdress, while the overdress is of black llama or Chantilly lace, in the old patterns and designs.

Short visite mantles with the sleeves entirely of jet embroidery or jet net, and the body of plain velvet, satin or grenadine broche, are trimmed with jet fringes, jet macaroons and motifs. Sometimes the sleeves are of plain stuff, while the body is covered with jet bead embroidery or net.

The printed Khyber cloths sold at eighteen cents the yard are just the thing to combine with self-colored veilings at fifteen cents the yard, for lawn and garden party dresses. The beige, twine-colored, and tan woolen laces are the correct trimmings for these dresses, and cheap ribbons make them dressy and chic

Bonnet scarfs of black, blue, green, gray, beige, white, tan, and brown barege, striped or barred across at each end with various colors, in the style of a Roman scarf, with gold lines between those of color, trim many pretty bonnets, and are also used for neckwear and various toilet and decorative purposes.

The proper way to use golden grain, oats and wheat, in hat and bonnet trimming is to put from three to six heads of the grain in a panache of ostrich feathers and a bunch of gold catkins, or a gold or silk pompon, or, in place of the feathers, a close but tall bouquet of flowers, mingled with golden catkins.

The newest silk undervests for ladies have no gores set in for the bosom fullness, but this is provided for in the weaving, which shapes the garment with a soft woven seam in such a manner as to define the exact shape. Fastidious women edge the low necks and short sleeves of these vests with lace.

Flower weddings are all the rage in London. At these the bride and her bridesmaids wear dresses representing spring flowers, lilies, white roses, orange blossoms or other white flowers being the representative blossoms of the bride, while her maids wear daffodil, buttercup, jonquil, hyacinth, red or pale rose or violet-colored frocks trimmed with the flower to be personated.—*N. Y. Sun.*

—Nut cake: One and a half cups sugar, one-half cup butter, two cups flour, three-fourths cup sweet milk, two teaspoons baking powder, whites of four eggs; bake in two layers; take whites of two eggs for the icing, using equal parts of egg and ice water; thicken with confectioner's sugar, mixing with a fork until smooth; flavor both cake and the icing with vanilla; frost one cake and cover with English walnuts; place the other cake on, frost and cover with walnuts and frost again. —*Rural Home.*

TEMPERANCE.

THE DRUNKARD'S DREAM.

He slumbered in a quiet sleep beneath Heaven's sparkling dome,
A man without a single friend, a wretch without a home;
And there he lay, a spectacle to every passer-by—
The only roof that sheltered him, the star-bespangled sky!

Hungry and ill, he'd left the town to roam he knew not where;
Hungry and tired, he slept at last, forgetful of his care;
Forgetful of the agony he'd suffered all the day,
He slumbered now, and care and woe at last had flown away.

He dreamt that he was standing where so long ago he stood;
Again he heard the cheering of a mighty multitude;
He was receiving once again the prize his skill had won—
He heard his father blessing God for having such a son!

His fancy changed: he dreamt he stood beneath the rustling trees,
Which seemed to shake with laughter at the antics of the breeze;
A thousand flowers were 'neath his feet, rich, beautiful and rare,
As he was whispering love-tales to a maiden twice as fair.

He saw her startled attitude, he marked the rising blush,
He saw the tears of pleasure from her lovely eyelids gush,
He saw the joy and happiness she sought not to repress,
And with a thrill he heard again the softly-whispered "Yes!"

His dream was changed: Again he stood—and she was by his side,
Within the little village church to claim her as his bride;
Joy thrills his heart with happiness, his eyes with pleasure gleam,
When, hark that noise! he wakes again to find it but a dream.

The wild wind moans in sorrow and the rain begins to fall;
Where are the pictures of his dream? They've vanished one and all.
The lightnings flash, the thunders roll and rattle overhead,
And the very sky seems weeping o'er the joy forever fled!

He tries to rise, but, weak and faint, he can not stir a limb;
Before his dazzled, weakened eyes the trees begin to swim;
He hears another rattle, and another rattle still,
And now through every nerve there runs a strange and fearful thrill!

A sudden pang has twitched his heart, has robbed him of his breath;
He gasps a moment, then he falls asleep—but now in death!
The lightning struck him lying there, and severed life's last link,
And the stars alone are weeping for the victim of the drink.
—*Irish World.*

MISS CLEVELAND.

What She Has to Say Concerning the Liquor Traffic—Her Reply to Dr. Crosby on the Question of Total Abstinence.

The New York *Sun* of a recent date published a communication from Miss Elizabeth Cleveland, sister of President Cleveland, in reply to Rev. Dr. Howard Crosby, on the question of total abstinence. Miss Cleveland commences by quoting the following from Dr. Crosby:

"I do not wonder that excellent women, whose husbands or sons have become sots, should advocate total abstinence for every one. We have heard a good woman whose boy had cut his finger nearly off with a knife wish that there were no knives in the world, and if she could have her way she would have them all destroyed forthwith. It is natural, and a woman's cry on such an occasion excites our tenderest sympathy. But who will count that an argument?"

Miss Cleveland then says:

The above paragraph from "A Calm View of Dr. Nelson," by Rev. Howard Crosby, D. D., in the *Evangelist* of March 17, has most pertinaciously haunted me ever since the perusal of the article last evening. That this above any other paragraph should most impress itself upon the impressible mind of one emotional woman in particular, or of woman as an emotional creature in general, will surprise no man. It is, as the doctor says, natural; and I am certain that multitudes of women besides myself are to-day smarting under these "calm" words, against the imputation of which every fiber of the woman's nature rises up in revolt.

The male animal is very fierce; the female of all genera is comparatively and in general uncombative. But the same science which tells us this tells us also that the mother, among all beasts, in defense of her young, is the fiercest of all living creatures. The lioness, under ordinary circumstances, is quite easy of conquest, but the lioness robbed of her whelps no man or beast cares to encounter. Both these phases of the female nature are undoubtedly "natural." They belong, as Bishop Butler said of certain so-called supernatural phenomena, to the natural of which there are "two causes"—the one ordinary, the other not supernatural, still less superhuman, but extraordinary. You see, Mrs. Foster, that this "mad dog" you talk about is to be put, by a calm view of the thing as it is, into the same category with cutlery. You have no more real right to "cry" about this unloosed beast because it may meet your children on their way to school and may bite one or two of them than you have to cry out against the manufacture and sale of knives because your boy cut himself once. The perfectly clear thing is, if you only had head enough to see it, that the manufacture (by fermentation, not distillation) of the mad dog (not very mad, only some mad) ought to go on, and that one mad dog (of this good kind) for every one thousand people ought to be protected by law from the bullets of hydrophobia-haters.

This calm view of the "evil," which, because of some, in fact several, cases of hydrophobia among us has come to be called by unthinking people a "mad dog," is proved by concurrent testimony of experience, science, scholarship, sound philosophy, and, above all, rightly-read Scripture, to be a good creature of God. The calmly Christian thing for you to do "on such an occasion" is not to go up and down "crying," but to stay at home and teach your little boys and your big boys how a little mad dog's bite is good for them, but a big mad dog's bite is very bad for them.

You ought—if you would only do the thing you ought, instead of the thing you like—to mix up a little wine and water for your little boys at dinner, so that they may early learn the difference between true Temperance and this miserable parody on true Temperance called "total abstinence," and may be prepared to make a manly protest against drunkenness when they shall be grown up. It is simply silly—yes, while we feel the tenderest sympathy for your sorrow, we must say it—it is silly for you to refuse to see that knives and mad dogs are equally dangerous. It is as ridiculous for you to demand that all alcohol shall be banished from the bevarages of mankind, because the fiery liquor is burning out the manhood (in more ways than by its consumption) of the world, as it would be for you to demand that all the wells should be dried up because men lose their lives by drowning.

Alcohol and water are exactly analogous, if you could but see it, you foolish woman!

Your cry is no argument; it were better you should stop your crying.

Dr. Crosby, we can not—try we ever so hard—we can not defy or deny nature. God has made us a crying genus. We can not understand how knives and mad dogs are just alike; we can not understand why a mad dog should not be killed. We can not help crying if only one to every one thousand human beings is let loose in our streets. These things are too high for us; we can not find them out. It is not our blame. It is our nature. And we dare to say that through the pure and unsophisticated nature of the human mother God's argument against any use of alcohol except as a medicine is given to the world to-day.

When the young Queen of Austria, pressed on every side by the ruthless oppression of the great Prussian King, fled trembling into Hungary, and, with her infant in her arms and her royal crown upon her head, appealed for the protection of her kingdom to her loyal subjects there, those stalwart Hungarian nobles rose in a mass, and laying their right hands upon the swords at their sides, swore in a shout whose heroic ring echoes down the years: "Moriamur pro rege nostro, Maria Theresa!" And how they did die all the world knows. It is not for rhetorical effect, still less for the excitation of the "tenderest sympathy," that I revert to this well-known historical incident. It is that I may call attention to the argument in the cry of those men—for I suppose a man's "cry" may be counted as an "argument." I wish to beg you to notice these words "rege nostro." That expression of those Hungarian nobles, our King, Maria Theresa, instead of our Queen, Maria Theresa, has been interpreted to represent an idea in their minds to suit the mind of the interpreter. "Woman's rights" speakers have made them an acknowledgment on the part of those most masculine men that here was a woman who was more man than any one of them, or all together; more able to command them by having more that was kingly in her. Hence "pro rege nostro" rather than "pro regina nostra." Chivalrous knight errants of our day make this expression to indicate the most refined and splendid chivalry in those Hungarian nobles, as if they had said to this threatened and trembling mother, clasping the future King in her arms: "Never mind, now, you shall be just as much sovereign as if you were a King yourself. We will die to make it so: 'pro rege nostro.'"

Now, I make this expression to mean neither of these things. I believe that these strong and straightforward warriors roared out these words as the simplest usage to express their most instant and impulsive expression for all that men as patriots should die for. I believe that this crowned mother stood to them as the representative of their nationality, their rights, their honor, summing up in their person, as did the ruling sovereign of those days, their country and their country's cause. They formulated in their expression, "rege nostro," the sentiment which Louis XIV. taught in the words: "L'Etat c'est moi." They proved this, for they fought, and many of them did die; and men do not deliberately die for a beautiful, weeping woman, though they love to swear to that effect sometimes, unless there be some worthier object to be gained by their self-devotion. But whether my idea of this be fanciful or not, whether it be calm and logical, whether it be good criticism, I do not affirm—Dr. Crosby will know; but I dare affirm that the American mother, who to-day, being pressed on every side by the aggression of King Alcohol, confronts American men, the infant in her arms her only scepter, the motherhood on her brow her only crown, and cries to them for the protection of her kingdom, the home, carries in her cry an argument. And I dare affirm—for, thank God! it is a spectacle which all may witness—that stalwart warriors, pulling from their scabbards trusty swords, admit that cry to be an argument by their answering shout: "We will fight for our King." For we all have a King, even doctors. There is a majesty of right, a royalty of truth, which in manifold forms claims our allegiance and argues its claim. God sees in the tearful cry of the bruised and baffled mother, sister, wife, His own argument for the utter extinction of intoxicating beverages—the suppression, root and branch, of the liquor traffic. And in that cry He makes His argument to men.

A Chancellor's philosophy, grasping in its mighty sapience cults and sciences which we poor women can not even name, has as yet failed to apprehend that chemistry of Heaven which distills from a Christian mother's tear the first drop of that mighty gathering storm whose full and final outbreak shall sweep away for ever all refuges of lies which, sincere or insincere, bulwark the liquor traffic. "And the children of Israel sighed by reason of bondage, and their cry came up unto God: and God heard their groaning, and God remembered His covenant; and God looked upon the children of Israel and had respect unto them." ELIZABETH CLEVELAND.

ANNIVERSARY CELEBRATION.

The Recent Meeting in New York of the National Temperance Society—Interesting Annual Report.

The National Temperance Society celebrated its twentieth anniversary at the Broadway Tabernacle, on Tuesday evening, General Clinton B. Fiske presiding. A large assembly filled the Tabernacle, and the meeting was one of the most enthusiastic and inspiring that the society has held for years.

Mr. J. N. Stearns, Secretary, read the annual report, of which the following is an abstract:

Much effective work has been done to promote the more thorough enforcement of restrictive and prohibitory laws. Three additional State Legislatures (Oregon, Rhode Island and Tennessee) have voted to submit Prohibitory Constitutional amendments to the people. More fully than ever before the suppression of the liquor traffic has come to be recognized as one of the foremost issues in local, State and National politics.

Nearly every Legislature in the Nation which has been in session during the year has agitated the liquor question. Bills of every variety have been presented—for constitutional prohibition, local option, local prohibition, scientific temperance, high license, prohibition, anti-treating, as well as for amendments to existing laws—almost without number. The liquor interest has been strongly represented at every capital to secure license for their business with few restrictions, and to oppose all legislation which interferes with their traffic. So far as heard from no adverse legislation has been consummated. The United States Senate again passed the bill to provide for a National Commission of Inquiry concerning the alcoholic liquor traffic. The House of Representatives passed a bill increasing the liquor-license fees in the District of Columbia. The distillers and whisky speculators secured from the late Secretary of the Treasury a ruling in their special interest, the practical effect of which was to extend the bonded whisky period for seven months—an extension which the previous Secretary of the Treasury and Congress had declined to authorize. To evade the payment of the already overdue revenue tax, whisky has to some extent been withdrawn and shipped to foreign ports, and returned and placed on the market as imported whisky. The present Secretary of the Treasury has thwarted this speculative scheme by directing that the customs officials shall turn over to the Internal Revenue officers all such re-imported whisky for the collection of the internal-revenue tax. Thus in various ways the liquor question, in its national aspect, assumes steadily increasing prominence and importance.

During the year the receipts from memberships and donations have been $6,095.81; legacies, $1,284.57; invested funds, $1,516.67, making a total of $8,897.05. The total missionary work of the society has been over $12,000.

During the past year there have been published 132 new publications, six of which have been bound volumes for Sabbath-school libraries, 16 pamphlets and 110 tracts, lesson leaves and miscellaneous publications.

William D. Porter, Esq., treasurer, reported the entire receipts of the year to be $60,218.14; total expenses, $60,289.77. Cash on hand May 1, 1885, $36.64.

Effective addresses were delivered by Rev. Drs. T. L. Cuyler, of Brooklyn, and Daniel Dorchester, of Massachusetts, and Rev. C. H. Mead, of Hornellsville, N. Y., special missionary of the society among the freedmen of the South. Among the resolutions adopted was the following:

Resolved, That we earnestly urge all Temperance organizations throughout our own country and in other lands to unite in the month of September next in celebrations to fitly commemorate the completion of the first century of the Temperance reform, as inaugurated by the pioneer labors and the historic essay by Dr. Benjamin Rush, of Philadelphia: "An Inquiry into the Effects of Ardent Spirits upon the Human Body and Mind," first published in 1785.

The following were elected officers for the ensuing year: President, T. L. Cuyler, D. D., New York; Corresponding and Recording Secretary, J. N. Stearns; Treasurer, William D. Porter.—*N. Y. Observer.*

FOR OUR YOUNG FOLKS.

PUSSY AND SPARROW.

Long, long ago, one summer day—I think
twas in the month of May—
A pussy cat beneath a tree walked back and
forward mewsingly.
Around about, the flowers fair exhaled their
hearts upon the air;
Above her head, and all about, the glad birds
"shook their carols out."
The sunshine's glow, the shadow's grace,
made that same spot a pleasant place,
As back and forth beneath the tree that pussy
cat walked mewsingly.

But not for any flower that grew, nor yet for
any breeze that blew,
Nor yet for grace of sun or shade, or music
that the glad birds made,
Did that same cat beneath the tree walk back
and forward mewsingly.
Her heart, as back and forth she went, raged
with a sly age discontent.
"These birds," she said, "I do declare, their
songs are more than I can bear;
Each wretched little singing sinner would
make some cat a splendid dinner.
Now, there is one, so sleek and plump! Just
see the creature hop and jump!
If I could get within my clutch that bird, or
any other such,
I'd show," these were her very words, "the
proper use to make of birds."
Thus said that pussy cat as she walked back
and forth beneath that tree.

She watched, with eager, hungry eyes; when
lo! within her reach, there flies
A sparrow. Ah! the bird was rash! A little
spring, a little flash
Of wings that spread too late, alas! And so,
you see, it came to pass
The pretty bird, as quick as thought, within
the old cat's claws was caught.
"My chances," thought the reckless sparrow,
"are certainly extremely narrow.
And yet, I'll do the best I can; no more than
that can bird or man."
So, as the cat tried to begin her long-delayed,
long wished-for dinner,
The sparrow cried: "Dear Madam Cat, you
surely have forgotten that
Every one should wash his face, or hers, just
as may be the case,
Before he eats (or she). I've heard, upon my
honor as a bird,
This is a rule that, far and wide, no high-
toned circle sets aside.
The very manner of one's feeding is *such* a
test of one's good breeding.
And you, dear, lovely Madam, are too ele-
gant, I know, by far,
For e'en a moment to forget the smallest
claim of etiquette."

The pussy cat, alas!—but she had her own
share of vanity;
And, in all courtesy refined, she did not wish
to be behind—
She said, quite to herself: "If that's the rule,
I'll be to future cats
A bright example. I will be a model for pos-
terity."
So she prepared, with not a doubt, this new
resolve to carry out.
She laid the bird which, be it said, was look-
ing less alive than dead,
Down in a fitly chosen place, while she pre-
pared to wash her face.
O, foolish cat! O, wily bird! Was ever such
deception heard?
Quick as the flight of any arrow, away went
that deceitful sparrow,
While 'neath that spreading tree there sat a
most dejected looking cat.

Then back and forth beneath the tree again
she wandered mewsingly.
"That rule," she said, "is too absurd. 'Twill
never work 'twixt cat and bird."
Waving a disappointed paw, she said again:
"I'll make a law
That shall not such a chasm set 'twixt appe-
tite and etiquette.
That shall not leave my hapless kind a prey to
every guileful mind.
So now I publish this decree, that all the cats
that yet shall be,
Of all degrees and times and places, shall eat
their bird, then wash their faces.
Thus is the cruel law reversed of dinner last
and manners first."
Thus spoke that cat as 'neath the tree she
wandered most dejectedly.
And this since then has been the law; and
every cat you ever saw
Adds to the maxim, firm and fast, of dinner
first and manners last.
And if you read with half an eye, of course
you see the reason why.
—*Carlotta Perry, in N. Y. Independent.*

JESSIE'S STORY.

What She Thought About Her Dreadfully Bad Brother.

Little Jessie came and leaned her head against her mother's shoulder.

"Archie's a very bad boy, mamma."

"Is he, dear? I'm sorry."

"Yes, mamma, a *dreadfully* bad boy! He—"

"Wait a few minutes, pet, until I finish this, and then I'll hear about it."

Jessie waited and watched as the pen quickly traveled over the page, wondering if she herself should ever be able to make the little letters which were such a trial to her every day at the kindergarten. And thinking she could make almost as good capital M's as mamma, but feeling quite sure she never could make such nicely-shaped B's. And proud to find that she could tell "and," and "to," and "be," and that she knew a comma and a period.

"It's very easy to write stories when you know how to make all the letters, isn't it, mamma?"

Mamma smiled as she wiped her pen.

"Does it seem so?" she asked.

"Why, yes, mamma. You just write and write and write, as fast, and the first thing you know, it is a beautiful little story, and you read it to me."

"Suppose you write one, Jessie."

"But I can't make half the little letters, and I never know which way to turn my capital E's, and my F's and T's always look just like each other."

"But I will write it for you. You need only to tell me what to say."

"Oh, that will be nice, mamma—only I'm afraid you'll get tired before I'm done. Now I'll begin:

"'Once there was a little girl, and she had curly hair and brown eyes and a pink gingham frock and—and—her mamma'—what is it you do for me when I am very, very good, mamma?"

"Kiss you and hug you and call you my little sunshine?"

"No, I don't mean that. When I'm so good that you let me have a little tea-party with Bessie Gay, or buy me some gum-drops. You in—in—"

"I indulge you, do you mean?"

"Yes, that's it. 'Her mamma was a very indulging char—character'—there has to be some big words in a story, you know!"

"Go on, Jessie."

"'—And she would have been a very happy little girl if she hadn't had a brother, and he was a very, *very*, VERY bad boy, indeed, and he took her doll's fly bar for a fish net, and pinched her kitty's tail, and drove her away up in the apple-tree, and—and the little girl'—how long is the story, mamma?"

"Only so long."

"Is that all? Well—'and the little girl'—I don't think it is so very easy to write stories, mamma."

"Go on, dear."

"'And the little girl'—I wonder where Archie is?"

Jessie changed uneasily from one foot to the other. "'And the little girl'"—she looked out of the window. "I'm sure Archie will be wanting to play with me, mamma."

"You'd better run out then, dear."

"And couldn't you finish the story? I think it's *dreadfully* hard to write stories."

"Have you finished the story, mamma?" asked Jessie at tea-time.

"Not yet, but I will very soon, and will read it to you when you go to bed."

After Jessie had said her prayers, her mamma read:

"'And the little girl went out and looked for her brother, but could not find him. She waited and waited, and hunted about, wondering where he could be, and feeling very lonely and forlorn without him.

"'At length some of the neighbors came running by in great fright, and told her mamma that some little boys had been playing in the woods, and two of them had fallen into a deep hole in the creek.

"'The little girl did not know that her brother had asked mamma to let him go to the woods for a bunch of wild flowers for his little sister. Mamma told her to stay in the garden while she herself ran across the meadow toward the woods.

"'Then for a dreadful half hour, which she will never forget, the little girl waited, not knowing whether she had any little brother or not, trying to fancy how it would seem never again to hear his merry voice, or to see his bright face. Even his teasing seemed only a trifle now, only a little fun, which she might easily have laughed at, or borne patiently, instead of fretting and complaining about it.

"'Halloo, Jessie! Look!' There at last was the dear boy running toward her, with his hands full of beautiful wild flowers—pink and purple and blue and white.

"'I got them all for you!' he cried. 'And Johnny and Bert fell into the water, and 'most got drowned, but they're out now.'

"'What a delightful play they had that afternoon! Mamma listened, as they laughed and sang and ran about, and with a great thanksgiving in her heart, wondered if the little girl would ever think again that she would be very happy if it were not for her brother!'"

"O, mamma!" said Jessie, with tears in her eyes; "your part of the story is the best. What should I do for a brother if Archie had been drowned? I don't believe I shall ever be angry with him again. Do let me run and kiss him before I go to sleep."—*Sidney Dayre, in Youth's Companion.*

TRUSTWORTHY.

The Boy Who Scorned to Cheat a Railroad Company.

"Here, Ellis," said Deacon Cary to a lad of fifteen, as he stepped from the morning train. "Here is a good round-trip ticket that will carry you to Springfield and back without costing you a cent. Take it, and run up and spend Sunday with your mother. It will save you a round two dollars, and that will buy you a new jacket, which I dare say, you need."

The boy took the ticket from the outstretched hand, and looked it over with a glad smile lighting up his face.

"It is all right," continued the deacon, "and good until it is used, you see. I made my trip upon it, and the careless conductor failed to call for it either way. Keep it, and use it," he said, as the boy offered him the bit of pasteboard. "You are welcome to it, and your mother will be glad to see you, I am sure."

"But you have used this ticket already, Mr. Cary," urged Ellis.

"It's not my lookout if the conductor fails to attend to his duty. The ticket is my property yet, and I make a present of it to you," the deacon replied, a little impatiently.

Ellis Conway looked at the card in his hand, and thought of his poor, sick mother, and of all the delicacies the extra two dollars would buy for her comfort, and he was sorely tempted to take the next train to Springfield; but the next moment his better self had triumphed, and tearing the ticket into small bits, he deliberately cast them into the fire, saying as he did so: "The temptation is removed now. If I had used it, the railroad company would not have been much poorer, but I would, for I would have lost my self-respect, and I can not afford to be on bad terms with myself."

Deacon Cary muttered something about over-righteousness, but a few months later, when in need of a trustworthy clerk, Ellis was the first one he invited to fill the vacancy. He explained to his partner: "A boy who scorns to cheat a railroad company will be perfectly trustworthy among piles of money."—*Belle V. Chisholm, in S. S. Times.*

WHERE BARBERS WAX FAT.

People Whose Religion Compels Them to Patronize the Knights of the Razor.

The barber trade is one of the most important in Persia. The Koran makes it honorable for a man to wear a beard, but commands the shaving of the head. There are two great sects among those who accept the Mohammedan faith, the Sheas and the Sunnees. The latter are all Turks and they shave the whole crown excepting a tuft in the center by which the archangel may draw them out of the grave.

But the Persians are Sheas, and they shave the center of the head, from the forehead to the neck, leaving a long curl on each side. It is curious to see even little boys with their heads thus polished. The Persians consider it a great disgrace to lose their side curls. As they all wear turbans, or black, conical caps of Astrakhan lambskin, no one would suspect the head to be shaved until the cap is taken off. Then, indeed, the appearance of the head is exceedingly grotesque. It is evident that the care of the hair is a very important question in Persia. But this is not all.

One rarely sees a gray beard or gray locks in Teheran. Even the most venerable men have dark or red hair. The reason is because all, from the highest to the lowest, dye their hair. Even the tails and manes of the horses are sometimes tinged with henna. Those of the royal stables are dyed a beautiful rose color. The use of red for curtains, awnings and umbrellas is forbidden. It is a color reserved in such cases for the palace and the King alone.—*Cor. London News.*

—New Orleans was founded by a company of French adventurers in 1743.

MISCELLANEOUS.

—"No whispering allowed," is one of the rules conspicuously posted up in the school-room at the deaf mute institution, Salem, Ore.

—So high-priced have been peaches for the past two seasons that five hundred new peach orchards have been set out in Delaware within a year.

—An authority on the subject says that a dog show is called a "bench show" because the cage kennels in which dogs are exhibited are located on benches.

—The oldest book in the Congressional Library is said to be "The Olive Leaf," by one Hauser, of Georgia, a tune book concocted "for the glory of God and the good of mankind."

—A recent report on the subject states that machinery intended for the Indian market should be simple in construction and such that if any part be broken it can be mended in any blacksmith shop.

—The new kind of paper on which the New Orleans *Picayune* is printed is called bagasse, the crushed refuse of the stalks of the sugar cane. The paper is fine and soft, with almost a silk-like surface.

—Thirteen State Bureaus of Statistics of Labor are now in existence. The oldest, that of Massachusetts, was established in 1869, Mr. Wright, now at the head of the National Bureau, being still its chief. The Bureau of Pennsylvania, next in age, was established in 1872, Joel B. McCamant being its chief. —*Boston Journal.*

—The Secretary of the London Swimming Club makes the following suggestion: "To bathe before retiring to rest, after the heat and bustle of the day, would be a sure means of inducing sleep—the happy, peaceful sleep of a child that would be an antidote to most of the ills that flesh is heir to, not forgetting lunacy, which is induced by want of sleep.

—Compulsory education works well when it can be enforced. In a Missouri court some time ago an illiterate prisoner was sentenced to jail until he would learn to write; another was sentenced until he could teach the former the art. In less than a month both men were discharged, the one who could not write before being able to write a fair hand.—*St. Louis Post.*

—Rowell is the only one of the famous pedestrians who is rich. He is worth $80,000 and never speculates. Of himself O'Leary said recently: "Six years ago I had $150,000. I began to dabble in stocks, and as a result dropped my bundle, but I never played a card for money in my life or bucked the tiger. I have walked since July 14, 1874, 75,000 miles in matches and exhibitions in this country, England, Ireland and Australia."—*N. Y. Sun.*

—The light of the sun is estimated to equal in quantity 1,575,000,000,000,000,000,000,000,000 candles, the light's intensity at the sun's surface being 190,000 times that of candle flame, 5,300 times that of metal in a Bessemer converter, 141 times that of a calcium light, or 314 that of an electric are. The temperature, according Rosetti, is about 18,000 Fahr. The mechanical equivalent of the solar rdiation, continuously acting, is nearly 10,000 horse-power per square foot of solar surface.

—Living creatures in water seem to have a vegetable origin. Examine pure lake-water or spring-water with a microscope and no life is visible; but put flowers or any vegetable substance in the water and in forty-eight hours the water will swarm with life. Water thus is revealed as the hatching medium for many forms of life. Many beautiful grassplots in cities are ruined by excessive watering. The water hatches out millions of eggs which the dry sun would have killed.—*Chicago Current.*

—A tramp who called at a farm house to ask for a cold bite was almost paralyzed at being welcomed with smiles and kind words and having a fine repast laid out for him. In explanation the woman said that he reminded her of her long-lost cousin. At the next house the tramp at once announced that he was the woman's long-lost brother, but in place of smiles and mince pie the woman seized the broomstick and went for him, saying: "Slide out, you villain! They were all girls in our family!"—*Texas Siftings.*

BURNING A CHURCH.

How it May be Done Cheaply and Expeditiously.

This art has been practiced with eminent success. We have had two very complete examples in the neighborhood of Boston within the last few years, and we burn one church and a half per week, sometimes two, in the United States. This art is very simple. Inside of a stone or brick exterior sham, construct a timber church with a joisted floor, sheathed overhead in the cellar so as to create a certain number of wooden cells, each one connecting with a hollow space between the outer stone sham and the inner wooden structure, built of light timber and fastened to the stone walls by cross-braces of sawed wood, very numerous. Connect these interspaces in the vertical walls not only with the cellular door, but also with a large cavity in the roof between the inch boards of the roof and the false ceiling of the interior wooden structure; then set a furnace of an approved pattern, with a metal air-box near the furnace, but connecting with a wooden air-box in the hollow floor. On the Friday of a very cold week, when "Old Prob" says that "Saturday will be warm," light a very hot fire in the furnace. By Saturday night or Sunday morning the pressure of the cold air of the early part of the week, which had accumulated inside the church, will have circulated *downward* through the furnace, and will have forced the hot air through the wooden air-box in the hollow door to a sufficient extent to set it on fire; the fire will be carried through the wooden cells in the hollow walls to the hollow spaces in the roof in about five minutes, and the first alarm will be given by some one who sees the smoke issuing from the peak of the roof. The whole of the interior structure being protected from water by the stone or brick sham, the destruction of the church will be very certain. This is a customary and very successful method. *Edward Atkinson, in Boston Advertiser.*

AMERICAN HUMOR.

Statistics Showing the Decline of this Peculiar Native Production.

To the casual observer it might appear that American humor was in as flourishing condition as ever; that, notwithstanding the heavy drafts which it has sustained during the last decade, the supply was still abundant, not to say inexhaustible.

But such, alas! is not the fact, as can be conclusively shown by the presentation of statistics carefully prepared, at considerable expense, and which will be given in detail farther on.

The most serious evidence of the decline in our National humor is shown in the paucity of fresh subjects; there having been in the first four months of 1885 but eleven new subjects used in the construction of newspaporial wit, against forty-seven in the corresponding four months of last year; and while several topics which were once under constant treatment have sunk into desuetude and are now no more heard than if they had never been, it is also true that scores of other favorite marks for the shafts of the funny men have shown a gradual falling off in paragraphic favor.

The stove-pipe joke is a notable instance of the former class just alluded to, the class which has utterly disappeared. This mirth-excitant, which in the year 1875 reached the marvelous proportions of 2,764 paragraphs per month, or 33,168 during the entire year, had fallen off in 1884 to 95 per month, or 389 during the first four months of the year, while for the corresponding period of 1885 but 17 cases have been recorded, an average of only 4¼ per month.

A similar, though not so excessive, falling off is shown by many other old stand-bys; notably, the mother-in-law, the cake of soap on the stairs, the oldest Mason, and so forth. But we have the figures handy. Let us consult them.

During the first third of 1884 the mother-in-law formed the subject of 4,987 paragraphs or articles, whereas the corresponding term of the present year can boast of but 215, and 214 of these are essentially repetitions. Goat and the circus poster, 1884, 3,864; 1885, 24. Oldest Mason, 1884, 841; 1885, 53. And here are several more, the first figure indicating the number of times a joke was utilized from January to April, both inclusive, in 1884, and the second figure referring to the number of appearances during the first four months of the present year:

Messenger boy, 4,231, 4,299; oyster, 1774, 797; dude, 5,649, 34; hair in the butter, 1,423, 6 (which, by the way, is six times too many); big hat at the theatre, 1,262, 48; game of poker, 1,812, 135; whisky drinking, 4,831, 3,560; boarding-house hash, 3,112, 124; strong butter, 2,076, 111 (oleomargarine not included); Chicago girl's over-nutrition of pedal extremities, 3,125, 2,008; cake of soap on stairs, 488, 21; coal-hole cover, 976, 43; banana skin, 816, 27; editor and poet, 3,265, 2,003; green apples, 4, 1 (not in season); iceman, 4,981, 2,605; plumber, 9,871, 6,432; picnic, 401, 30 (rush usually comes later); Niagara hackman, 776, 614; bent pin, 7,671, 2,454; umbrella, 7,841, 2,432; watermelon (out of season), 148, 125.

In almost every instance it will be seen that there has been great disparity in the present year's figures as compared with those of the year preceding. The messenger boy, it is true, has very nearly held his own, and no excessively marked falling off is noticed in whisky drinking or the Chicago girl's feet. The wonderful divergence which is shown in the figures relating to the dude is to be explained by the fact that he was a novelty in the paragraphic field last year; but, thank heaven, he is a short-lived creature, as our statistics show, and haply after another year he shall be heard of no more forever.

Jokes on love-making, matrimony, millinery, twins, divorce and kindred accidents, inseparable from one's earthly pilgrimage, hold their time-honored places. They always have been and always will be, world without end; therefore it has not been thought worth while to collect data regarding them. And for other but equally cogent reasons, no notice has been taken of alleged witticisms on deaths by drowning or other adventitious means. Neither has any account been made of poronomasia. Punning is not joking, and a new pun is well-nigh an impossibility.

From our statistics, then, it will be seen that there has been a marked decline in almost every department of American humor; and we have by no means exhausted the evidence which we have at hand. We have only given a few samples of a very large invoice, which we might draw upon almost without limit.

But in this general decline it is pleasant to know that there is one subject at least which has come forward to partially make up for what has been lost. Need we say we refer to the roller skate? During the first four months of 1884 the roller skate was the foundation of but three paragraps; during the corresponding period of 1885 it has furnished the *raison d'etre* of 17,864 witticisms of different lengths and of various quality. Therefore, providing there shall be no increase in the monthly returns (and the probabilites all point in an opposite direction) there will be, during the entire year, 214,368 mirthful allusions to the skating rink set before the readers of American newspapers.

Finally, then, while deploring the decline of American humor in general, let us thank Heaven and take courage, in view of the marvelous possibilities presented by the roller skates, and let us all pray that this last bulwark of our Nation's wit may forever withstand the wear and tear of time and the strain of constant and continual use.—*Boston Transcript.*

—A young man became involved in a difficulty, and in an evil moment accepted a challenge. At the railroad station he said anxiously to the ticket agent: "Did a couple of gentlemen buy tickets for R—— within a short time?" "Yes, sir," said the agent. "They went to the lunch-counter and ordered gunpowder tea and rare roast beef, with plenty of blood gravy, and then bought two tickets to R—— and return." "And return! By thunder!" gasped the young man to his second. "I guess I'd better apologize."—*N. Y. Sun.*

SELF-DEFENSE.

When and How a Man Can Slay Another and Have the Law on His Side.

"Now that the Wepler case is at an end," said a well-known judge to a reporter one day recently, "it would be interesting to show what constitutes the right of self-defense as laid down in the law books. The right of self-defense is founded on the law of nature, and is not superseded by the laws of society. It is a right which every one brings into society, and retains in society, except so far as the laws of society have curtailed it. Every man has a right to defend himself against an attack threatening him with death or serious bodily harm, and his innocence will be presumed until his guilt is established beyond a reasonable doubt. The right is based on necessity, and arises where one manifestly intends and endeavors, by violence or surprise, to commit a known felony on the person, habitation or property of another. It is a defense against a present unlawful attack; as where an assault is made with a deadly weapon, or where one is assaulted in his habitation, or where a forcible felony is attempted. The law of self-defense does not require one, whose life has been threatened, to seek the protection of the law; nor is he obliged first to call on the authorities. The omission to seek protection from the authorities does not deprive him of the protection of the law, or of his rights of self-defense.

"The right of self-defense is not limited to the actual danger threatened. The danger of death or great bodily harm must be either real, or be honestly believed at the time to be imminent and on sufficient grounds. A reasonable apprehension of danger is sufficient; and a reasonable ground for belief that there is a design to destroy life, to rob, or commit a felony; a reasonable and well-grounded belief, a belief arising from appearances that the danger is actual and imminent. Guilt must depend on the circumstances as they appeared to him. Apparent danger is a mixed question of law and fact. A man is justified in acting for his defense according to the circumstances as they appear to him.

"The law of self-defense does not require one whose life has been threatened to leave his house or to secrete himself to avoid his foe. When a person without fault—in a place where he has a right to be—is violently assailed, he may, without retreating, repel force by force, in the reasonable exercise of his right of self-defense. He is not obliged to retreat or go to the wall from an assailant armed with a deadly weapon, and if he is driven to the wall so that he must be killed or sustain great bodily harm, and, therefore, kills his assailant, it is excusable homicide. He is not obliged to retreat, but may pursue until he is out of danger, and may kill to get out of danger; but when the attack is not felonious the rule of law is different.

"A man is not required to do everything in his power to avoid the necessity of slaying his assailant. Where there is no escape, after retreating as far as possible, killing will be justifiable, so where retreat is impossible or perilous, or would increase the danger, or where further retreat is prevented by some impediment, or was as far as the fierceness of the assault permitted. But if the assaulted party is in fault, he is bound to retreat as far as he can safely do so; he is required to decline the combat in good faith, and if he uses all the means in his power to escape, even killing in self-defense is lawful. But if a man seeks to bring on a difficulty and slays his adversary he can not avail himself of the plea of self-defense. That a party has been struck gives him no right to retaliate by an assault.

"An act done from necessity raises no presumption of a criminal intent; but the necessity must be actual, imminent, and apparent, with no other probable or possible means of escape. It must be great, and must arise from imminent peril to life or limb. Men, when threatened with danger, must determine the necessity of resorting to self-defense, and they will not be held responsible for a mistake in the extent of the actual danger, nor be subject to the peril of making that guilty, if appearances prove false, which would be innocent if they proved true. There must be at least an apparent necessity, an actual necessity, or a reasonable belief of such necessity, to ward off some impending harm. Necessity is a defense when the act charged was done to avoid irreparable evil, from which there was no other adequate means of escape, and the remedy was not disproportionate to the threatened evil; and the necessity must not have been created by the fault of him who pleads it, nor be occasioned by him, nor be the result of his own culpability, nor be rashly rushed into; and in cases of assault or intrusion by strangers no more force than is necessary must be used in repelling the assault.

"The right of self-defense does not include the right of retribution. A party assaulted is justified in using such force as is necessary to repel an assailant, but no more, and if unnecessary force is used he becomes the assailant. The degree of force must not exceed the bounds of defense and prevention, and this depends on the circumstances of each case, and the condition of both parties may be considered. A party in possession of property may use force sufficient to protect it. Whether a man is justified in employing in the first instance such means of resistance as will produce death depends on the circumstances and the nature of the attack, and he may not always use a deadly weapon, and it is still further wrong if it is a concealed weapon. But if the taking of life is necessary it will be excusable. It is always excusable when in defense of life, yet it requires a great disparity of size and strength and a very violent attack to excuse the taking of life. A party may use whatever force is necessary to avert the apparent danger, although it may afterward appear that the gun was not loaded, and that there was no real danger."—*Louisville Commercial.*

—According to an exchange dry powdered salt will keep moths out of a carpet. The salt should be sprinkled freely over the carpet, particularly along the edges, then sweep thoroughly. This should be done about once a month in moth time, and there will be no trouble from the destructive insect.

SCHOOL AND CHURCH.

—The smallest salary a pastor in the Presbyterian Church of Australia is permitted to receive is $1,500.

—If compelled to choose between the two, always prefer a good teacher to a fine school-house. — *Chicago Inter Ocean.*

—An uncommon form of strike is the quitting of pastoral work by the lower clergy of Bulgaria. They refuse to hold church services, baptise, or solemnize marriages and burials. Their grievance is the very worldy one of a reduction of wages, which are paid them by the State.

—The rectors and prominent laymen connected with several of the Protestant Episcopal Churches in New York have inaugurated a mission work fashioned after the recent London Mission, which is designed to put the churches in more thorough sympathy with the working people.—*N. Y. Tribune.*

—Speaking of our "Home Heathen" the *Christian Union* says: "The population has been growing, and the church accommodations have been diminishing. In the city of New York, in 1840, one church to every 1,800; in 1880, one church to every 2,400. In the city of Chicago, in 1840, one church to every 747; in 1880, one church to every 2,000. These figures show that the darkness is gaining on the daylight in these two great cities. This is also true in Cincinnati and St. Louis."

—The Maryland Annual Conference of the Methodist Protestant Church held at Alexandria, Va., reports total number of members, 15,149, being an increase of 224; received 1,571, an increase of 377; parsonages, 61; churches, 230; value of church property, $794,398; church indebtedness, $28,107, or $3,363 less than last year. Number of Sunday-schools, 194; teachers and scholars, 17,974; volumes in library, 29,250; conversions in Sabbath-schools, 763, a gain of 321 over last year.

—The London School Board, by a vote of thirty-one to four, adopted a resolution providing that teachers should not require home-study of pupils who are in a delicate state of health or whose parents object thereto. Several steps have recently been taken by the English educational authorities toward making the school-life of children less arduous. Such expressions of public opinion as have been obtained indicate a general disposition on the part of parents in favor of less hours and less work for the children.

—A minister well known by name throughout the land, who has one of the best equipped houses of worship, was showing a friend, not long since, through its various rooms, when they came to the kitchen, which was connected by a speaking tube to the pastor's study. On the wall was printed in large letters: "The Lord will provide," while in smaller letters on the same wall near the mouthpiece of the tube was the direction: "Blow and wait for an answer." The visitor naturally asked if the two inscriptions had any particular connection with one another; and it is hardly necessary to say that a change was soon made in the lettering. —*Congregationalist.*

PUNGENT PARAGRAPHS.

—An Arcola woman set a speckled hen on a dried-apple pie, and in three weeks the hen hatched fourteen night-mares with blue ribbons on their tails. —*Newman Independent.*

—A young lady writes: "How should a young man kiss me?" If that young lady possesses as little beauty as she does sense she will in all probability remain ignorant till death.—*Boston Post.*

—Inquiring youngster: "Uncle, why do the hippopotamuses always have their mouths open in the show-bills?" Uncle (with malicious equivoke): "To take in the public, my boy; now go and play."—*Exchange.*

—"What's the matter?" called a mother, turning to her little boy, who "set up" a howl. "What are you crying about?" "I want something." "What do you want?" "I have forgot what it is, an' that's what makes me cry."—*Arkansaw Traveler.*

—A "Perfect Bore."—

Now doth the little dudelet
Unto his tailor strut,
And order suit of "corkscrew"
Of the very latest cut;
And there is no material
Could suit his nature more,
The slim ethereal creature
Is such a "perfect bore."
—*Norristown Herald.*

—"Whew!" exclaimed Crimsonbeak, surprised on entering his sleeping-apartment to find his wife waiting for him the other morning at two o'clock, "those stairs almost take my breath away." "Well, I wish they would," replied his displeased wife, catching the odor of the club-man's evening beverage.—*Yonkers Statesman.*

—Children have funny ways of expressing themselves. Johnnie, who was born and raised in the city, went up to Portsmouth, a nice little town on the Ohio, not long ago, and when he came home he had much to tell. "By the way, Johnnie," asked his father, "is Portsmouth as big as Cincinnati?" "Well, no, papa, I guess not. That is, there ain't nearly so many houses, but there's ever so much more world."—*Merchant Traveler.*

—"When your father and your mother forsake you, Johnny, do you know who will take you up?" "Yes, sir," said he. "And who?" said the friend. "The police," was Johnny's answer. Parents will do well to consider the truth there is in this reply. The parent who is too much engaged, or too selfish, to look after the training of his child, need not be surprised to see the child come to serious harm.—*Toledo Blade.*

Familiar With the Tools.

Chicago Editor—"I very much fear, madam, that I can not give you a place on our staff. We have never employed lady writers."

Fair Applicant—"But I am sure I can give satisfaction. I will not require any assistance except to sharpen my lead pencil."

Chicago Editor—"Well, as to that we seldom use any pencils. All our articles are——"

Fair Applicant—"Oh, then it is all right, I used to be a tailoress, and am an adept with the shears."—*Philadelphia Call.*

SATURDAY, JUNE 13, 1885.

People may doubt or disbelieve what we say, but they will believe what we do.

In this week's issue of our paper we publish the levy list for 1885. This is a matter in which every tax payer is interested and which furnishes matter for reflection and thought for all who are interested in or concerned about the management of county affairs. The present board of county commissioners is the first in the history of Garrett county in which the majority were Democratic, and it will be well for the calm and dispassionate reader to remember that the present board was elected on the idea that retrenchment and reform were necessary. We take it for granted, too, that the people have not forgotten the many promises of reform made by the Democrats of this county, and by the present board of commissioners particularly and especially. Now that the last levy of the present board has been made and its administration practically ended, the people can examine the two levies made by the present commissioners and see whether their promises have been made good or not. We suppose the commissioners will claim that they have made a material reduction in the taxes. That the present levy is less than the levy of last year we grant, but when we add the two levies made by this board we find they aggregate $2.90, or an average of $1.45 per year. This is the highest tax rate for any two years in the history of the county. The highest aggregate for any two years under a majority of Republican commissioners was $2.55, and of the only two years where we had a full Republican board $2.13½. The highest tax rate in any year under a majority of Republicans is less than the present levy, which is the lowest under a majority of Democrats. When we undertake to account for the high rate under the present board we do not find that it levied more money for public schools and county roads than is usually levied. Whilst it is a notable fact that the estimate for jurors and State witnesses is far below the needs of the county, and before the next May Term is over the next board of commissioners will have to borrow $800 or $1,000, and perhaps more, to meet a deficiency in this particular. With past experience to guide them it seems to us a stupid piece of folly to levy so far below the required sum for this purpose.

Pursuing the same line the basis of taxation has been increased, we are told, something over $140,000. This if we are not sadly mistaken, is merely an increase *upon paper*, without any substantial increase in fact, and will return to be provided for by the next board in the shape of insolvencies.

We do not propose to make any comments upon this matter now. We content ourself with a simple statement of facts and leave our readers to draw their own conclusions. The matters to which we have refered are all of record and can be easily verified if anybody has a doubt in the premises.

Comparatively few people understand propagating fish or have any definite idea of the profit to be derived therefrom. There is no better place anywhere for cultivating carp than in the vicinity of Oakland, and when we consider the small cost attending the construction of a proper pond as compared with the enormous profits of such an enterprise, it is a matter of surprise that some of our people do not make an effort in this direction. Mr. Edwin H. Reynolds, of Cecil county, has a small carp pond from which he sold last year $223.00 worth of fish and his stock is much larger now than it was before he made the sale. He feeds the fish on canned corn, and says it is much more profitable than feeding the corn to hogs. The experiment is worth a trial.

In some parts of Northern New York the farmers are getting on slowly with the season's work on account of a disease among their horses. The vets attribute the malady to the sudden change to warm weather from a long, hard winter—a kind of spring fever.

State of Trade.

NEW YORK, June 8.—*Bradstreet's Journal* in its commercial summary says: The past week shows an increased depression in general trade. The stoppage of the iron mills at the best can not fail to act as a further drag of trade. The volume of merchandise moved is not large. The demand for fall goods is below anticipations, and in transportation circles freight rates are lower than ever, From Chicago to New York 10 cents per 100 pounds for grain represents a loss. Lake freights are as low as ever before, and yet tonnage and cars lie idle. The demand for produce does not exist eyen at the very low cost of delivery, The banks at Eastern and Western centres continue to accumulate funds. Interest rates at the interior are lower than ever before, and in still other ways there are evidences of accumulating idle commercial machinery.

The dry goods market is noticeably dull, and jobbers do not expect any improvement during the month. At Boston the volume of dry goods staple lines which has been disposed of during the past season is said to be of fair proportions, but there is much complaint as to prices realized. The inference is made that the discounts to the trade exceed the rates commonly reported. The corn crop in the Mississippi and Missouri valleys has all been planted. The Michigan wheat crop promises to equal the heaviest yield in that State. The spring wheat crop is progressing finely, and is up six or eight inches, with favoring conditions. The Pacific coast wheat crop now promises to be about 12,000,000 bushels short of 1884. There is no reported improvement in the prospect for wheat in Illinois, Indiana or Ohio.

BOSTON, June 6,—The *Advertiser* in its weekly review of the wool trade says: The market is in its usual between season condition of dullness, when the country becomes almost of greater importance than the city. Prices remain here with no quotable change, but any pressure to sell would necessarily have to be accompanied by concessions, Holders are, however, firm, as they can day by day see more clearly that their supplies cannot be replaced by fresh purchases in the country, except at an advance upon the present selling prices. Old wool, too, has always a preference over new, but selections are of course now much broken, the best wools having generally all been sold earlier in the season. New wools upon the market will bring as much this week as last. Some new Ohio fleece has been received, and some little combing and delaine is included in the sales of "unclassified" at 33a35 c. We hear of no sales of X and XX, but a fair price would be 30a33c. Fat sheep's wool continues to arrive and is selling at 18a20c. for fine and 22a24c. for medium clothing and combing.

Villages Swallowed Up.

CALCUTTA, June 8.—Dispatches continue to be received here about the earthquake in the vale of Cashmere. Whole villages have been destroyed. Dubgood, Janalapar and Ivan have disappeared entirely, having been completely engulfed in the awful convulsions.

The fort at Gurais and the granaries in many parts of the Vale have been swallowed up. A large supply of rice and a considerable amount of money have been distributed throughout the Vale of Cashmere to relieve the distress of the people. It is estimated that over 200 persons were killed.

Wonders in Telegraphy.

PHILADELPHIA, June 8.—An exceedingly interesting exhibition of an entirely new system of telegraphy, that bids fair to at least measurably revolutionize telegraphic and telephonic service, was given here to-day. There were present by invitation a number of New York and Philadelphia capitalists, electricians and representatives of the press. The tests were highly successful. The most marvelous thing about the contrivance is the fact that a single ordinary telegraphic wire conveys the electric current and operates the receiving machine. In appearance the sending machine is very much like an ordinary type-writer. The instrument has forty-two keys—the letters of the alphabet, the numerals and a few punctuation marks—and every letter or sign struck by the sending apparatus was instantly shown both upon that instrument and the receiver. Pressure upon any key caused a certain number of magnetic impulses to pass through the line. The number of these impulses differs for each letter, and they bring corresponding letters on the type wheel of the receiving instrument into such a position as to make the impression on a piece of paper. Any person who can read can transmit and receive messages through it as correctly as could the most experienced expert using the Morse instrument. It is as rapid as it is accurate, and all messages by it being automatically printed, both at the point of transmission and that of reception, they can be received with safety and reliability in the absence, as well as in the presence, of the recipient. The recording of messages at both points precludes all questions of errors in transmission. It cannot be read by sound, and is consequently the only method for preserving privacy in electrial communications. It is at once a stock indicator, telephone and type-printing telegraph. The inventor was Mr. George M. Hathaway, but Mr. Linville has done much to make the contrivance practical. The company controlling this system, which is known as the Hathaway-Linville, has already sold at large sums territorial rights for Ohio, Western Pennsylvania, Virginia, Missouri and Mexico, and is in negotiation for other large territory. A company in London has contracted to pay $1,250,000 for the right of Great Britain upon delivery of two working commercial instruments in London. Over five thousand machines are now ordered. The parent company is not selling stock.

The Age of Steel.

Steel threatens to displace iron for nearly all the multitudinous purposes to which the latter is now applied. New processes have been invented for its manufacture, following the grand idea of Bessemer, the inventor of the process of producing cast-steel directly from pig-iron as the latter leaves the furnace in which it has been reduced from the original ore, and now it can be produced as cheaply as malleable iron. By some of the most recent improved processes, pig-iron can be converted into a goop quality of steel at a cost of only $3 to $4 per ton. Steel is far more valuable than malleable iron on account of its much greater strength—a steel rod being able to stand as great a strain as a rod of malleable iron of five times its diameter, and also because of the greater durability of steel.

The greater value of steel for use as compared with iron, and the cheapness with which it can be produced, has begun a revolution in the great iron mills of the country. The manufacturers are introducing such changes in their plants as will allow them to produce steel instead of malleable iron. Iron rails for railways are being abandoned as fast as they wear out, and they are being replaced by steel. The latter material is taking the place of iron in the construction of vessels, steam boilers, and in fact for all the uses to which the latter metal can be put. The Chicago *Journal* gives the following instances of changes from an iron to a steel plant in several large iron works:

In Wheeling, W. Va., seven nail factories will be so altered as to manufacture steel instead of iron nails. In the Calumet Iron and Steel Works such machinery is to be added as may be required for rolling steel to be made up into nails, the steel nails heretofore produced at these works having been made of rolled steel purchased elsewhere for the purpose. Similar changes are being made, or have been made, at large establishments in the East and West. It is reported that the North Chicago mills will receive the necessary changes of machinery for making steel beams, channels and other heavy building materials heretofore constituted of iron.

"The colored people have nearly 1,000,000 children in school; publish over eighty newspapers; furnish nearly 16,000 school teachers; about 15,000 students in the high schools and colleges; about 2,000,000 members in the Methodist and Baptist churches; own 680,000 acres of land in Georgia alone, and over 5,000,000 in the whole South; the increase in the production of cotton since emancipation has been 1,000,000 bales per year, or one-third more than that raised when working under the lash; and had deposited in the fraudulent Freedmen's Bank, $56,000,000; besides, colored men have engineered and nearly completed a railroad in North Carolina, and they are assessed $91,000,000 of taxable property."—*Pro. W. H. Crogman, (colored,) Clark University.*

It is evident that the President is meeting with the same sort of embarrassment in his efforts to be good that interfered with the pious desires of the citizen of Arkansas who said to the minister: "I guess I'll have to give it up; every time I think I've got my religion solid, somethin' turns up that jest makes me cuss, and I can't help it."—*St. Louis Globe-Democrat (Rep.).*

Judging the policy of the administration by its appointments to office, voting or speaking for the Republican party was "offensive partizanship," but services in the Rebellion and seeking to destroy the government was partizanship of the right stamp neither offensive nor discreditable and deserving honorable recognition.—*Frederick Examiner.*

ANNUAL LEVY, 1885.

Annual Levy List for Garrett County, Md., for the year 1885, *Levied by the County Commissioners, at June Session,* 1885.

The State tax is fixed by law at 18¾ cents on each $100 assessable property, which, added to the $1.12½ for county purposes, makes the sum of $1.31¼ on each $100 of assessable property in Garrett county for the year 1885.

Basis for State tax	$3,754,991 00
At 18¾	$ 7,040 60

G. W. MERRILL,
Clerk to Commissioners.

LOCAL NEWS.

LODGE MEETINGS.

OAKLAND LODGE, I. O. G. T., meets in Sturgiss' Hall every Tuesday night.

LOCAL BRANCH, No. 85, of the Iron Hall, meets in same Hall 1st and 3d Saturday nights of each month.

ALTA LODGE, No. 574, K. of H., meets in same Hall 2d and 4th Thursday nights of each month.

SHEALTIEL LODGE, No. 122, I. O. O. F., meets in Legge's Hall every Monday night.

PATMOS COUNCIL, No. 386, A. L. of H., meets in same Hall 2d and 4th Friday nights of each month.

—Toys and fancy goods at Cheap John's.

—The Glades Hotel has already a number of summer guests.

—General Paine, of Washington, has rented the "Oaks" for the season.

—Soda water tickets good for 12 glasses 40 cents, at Cheap John's.

—The new depot building here will be ready for occupancy next week.

—The family of Maj. N. S. Hill occupy the large Perry cottage near Oakland.

—There will be a pic-nic held at Swanton, on Saturday, July 4th. All are invited to come.

—Birch and ginger beer 3 bottles for 10 cents, or 35 cents per dozen, at Cheap John's. Pop same price.

—We had light frosts here Tuesday and Wednesday mornings, but there was no peaceptible damage to vegetation.

—Mr. P. Hamill returned home last week from Knoxville, Tenn., where he had been attending school during the past winter.

—Mr. Wm. D. Nydegger has purchased a handsome soda fountain, and can now supply the thirsty with the purest and coldest soda water.

—Married, at the residence of Frank Nethkin, on the 7th inst., by Rev. Wm. E. George, George W. Smith and Mary E. Durst, both of this county.

—Bring in your buggies and wagons and have them repainted. Shop over Naylor & Richardson's wagon shop, Z. F. MALONE.
6 6 4t. Carriage Painter.

—Attention is called to the card of Dr. Casteel. The Doctor is a graduate of one of the foremost medical colleges in the United States, and is a young man well and favorably known in this community.

—Mr. James Lakin will occupy his new room on Railroad street next week, with a much larger stock than heretofore. His old customers and the public generally are cordially invited to call and inspect his stock.

—Mr. John Sincell has now on hand, in his new building near the depot, a full line of confectionas, fruits, nuts, tobaccos, &c. He is also conducting an ice cream parlor, where customers may be supplied either by the plate or in any quantity.

—There will be another pic-nic at McHenry near the Celebrated Boiling Spring, on July 4th, 1885. All wishing first-class amusement are cordially invited to attend. Refreshments will be on the ground. By order of committee.

—Died, at his residence near Frederick City, Md., May 30th, 1885, Wm. H. Howard, aged about 45 years. Deceased was the last male representative of that branch of this noted family. He was a brother of Mrs. Col. Veitch, of Oakland, who attended his funeral.

—Children's Day service will be held in the M. E. Church, in Oakland on next Sunday, at 10:30 A. M. The church will be appropriately decorated and among the varied exercises addresses will be deliver by Miss Adelaid Sherman, and perhaps by Miss Jennie Smith. A similar service will be held at the Park at 3 P. M. All are invited to attend.

—There are at least four persons, (not druggists), in Oakland who are suspected of selling liquor in violation of law. If there be any foundation for the suspicion refered to, a word of warning may not be out of place. There is a well grounded determination on the part of the people of Oakland who aided in securing the passage of the local option law to see that it is enforced and to secure the conviction and punishment of those who willfully violate its provisions.

—It seems to us that such a plain provision of law as that which requires the corporation authorities to make a statement of the receipt and disbursements and of the financial condtion of the corporation, ought to be complied with. Can it be that the Burgess and Commissioners regard themselves as the masters of the people instead of public servants? We hardly think so, and yet it does look as if there is a disposition on the part of some of the members to substitute their will for the law, in the premises. We are told that some of the members are urging that this statement be made and that all obstructed streets and alleys be opened. We hope there are enough lawabiding citizens in the board to see that the law is enforced. It has been asserted by some tax payers that claims against the corporation have been bought up at a heavy discount and that the corporation is heavily in debt. Let us have a full, fair and impartial statement.

—There will be special re-opening and communion services at the Forks Lutheran church, on next Lord's day morning, (June 14,) at 10 o'clock. Rev. J. J. Young, of Richmond, Indiana, former pastor here, will be present to preach, both on Saturday evening and at the re-opening. All who may desire to come, are kindly invited to attend these services.

J. B. SHOUP.
Pastor.

Church Services--Sunday.

M. E. Church—Preaching at 8 P. M. by Rev. M. W. Rider.

Presbyterian Church—Preaching at 8 P. M. by Rev. John S. Foulk.

Lutheran Church—Preaching at 10½ A. M. and 8 P. M. by Rev. C. W. Sechrist.

Preaching at Deer Park, by Rev. C. W. Sechrist, at 2½ P. M.

St. Peter's, Catholic— Preaching every Sunday at 10½ o'clock A. M., except the second Sunday of each month.

Dentistry.

Dr. P. P. Ritter will visit Accident, Md., June 23d, and remain a few days. Persons wishing work done should call early and make arrangements, as his time is limited.

Notice!

All persons knowing themselves indebted to me will please call and settle by cash or note. All claims not settled by the 1st of June next will be given out for collection.

H. A. RASCHE.

For Sale Cheap.

Lafayette T. Friend and wife to Elizabeth Friend, conveys part of a tract of land called "Deer Park" containing 10 acres; $1.

Elizabeth Friend and husband to Lafayette T. Friend, conveys parts of military lots 1133 and 1135, containing 52 acres; $120.

Catharine A. and Sarah A. Augustine to Matthias Frazee, conveys a tract of land on Frazee's ridge, containing 98¾ acres, also a tract called "Simkins Discovery" containing 10 acres, and also part of a tract being a vacancy, containing 15 acres; $3,000.

Matthias Frazee and wife to Lott Frazee, conveys part of military lot 2860, containing 41 acres more or less, also military lots 2937 and 2838, containing 100 acres; $2,000.

Ernest W. Cecil and wife to E. D. McClenahan, conveys military lot No. 1289; $525.

Joseph R. Anderson and wife to A. J. Roads, conveys two pieces of a tract of land called "Republic" containing 59 acres; $180.

Geo. Schlossnagle to Mary Schlossnagle, conveys part of a tract of land called "Fike's Venture," containing 120 acres, excepting 80 acres heretofore sold to Catharine Gies, and 31 acres and 132 perches sold to Michael Harden.

Joseph Buckel to James W. Beeghley, conveys 53¾ acres, $690.

Mahlon Glotfelty and wife to Fannie E. Callis, conveys a piece of land called "The Prize," containing 50 acres; $345.

Robert M. Porter to George T. Porter, conveys military lots 923 and 925; $25.

Joseph B. Davis and wife to John M. Davis, conveys lot in Oakland; $1.000

S. L. Townshend and wife to Eleanor J. Davis, conveys their interest in and to a piece of land near Oakland containing 20 acres; $50 and other considerations.

Valentine Kahl and wife to Elizabeth Kahl, conveys part of military lot 3343, containing 12 acres; $155.

Daniel Harshberger to H. Zehner, conveys part of a tract called "Hard Struggle," containing 149½ acres; $1,000.

Elias Weitzell and wife to George W. Blocher, conveys military lots 685 and 779; $300.

Samuel Johnson and others to Peter Donius, conveys military lot No. 511, excepting certain timber therefrom, and minerals underlying the same; $250.

Samuel Johnson and others to Wm. Brown, conveys military lot No. 581, excepting certain saw timber therefrom; $350.

Thomas Wilburn to Sarah E. Wilburn, conveys military lot No. 1834; $250.

Nathaniel Slicer and wife to James H. Bevans, conveys a tract of land adjoining the town of Grantsville, called "Cornucopia," containing 116½ acres, excepting 13 acres sold to Henry Winterberg, 2 acres sold to Samuel Ringler, and a piece for a cemetery: $5,000.

John Markley and wife to Elijah Meyers and Isaac Turney, conveys by way of correction their undivided one-third interest in and to military lots 2872, 2873 and 2874; $1, and other considerations.

H. G. Davis and wife and others to Thomas Skipper, conveys 102¾ acres of land, reserving all suitable saw timber; $511,25.

Joseph R. Anderson and wife to George S. Lee, conveys part of a tract of land called "Republic," containing 50 acres; $650.

Jacob Pysell and wife to Truman Pysell, conveys a piece of land containing 178 acres more or less, excepting therefrom a piece heretofore sold and conveyed to Elizabeth Alexander by Truman West and wife; $5,500.

James A. Fullerton and wife to John C. Bardall, conveys lot No. 73 on the plat of Mt. Lake Park; $525.

C. F. Glotfelty and wife and others to Adrian Glotfelty, conveys one piece of land called "Piney Bottom," and another piece called "Bucks Dale," containing for both pieces 464 acres; $5,000.

Brison Welch and wife to John Spoerline, conveys a piece of land containing 50 acres; $750.

Deer Park.

Deer Park is rapidly adding to the number of residents, Mr. T. Harrison Garrett and family arrived last Sunday.

Mr. J. W. Williams' family will be here to-morrow. Mr. Williams was here last Saturday to determine the site of his cottage, and work has commenced on it.

Mr. G. W. Haulenbecks family came last week from Baltimore to spend the summer at the cottage formerly occupied by Mr. R. J. Head.

Miss May Davis came from Piedmont on Tuesday, to her mother's summer residence. Mrs. W. R. Davis will return on Saturday with her other daughters, Misses Mattie and Katie Davis, after attending commencement exercises at Poolsville, Md., where Miss Katie will graduate on the 12th.

Master Joe Davis is the centre of attraction to the boys in town, as the owner and driver of a pair of goats, in a little wagon.

Mrs. H. G. Davis came Monday, having just recovered from a long illness.

Mr. Bugher, of Cincinuati, will occupy the cottage in which Gen. Beale resided last summer. His family will be here about the 20th inst.

The Civil engineers of the country will hold their convention in Deer Park this summer, commencing about the 25th. About 500 are expected.

The Band of Hope met last Saturday evening. The house was crowded, and much interest manifested. A vacancy in the programme committee caused by the resignation of Mrs. C. H. Tillson, was filled by the election of Miss Katie Davis.

Miss Ellen Hoye returned last Saturday from her visit to Alexandria.

Mr. E. F. Droege has just returned from a visit to Baltimore.

Harry, a little son of Mr. R. J. Head, fell from a fence one day last week, and dislocated some bones in his arm and shoulder. He was attended by Dr. Laughlin and is now doing nicely.

Mr. J. H. Rafter, agent for Chase & Co's Nurseries in Geneva, N. Y., is making a very successful canvass of our district for the sale of fruit trees and shrubbery.

Registered at Wing-and-Wing:
Baltimore, Md.—H. F. Killen, B. Friel, A. Bowersock, Jr., R. L. Simpson, Geo. C. J. Fleck.

Blaine, W. Va.—J. H. Rafter.
Mountain Lake Park—E. C. Gibson. ***

Mountain Lake Park.

A cold wave struck us last (Monday) evening from the northwest, which will slightly check the rapid growth of vegetation. A slight frost was reported near here, but nothing appears to be injured here.

Mr. and Mrs. Hank are here for a few days to recover health and strength.

Posting signs any where in the Park is a direct violation of one of the rules. Parties desiring to advertise here will leave their handbills at the cottages and not post them up.

No stock will be allowed to run at large on the grounds, either day or night.

The addition to the Sharps and Richardson cottages are completed.

Rev. J. M. Davis is having his building weather-boarded.

The frame of G. A. Shirer's building is now up ready for the weather-boarding.

Work was commenced this morning on Mr. M. E. Howe's cottage.

Mr. D. M. Dickson is again at his place with Mr. Garthright.

Rev. N. L. Baumgardner is here furnishing his cottage. J. A. E.

Special Attention.

In the various departments of our business we endeavor to meet the popular demand for new goods and low prices. We have a large variety in ladies' and children's hats and bonnets, both trimmed and untrimmed. We also have a complete line of trimmings, flowers, feathers, plumes and pompons, silver and gilt laces, ribbon scarfs and other novelties. Good assortment of ladies' cotton, lisle thread, silk and kid gloves, all colors and latest styles. Satin and silk coaching parasols, of latest styles and lowest prices. Our shoes are from the best manufacturers. We guarantee every pair as represented and as low as the same quality can be bought anywhere. Orders by mail or otherwise promptly attended to.

Guides for Ghosts.

The Chinese hill tribes believe that man has only three souls, and these are most satisfactorily disposed of. One appropriately and conveniently remains in the grave, another takes up his position at the ancestral board, and the third roams about unrestrained in the spirit world, and not necessarily upon earth. Many of the women are fond, as in India, of giving their dead child a dog, or—by dint of prayers and supplications—the departed soul of an old and experienced person, as a guide, that the infant wanderer may not miss its way on the path to the spirit world. For this reason it was that the Mongolians sent slaves to accompany their dead princes. The Chinese, however, have a more humane idea. They believe that, since it is likely that the dead man will be unable to find his way safely to the world of spirits, and may as probably as not stray from the right path, the kings of the underworld would furnish him with a little devil to act the part of a guide and servant to the newly disembodied spirit on its journey. The Poles used to have a notion of a similar kind, though they, like the Chinese, did not display it in such an unpleasant way for survivors. It was their custom to lay bears' claws in the grave, to serve the dead man as hooks, with the help of which he might climb the great glass mountain. According to the common notion among the Karenns, the dead renew as "plu-ph in the world of Pju, under sovereignty of the great King Kootay, or Theedo, the occupations which they had followed while as yet mortals upon earth—a curious hint at the caste system of the Hindoos, which has no place with the Karenns while they are alive.

A Yankee, who never told a lie, used to relate this: He was standing one day beside a frog-pond, and saw a large garter-snake make an attempt on an enormous bull-frog. The snake seized one of the frog's hind legs, and the frog, to be on a par with his shakeship, caught him by the tail, and both commenced swallowing one another, and continued this performance till nothing was left of either of them.

Baltimore Live Stock Market.

[From Baltimore American.]
MONDAY, June 8, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5¼@6c. that generally rated first quality 5@5¾ cts; medium or good fair quality 4½@5 cts; ordinary thin steers, oxen and cows 3½@4½ cts; extreme range of prices 3½@6 cts; most of the sales were from 5@5¾.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 853 head, against 1,140 last week and 1,579 head the corresponding week of last year, and the sales were 645 head, against 840 last week, and 923 head the corresponding week of last year.

The market generally reported as stronger than last week. A few dealers reported a slight advance, but, considering the generally improved quality of the offerings over those of last week, the market may be reported as "strong as last week's values"—an advance of a shade possibly being established for the medium and common grades. Prices 3½@6c. with few at the first figure, and a fair number at the latter price. Most sales 5@5¾c.

THE SWINE MARKET.

The offerings scarcely equal in quality those of last week, for, though some of the dealers report their receipts as equally as good in grade as their offerings last week, numbers report a falling off in that regard. Prices are quoted fully up to last week's figures, and range from 5 to 6c. with a few extra a shade higher; most sales from 5¾ to 6c. Same time last year 6½@7¾c.—a few extra only at the latter figure.

THE SHEEP MARKET.

There is a slight increase in the numbers of the receipts over last week's offerings, with the quality generally as it was then. Owing to a fair outside demand and the wants of our home dealers, trade was fairly active in all the yards, and the best stock was generally sold out at an early hour. We quote sheep at 2@4¾c., few selling at either extreme; lambs 5@8 gross. Same time last year sold at 3@5¼c., and lambs at 5@6¾ gross.

Dissolution of Co-partnership.

EGLON, W. VA., June 1, 1885.

The co-partnership heretofore existing between Julius Scherr and George Giessman, under firm name of Julius Scherr & Co., is this day dissolved by mutual consent, George Giessman retiring.

JULIUS SCHERR,
GEORGE GIESSMAN.

Having taken entire charge of the Mercantile Business of the late firm of Julius Scherr & Co., at Eglon, W. Va., I will continue to do business at the old stand and shall be pleased to serve my many friends and old customers. I will at all times pay full market price for produce, and guarantee to sell goods at the very lowest prices.

All accounts and notes due the late firms of A. C. Scherr & Co., and Julius Scherr & Co., must be settled as speedily as possible, either by cash or produce, or by note.

To the cash buyer and prompt payer I will say: Call and examine my stock and see prices before purchasing elsewhere. It will be to your interest to buy your goods from me, believing that a "nimble sixpence is better than a slow shilling." Quick sales, prompt payments and small profits.

Very Respectfully Yours,
JULIUS SCHERR.

N. B.—Mr. M. C. Feather will remain with the new firm, and will be pleased to have his many friends call. 6 6 3t.

Estate of Daniel Fichtner, deceased.

JAS. A. HAYDEN, Publisher.

OAKLAND, GARRETT CO., MD.

WHERE IS CONRAD?"

An Incident of the Recent Brooklyn Calamity.

"You will tell me where is Conrad?" said an old man, bent and gray,
While the flames were wildly dancing and the walls were giving way.

"I haf heard some ones was buried underneath the ruins fell:
He was in de topmost story—ach, mein Gott! I love him well!

"I will tell you how you knew him: he had full and laughing eye,
And his face was smooth and smiling—and he was too young to die.

"Hair he had, like clouds at sunset, when anoder day is done;
And I luf him—how I luf him! and he is mine only son.

"Say, Policeman, tell me truly that this young man you did see;
And I all each money gif you, such as I could bring with me.

"Tell me that he anxious acted—that he hunted far and long—
Like as children would be calling for their fader, in a throng.

"Or he wounded was? pray tell me; in the hospital to lie?—
I will just now hasten to him, and I not will let him die!

"Tell me—oh, you must not told me—dead you haf my Conrad see?
Yes, it seems 'bout the und dhat—I did long a soldier be.

"Only—Death, [illegible] ar him when we hear the bull's not fe[illegible]
But to haf my boy and[illegible]ed this[illegible]s way is a rather different thing.

"Only—that his poor old mudder—she waits home all full of fear.
And I can not there be going, till I take good news from here!

"Young he was when we did bring him from the Rhine land here to be;
I did lif for her and Conrad—she did lif for him and me.

"Other ones we bring not with us; Gott, He say: 'These more be mine;'
And we left them all a-sleeping 'mong the vineyards of the Rhine.

"He haf not a cross word gif us—he haf love us, every day;
And if he to-night comes home not, 'tis the first night he's away.

"Let me to that fire, Policeman! I care what for walls or brand?
May be he in there be living—reaching for his father's hand!

"Let me there, I say, Policeman! I haf work there to be done!
Let go me, or I will strike you! Is it that you haf no son?"

* * * * * * *

Still the flames were like a furnace, and the walls were crashing loud,
And the old man, held in safety, fainted 'mid the trembling crowd.

And the mother watched and wondered, with her great eyes scarcely wet;
And, half-dazed amid her sorrow, waits for Conrad even yet.

—*Will Carleton, in N. Y. Graphic.*

AN OCCULT SCIENCE.

Story of the Most Eventful Year of My Life.

It was dear old Aunt Judith who first instigated me to attempt an account of one year of my life, which, though it contained more uncertainty, more thought and more unhappiness than any other, is nevertheless that for which I have always been most thankful, and to which I am fondest of looking back.

I was engaged to Ernest Crofts, and had been so for six months. We were to be married in the summer, by which time Ernest assured my father that he would have a sufficient competency upon which to marry. I then thought I was very fond of him; probably in a way I was. I admired him; he was better-looking, and had a more distinguished air than any one in the village. Even young Walter Fardyce, who was articled to old Mr. Welsh, fell into the background on occasions when Ernest came down for a day or two; and it was not without pride that I noticed the unmistakable looks of admiration cast upon him as he walked up the aisle of the church on Sunday, and reflected that it was just to see *me* that he had torn himself away from the many attractions of London, and come to spend his Sunday in quiet Stokebourne. Ernest was "in the city." He had to sit in an office a great part of the day; but he assured me that his work was very different from what it had been. He was in a much better position than formerly: held a responsible and trusted post, and had the management of considerable sums of money.

That was about all that I knew of him. My father had made all necessary inquiries when we were first engaged, and my duty was not so much to inquire how he obtained his income, as to study the way in which I was to manage it best.

There was considerable excitement in the village that winter. Old Dr. Williams had died at Christmas, and everybody was naturally much exercised about his successor. We had heard vague rumors concerning Dr. Browne, who, it was stated, had made all necessary arrangements about the purchase of the practice. It was quite certain that a stranger had been down to see old Mrs. Williams, and Walter Fardyce had put on a very knowing and mysterious look when questioned about him. From all accounts Dr. Browne was a wonderful man; had been abroad a great deal. Some said in India, others were sure it was California, and deaf old Miss Sedgewick, who somehow or other always managed to hear most things, assured me it was Egypt. Walter Fardyce committed himself to the statement that he was leaving a good practice in London, in order to obtain greater leisure for his scientific studies than was possible in the metropolis. I wondered at this, for, from all I had heard from Ernest, it seemed to to me that no place could be so desirable for a residence as London. In comparison with it Stokebourne was a mere desert.

I remember well the first time I spoke to Dr. Browne. There was a party at the Welshes', and Earnest was present. He had certainly made a great favor of it, for he hated these "rustic festivities," as he was pleased to call them, but supposed it would be as well to accept sometimes. Besides, I had begged him to come.

I suppose the Stokebourne parties were very dull; Ernest said so; but I had never been to any others, and felt that I was no competent judge. There was a bagatelle board in the hall at Mr. Welsh's, and some of the younger guests generally amused themselves there. Ernest despised it, but that was no wonder, for in London he was in the habit of playing billiards. In the drawing-room four of the elders played whist, and a round game of cards was organized at the large table. In addition to this there was a piano in the room, and one after another, everybody with the least pretensions to musical ability, was called upon to do his or her little utmost for the entertainment of the assembly. I never quite saw why, for nobody listened, and with the exception of the whist players, who undoubtedly hated the music, everybody talked.

Dr. Browne arrive late. He had been called out to a patient and detained longer then he had expected to be, and there was quite a flutter when he made his appearance. I had just been singing, with Ernest to turn over for me, and we were standing in the hall watching the balls running round the end of the board, instead of going into the nine hole as the player wished. The doctor was not handsome, certainly. I glanced at Ernest as I made this mental comment, and the sight of his features strengthened my opinion. But handsome or not, I felt sure that not even my lover could have been more self-possessed on entering the room, or made his apologies to Mrs. Welsh in better turned sentences.

The game of bagatelle came to an end. Dr. Browne expressed his willingness to do anything that was desired of him, and I soon found that I was to play on one side with Ernest, against Annie Welsh and the new-comer. Was he young or old? That was a question difficult to decide. I had heard Miss Sedgewick speak of him as "our young doctor," but that was probably in comparison with Dr. Williams, who had died at the age of seventy. Walter Fardyce jocularly spoke of him as "old Browne," and I could see that his forehead was wrinkled and that he was slightly bald. He did not talk much at first, but seemed to be noticing everything around him with an amused smile on his face. There was, however, one thing that struck me, and that was that whenever Ernest placed his hand on the edge of the board, or on the back of a chair, he always gazed at it intently, and then slightly frowned, as if dissatisfied with something. I had always thought Ernest's hands rather nice; they were whiter and softer than most men's. I heard Dr. Browne ask Annie Welsh who he was, and soon after we went in to supper, changing partners at Annie's suggestion.

I wore mittens. The doctor observed it, and soon I became aware that he was endeavoring to make me remove them. He suggested that the knife and fork might injure them; also that the room was hot, and that I should be more comfortable without them. This troubled me; I preferred to keep my mittens on, and found myself hiding my hands in my lap as much as I could. He managed to get Ernest to pass him a good many things, and scrutinized his hands carefully as he did so. I was glad when supper was over and I escaped to the drawing-room. The doctor's earnest investigations oppressed me. But there was no getting very far away from him; he followed me, and I saw his face light up as he noticed the piano.

"You sing, Miss Fox, I am sure," he said. "Will you not give us the pleasure?"

"I have brought only two songs," I stammered, "and I have already sung them."

"I don't believe any one will notice if you repeat one; please do."

"I would much ——" But here Mr. Welsh came up to say that they were getting up a game of "person and thing;" would we play? I consented only too readily, and the doctor was baffled once more.

Of course, as was unavoidable in Stokebourne, there was always a superabundance of ladies at parties, but this fact was never openly admitted. The subject was scrupulously avoided, and on occasions when "person and thing" was the game selected, it was carried out quite as though there had been an equal supply of both sexes. Gentleman and lady always went out together, and when every gentleman had had his turn, some one suggested that the amusement should be changed. Preference was always given to the older ladies or more honored guests, so I was not at all surprised to find myself passed over. To be sure, I should have liked to have gone out with Ernest, but there was always a sort of innate modesty in Stokebourne with regard to engaged couples, and I had feared a tete-a-tete with the doctor.

Ernest yawned all the way home and pronounced himself fearfully bored. In dutiful sympathy I also tried to imagine myself so, but couldn't. I kept thinking of Dr. Browne's expressive face, and wondering what was passing through his mind. Ernest's thoughts were evidently much on the same track.

"And the worst of all, Trixy," he muttered, "was that confounded doctor, with his sharp eyes forever taking stock of your paws. Can't make it out. His are nothing to boast of."

The winter wore on. I had a great many letters from Ernest and wrote a great many to him. He was getting on splendidly, he said, and wrote enthusiastically about next summer.

My father was fond of scientific subjects, and had struck up quite a friendship with the new doctor, who would often come over to our house in the evening and have a chat and a smoke. I rarely saw him unless I happened to come across him as he passed in or out; he sat in the study with my father. One evening, however, I had to go in about the weekly tradesmen's books, and found the doctor there. I had not known he was in the house, or perhaps should not have ventured near the study.

"Sit down, Trixy, said my father. "Dr. Browne has been telling me most interesting facts with regard to electricity; I'm sure you would like to hear them also."

I obeyed, and soon forgot my dread of the man in listening to his grave, sweet voice as he simply explained many things hitherto unknown to me. There was a fascination about him. I watched the large, firm mouth, deep-set eyes, and short projecting nose, and could not find the face so plain as I had imagined it. He rambled on and on; I sank down into the recesses of the arm-chair before the fire listening with all my ears and hardly able to take my eyes off him. Electricity gave way to other subjects, all equally interesting, and all equally well understood by the doctor, it would appear.

"They are curiously superstitious and yet intelligent people," he said of the Egyptians. "I have picked up many strange things from them. Do you know anything of palmistry, Mr. Fox?"

My father shook his head and I felt myself getting hot.

"Many people know a little," he continued. "There are certain points connected with character to which common credence is given. It is generally admitted that there are hands whom no one should trust."

He dropped his voice and his eye-lids as he spoke, but I felt that he was looking at me, and I hid my own hands hurriedly under my apron.

My father rose and went to the bookcase and took down a packet of pamphlets.

"There's something about it in one of these," he said. "I've had it for years."

"There are a great many systems," resumed the Doctor. "They vary much in the details, but in the main I believe them to be the same."

My father stretched out his hand towards him smiling.

"Can you tell me anything about that?" he asked.

"It's rather old and worn for character," replied Dr. Browne, "and you surely have no need of a gipsy. At your age, one would say your fortune was made."

"Come, Trixy," exclaimed my father, "let us hear the sage expound. Put out your hands."

"Miss Fox will suit my purpose to perfection," said the Doctor, bowing with mock gallantry. "It is the privilege of an old bachelor, I believe, to interest himself in the future welfare of young people about to take an important step in life. At any rate, it is a special fad of mine. The sympathy of hands—you understand, Mr. Fox?"

My father did not understand; he was totally ignorant of the subject.

"I fancy few people would agree with me," continued Doctor Browne, but I firmly believe that a wider knowledge of the matter would be of a practical utility. At the same time, ignorance of these signs saves the dread of approaching unhappiness; for there always must be a want of sympathy between people when there exists an utter dissimilarity in the fundamental formation of their hands. It is my hobby," turning towards me with a grave smile. "I fear I annoyed Mr. Crofts the first time we met. It was indiscreet, I admit; but you were the only engaged people present, were you not?"

He stretched out his hand to receive mine for inspection. I drew back.

"Nonsense!" said my father; and I was obliged to obey.

Dr. Browne took my hand. His was a firm, strong hand, rather fleshy; a somewhat clumsy hand to look at, though the large fingers were lissom enough. He noticed a few things about mine; then suddenly, with a start, let it drop, rose and walked towards the book-case.

"It's rather an ordinary hand," he stammered; "there isn't much to say. And it's getting late, I think; I must be off. Good night." He took his hat and was gone.

I was terribly troubled that night. The only conclusion I could arrive at was that the *false* hand he spoke of was mine; that he had suspected it from the beginning, and was now convinced of it. I could get no rest; I was miserable. Towards morning I sneaked down to the study, and seizing the packet of pamphlets, flew upstairs again.

But I could make nothing of the matter. I studied my hand carefully, according to the instructions given, but found nothing that should have caused the Doctor to start. My failure made me more wretched still.

Several days passed without my seeing Dr. Browne. I was glad, for I somewhat resented what I imagined to be his unfair judgment. But one dull afternoon as I entered our back gate and was proceeding across the garden, I ran against him leaving the house. I attempted to pass on with a bow and an exchange of "good evenings," but he detained me.

"Miss Fox," he said, "I frightened you the other night; let me explain myself."

"It's of no consequence," I replied. "Smooth down the fact as much as you will, you have nevertheless tacitly admitted the existence of an odious characteristic in me."

"You mistake," he cried; "I feared it. The untrustworthy hand does not belong to *you*; never could with those fingers."

"Then to whom?" I asked.

"We did not allot it to any one, if I remember rightly. I brought it forward as an example." But I thought he seemed embarrassed as he spoke.

"Then what is there in mine that you would not tell?" I demanded. "Surely I may know."

He paused.

"There was the absence of something I feared to find, and the presence of something I hoped for, yet hardly dared hope for, and the finding of which I now fear."

I shuddered as he took my hand in his and gazed very earnestly into my face. I could not meet those grave, almost sad, penetrating eyes. Then he sighed and turned away.

"It's all rubbish, your palmistry," I cried, as nervous tears started to my eyes. "I looked about my hand in a book, and found nothing to fear."

"You are probably right," he rejoined. "You do well not to be superstitious."

Ernest was very busy at this time, and did not get away from the city so frequently as formerly. It was spring now and with its beautiful promise of joyful summer, I felt cheered, for did I not imagine that my happiness was approaching with it?

Dr. Browne came and went; we were good friends, we spoke when we met, but carefully avoided the subject of hands. I used to wish he would not look at me so intently; it almost frightened me; and yet the better I knew him, the less there seemed in him to fear. His kindness and gentleness had gained him the hearts of all his patients, and there was something about him that seemed to impress one with the certainty of his great sincerity and trustworthiness.

It was May; Ernest and I were to be married towards the end of June. I had been receiving daily letters from him all the winter and now two days had passed and I heard nothing. I was anxious, yet would not allow myself to be so; he was specially busy that was all; and there was another delivery at eleven o'clock. I sat in the drawing-room, looking along the road, till I saw the postman appear. He was walking on the opposite side till he approached our house, when I saw him cross and make straight for our gate. His hand was raised to open it, I was jumping up to run to the door, when a man dashed along the street and prevented him, a few words were exchanged—and the postman passed on. The man was Dr. Browne.

I was petrified.

"Wretch," I muttered between my teeth, "who now has proved himself the owner of the false hand!"

I paced the room in a fever of indecision, then began to review the state of things and decide upon a plan of action. A maid disturbed me thus occupied; my father had sent for me in his study. I went down. He was walking about the room, an unusual thing with him, and I could see he was agitated.

"Well, Trixy," he began, with an assumed smile, "I have something to say to you. I was just thinking you have not seen Aunt Judith lately; I hear she is not well; now what do you say to paying her a visit of a week or two?"

"Papa," I cried, "what do you mean? I am so busy preparing. You forget *it* is to come off in five weeks."

He walked away towards the other side of the room. "No, child," he continued, with a forced laugh. "You can not imagine I have forgotten that; but you see, it is just on that account that I want you to go; married women are not free to go visiting. Come, my dear, sewing will progress all the better with good Aunt Judith to help. Be prepared to start at three o'clock, and I will drive you to the junction. Don't bother about the house; you'd better not go out—I think perhaps it may rain," he feebly added. "Now then, off with you!"

He kissed me and I knew that there was nothing left but to obey. I have very good ears, and I am certain that I heard my father speaking to the servant as I went up the stairs; he was telling her to admit no one till I was gone.

Aunt Judith was my mother's sister, and lived in a bijou residence at Denmark Hill. She always has been and still is my ideal of an old lady. She received me warmly and I thought almost unnecessarily kindly, fussing about me a good deal and looking at me most sadly. The evening was chilly; we sat together in the pretty drawing-room with its wealth of knick-knacks and I felt as though I must do something to occupy myself.

"Where is the paper," Aunt Judith? I asked. "I haven't seen it to-day."

"Never mind the paper," said Aunt Judith, looking anxious; "it is upstairs. Take Harper's; you don't see it at Stokebourne."

"No, Aunt Judith," I exclaimed. "Why am I not to see the paper, and why have I been hustled off here in this unceremonious manner? What does it all mean? There is something that is being kept from me." For it suddenly flashed upon me that for some reason or other the postman had not been allowed to leave the paper as usual by the eleven o'clock delivery.

Aunt Judith came and put her arms round me.

"My dear," she whispered, "I hoped to wait till to-morrow. Your father sent you here because he had no courage; it always was John's way," she added.

I soon learnt all about it. Ernest had disappeared and there were considerable discrepancies discovered between the cash in hand and the cash that should be accounted for. The books had been tampered with to no small extent, and the fraud had been going on for some time. Hints were dropped about fast companions and too much billiard playing.

Aunt Judith glossed over these crimes to the best of her ability, still clinging to the hope that there might be some mistake, and I stayed on and stayed on with her, going about like one in a hopeless dream. I felt thankful to my father for sending me away; I could not have borne to have seen the home faces around me in my sorrow.

The summer passed—a dreary summer to me. Aunt Judith took me to Folkestone for a month, and while we were there we heard that Ernest was reported to have been seen in America. He had run away and there was no longer any hope of his righting himself in England.

In September I returned to Stokebourne. My father met me at the station, and that evening Dr. Browne came to see me. He was very kind and gentle, and smiled when I thanked him for having prevented my first learning the bare facts from the newspaper.

"That was an act of common charity, Miss Fox, and so many months ago as to be almost forgotten."

"Not by me," I replied.

We saw a good deal of him that autumn and winter, and I heard from Miss Sedgewick wonderful accounts of his endeavors to find Ernest, and if possible save him from further disaster. It was comforting to have him in the study in the evenings. I got into the way of joining him and my father there, and listening to their talk, which was always enjoyable. I liked to feel myself in the presence of such a strong, noble nature.

He came one night and my father was out. He entered the drawing-room where I was seated.

"Do you know I have been in Stokebourne a year?" he asked.

"Yes," I replied, "I remember it very well."

"You did not like me when I first came."

"I did not know you; that was the reason."

He lifted my hand. "May I explain now? you know I could not that afternoon in the garden."

I looked up into his honest face, and he smiled.

"Do not despise me for my belief, but these signs I have never known to fail."

He turned my hand palm upwards, and placed his own in the same position beside it.

"Now do you see anything exactly similar?"

"I can not say I do," I replied, laughing; his strong hand appeared so different to my poor little weak one.

"Nevertheless it is there," and he pointed out two little lines, one on his hand and one on mine, which were certainly identical.

"But doesn't everybody have them?" I asked.

"Certainly not. May I explain their significance?"

I nodded.

"When these two lines so minutely identical are found, one on the hand of a man, and the other on that of a woman, these two hands will surely be joined and their owners be no more parted."

"But—but," I stammered, "the book said nothing about that."

"No; it is an Egyptian superstition. I believe no other European knows of it, but it rarely, if ever, deceives. Tell me now, Beatrice, that it shall not on this occasion let our hands remain always together."

He took my hand in his, and drew me towards him; and I felt that it must be so; that all my happiness depended on the fulfillment of that ancient superstition.

"My dear," he whispered, "you understand now why I so dreaded your marriage with Mr. Crofts, and why the discovery of what I have shown you caused me such mingled hope and fear. Those soft white hands of his! they forced themselves upon my attention from the first. I had never before met with so mean a type clothed in so fair an exterior. And he in such close connection with *you!* Ah, Beatrice, I was not then, as I now feel myself to be, a man greatly to be envied.—*Argosy.*

SMALL FARMS.

The Difficulty That Lies in the Way of Profitable Culture.

The greatest difficulty experienced in making the farm pay is that too much land is cultivated. This experience came to the writer one year ago when, by the mistake of a hired man, a heap of manure intended for a five-acre field was all spread over two acres, and the three acres was left untouched. The field was to be planted to sweet corn for market. The yield of the two acres was better than would have been expected over the whole five, and this was, no doubt, in consequence of the excellent cultivation given to keep down the abundant growth of weeds. The three acres was fertilized with artificial manure, and yielded a fair crop, which was so much gain. Moreover, the two acres produced a heavy crop of millet after the sweet corn was harvested, which was so much more gain. Every year the writer is more and more assured that the farmer who would have the courage to work only half his land, and put on it the manure and labor he would have put upon the whole of it, would find his enterprise well rewarded. It may be some encouragement for those farmers who are worrying over the problem of how to make a living on one hundred acres of land to know that a farmer who is a well-known writer upon dairying, and who lives near Rochester, N. Y., makes a sufficient living from five acres.

His little farm is mostly in fruit—apples and raspberries. He raises corn and potatoes, and keeps one cow wholly by soiling and a flock of forty hens. The fowls bring him in more than $90, which indicates the ease with which he produces over $600 clear profit from his little farm well tilled. It is as great a credit to this gentleman—for he is both a gentleman and a scholar—that this moderate living matches his well-earned competence, and that his own hands alone support himself and his family in comfort and the luxury of satisfied desire and a healthful and happy old age. We can not refrain from adding that this exemplary gentleman and farmer is Prof. L. B. Arnold, the acknowledged standard authority upon dairy matters in America and a thorough scientific scholar and student.—*N. Y. Times.*

Thin Woolens.

The fancy for dresses of woolen stuffs has resulted in the production of sheer thin wool fabrics suitable for midsummer dresses, and these will be worn at all hours of the day during the coming season. Thirty different weavings of white wool alone are shown in these thin materials that imitate canvas, grenadine, bison cloth, serge and bourette, some with tufted surfaces, others with wide twills, and many that are partly plain and partly striped. The white canvas or twilled wools with wide bourette stripes of color, dull green, red, brown, or Chelsea blue in the porcelain shades, are used for skirts that may be either plain or partly pleated. These are very effective with the drapery of pure white, and the white basque, completed by a narrow vest, high collar, and cuffs of the striped goods. There are also many ecru, tan, gray and porcelain wools of this kind, and these dresses have nothing added to their weight in the way of trimming. Such a dress is to be worn at any hour of the day in Newport or Saratoga, while for evening dresses they are wool gauzes and crape wools of exquisite qualities. The intermediate dress for the seaside resorts is of white or ecru bison cloth, or else flannelette for the basque and drapery, while a single deep fall of wool lace forms the lower skirt. Fashionable tailors use silk cords instead of gilt, silver or mohair braid for trimming summer woolen dresses.—*Harper's Bazar.*

BOSTON GIRLS.

Prattle at the Symphony—A Diversity of Information.

Two genuine Boston girls, near whom the writer sat the other night at a symphony concert, knew the special style of every man in the orchestra, from the leader, Listeman, to dear, departed Lichtenberg of happy memory; they could tell if the oboe fell a sixteenth part of a half tone from the pitch, or if the farthest kettledrum was snared an infinitesimal atom too tightly. When the andantino of a Tscalkowsky concerto was fainting away in a strain of delicious sweetness that you or I would as soon think of analyzing as an echo from Paradise, it reminded one of "that staccato study of Rubenstein;" when the andante con fuoco began it recalled to the other something of Brahms. They discussed the relative merits of the Lang school and the rival clique with a discriminating justice that would not have shamed Solomon; they gossipped in German and translated the French song on the programme; they spoke of one woman's back hair as "a study" and another woman's bonnet as "a daisy"—so that they were human after all. They knew the genealogy of every one in the hall, which is another essentially Boston accomplishment; and I found out in the pauses for intermission and breath that they hammered brasswork, wrote essays, painted in oils, read Wagner's music at sight, went to the theater every other evening, kept up an intimate acquaintance with 500 friends, and had their own ideas on the subject of housekeeping. And yet, I give you my word of honor, they looked as pretty and artless and as quiet as if they had not two thoughts in their two heads; and, although they whispered a great deal, they managed to do it without disturbing any one but myself, who rather enjoyed it. You think, perhaps, that I have been sketching an isolated type? My dear friend, my style is as plenty as peas on the Fourth of July. It is you who have been imposed upon by a false semblance, a poor imitation, a base fraud upon the genuine Boston girl.—*Boston Cor. San Francisco Call.*

BUSINESS EXPENSES.

Steady Increase in the Ordinary Expenses of Business Since the War.

A well-informed merchant of Boston recently said to a representative of a Boston newspaper that he had been looking back over his accounts and was surprised to find that since the close of the war there had been a steady increase in the ordinary expenses of carrying on business. That this increase of business expenses extends beyond the merchant to the manufacturer and most other kinds of business is a fact patent to most employers. Mere office work costs a great deal more now than it did in 1865; more clerks are needed, and, on the whole, each of these receives higher pay. Assistance is required in the receiving and delivering departments to an extent and of a character that would not have been dreamed of two decades ago. Then there are a variety of incidental expenses that now enter into the computation. There are telephone charges, printing, the expense of solicitors, the whole making up an amount sufficiently large to eat up all that would have been considered fair profits a quarter of a century ago. It is probable that the experience in different trades varies, and yet we fancy that in most lines of business statements somewhat similar to the above might be made. The tendency, all the time going on to lessen the hours of service, both in offices and workshops, of itself makes the cost of business proportionately higher. Competition is sharper than it was ten or twenty years ago, and prices are so much reduced in most commodities which enter into the necessities of a household, that mechanics, clerks and others are enabled to live much better now than it was possible for them to do ten or twenty years ago, when their wages were less and the cost of living is greater.—*Scientific American.*

"A Foine Play."

A newly-landed Irishman enjoyed his first attendance at a theater shortly after his arrival in this country. The play was of the blood-and-thunder kind, and therefore particularly adapted to the pugnacious fancy of the Hibernian. In the first act occurred a thunder storm with all the stage accessories. This pleased him much. In the second there was an encounter between two regiments of supers armed with muskets. Again his Celtic blood grew warm. In the third act was represented a first-class free fight, and he fairly shouted with joy. Just as the curtain went up on the fourth act the boiler in the cellar of the theater exploded and threw the Irishman into the middle of the next street. He gathered himself up, smoothed out the dents in his skull and went back to the ruins of the theater. There he found the ticket-taker overlooking the wreck and thus accosted him:

"Begorra, sor, but that was a foine play. Av you plaze, what are yez goin' to play next?"—*Buffalo Express.*

A Texas Chesterfield.

Jim Vandyke, who lives on Onion Creek, tied his pony to a fence railing on Austin Avenue. The owner of the premises came up to him and said:

"You bow-legged, freckle-faced fraud, if you don't untie that horse I'll fan the air with your ungainly carcass."

"You must excuse me, sir, responded Vandyke, "but I am a stranger and did not know there would be any objection."

"You addle-pated outcast, don't you suppose I know that you are a stranger, you loathsome ass. That's why I talk politely to you, you goggle-eyed idiot. That's why I don't talk rough to you, you son of a gun. If you lived here in town I'd give you a piece of my mind. I'd talk plain to you, you bet I would."—*Texas Siftings.*

—If you have no grass runs for the chicks, sow lettuce, oats and whatever else will grow quickly. Both old hens and chicks will appreciate the kindness and thrive under it.—*Troy Times.*

HYPOCHONDRIA.

A Peculiar Condition of the Human Subject Closely Allied to Insanity.

An unreasonable anxiety as to health is the principal characteristic of what is known as "the vapors," "the spleen" or "the hypo"—the latter being an abbreviation of the ancient name which is given above. This term literally signifies "under the cartilage," and refers to the uneasy feeling located in the region of the stomach, just below the cartilage which is attached to the end of the breast-bone. It is also applied to the parts under the cartilages of the ribs at each side, which cover the liver on the right and the spleen on the left. A diseased concentration of the attention upon sensations, and thus an exaggeration of these feelings, results finally in a distemper of the imagination to such a degree that slight bodily ailments become of greater importance than the gravest of real diseases. This fact is sometimes well understood by the sufferer. Thus the poet Cowper, who was a confirmed hypochondriac, writing to a friend who had recently recovered from a severe disease, says: "Your illness has indeed been a sad one, causing, no doubt, great distress to yourself and considerable anxiety to your relations and friends; but, oh! what are your bodily sufferings, acute as they undoubtedly were, to the unceasing mental torture I suffer from a fever of the mind?"

Camerarius records that the great Melancthon was much troubled with hypochondria, and believed that it was common to all men whenever grievous trouble, passion or discontent assails them too continuously. He therefore held "it a most necessary and profitable study for every man to know the accidents of it, and a dangerous thing to be ignorant." The renowned author of the Augsbury Confession was undoubtedly right, for every one at the present day, at one time or another, has unduly concentrated his attention upon some trivial sensation, and thought himself the victim of incurable disease without reasonable foundation in fact for the idea.

The poet Burns describes his own condition in the following characteristic words: "I have been for some time pining under secret wretchedness. The pang of disappointment, the sting of pride and some wandering state of remorse settle on my life like vultures, when my attention is not called away by the claims of society or the vagaries of music. Even in the hour of social mirth, my gayety is the madness of an intoxicated criminal under the hands of an executioner. My constitution was blasted, *ab origine*, with a deep, incurable taint of melancholy that poisons my existence." It seems that, from early life, his digestion was disordered, he suffered from frequent headaches, and the action of the heart was very irregular—all of which were aggravated by his irregular life. Edgar A. Poe was subject to much the same physical symptoms, but they showed their influence more by depression of spirits than by attention to imaginary diseases of the bodily frame, characteristic of hypochondria. Instances might be cited in considerable numbers to show how much of our best literature has been produced while the authors were the prey to mental disease of some sort, hypochondria particularly.

Hypochondria, in many of its phases, must not be confounded with insanity. At the same time, many cases of madness first show themselves as hypochondria, and all their symptoms are stamped with the original motives of exaggerated attention to bodily sensations. So long as these ideas do not interfere with the conduct or social relations, the case is one of hypochondria, pure and simple. When, however, absurd actions arise, such as those attributed to the late Lord Dudley, there is undeniable insanity. It is difficult to draw the line where the one ends and the other begins, as in every case of mental disturbance. Many a man "for the sake of life neglects the very causes for which life was granted" (Juvenal) without becoming insane.—*St. Louis Globe-Democrat.*

SOCIETY IN JAPAN.

Woman's Rank and How It is Maintained —Freedom From Divorce.

Early betrothals have never been as general in Japan as in other Eastern countries, and they are now decreasing yearly. Marriages are arranged by the respective parents, assisted by a man and his wife (mutual friends of the families) as an intermediary. Contrary to the usual notion on this subject, the wishes of the young people are generally consulted. The statement sometimes made that the wife in Japan is a mere chattel to be lightly acquired or disposed of, is absolutely false. Divorces among the better classes are scarcely more frequent or more frequently sought for than in many parts of our own country. Our tricky divorce lawyer would starve in Japan. If a divorce is demanded the matter must be laid before the families of the couple, with the intermediary spoken of as arbitrators, and neither the man nor the woman can be released from the marriage vow without their concurrence. As divorce must result in the sending of the wife back to the father for support, separations, except for a grave and sufficient reason, are not easily obtained. The position of a wife, and especially of a mother in Japan, is all that a true woman can desire. It is not the custom, except on special occasions, for women to mingle socially with men who are not of their own family by blood or marriage. This restriction is not imposed by the legal lord alone, it is a part of the family organization and by the family imposed for the promotion of morality and good order in society. Nothing can exceed the beauty and harmony of the Japanese home. Disrespect and disobedience to parents are rare, and we have often been compelled to contrast the family discipline of Japan with that of our own, much to our mortification.—*N. Y. Mail and Express.*

—Nine persons out of ten would say that the actual color of gold and silver was yellow and white. Let these nine persons try to match these colors, and they will be astonished to find that drab silk matches gold, and grey silver.—*Chicago Journal.*

RUSSIAN FUNERALS.

The Ceremonies Which Attend the Burial of the Dead in the Dominions of the Czar.

We learn, from Khol's work on St. Petersburg, that black coffins are seldom used in Russia; coffins are generally brown, but children have pink, grown-up unmarried girls sky-blue, while older females are indulged with a violet color. Among the poorer classes the coffin is adorned with pine branches; while among the rich the whole way from the habitation to the church is strewed with the same. Mr. Khol says:

"The coffin is carried to the church uncovered, that the acquaintances who may happen to meet it in the street may have a last glimpse of their friend's face. The lid is carried before. The coffin is followed, even in the day-time, by a band of torch-bearers, with broad cocked hats, and enveloped in long black mantles.

"All those who meet the funeral procession take off their hats and offer up a prayer to heaven for the dead; and so earnest are they in their devotions that they do not replace their hats until the cavalcade has disappeared from sight. This mark of respect is shown to every corpse—to Russians as well as to Protestants and Catholics. In the church the corpse is again set out in state and the priests, clad in black and white and holding in their hands wax-lights enveloped in crape, supply the dead with everything they judge necessary for the journey. On his forehead is placed a fillet ornamented with holy 'saws' and images. In his hand is stuck a cross of wax or other substance. He then receives the passport.

"Even a plate of food is placed near the coffin. This funeral dish is termed *kulja*, and generally consists of rice cooked with honey, formed into a kind of pudding. This is strewed with raisins by way of ornament, and on the top lies a cross of the same fruit. The wealthy, instead of raisins, use small pieces of sugar.

"After this a mass, in Russian ecclesiastical language, Panichide, is chanted by the priests. During this the relations take the last farewell of the departed, all kiss his hand, and amongst the lower orders the most doleful and eloquent addresses succeed. If the deceased be a married man, the widow gives way to the most moving and poetical expressions of sorrow. Wringing her hands and staring all the while at the face of the corpse, as if he were still alive, she cries now louder, now more gently:—

"'*Golubotschik moi, Drushotschick.* Alas! my little dove, my little friend, why hast thou deserted me? Did I not prepare everything at home for thee with love, that thou must thus spurn thy wife? Woe is me! How fresh and well didst thou sit with me and thy children only six weeks ago, and playedst with thy little son Feodor, who is three years old; and now thou art dead and still, and answerest not a word to thy wife and weeping children! My little friend, my husband, lord, awake! awake!'

"Amidst this lamentation without end the lid of the coffin is closed, and the procession moves on to the burial-ground.—*Youth's Companion.*

EVENED IT UP.

How a Dog Owner Managed to Help Out an Indifferent Beast.

They have a fighting dog in a saloon on Michigan Avenue. They not only keep him to fight any dog in the State for spot cash, but he furnishes a heap of fun to hangers on by the way he picks up such canines as happen to drop inside at the heels of their masters. It is a poor week when he doesn't cripple three or four, and he has killed several outright. The other day a roughly dressed man, carrying a whip in his hand and looking like a callous-handed son of toil, entered the place and called for beer. He was followed by a broken-hearted dog of respectable size, and as soon as the loafers caught sight of the canine there was much winking and chuckling.

"Better send that dog out," suggested one.

"Is it agin the rules of the house?"

"No, but he'll get chewed up."

"I don't see anything likely to do it, though he ain't no fighter."

"There's a dog in the back room which can snake him out in ten ticks of the clock,' said the bartender.

"Wall, I dunno. P'raps he might and p'raps he might'ent. William Henry allus kinder manages to squeak along somehow."

"Would you have any objection to my bringing in my purp?"

"N-o, I guess not, though I never encourage dog-fighting.

The saloon fighter from the head waters of fighting creek was untied and ushered in. William Henry was half asleep in the center of the room, and the first thing he knew he was rolled over and over, and something had hold of him by the throat. It was a fleeting grip, however. The fighing dog seemed to get hold of something to discourage him and he let go and began sneezing and coughing. Then it was William Henry's turn and he sailed in. In three minutes' time he had run the fighter out doors and across the street and would have killed him in the gutter if pedestrians had not interfered.

"Say, stranger, how was it done?" asked the bartender as he picked up the remains to carry them in.

"Well, William Henry hain't no great fighter, as I told you before, and to kinder help him out I used about a pound of snuff around the vital parts. It's awful good for fleas and it sorter evens up a put-up thing."—*Detroit Free Press.*

—Not many years have passed away since roller skating was the fashionable amusement of the hour in large cities and watering places both in England and Ireland. Rinks sprang up here and there with a mushroom growth, and after a short lapse faded as rapidly away. Dublin affords ample evidence of the fall of this artificial imitation of skating.—*N. Y. Sun.*

—Many-hued birds sold by a street peddler in Marietta, Ga., the other day, were beautiful and changed ownership readily. A purchaser of one of these birds placed one of its bright tinted feathers in some hot water and the paint came off.

FARM AND FIRESIDE.

—Old feather beds are improved by putting them upon a clean grass plot during a heavy shower, permitting them to be thoroughly wet through and then dried and beaten with light rods. It freshens the feathers.—*Boston Budget.*

—Cheap Rice Pudding: One and one-half cup of sugar, one cup of rice, a piece of butter half the size of an egg, put in a two-quart basin, and fill the basin with good, rich milk, put in a slow oven and bake two hours. Stir two or three times. Please try it.—*Exchange.*

—It would pay all farmers, who have any considerable number of cattle to winter, to get a small engine or horse power, and cut up all the good corn stalks in short pieces, half an inch or less in length, as this will induce the animals to eat it all up clean instead of rejecting the large stalks.—*Prairie Farmer.*

—An ounce of nitrate of soda dissolved in four gallons of water is said to be a good stimulant for bulbs. It should be applied twice a week after the flower spikes show themselves. A pint of soot, tied up in a cloth, and immersed in the same quantity of water, is also an excellent and safe stimulant.—*Philadelphia Press.*

—An Eastern housekeeper says the best way to destroy moths is to take dry powdered salt and sprinkle it all over the carpet, particularly along the edges; then sweep it thoroughly. Repeat this about once a month in moth time, and you will have no trouble from that destructive insect. The salt may also be sprinkled on any wooden furniture and brushed off with a whisp broom. It is perfectly harmless and will help to cleanse and preserve the color of the wood.—*Chicago Herald.*

—The cause of fowls picking their feathers is generally want of exercise. And when once they get at it, it is almost impossible to stop it until spring opens and they can have their liberty. But you can check it by giving mangle wurtzels, raw potatoes, cabbage, apples and steamed rowen hay. A sheep's pluck hung up in the house is a good thing—anything to keep them busy; and, if this don't stop it, turn in a lot of hens' feathers and give them all they want.—*Albany Journal.*

THE BEAN.

Discovery of a New Enemy to This Esculent.

The conflict which is in constant operation between man and the creeping things of the earth is so equally balanced that there is some doubt as to which will conquer. No sooner does man find some effectual remedy to check the ravages of one insect than another makes its appearance to devour vegetation and that has been supposed to be proof against the whole insect tribe. We look back to our boyhood days and call to mind the luscious currants that grew almost spontaneously, with no enemy to molest them, and hanging in large clusters on the bushes until September. How little did we then suspect that some creeping worm would come and destroy every green leaf before the currants could grow, and thus leave the half green fruit to bake in the sun. And the potato fields of our boyhood, how green and luxuriant they kept until the cool nights of autumn came; how little did we dream of the sickening odor of the rot which comes in a night and lays low the tops and makes the tubers a disgusting mass of corruption. But no sooner did we get familiar with this new disease, than came a disgusting slug to strip every leaf from the stalks before the blast was ready to destroy them. Thus one thing after another has been laid low by some new enemy, and is only saved by persistent efforts directed by the sharpened wits of man. But one product of the garden has been spared from destructive insects, and has been gathered untarnished from insect pollution; it has been looked upon as a product so clean and so good that every New England Christian is expected to have his stomach filled with it before he goes to listen to the Sabbath sermon. Who has ever suspected that a little insignificant enemy to our own Boston bean would suddenly make his appearance to destroy the purity and the good qualities of an article so necessary to mark the weekly culinary calendar.

This new enemy appears in the shape of a very small worm that works in the bean, evidently during the autumn, and passes the winter in the bean to come out in the spring like the pea bug. It does not appear quite as large as the pea bug, but makes up in numbers what it lacks in size, four or five sometimes being found in a single small bean. If this enemy should spread as other similar enemies do it would not only be a serious drawback on the production of the bean, but it would be a death blow to the bean pot, for our New England baked beans would be among the things of the past. What are we to do about this new enemy, will any one tell us?—*Massachusetts Ploughman.*

Misses' Hats and Caps.

There are three or four favorite hats and caps for misses that are repeated in all colors of smooth, rough, or mixed braids. The most popular round hat has a high, narrow crown, with the brim turned up closely in the front and sides, and narrower still behind. The brim is faced with velvet, and there is a bunch of standing loops in front, made of wide gauze ribbon or of a canvas scarf, or else velvet ribbon is used as if tying a bunch of flowers there. The second favorite shape is a peaked brim of small size, worn very far forward on the head, and trimmed with a wreath of daisies or rose-buds or buttercups, or else with thickly clustered loops of ribbon forming a band around the crown. Another trimming for these pointed bonnets is an elongated rosette made of canvas ribbons or of gauze ribbons that have one edge scalloped. The English turban, of straw, with rosettes or wings in front, and the Tam o' Shanter cap, also of straw, with a velvet bow and quills, are suitable for young misses.—*Harper's Bazar.*

SISTERS of Notre Dame, Govanstown, Md., say Red Star Cough Cure is beneficial.

A DOCTOR'S patients must put their tongues out and a doctor's wife must keep her tongue in.—*Dr. Holmes, in the Atlantic.*

I Had a Dreadful Cough,

and raised a considerable amount of blood and matter; besides, I was very thin, and so weak I could scarcely go about the house. This was the case of a man with consumption arising from liver complaint. He recovered his health *completely* by the use of Dr. Pierce's "Golden Medical Discovery." Thousands of others bear similar testimony.

THE way to make an overcoat last is to make the undercoat first.—*Lynn Union.*

For the Ladies.

Laughter is the poor man's plaster,
Making every burden light;
Turning sadness into gladness,
Darkest hour to May dawn bright.
'Tis the deepest and the cheapest
Cure for ills of this description,
But for those that woman's heir to,
Use Dr. Pierce's "Favorite Prescription."

Cures all weaknesses and irregularities, "bearing down" sensations, "internal fever," bloating, displacements, inflammation, morning sickness and tendency to cancerous disease. Price reduced to one dollar. By druggists.

A DENTIST is no chicken. He is always a pull-it.

* * * * Delicate diseases, affecting male or female, however induced, speedily and permanently cured. Illustrated book three letter stamps. Consultation free. World's Dispensary Medical Association, Buffalo, N. Y.

OUR DRUGGIST

Says that when a customer asks for THE BEST Spring Medicine he confidently recommends

Ayer's Sarsaparilla.

From E. S. Russell, Druggist, Nashua, N. H.

I have been in the drug and prescription business in Nashua over forty years, and am the oldest druggist here. I was the first to introduce your valuable medicines in this city. I believe in them. Ayer's Sarsaparilla I take pleasure in recommending to my customers, well knowing it to give satisfaction. In all my experience, as a druggist, I have yet to hear the first complaint against it.

From F. & E. Bailey & Co., Lowell, Mass.

Having sold Ayer's Sarsaparilla since it was first placed upon the market, we can say, after an experience covering a quarter of a century, that we have yet to learn of a case where it has failed to give satisfaction. Its merits are fully established.

From C. Way & Co., Portland, Me.

We have used Ayer's Sarsaparilla for years, and our customers are much pleased with its effects. We believe it to be one of the best medicines in the market.

Ayer's Sarsaparilla,

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by Druggists. Price $1; six bottles $5.

WITHOUT MONEY!

—AND—

WITHOUT PRICE!

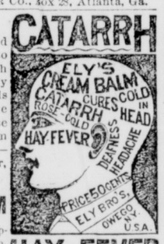
We have just issued a most wonderful and valuable new book, which treats of diseases "peculiar to the female sex," and have spared neither pains nor money to make it worthy the perusal and confidence of the women all over our land. Every mother, wife, sister and daughter is deeply, *vitally* interested in this great work, and should send for it without delay. It will be sent to any address in the word **Free of Cost!** Read it carefully, study it well, and you will glean information that may prove more valuble than all the wealth of the Rothschilds—more precious than all the gems of Europe's royalty. *It may save your life!*

BRADFIELD REGULATOR CO., box 28, Atlanta, Ga.

HAY-FEVER.

My brother Myron and myself were both cured, to all appearance, of Catarrh and Hay-Fever last July and August. Up to this date, Dec. 28, neither have had any return of these troubles. Ely's Cream Balm was the medicine used.—GABRIEL FERRIS, Spencer, Tioga Co., N. Y

CATARRH



HAY-FEVER

CREAM BALM

has gained an enviable reputation wherever known, displacing all other preparations. A particle is applied into each nostril; no pain; agreeable to use. Price 50c. by mail or at druggists. Send for circular. ELY BROTHERS, Druggists, Owego, N. Y.

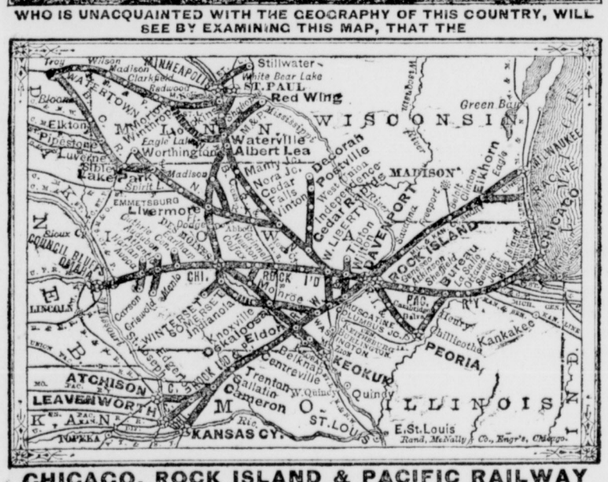
A MAN

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE



CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points W est, Northwest and Southwest.

The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.

THE GREAT ROCK ISLAND ROUTE

Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.

The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.

THE FAMOUS ALBERT LEA ROUTE

Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.

Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.

For detailed information see Maps and Folders, obtainable, as well as Tickets, at all principal Ticket Offices in the United States and Canada; or by addressing

R. R. CABLE, President and General Manager, Chicago.

E. ST. JOHN, General Ticket and Passenger Agent, Chicago.

Frederick the Great.

It is related of an illustrious Russian general, that when a boy he lived for some time at the court of Frederick the Great, when the following incident occured:

After the death of his father, his mother had many a hard struggle to support herself. This fact was well known to her son, whose greatest ambition at this time was to be able to provide comforts for her by his own exertions.

To his sorrow, he soon found that it was quite impossible to save any money for that purpose out of his small allowance. He did not despair, however, but assiduously set himself to watch his opportunity.

At last an idea flashed through his mind. It was a recognized custom that one of the pages should sit up all night, in a room adjoining the king's sleeping apartment, to be ready at any moment to obey a summons, should the king require his services.

Fritz discovered that to some of the pages this duty was both burdensome and disagreeable, and that to provide a substitute they would gladly give a certain sum of money. Fritz offered to take upon himself the night-watch for any one who might be willing to pay him rather than accept the duty when their turn came around.

The offer was acceded to by several, and the money thus earned was regularly sent by Fritz to his mother.

One night, the king could not sleep, and determined at last to call the page in attendance to read aloud to him. He called; but there was no response. At length he rose and walked into the ante-chamber, to look if there really was no page on duty.

Here he found a page, indeed, sitting at his post, but sound asleep. Slipping quietly forward to the table at which the boy was sitting, the king's eyes fell upon a letter which Fritz had been writing to his mother when overpowered by sleep. The king read the following lines:

MY DEARLY BELOVED MOTHER,—This is the third night that I have taken watch-duty for a comrade. I can scarcely hold out any longer; but I rejoice greatly that I have again earned ten thalers for you which I send in this letter

With a heart deeply touched by this proof of tender filial affection, the king went softly back to his room, took out two rolls of ducats from a drawer, and returned to the sleeping page, into whose side pockets he gently slid the rolls of money. Then betaking himself again to bed, the king considerately left exhausted nature to restore itself.

Fritz at last awoke with a start, to find that he must have slept several hours; and, when finding his pockets heavy, he thrust his hands in and pulled out the precious rolls of money, he conjectured at once what had happened.

Fear made him tremble, for it was a heinous offence to be caught asleep at his post, but in spite of the fear and shame he experienced, he could not but rejoice, for now he had ample means to assist his mother for a long time to come: and he hoped that the king, who, in the goodness of his heart, had put the ducats into his pockets, would pardon his grievous fault.

In the morning he seized the very first opportunity to approach the king, acknowledge the great dereliction of duty of which he had been guilty, and humble beg for pardon.

One hurried glance at his monarch's benevolent countenance was enough, for there he read not only forgiveness but approval; the kind eyes bent upon him melted him to tenderness, and it was with a faltering voice he now gave expression to his heartfelt gratitude and thanks for the munificent gift his majesty had bestowed upon him.

The king did not attempt to conceal the high admiration he felt for the filial love which had promoted Fritz to such noble, self-denying exertions. He made a few kindly inquiries regarding his mother's circumstances, assured him of his entire sympathy, and promised that from that day it would be his endeavor to promote the interests and pave the way to advancement of such a faithful, loving son.

And Frederick the Great was as good as his word. Step by step, as years rolled on, Fritz rose from one position of honor to another, and as a brave and skillful general he served his beloved king faithfully and well even to old age.—*Boston Commonwealth.*

"Are you going for business or pleasure?" said a gentleman to his friend about to depart for Paris. "For pleasure." "Does your wife accompany you?" "I told you I was going for pleasure."—*Boston Post.*

Ayer's Sarsaparilla requires a smaller dose, and is more effective, dose for dose, than any other blood medicine.

Bill Nye on the Comet.

The comet is a kind of astronomical parody on the planet. Comets look some like planets but they are thinner and do not hurt so hard when they hit anybody as a planet does. The comet was so called because it had hair on it, I believe, but late years the blad-headed comet is giving just as good satisfaction everywhere.

The characteristic features of the comet are: A nucleus, a nubulous light or coma, and usually a luminous train or tail worn high. Sometimes several tails are observed on one comet, but this occurs only in flush times.

When I was young I used to think I would like to be a comet in the sky, up above the world so high, with nothing to do but loaf around and play with the little new laid planets and have a good time, but now I can see where I was wrong. Comets also have their troubles, their perinelions, their hyperbolas and their parabolas. A little over 300 years ago Tycho Brahe discovered that comets were extraneous to our atmosphere, and since then times have improved. I can see that trade is steadier and potatoes run less to tops than they did before.

Soon after that they discovered that comets all had more or less periodicity. Nobody knows how they got it. All the astronomers had been watching them day and night and didn't know when they were exposed but there was no time to talk and argue over the question. There were two or three hundred comets all down with it at once. It was an exciting time.

Comets sometimes live to a great age. This shows that the night air is not so injurious to the health as many people would have us believe. The great comet of 1680 is supposed to have been the one that was noticed about the time of Cæsar's death, 44 B. C., and still when it appeared in Newton's time, seventeen hundred years after its first grand farewell tour, Ike said that it was very well preserved indeed and seemed to have retained all its faculties in good shape.

Astronomers say that the tails of all comets are turned from the sun. I do not know why they do this, whether it is etiquette among them or just a mere habit.

A late writer on astronomy said that the substance of the nebulosity and the tail is of almost inconceivable tenuity. He said this and then death came to his relief.

Another writer says of the comet and its tail that "the curvature of the latter and the acceleration of the periodic time in the case of Encke's comet indicate their being affected by a resisting medium which has never been observed to have the slightest influence on the planetary periods."

I do not fully agree with the eminent authority, though he may be right. Much fear has been the result of the comet's appearance ever since the world begun, and it is as good a thing to worry about as anything I know of. If we could get close to a comet without frightening it away, we would find that we could walk through it any where as we could through the glare of a torchlight procession. We should so live that we will not be ashamed to look a comet in the eye, however. Let us pay up our newspaper subscription and lead such lives that when the comet strikes we will all be ready.

Some worry a good deal about the chances for a big comet to plow into the sun some dark rainy night, and thus bust up the whole universe. I wish that was all I had to worry about, If any responsible man will agree to pay my taxes and funeral expenses, I will agree to do his worrying about the comet's crashing in to the bosom of the sun and knocking its daylights out.—*Bill Nye in Detroit Free Press.*

Imaginary Ailments.

Some years ago a story was current of a women who applied at one of our hospitals for treatment of a nervous affection. After listening to a recital of her symptoms, the doctor made her shut her lips upon a clinical thermometer. Upon removing it, the patient exclaimed, "Why, I declare it has done me good already." The doctor humored her delusion, and refrained from any other treatment than a few more applications of the magical glass tube. She was soon cured. A parallel case is now cited by the Philadelphia *Medical News*, a hysterical patient having been cured by magnetism. The magnet was of wood, but capped with metal so as to seem cold to the touch. These cases remind us that a large proportion of such ailments are imaginary, and will often yield to imaginary remedies.

When a young man tries for three minutes in church to brush a sunbeam off his new coat under the impression that it is a streak of dust, and then looks up and sees a pretty girl laughing at him, he kind of loses the thread of the sermon temporarily as it were.

NEW ADVERTISEMENTS.

No Wonder.

A MAN WHO SUFFERED MENTAL AND PHYSICAL AGONY EIGHT YEARS PROCLAIMS HIS HAPPINESS.

Mental agony is dreadful, but when that and physical ailment combine, it is simply terrible. Such was the condition of Geo. W. Frampton, of Huntingdon, W. Va., for eight years. He was a sufferer of necroses—that is, the leg bone at the ankle was inflamed and mortified, which caused running sores. He says: "Pieces of bone the size of a silver three cent piece came out of the sores on my leg. The discharge from the sores was almost continual, and I was unable to walk. For eight years I have been doctoring. I had been under the treatment of a physician at Newport, Ky., for a year; another at Burlington, O., attended me for three years, and a doctor here at Huntingdon worked with me for a long time. None of them did me any good, and they all finally said my case was hopeless. A few months ago I commenced trying PERUNA, and now I am well. I can walk as good as anybody, and have perfect use of my limbs."

Mr. Alf. Lusk, Wooster, Ohio, writes: "DR. HARTMAN, Columbus, O. I have been a great sufferer from that dreaded disease, chronic catarrh of the stomach. I have thoroughly tried your MANALIN, and it has done me more good ten-fold than all the doctors' prescriptions, and I have used legions of them.

Mr. Edgar Harte, Smeltzer P. O., Elk county, Pa., writes: "I have bought several bottles of your PERUNA, and find it to be of great benefit. I also gave it to some of my friends; they experienced the same result."

Mr. L. R. Wollen, 45 and 47 Ross street, Pittsburgh, Pa, writes: "I am taking PERUNA with good results, and can highly recommend it to all. I have applied at the different drug stores for one of your books. They claim they have none on hand at present. Please do me the favor to send me one."
